Mineral Products —Total value 1911 \$37.430 187 In output of coal the state ranked 6th with 14 201 355 tons (\$15 326 808) and of this product as of petroleum 1 695 289 bbls (\$1 228 835) and of natural gas (\$1 192,418), the product was less than in 1910 Many gas wells were exhausted in 1911 The value of clay products was \$7 000 771 (including \$549 470 for sanitary ware—\$1 004,737 for all pottery). In Portland cement the state in 1911 ranked 2nd in quantity and 3rd in value 7 407 830 bbls \$5.937 241. The value of stone was \$4.413 655 (mostly fimestone) of hime \$324.950 of sand and gravel \$1 133 829. Mineral waters bottled at 15 springs (including 6 resorts) were worth \$653 641.

Manufactures —From 1904 to 1900 the number of establishments increased from 7.044.

Monigactures —From 1904 to 1909 the number of establishments increased from 7 044 to 7 969 the number of persons engaged in manufacturing from 176 227 (154 174 wage earners) to 218 263 (186 984 wage-earners) the capital invested from \$372 071 000 to \$508 717 000 (63 %) and the value of products from \$393 954 000 to \$579 075 000—the state ranking 9th in the Umon Among the principal manufactures in 1909 were slaughtering and meat packing products \$47 289 000 of which about four fifths came from Indianapolis flour, \$40 541 000 ranking the state 8th foundry and machine shop products \$39 884 000 iron and steel mills \$38 652 000 128 4% more than in 1904 distilled liquors \$31 610 000 the state ranking 3rd (in 1904 2nd) automobiles \$23 764 000 lumber and timber \$23 135 000 carriages and wagons \$21 655,000 furniture and refrigerators \$18 456 000 railway cars repairs \$17 128,000 and manufacture \$9 498 000 agricultural implements \$13 670 000 and glass \$17 593 000 The principal manufacturing cities were Indianapolis \$126 522 000 South Bend \$27 854 000 Fort Wayne \$23 687 000 Evansville \$22 9_9 000 and Terre Haute \$21 793 000

Transportation—Railway mileage January 1 1912 7 496 72 In 1911 the powers of the railway commission were much increased railway rates are subject to its decisions and it may suspend any rate for 30 days. An act deals with the liability of common carriers and includes a bill of lading law In 1911 the Federal government began the improvement of the outer harbour at Indiana Harbor

Constitution -A new constitution was to have been voted upon in November 1012 but the constitutionality of this was in question and the matter was referred to the state supreme court which had previously decided that an amendment was pending until a majority of the electors of the state had voted for it or against it and which held (July 5 1912) the act submitting the new draft unconstitutional because a single session of the legislature and not two consecutive sessions or a constitutional convention pro The supreme court by three (1 Democrat the chief justice and posed the changes 2 Republicans) to two (Democrats) upheld the Marion circuit court (Remster Democrat), which enjoined the state board of election commissioners including the governor, from putting the constitutional question on the ballot the decision was not on party lines The constitution of 1851 forbids the proposal of amendments (or an amendment) when action on an amendment is pending and an amendment of 1897 giving the legislature power to prescribe qualifications for admission to the bar (every voter of good moral character may now be admitted to the bar) was voted on by the people in 1900 1906 and 1910 each time not decisively so that this pending amendment barred other amendments It is a question whether revision by the creation of a new constitution is harred in the same way—as the constitution of 1851 prescribed no mode of adopting a new one The Republican party opposed the new constitution and it was argued that it was not new but amended, that the legislature could constitutionally call a constitutional convention, but could not submit a constitution to the people, and that this was a one man' draft—it was largely the work of Governor Marshall

The principal changes in the proposed constitution were in the bill of rights a provision empowering the legislature to enact a workmen's compulsory compensation law, defining "hazardous employment," in suffrage requirements the increase from six to twelve months of residence in the state, the omission of a clause giving the suffrage to alrens living in the state six months and in the United States one year, who have declared their intention to become citizens and the addition of a clause requiring would

be voters not registered before November 1913 to be able to read "in English or some other known tongue any section" of the constitution, the governor was empowered to veto items in appropriation bills and a three fifths vote (instead of a majority) was required to over ride a veto, the legislature might (on petition of 25% of the electors) enact laws for initiative, referendum and recall (not applying to judges) and provide for qualifications for admission to the bar, and there was a definite provision for amendments without the clause that new amendments (except on the same subject) might not be proposed when one or some were—pending.

Legislation - The regular session of the legislature met on January 3, 1911 It voted to submit to the people the new constitution described above and provided for a method of voting for constitutional amendments permitting the state conventions of political parties to approve or disapprove in their platform of any constitutional amend ment, so that a straight party ticket might be voted including a vote on the amendment The proposed 16th amendment to the Federal Constitution was ratified on February Probate juvenile court and superior judges are to hold office hereafter for four years elections for these judges being held in 1914 and in 1918—but none in 1912 rigorous corrupt practices act was adopted. The county option law of 1908 was repealed and city and township option was substituted 1. A regulation law hmits saloons to not more than I for each 500 and not less than I for each I 000 inhabitants —the limit to be fixed by the county commissioners The offices of a state commissioner of weights and measures and state food and drug commissioner were created pure food law of 190, was revised. Cold storage food products except for interstate shipment must be marled with the date of storage and must not be kept in storage for more than 9 months The medical inspection of children in schools was authorised and recommended, and the sanitation and ventilation of school buildings was provided for The punishment for pandering was set at imprisonment from o to 10 years and a fine of \$300 to \$1 000 and for a second offence imprisonment of from 5 to 14 years, mar riage is no defence and a wife's testimony is competent against her husband

The factory inspection department was changed into a tripartite bureau (1) for inspection of buildings factories and workshops (2) for inspection of mines and (3) for inspection of boilers with an inspector of locomotive boilers. The state established free employment bureaus in cities of 50 000 or more and the law of 1909 governing employment agencies was entirely revised. Cal mining was classed as a dangerous industry. The law of 1887 in regard to the payment of wages was replaced by a new law which gives greater protection to employees. Various important public safety laws applying to railways were passed

No child is permitted to work except on a farm or in domestic labour if he is under 14 but between June 1st and October 1st children between 12 and 14 may work in fruit and vegetable canneries except at farm work and domestic labour no child under 16 may work more than 48 hours a week or 8 hours a day without the written consent of parent or guardian Under no condition may a child of this age work more than 54 hours a week or 9 hours a day before 7 AM or after 6 PM No minor under 16 may work in a tobacco factory hotel or a theatre and no boy under 16 and no girl under 18 in a saloon brewerv or distillery or in the manufacture of matches or explosives. No girl under 18 may work where she must stand constantly and no child under 16 on certain dangerous machinery.

An employers hability act applies to all employers of five or more workmen abrogates

An employers hability act applies to all employers of five or more workmen abrogates the fellow servant rule and the defence of contributory negligence restricts the rule of assumption of risk stipulates that hability may not be avoided by contract and permits an employer to set off any contribution to the insurance or relief of an injured workman. The act is not retroactive but limits the amount of recovery to \$10 000 and the time of action to two years from the cause. On December 23 1912 the U.S. Supreme Court held constitutional a state law taxing shares of stock in corporations organised outside the state and held by residents. The 12th of October was made a legal holiday as "Discovery Day"

Finance—A state debt sinking fund for 1912 and 1913 was provided for by the levy of

Finance —A state debt sinking fund for 1912 and 1913 was provided for by the levy of oil mills. The 1907 law for bank and trust company commissioners was revised and the state auditor was made head of a state department governing building and loan associations. On September 30 1911 the balance in the treasury was \$272 969 on September 30 1912 \$339 405, the receipts during this period were \$11 101 456 and the disbursements, \$11 035 020. The state debt on September 30 1912 was \$1 260,163

Education — The governor was authorised in 1911 to appoint a commission to report

1 Under this act, the Proctor law 48 cities voted 30 for and 18 against licence and
210 townships 43 for 166 against and 1 tie

by January 1, 1913 on industrial and agricultural education in the state This commission reported an December 1912 recommending the establishment of vocational schools and departments with state aid amounting to two-thirds the local expenditure the presence on the state board of education of three vocational experts the employment of an agricultural agent by the state supernement etc. Any city of the first class may establish and main tain a trade school. A tax of or mills may be levied in any city of 6 000 or more for the maintenance of kindergartens. Night schools were authorised (1911) in cities of 3 000 or more In cities of more than 100 000 schools may arrange with art associations museums etc for art education. A minimum wage law for teachers provided that the pay of all etr for aft education. A minimum wage law for teachers provided that the pay of all beginning teachers should be the product of the average per cent on a hoence examination multiplied by 2½ cents a day and that for teachers who had taught more than 3 years the pay should be the average percentage on examinations and for success (with 2% added for attending teachers institutes) multiplied by 3½ cents a day. The previous rate had been 3 cents. The compulsory education law of 1909 was extended to deaf and blind children who must attend the state schools between the ages of 8 and 16

The Robert W Long hospital was established in connection with the Indiana University School of Medicine on a gift of property (about \$200 000) from Dr Robert W Long and his wife the building was not begun in 1912 A state educational building or museum is to be erected to celebrate in 1916 the 100th anniversary of the admission of Indiana to the Union The legislature appropriated \$100,000 for a library building for Purdue University which

was practically completed in 1912

The school census for 1912 showed 761,494 children of school age an enrollment of 532

The school census for 1912 showed 761,494 children of school age an enrollment of 532 821 and an average daily attendance of 430 862. The average school year was 140 days in townships and 187 days in cities. The total revenue for the school year 1911-12 was \$19 354 565 and the expenditures \$18 784 426 (\$9 209 226 for teaching). In 1910 the percentage of illiteracy in the population 10 years and over was 3 I (46 in 1900). Charities and Penal Institutions.—The age of commitment to the Indiana Girls. School was limited to from 10 to 18 older girls are to be transferred to the women s prison. No life prisoner is to be sent to the reformatory. The state and the political divisions of the state must purchase goods made in the reformatory except upon a release by the superintendent. The legislature appropriated \$75 000 for land for a colony for the insane in connection with one of the state hospitals (and in 1012 a site was chosen for the colony under the supervision. one of the state hospitals (and in 1912 a site was chosen for the colony under the supervision of the Eastern Hospital at Richmond) and \$25 000 for a new industrial school for negroes and it spent \$25,000 for the installation of electro-hydrotherapeutic apparatus in the Southern Hospital for the insane In April 1911 the State Tuberculosis Hospital (established 1907) 3 m E of Rockville was opened In 1912 a former teacher of psychology in De Pauw University was appointed associate superintendent of the state reformatory

History - The political history of the last two years centres in the movement led by Governor Thomas R Marshall and opposed by the Republicans, for a revision of the state constitution. The Democratic legislature elected with Marshall voted in vain for his measure, which the supreme court decided could not be submitted to the people On January 18 1911, it chose John Worth Kern (b 1849), Democratic candidate for vice president in 1908, United States senator to succeed Albert Jeremiah Beveridge (b 1862), Republican, senator in 1899-1911 Beveridge used his influence for the nomination of Roosevelt-he was chairman of the National Progressive Conventionand for his election and was nominated (August 1, 1912) for governor with a full state ticket by the party his opponents charged that he had the backing of the Steel Trust But the conservative Republicans led by Harry Stewart New (b 1858) a member of the party's National Committee carried the Republican state convention for Tait Twelve seats were contested by Roosevelt men, but all were awarded to delegates Governor Marshall was the choice of the Democratic Convention in pledged to Taft the state for the presidency and of the national convention for vice president. In the election of November 5 1012 Samuel M Ralston, the Democratic nominee for governor received 275,357 votes to 166,124 for Beveridge, who did much better in the country districts than in Indianapolis, and 142,850 for Winfield Taylor Durbin (b 1847), Republican, governor in 1901-05 The new state legislature contains 40 Democrats o Republicans and I Progressive in the senate, and of Democrats, 4 Republicans and I Progressive in the House The Democrats carried all the 13 Congressional districts, including the 10th, where Edgar Dean Crumpacker (b. 1851), representative since 1897 and the only Republican from Indiana in the House of Representatives in 1910-11, was defeated by his Democratic opponent, John B Peterson Although the Democratic candidates were criticised because they did not break with Thomas Taggart (b. 1856), IOWA 800

the reputed 'boss" of the state, the presidential electors for Woodrow Wilson and Marshall received 281 890 votes those for Roosevelt, 162,007, those for Taft 151 267and those for Debs, a native of the state, 36,031 (in 1908, 13,476, in 1910, Socialist vote for governor, about 19 600)

On October 22 1912 Governor Marshall sent three companies of state troops to the race track near Valparaiso to stop racing because gambling was going on and on the ofth Judge Tuthill refused to grant an injunction forbidding this use of the militia

About 50 officials of the Association of Bridge and Structural Ironworkers arrested in February 1912 on evidence secured by William J Burns and through information given by Ortic McManigal who figured in the Los Angeles Times case (see California), were put on trial in Indianapolis October 1 charged with conspiracy to carry dynamite on trains in interstate commerce. McManigal gave minute and circumstantial testimony tending to show that the Ironworkers had for 6 years systematically dynamited structures built by non union men A plot to blow up locks of the Panama Canal was disclosed and evidence was brought to show that textile strikers in Massachusetts secured dynamiters from the Ironworkers The judge ruled (October 22) that the conspiracy was proved and on December 28 38 of the defendants were found guilty on each of the 52 counts of the indictments. Thirty three of them were sentenced to the Federal prison at Leavenworth, Kansas, for terms varying from 1 to 7 years

zinc was reported shipped to smelters in IGII, the lead mined was only 60 tons (\$5 400)

anc was reported shipped to smelters in IGII, the lead mined was only 60 tons (\$5 400). The value of mineral waters botaled was \$20,500, about \$\frac{1}{2}\$ less than in 1910. Manufactures—In 1899-1909 the capital invested in manufacturing doubled and the value of the manufactured product increased nearly as much. Between 1904 and 1909 the number of establishments increased from 4.785 to 5.528 and that of persons engaged in manufacturing from 61.361 (49.481 wage-earners) to 78.360 (61.635 wage-earners) the capital invested from \$111,427 000 to \$171,219 000 and the value of products from \$160.572 000 to \$259.238 000 (61.4%). In 1909 the value of slaughtering and meat packing products including sausage was \$59.045 000 nearly twice the value in 1904 and more than one 6fth the value of all products, the state rathking 6th in this industry. In dairy products one fifth the value of all products, the state rathing 6th in this industry. In dary product (mostly butter) valued at \$25,850,000 (72% more than in 1904). How ranked 3rd Foundry and machine-shop products were valued at \$14,064,000 (122 1% more than in 1904), flour and grist mill products at \$12,871 000 Other important products were lumber and timber \$12,059,000 car construction and repairs by steam railway companies \$10,269,000 timber \$12 059 000 car construction and repairs by steam railway companies \$10 209 000 carriages and wagons \$4,786 000 agricultural implements, \$4,757 000 brick and tile \$4,483 000 and buttons, \$4,035 000 (168 8% more than in 1904) almost entirely made from fresh water pearl. The principal manufacturing cities were Sioux City \$37 424 000 (153 5% increase over 1904) Cedar Rapids \$24 824 000 Des Moines \$23 585 000 Davenport \$18 802 000 Dubuque \$15 376 000 Ottumwa \$14 838 000 Waterloo \$8 999 000 Burlington \$8 443 000 principally car construction and repairs, Clinton \$7 480 000 Keokuk \$7 399 000 and Muscatine \$6 166 000 principally buttons Transportation.—Railway mileage, Japuary 1 1912 9 988 24

Legislation —The regular session of the legislature was held from January 9 to April 12 1011 On February 27 it ratified the proposed Federal income tax amendment and on April 4 made application to Congress to call a constitutional convention to propose an amendment to the Federal Constitution providing for the direct election of United States senators The Oregon plan of direct election of United States senators passed the legislature, but was vetoed by the governor

The state was re-apportioned there are now 50 senators and 108 representatives from 99 county districts—the nine largest counties each having two representatives although some of these notably Polk (1910 pop 110 438) and Woodbury (pop 67 616) had populations more than twice 22 472 the number set for the ratio of representation

An employer's hability commission appointed in 1911 reported in September 1912 a bill creating an industrial commission to administer an elective compensation law. The law of workmen's compensation was amended in 1911 so that a woman may recover not merely for elements of damages recoverable by common law but also for medical attendance loss of time and other expenses resulting from an accident. The coal mining law was revised to insure safety and comfort of miners. The office of state fire marshal was established

The board of railroad commissioners was authorised to appoint a commerce counsel with

a salary of \$5,000 and this was done July 1 1911. A uniform bill of lading act was adopted. For regulating the sale of milk and cream the new offices of dairy and food commissioner deputy commissioner and state dairy inspector were created. New pure food laws and pure drug laws were enacted The state dairy commissioner is required to inspect scales weights and measures Infantile paralysis is included in the list of diseases to be quarantined, and the disinfection of premises is required after a death from tuberculosis. An anti toxin department under the direction of the state board of health, is created. A law of 1911 making the certificate of an internal revenue collector that he has issued a federal tax stamp to any person to sell intoxicating liquor prima facie evidence that the person is engaged in the sale of liquor was held unconstitutional in 1912 by a district court as taking away the presumption of innocence The Moon law of 1900 limiting the number of saloons to 1 for every 1 000 inhabitants was held constitutional on December 18 1911 by the supreme court Cities may establish on the approval of 60 / of the voters a department of publicity

In cities under the commission plan fire employees development and general welfare

are put under the civil service laws

Finance —A Tax Commission appointed in 1911 made a report in October 1912 pro posing a new tax code with three commissioners appointed by the governor for 6 years taking the place of the present executive council for taxation, assessment and equalisation. The state levy was set at \$2 500 000 for the fiscal year 1911 and for 1912. A limit is set on property exempt from taxation belonging to educational institutions or to army veterans The inheritance tax law was revised the tax was set at 5 , 10 6 is the rate if the legatet is a brother or sister and an alien non-resident in the United States 20% for other aliens non resident in the United States the exceptions are estates less than \$1 000 after debts have been deducted; if the legatee is husband or wife father or mother lineal descendant or adopted child of the decreased or if the legater is an educational or a religious corporation or a charity or a municipality the bequest being for public purposes. The taxation of moneys and credits was changed and a law fixing an annual rate was adopted

FOWA RIX

On July 1 1981 the balance in the treasury was \$1 282,539 and on July 1 1922 \$1 041,486

On July 1 1981 the balance in the treasury was \$1 282,539 and on July 1 1912 \$1 041,486. The receipts for the fiscal year were \$4,983,448 and the expenditures \$5,224 501. The state debt July 1 1912) was \$65,969.

Education — For the year ending June 30 1912 the school population was 672 940 the public school enreliment 507 109 average daily attendance, 388 631 average length of the school vear 8 6 months revenues \$15,853 274 and expenditures \$15,330 652.

In 1910 the percentage of illuteracy of the population 10 years of age and over was 17 (23 in 1900)—less than in any other state in the Umon On February 23 1911 John Gabbert Bowman (b 1877) formerly secretary of the Carnegie Foundation for the Advancement of Teaching was elected president of the University of lows succeeding George E. McLean (b 1850) who resigned on February 1. He took office August 1 1911

In 1912 there was a general reorganisation of higher education new normal schools were planned and advanced courses for teachers were transferred from the Teachers College at Cedar Falls (which can no longer grant degrees) to the University the general science course from the Agricultural College at Ames to the University and the engineering department from the University to the Agricultural College. A new physics building at the University was completed in 1912 In December 1912 Grinnell College received a gift of \$50 000

Charitable and Penal Institutions—By a law of 1911 the execution of sentence may be

suspended for the first offender unless he is convicted of murder treason rape robbery or arson. On the recommendation of the state board of control surgeons in state institutions are authorised by a law operative July 4 1911 to sterilise criminals idiots feeble minded, drug fiends and epileptics in 1912 the law had not been enforced and its validity had not been tested Boys and girls in the state industrial schools may be placed under contracts in good homes with the approval of the board of control. The state College for the Blind wa transferred from the board of control to the board of education In May 1912 a commission recommended many changes in penal administration, notably the abolition of the contract system and the purchase for the use of first offenders and good conduct and short term con victs of a farm of 2 000 acres near the capital. At Knoxylle there is a state hospital with a 200 acre farm for mebriates

History —Beryl F Carroll (b. 1860) Republican governor in 1909-10 was re elected for 1911–12 with a large Republican majority in the legislature On the death of Jona than Prentiss Dolliver (1858-1910), Republican U S senator since 1900 Carroll ap pointed (Nov 1, 1910) as his successor until the legislature met Lafavette Young (b. 1848) editor since 1800 of the Des Moines Capital After a deadlock for nearly three months the legislature elected (April 12 1924) William Squire Kenyon (b 1869) who had been for a year assistant to the attorney general of the United States The other senator from Iowa Albert Baird Cummins (b 1850 governor in 190 -08 senator, 1908-1) was a radical and 10 delegates to the Republican National Convention were instructed for him and 16 for Taft In the Republican National Convention Cummins received these 10 votes from Iowa and 7 from Idaho The strong Republican majority in the these 10 votes from Iowa and 7 from Idaho state was thus split and in the first victory for a Democratic presidential candidate in the states history 185 376 votes were cast for Wilson 161 78, for Roosevelt, 119 811 for Taft and 15 914 for Debs (8 287 in 1908) But the state Republican ticket, in spite of I rogressive nominations for governor and 8 congressmen was successful for governor George W Clarke defeated E G Dunn Dem by 184 057 to 182 349 The vote for John L Stevens the Progressive candidate was 75 000 In the legislature there is a Republican majority of 38 (14 in senate 24 in house) by which Kenyon was re elected US senator January 1, 1913, and of the Congressional delegation of 11 (the same num ber as in the preceding apportionment) the Democrats got three seats (only 1 in 62nd Congress) 1

In Muscatine the factories making buttons from fresh water mussel shells shut down without notice February 25 1911. A week later non union labourers were taken back to work. There was then some violence and a more thorough organisation of the workmen began The state commissioner of labour and the governor interposed and on May 4th the factories re opened taking in union men The employees claimed that their employers did not keep their agreement, and in August there was another strike, non umon workers were imported, there was rigting and a policeman was killed. During

minerals were salt 1 390 168 bbls. (\$608 666) Kansas ranking 4th zinc 6 843 tons (\$780 102) lead 2 522 tons (\$226 980) building stone \$803,222 mostly limestone mineral waters (from 18 springs) \$63,063 and a little purice from Phillips county

Manufactures—From 1904 to 1909 the number of establishments increased from 2 475

Manufactures — From 1944 to 1949 the number of establishmens increased from 2 475 to 3 435 the number of persons engaged in manufacturing from 42 057 (including 35.570 wage earners) to 54 649 (44.215 wage earners) the capital invested from \$88 680 000 to \$156 090 000 the value of products from \$198 245 000 to \$325,104 000. The larger separate industries in 1909 were slaughtering and meat packing \$165 361 000 50.9 % of the value of all products the state ranking 2nd only to Illinois in this industry flour and grist multi-\$68 476 000 21 1% of the state a total product value and ranking Kansas 3rd in this industry \$68 470 000 21 1% of the state s total product value and ranking Kansas 3rd in this industry repair of steam railway cars \$11 193 000 zinc sincling and refining \$10 857 000 ranking the state 1st in this industry with nearly \(\frac{1}{2}\) the country's total product value. Among other important products are cement \(\frac{2}{4}\) 682 000 Kansas ranking 4th glass \(\frac{2}{2}\).037 000 Kansas ranking 8th and salt \(\frac{2}{2}\) 106 000 the state ranking 4th The principal manufacturing centres were Kansas City \(\frac{2}{2}\) 164 081 000 (50 5% of the state s total) Wichita, \(\frac{2}{2}\)22,564 000 (200 more than in 1904) Topeka, \(\frac{2}{2}\)17 821 000 and Leavenworth \(\frac{2}{2}\)4 875 000.

Transportation -Railway mileage January 1 1912 9 150.40

Legislation -The regular session of the legislature was from January 10 to March 15 1911 On March 6th it ratified the proposed income tax amendment to the Federal Constitution An amendment to the state constitution providing for woman suffrage was adopted in November 1912 by 175,246 to 159,197 The legislature recommended (1911) the direct election of United States senators Public utility corporations may not contribute to campaign funds United States senators are to be voted for at primary and general elections and the candidates for the legislature must sign a pledge as in Oregon, either to follow the choice of the people in a primary election or to consider it as a recommendation when they choose United States senators Electors who are unavoidably absent from their election district on election day may vote in any other district and the ballot must be forwarded to the home election officers

The 12th of October (Columbus Day) was made a legal holiday From funds received from Congress in 1908 (\$97,466) and 1909 (\$425,065) to reimburse the state for expenditures during the Civil War an appropriation was made to continue construction of the Memorial Hall Topeka for the use of the Department of Kansas Grand Army of the Republic and the Kansas State Historical Society. The board of railway commissioners was converted into a public utilities commission it is to regulate the issue of bonds and stocks and only with its permission may corporations consolidate or may any corporation purchase the stock of a competitor Unless the commission decides that it is a public necessity no public utility or common carrier may operate within the state. Public utility companies and common carriers wholly within the limits of any city are controlled by the municipality. The U.S. Supreme Court. December 2, 1912 held invalid for interstate commerce a state. law requiring foreign corporations trading in Kansas to file annual statements

The office of live stock sanitary commissioner was created and a state fish and game

warden is to be appointed under an act which is practically a new game code

The cities which have more recently adopted the commission form of government are
Chanute Council Grove Manhattan and Pratt in 1911 and Arkansas City Holton Junction

City Olathe and Parsons in 1912

A law providing compensation for workmen injured in an accident is elective and applies to especially dangerous occupations (enumerated) regularly employing 15 or more work men. An employer must file his choice of action under the law. The act abrogates the defence of assumed risks and of fellow servant and requires contributory negligence to be measured but not if an employer who has chosen the compensation system is sued. Suits for damages in lieu of compensation are permitted and certain approved schemes may be substituted There is no compensation for disability of less than two weeks. For an employee's death the compensation is set at a maximum of \$3 600 but \$100 is the maximum if he leaves no dependents For total disability the compensation is 50% of the injured man's weekly earnings not less than \$6 and not more than \$15 and the payment of this amount is not to be continued for more than 10 years. If the beneficiaries of the compensa tion are non resident aliens \$750 is the maximum unless they are residents of Canada act makes railway corporations liable for accidents to their employees abrogates the fellow servant rule enumerates insufficiencies of railway equipment which places the hability for injuries on the employer and makes it impossible for liability to be avoided by contract but permits an employer to offset any contribution or rehef that he has made to the injured man. The US Supreme Court January 7 1912 upheld the constitutionality of a state

law regulating the sale of black powder

Descripin by a husband or parent is pumshable by a maximum imprisonment of 2 years

at hard labour in the reformatory or penitentiary,

Fiscace—The 1909 laws governing the bank depositors' guaranty fund and building lown associations were amended in 1911 and a new assessment and taxation law was passed On July 1, 1911 the balance in the treasury was \$1,423,238, and on June 30, 1912 \$1 289 209 and the receipts for the fiscal year were \$7,738,270 and the expenditures \$7,892 099 The only bonded indebtedness in 1912 was \$3,70,000 held by the permanent school fund

Education—In 1911, 7 months was made the summum term for rural schools and 8 for schools in cities of the first and second class, and a complete re-organisation of the rural schools was planned. In 1931 \$70,000 was appropriated for 1912 and \$75,000 for 1913 to carry out the work planned in 1909 for normal school courses in high schools. A state school of manes was opened in the autumn of 1912 at Weir City. In October 1912 the General Education Board gave \$125,000 to Baker University at Baldwin

For the school year ending June 30, 1912 the school population was 510,273 the enroll ment, 395 064 the average daily attendance, 298 228 and the length of the average school year 170 days

The total revenue was \$12 956,894 and the total expenditures \$11 158 256

In 1910 2 2 % (in 1900, 2 9 %) of the population to years and over was illiterate

Charitable and Penal Insulations.—A board of penal institutions (three members) replaced

Charitable and Penal Institutions.—A board of penal institutions (three members) replaced the directors of the penitentiary and the managers of the Kansas industrial reformatory on July 1 1911. The legislature established an asylum to be used for the dangerous insane in the penitentiary and provided for a western state insane asylum Larined was chosen a its site in 1912. The penitentiary was authorised to buy coal rights adjacent to the penitentiary mine in which 300 to 400 convicts worked in 1912. Convicts were employed in building roads. It was made unlawful for convicts to work for private citizens. Newton has been chosen as the site for a state tuberculosis hospital (authorised 1911).

History —The control of the state by the Republican party, radical though the party was with Walter R Stubbs, governor and Joseph Little Bristow (b. 1861), United States senator, among its leaders appeared to be weakening in 1911 and 1912 in Fort Scott (April 5 1911) 3 councilmen (of 5 elected, 3 of 5 elected in 1910 were Socialists) and the city attorney were Socialists, and a Socialist mayor was chosen in Girard Crawford county two Republican members of the Federal House of Representatives died in office and a Democrat was chosen to succeed each, by a majority in each case greater than 1,000 votes in a light poll in a district usually strongly Republican. Stubbs was one of the seven governors who voiced the popular call to Roosevelt to contest the In May 1912 the Republican state convention instructed the four delegates at large for Roosevelt, and the primaries of August 5th resulted in the choice of electors pledged to Roosevelt on the regular Republican ticket Stubbs defeated Charles Curtis (b 1860) for a re nomination for United States senator (losing on the popular vote for the whole state by 1,200 but carrying a majority of the legislative districts)— William H Thompson receiving the Democratic nomination for senator in the same way carrying more legislative districts than Hugh P Farrelly but receiving 1 900 less votes in the state, and Arthur Capper (b. 1865, proprietor and editor Topeka Capital since 1802) received the Republican and George M. Hodges the Democratic nomination No state "Progressive ticket was nominated The names of the for governor National Progressive electors could not appear in the Republican column under a decision (Sept 19th) of the secretary of state,1 so these were put alone in a column headed 'Independent" Possibly this circumstance which made it necessary for "Progressives" to split the ticket if they wished to vote for Roosevelt electors worked against the National Progressive ticket. The state was carried for Wilson with 143,6,0 votes to 120,123 for Roosevelt 74 844 for Taft, and 26,867 for Debs (12,420 in 1908) Crawford county was carried by the Socialists who gave Debs a plurality and elected several county officers a state senator and two state representatives elected governor receiving 167 437 votes to 167,408 for Capper and 24,767 for Kleihage The other state officers were elected by a larger margin, but Thompson (Dem) defeated Stubbs (Rep) for Umted States senator by about 21,000 votes, 5 Democrats (2 in 62nd Congress in 1912) were elected and 3 Republicans—including D. R. Anthony and Victor Murdock-to the Federal House of Representatives, and

The state Supreme Court, and the Federal Courts first the District Court, then the Circuit Court of Appeals (Sept. 16th) had held that they had so jurisdiction and dismissed a bill assing for an impurction to keep Robsovelt electors of the Republican ballot,—practically a victory for the Progressives who did not take advestage of it.

the Republicans lost the state legislature (Senate, 21 Democrats, 18 Republicans, 1 Socialist House 72 Democrats 51 Republicans, 2 Socialists)

At Pawnee Rock, May 24, 1912, a monument was dedicated commemorating the early settlers of the state

KENTUCKY 1

Population (1910) 2 89 905 The percentage of increase (6 6) and even the abso lute increase in 1900 10 were less than for any decade since 1820 Density 57 to the sq m In 1900-10 the number of negroes decreased from 284,06 to 261 636 (133% of the total in 1900 and only 11 4% in 1910) The foreign born whites were 2,00 in 1900 and only 17% in 1910 In 1910 there were 40 incorporated places of 2 500 or more, containing 43% of the total, in 1900 34 such places contained 218% The pop ulation in purely rural territory was 70 4% of the total in 1900 and 67 5% in 1910 There were in 1910 20 cities with 5 000 or more Louisville, 223 928 Covington 5, -70 Lexington 35,000 Newport 30 300 Paducah 22 760 Owensboro 16 011, Henderson 11 45 Frankfort, 10 465 Hopkinsville 9 419, Bowling Green 9 173 Ash land 8 688 Middlesboro 7 305 Winchester, , 156, Dayton 6 979 Bellevue 6 683 Maysville, 6141 Mayfield 5916 Paris 5859 Danville, 5,420 and Richmond 5340

Agriculture —The acreage in farms increased from 21 979 422 to 22 189 127 between 1900 and 1910 and the improved land in farms from 13 741 968 to 14 354,471 the average farm acreage fell from 9, 7 to 85 6 and the value of farm property increased from \$471,045 milch cows 561 000 other neat cattle 1 3.0 000 sheep and 1 724 000 swine

In 1912 the legislature voted an annual appropriation of \$10 000 for the department of agriculture, \$5 000 of which was to be used to encourage corn clubs and similar clubs in and \$50 000 annually to the agricultural experiment station of the state public school

university A statute provides that the state industrial institute practically a farmers state fair be held at Frankfort each year

Mineral Products—Total value in 1911 \$18 910 731 The output of coal (bitiminous)
was 13 706 839 tons (\$13 617 217)—about twice as much as 1902 A little more petroleum was produced (172 458 bbls valued at \$328 614) than in 1910 but less natural gas (\$107 689) than in any year since 1907 and much natural gas inow piped into the state from West birginia. The output of pig iron in 1911 was 57 982 tons (\$870 542 not included in the total liven above) one-third less than in 1910 and that of zinc ore 158 tons (\$18 012) found total (even above) one-third less than in 1910 and that of zine ore 158 tons (818 012) found with fluorspar of which the value in 1911 was \$96.574 (less than in 1910). No lead was reported shipped to smelters in 1911. In building stone especially collitic immestione (value \$1 124,170) the state ranked 18th with an output valued at \$1 227 609 in 1911. The value of all clay products was \$2 368 094 (almost all brick and tide, less than in 1910). Mineral waters bottled from 13 springs (1 of these a resort) were valued at \$49 827. A little barytes is found. The Leitchfield marks of Grayson county containing about 34% of potash are being investigated as possible sources of potash for artificial fertiliser. In 1911 phosphate rock was found in the central part of the state.

Magnificture:—Howe 1904 to 1909 the number of establishments increased from 2.224.

Manufactures - From 1904 to 1909 the number of establishments increased from 3 734 manufactures — rom 1914 to 1909 the number of establishments increased from 3 734 to 4 776 of persons engaged in manufacturing from 59 755 (including 59 794 wage-earners); the capital invested from \$147 282 000 to \$772 779,000 and the value of products from \$159 754,000 to \$223 754,000. The more important separate manufactures in 1909 were distilled liquors \$44,350 000 incre that one fifth of the product for the entire country Elements ranking and almong the states flour and grist mill product for the entire country Elements and almong the states flour and grist mill product for the entire country the states flour and grist mill product for the entire country the states flour and grist mill product. \$22 365 000 lumber and timber \$21 381,000, tobacco, \$18,598,000, seven eighths of which See E B xv 740 et seg.

was manufactured in Louisville foundry and machine shop products \$9,627,000 iron and steel \$7,779,000 (including blast furnaces, \$9,258,000) slaughtering and meat packing products \$6,568,000 steam railway cars repairs, \$6,535,000 men's clothing \$6,052,000 and carriages and wagons \$5,147,000. The principal manufacturing cities were Louisville, \$101,284,000 Covington \$8,712,000 Newport \$6,490,000 Paducah \$4,967,000 Owens boro \$3,505,000 Frankfort \$3,083,000 Henderson, \$2,932,000 and Lexington \$2,851,000 Transportation—Railway mileage January I 1912, 3,840,66 In 1912 the Federal government began work on Lock and Dam No 14, the last of a series on the Kentucky river and in 1911 it repaired locks and dams on the Green and Barren rivers

Legislation —The regular session of the legislature was held in 1912 from January 2nd to March 12th The pay of members was increased from \$5 00 a day with mileage to \$10 a day and 15 cents a mile The president of the senate and the speaker of the house receive an additional \$5 00 a day For a new Governor's Mansion in Frankfort \$75 000 was appropriated Constitutional amendments were preposed by the legisla ture for working convicts on public roads and providing for a referendum petition in regard to tax laws These will be voted on at the next regular election

An appropriation was made for the purchase of Jefferson Davis's birthplace near Fair view in Todd county and for building a memorial in Jefferson Davis park under the control of the Jefferson Davis Home Association A cession of land to the Federal Government for a Mammoth Cave National Park was authorised

A new county McCreary was created out of Pulaski Wayne and Whitney counties and Knot was made temporary county seat by the county commissioners. The name of Pine Knot was made temporary county seat by the county commissioners. The name of Mt Pleasant Harlan county was changed to Harlan Lexington adopted commission government by vote on November 7 1911 the first election under the new charter was in November 1912. Newport adopted it in 19to and Paducah fejected it in November 1911.

Women are allowed to vote for school officers and on school matters and may hold school offices—except those limited to men by the constitution A primary election is to be held on the first Saturday of August of each year and nominations must be certified unless the nominating petition is signed by 3 to 10% of the party vote for presidential electrons at the last election. This law does not provide for primary vote for presidential electrons but it does require a preferential vote for United States senators.

The legislature created a state insurance board to take over the work of the insurance commissioner a pension board to pension indigent and disabled Confederate soldiers and widows of Confederate veterans residing in the state since January I 1907 a department of public roads and state commissioner of public roads a game and fish commission a state board of agriculture replacing the board of agriculture forestry and immigration part of the work of which is taken over by a newly created board of forestry a state board of tuber culosis commissioners a state geological survey to take over the work of the geological survey formerly a part of the state university and the office of state fire marshal

The working hours of women under 21 except in domestic service and nursing are limited

to 60 a week and 10 a day and these hours were made the maximum for all women working in factories, stores, hotels telephone and telegraph companies

The possession of a US special tax stamp was made prima facie evidence of violation of local option laws. It was made unlawful to buy procure or deliver intoxicating fiquors in local option territory where their sale is prohibited but common carriers acting in good faith may deliver 5 gallons or more to licensed druggists and physicians. Intoxicating liquors must not be sold within 400 ft. of state normal schools or colleges. The tenement laws of the state were revised. A law was passed forbidding public drinking cups.

Finance—The 1912 legislature created a state department of banking. The balance in

Finance -The 1912 legislature created a state department of banking the state treasury on June 30 1912 was \$300 550 and the amount of outstanding (unpaid) warrants \$1 801 387 receipts for the year were \$7 280 486 and expenditures, \$7 336 225

Education—The legislature of 1912 made education compulsory for children between 7

and 12 unless excused by the county board of education for physical or mental condition. The State School for the Deaf is now classified as an educational (rather than a charitable) Since the beginning of 1911 the department of education has had a rural institution. supervisor of schools whose salary is paid by the Southern Education Board and a high school supervisor whose salary is paid by the General Education Board (traveling expenses by the state university) and who acts as professor of secondary education in the Western Normal School. A school improvement league organiser is paid by the Southern Education Board and the State Federation of Women's Clubs.

The percentage of disterates in the population (10 years old and over) was 12 1 in 1910 as

compared with £6.5 m 1900; of negroes 27 6% in 1910 and 40 1% in 1900
For the year ending: June 30 1911 (the last for which statistics are available) in rural
schools the total population was 591 255 (59,000 negroes) the enrollment 424,076 (39 369

In 1911-12 of a counties voting on figure ficence only 3 were for heence and 1 of these will probably be contested (Boyd county election of May 2 1912)

negroes) and the average daily attendance 220,046 (19,920 negroes). The receipts were \$4,220,193 and expenditures \$4,089,723. In city schools (28 cities) the population was 142,067 (25,849 negroes) enrollment 69,887 (13,982 negroes) average daily attendance 52,614 (7,863 negroes). The receipts were \$2,459,213 and expenditures \$2,061,045. Charatable and Penal Institutions.—The last legislature made an appropriation to repow

Charitable and Penal Institutions — The last legislature made an appropriation to report the Kentucky Confederate Home (incorporated 1892) at Pewee Valley and besides the pension act for disabled and indigent soldiers provided for pensions for city firemen and for teachers in public schools in first class cities. In 1910 and 1911 cases of pellages were reported in the Eastern State Hospital for the Insane (Lexington). In the Central Hospital (Lakeland) a tuberculosis hospital was built in 1911—12 and at the Western Hospital (Hopkinsville) a tuberculosis colony was established in 1910—11. The tuberculosis hospital at the Eddyville Penitentiary authorised in 1906 was completed and opened for use in 1912.

History —There was a state election in 1911 which resulted in the defeat of the Republicans, who had been a control for four years. Augustus Everett Willson (b. 1846) Republican, governor in 1907-11 was not renominated, but the Republicans named Edward Clay O'Rear (b 1863), chief justice of the state court of appeals since He was defeated by James Bennett McCreary (b 1838), who had been governor in 18,5-79 representative in Congress (1885-97) and United States senator (1903-09) and who received 226 771 votes to 195 436 for O Rear The Democrats secured a strong majority in the legislature On January 16, 1912 it elected as successor to Thomas H Paynter (b 1851) Dem Ollie M James (b 1871) Democratic representative in Con gress in 1903-13 who was chairman of the Democratic National Convention at Balti more later in the year and who was affiliated with the Bryan wing of the party. In the presidential campaign the sentiment of the Democrats of the state favoured Champ Clark for the nomination A conspicuous incident of the pre nomination campaign was the breach between Woodrow Wilson and Henry Watterson who had previous, advocated in the Louisville Courier Journal the nomination of Wilson One Roosevelt dele gate to the Republican national convention and 17 pledged to Taft were seated after a contest, June 11, 1912 In the election (Nov 5 1912) Woodrow Wilson received 219 584 votes Taft 115 512 Roosevelt 10,,766 and Debs, 11 647 (in 1908, 4,000) The Congressional delegation of Democrats and 2 Republicans was unchanged—except that A W Barkley (Dem) in the 1st district succeeded James elected to the Senate were Progressive candidates for Congress in every district but the first and in the 5th the Progressive candidate was defeated by 1 680 out of 54 000 votes

In 1911 there were more lynchings in Kentucky than in any other state save Georgia 3 negroes, 2 accused of rape and 1 of wife murder were taken from the Shelbyville jail by a mob to which the jailer surrendered the keys (Jan 15th) a negro accused of murder was taken from a marshal at Livermore, McLean county by a mob and was shot on a theatre stage (April 12th) and 4 whites were lynched at Campton (May 25th)

The country around Hickman, Fulton county was flooded (about 300 sq m) early in April 1912 when the Mississippi burst a levee (, ft below standard grade but built up by sack topping) when the water was I ft above the levee

LOUISIANA 1

Population (1910) 1,656,388 an increase of 199% since 1900, the absolute numerical increase being greater than in any preceding decade. In 1900—10 the proportion of negroes decreased from 471% to 431% and that of the foreign born whites from 37% to 31%. Density of population, 365 to the sq. The rural population was 687% of the total in 1900 and 63.4% in 1910 and the urban 265% in 1900 (in 15 incorporated places each with more than 2,500 inhabitants) and 30% in 1910 (in 26 such places). There were in 1910 11 places of 5000 or more, New Orleans, 339,075, Shreveport, 28,015, Baton Rouge, 14,897, Lake Charles, 11,449, Alexandria, 11,213, Monroe, 10,-15ee E B xvii 53 et 190

209, New Theria, 7,499 Lafayette (town), 6392 Morgan, 5,477, Crowley, 5099, Houma (town), 5,024

Agriculture — The acreage in farms decreased from 11 059 127 to 10,439 481 in 1900 10, and the improved land increased from 4,666 532 to 5 276 016 the average farm acreage fell and the improved land increased from 4,666 532 to 5 276 old the average farm acreage fell from 95 4 to 86 6 and the value of farm property increased from \$198 536,906 to \$301 220 988 (\$187 803 277 land \$49 741 173 buildings \$18 977 053 implements and \$44,699,485 domestic animals) Of the land area 35 9 6 was in farms. The average value of farm land per acre was \$17 99 Farms were operated fargely by tenants (66 007 by tenants, 52 080 by owners and 950 by managers). In 1909 2,690 farms including 380 200 acres devoted to nice growing were trigated the largest areas being in Calcasieu (131 208 A.) Acadia (107 466) and Vermilton parisk (\$2,196). In 1912 (preliminary estimates) the principal crops were. Indian corn. 32,490 000 bu (1 805,000 A.) potatoes 1 460 000 bu (20 000 A.) hav 234 000 tons (142 000 A.) cotton. 435 000 bales (197 lbs per A.) tobacco. 150 000 lbs (500 A.) and rice. 11 812 000 bu (352 600 A.). In 1909 (U.S. Census) the value of vegetables (excluding potatoes) was \$3 000 864 of small fruits. \$486 988 of orchard fruits. \$314 027 and the acreage in sugar cane was 329 684. On January 1 1912 there were on farms 187 000 horses. 134,000 mules. 288 000 milch cows. 516 000 other neat cattle. 176 000 sheep and 1 642 000 swife. and I 642 000 swine

The production of long-staple Upland cotton has greatly decreased during the last few years through the prevalence of the boll weevil. Texas cotton boll weevil parasites were introduced into Louisiana in 1911. Partly because of difficulties in growing cotton and partly because of the work of the farmers cooperative demonstration, and of the boys corn growing. clubs there is increased cultivation of Indian corn In 1912 the police jury of each parish was authorised to establish and maintain an experiment farm under the supervision of the Federal and state departments of agriculture A conservation commission was created reneral and state departments of agriculture. A conservation commission was created which is to protect the natural resources of the state and for which \$125 000 a year was appropriated. Queen Bess Island Barataria Bay was set apart as a game preserve and in October Mrs. Russell Sage purchased Marsh Island Iberia parish as a bird refuge. The legislature declared that wild game was the property of the state and gave the conservation commission elaborate powers to protect game. It appropriated \$50 000 to purchase seed for needy farmers and planters in districts flooded in the spring of 1912, and \$15 000 for the system of the military during the flood. for the expense of the militia during the flood

Mireral Products —Total value 1911 \$12 710 958 Two large items sulphur and salt were not separately reported Louisiana is far the largest producer of sulphur in the United States and in 1911 a large part of the total output 265 664 tons came from the state mostly from Calcasieu parsh. In sait the state ranked 5th The output of petroleum 10 720 420 bhls (\$5,668,814), ranked the state 4th in 1911 in 1910 it was 8th. Natural gas was not separately reported new wells were operated in De Soto parish in 1910 and near Shreveport

bhis (\$5,668 814), ranked the state 4th in 1911 in 1910 it was 8th Natural gas was not separately reported new wells were operated in De Soto parish in 1910 and near Shreveport in 1912 and some gas is piped into Arkansas Mineral waters bottled at 5 springs including 3 resorts, were valued at \$110 998 Limestone was the only stone of importance Sand and gravel were valued at \$142 281 and clav products at \$531 949 Manufactures — In 1904-09 the number of establishments increased from 2 091 to 2 516 and that of persons engaged in manufacturing from 63 735 (55 859 wage earners) to 86 563 (76 165 wage-earners) the capital invested from \$150 811 000 to \$221 816 000 (47 1 ?) and the value of products from \$186 380 000 to \$223 949 000 The recent development is attributable largely to cheap fuel from the oil fields in the state and in Texas. Of the product value in 1909 28 5 % was that (\$63 775 000) of sugar and molasses and sugar refining and almo t as much \$62 838 000 was the value of lumber and timber (vellow pine and cypress were tie largest cuts) Other important products were cottonseed oil and cake \$13 085 000 rice cleaned and polished \$12 529 000 bags (not paper) \$5 352 000 printing and publishing \$3 823 000 mait liquors \$3 573 000 foundry and machine shop product \$2 998 000 copper tin and sheet iron, \$2,899,000 repair and construction by steam railroads \$2 527 000 New Orleans (product \$78 794 000) was the most important manufacturing city in 1909 its principal manufactures were bags (\$5 352 000) rice (\$5 125 000) and copper tin and sheet iron (\$2 554 000) Other important cities were Shreveport \$3 642 000 Lake Charles \$2 251 000 Alexandria \$1 279 000 Monroe, \$1 255,300 and Baton Rouge \$658 370

Transportation — Railway mileage, January I 1912 5 648.23 The Federal government by dredging in 1911 secured a depth of 31 ft in the channel at Southwest Pass The navigation of the Mississippi and its tributaires was much disturbed in 1912 by floods

A constitutional amendment providing that a police jury may form a parish i

A constitutional amendment providing that a police jury may form a parish into a road district and may levy tax for roads was adopted in 1912 by 32 703 votes to 17 151 and one extending the time of the organisation of the Pan American Steamship Company from 1913 to 1916 and still securing exemption from taxation was carried by 27 537 to 20,420 votes

Legislation — The legislature was in regular session from May 13 to July 11, 1912. and in extra session from August 12th to 24th. On July 1st it ratified the proposed 16th amendment to the Federal Constitution providing for an income tax, It asked Congress to authorise the secretary of the interior to settle confests between settlers and the Texas & Pacific Railway Company and also asked for the completion of the land survey of the state and for a final settlement of swamp land grants of March 2, 1849. It re apportioned the state into eight congressional districts (formerly 7)

Lobbying was forbidden. A corrupt practices act sets the maximum of expenditures of candidates for different offices in most cases 20% of one year s salery in office but \$2 000 for all state wide offices and \$6 000 for candidates for governor or for United States senator. A political party of the primary law of 1906 was defined to be a party casting at least 5% of the total vote. The dominating political party must nominate all candidates by direct primary minority parties may do so at the option of the executive committee. By a constitutional amendment adopted in November 1912 (by 33.955 to 18.144 votes) the time for final registration under the grandfather clause of the constitution of 1898 was postponed until September 1.1913. An amendment permitting women to hold educational office was defeated at the same election (31.452 votes to 18.779). Another defeated by 29.852 votes to 22.607 was for the recall of public officials (after January 1.1913) at an election not less than three nor more than five months after petition signed by 30% of the voters.

Vacancies in office in parish district or other subdivision of the state are to be filled by election if the unexpired term is more than one year and an amendment to the same effect applying to the city of New Orleans was adopted in November 1912 (27 998 to 19,422) Fhe legislature created a state printing board with authority to make contracts for state printing

legislature created a state printing board with authority to make contracts for state printing.

Three new parishes were created from Calcasieu—Allen from the NE part Jefferson Davi from the SE part and Beauregard from the NW part and the parish seat of Boissier was removed from Benton to Boissier City

The property of married persons was divided into separate property and common property and the wife was made a competent witness a ainst her husband in cases of desertion

An employer liability commission is to report in 1914 on the advisability of compulsors compensation for workmen. A law of 1908 forbidding the appearance of children under 14 on the stage was repealed the secretary of the national child labour committee calls this the first backward step in child labour legislation in any state in 8 years. The manufacture and sale of white phosphorus single dipped matches or blazer or wind matches was forbidden. The state board of health was authorised to revise the sanitary code. State boards of medical examiners were created by a law regulating the practice of medicine surgery and midwifery. A nurse board of examiners was created and unregistered nurses were prohibited from professional practice. Only registered nurses may use. R.N. after their names. A state tuberculosis commission was established.

Children under 16 must not be employed in any immoral or dangerous occupation nor except by permit from a judge of a juvenile court in any theatrical exhibition or musical concert. Children under 17 are forbidden in pool and billiard rooms and several acts prohibited gambling (and four the sale of intoxicating liquors) within five miles of certain public schools or within a school district. The conducting of disorderly houses makes one liable to a fine of \$10 to \$100. The legislature authorised municipal corporations to withhold permits for building houses for negroes in communities occupied mostly by whites or houses for whites in negro communities.

The powers of the railroad commission were enlarged it may award damages for violations of its rules rates and classifications. The legislature passed a uniform bill of lading act and a new fraternal insurance law. A commission of two lawyers and two business men appointed by the governor is to report in 1914 on revising the state corporation law.

The legislature provided commission charters for New Orleans and Natchtoches. In New Orleans there are a mayor and four councilmen at large each giving bond to the city in \$50,000. The city budget must be advertised and there is a provision for initiative and referendism on a 30% petition. The charter was adopted by New Orleans on August 28. The Natchtoches charter was to be adopted at an election called by a petition of 33% of the voters. The mayor and three commissioners are to be nominated at a primary and are subject to recall at an election summoned by a 30% petition under the unusual condition— if a majority of the duly qualified electors— shall—vote for the recall A general law for commission government was passed applying to towns above 2,500 inhabit ants and cities (except New Orleans) above 5,000 to be adopted at an election upon a petition of 25%. Shreveport had adopted commission government in 1910 and Hammend and New Iberia adopted it in 1012.

ants and cities (except. New Orleans) above 5 000 to be adopted at an election upon a petition of 25 % Shreveport had adopted commission government in 1910 and Hammond and New Iberia adopted it in 1912

Finance—The balance in the treasury December 31 1911 was \$986 068 The receipts for 1912 were \$7 219 743 and the expenditures \$7 355 786 the balance January 1 1913 \$850 025

The tax rate for the general fund was 5½ mills for 1913 and 1914. A commission of 32 members (heutenant governor speaker of the house, 16 representatives, 8 senators and 6 appointed by the governor) is to recommend amendments to the assessment and taxation laws of the state. New taxes were laid on theatres on the sale of mall highers (\$50 to \$100) on all severers from the soil of natural products—including timber turpentine minerals only gas sulphur and salt (½ / on gross value less royalty interest) Traveling selemen of stocks and bonds are required to pay a certificate fee and to give bond in \$15 000

In Nevember 1912 the following constitutional amendments were defeated one reorganisms and remodeling the state's system of assessment and taxation one for an issue of \$11 108 300 to refund the state debt one giving parishes and municipalities the power to exempt from tax any industrial enterprises exempting from tax for 10 years from their completion railways or parts of railways built after June 1 1912, exempting for ten years terrigation navigation and hydro-electric concerns expending not less than \$5,000 000 on their plants and in actual operation within five years of January I 1913 exempting money in hand or on deposit allowing parishes to decide by referendum whether cities or incorporated towns be exempt from parochial tax and authorising parishes and mumorpalities by referen dum to exempt \$2 000 of the value of dwellings used by actual owners as dwelling houses An amendment was adopted (29 609 to 21,953) exempting from tax corporations organised to lead money at not more than 6% on country mortgages, and one (28 155 to 21 480) exempting the legal reserve of his insurance companies. The former may be the basis for a rural credit plan benefiting farmers and planters. The state banking department was reorganised in

plan benefiting farmers and planters. The state banking department was reorganised in 1912 and a new law limited to one year the hability of a bank for forged checks. Education—In illiteracy the state ranked first in the Union the percentage for 1910 of the population 10 years and over being 29 (38 5 in 1900). Among whites it was 14 2 (18 9 in 1900) among negroes 48.4 (61 x in 1900). For the year ending July 1 1912 the school population was 526,268 the enrollment 287,988 the average daily attendance 173 797 and the length of the average school year 7 86 months. Receipts were \$5 867 968 and ex

penditures \$5,403,183
A new school code (1912) established a state board of education composed of the governor the superintendent of public education the attorney general and one citizen from each con gressional district The annual appropriations for support and maintenance were \$900 000 for free schools \$72,500 for the state normal school and \$100 000 for the state university The annual appropriations for support and maintenance were \$900 000 The legislature authorised the Southern University and Agricultural and Mechanical College (a land grant college for the education of negroes) to sell its property in Jefferson and Orleans parishes to acquire a new site in a rural community and to establish an industrial and agricul tural normal school for the training of negro teachers and a model school university are to be whites but all other officers and teachers are negroes The trustees of the

P.nal and Charitable Institutions - A constitutional amendment giving a pension (not more than \$8 a month) to Confederate soldiers and levying a 1 mill tax for this purpose was ad opted (43 938 votes to 13 049) in November 1912 For pensions \$150 000 was appropriated and a home was established for the wives and widows of Confederate soldiers. The employ ment of convicts for personal or private use outside prison walls or away from camps or penal farms was forbidden. The trustees of the state penitentiary were authorised to appropriate \$250,000 for penitentiary expenses, mortgaging the state farms if necessary. The legislature \$250.000 for penntentiary expenses, mortgaging the state farms if necessary. The legislature appropriated in 1912 \$10.000 for the tuberculosis sanitarium to be built by the Anti-Tuberculosis League \$24,000 a year for the Lepers. Home and \$176.000 for the Charity Hospital at New Orleans. On January 24, 1912 Edward Wisner gave New Orleans 50.000 acres of undrained alluvial land in the Mississippi delta, the revenue to be devoted to charitable purposes if the city does not sell the land for 100 years

History —The political history of the state centres in the contest between a Demo cratic "machine ' and a Democratic Good Government League, ' formed in 1910 and opposing the machine in the state and in New Orleans Governor Jared Young Sanders in July 1910 was chosen Umted States senator by the legislature to succeed Samuel Douglas McEnery (1837-1910, governor 1881-88 and senator since 1897) After taking some time to put his affairs in order, he withdrew his acceptance so that he might promote the claims of New Orleans for the Panama Exposition and with no apparent precedent appointed (Aug 27th) Judge John Randolph Thornton (b 1846), whom the legislature elected (Dec 7th), although he had not been nominated by the primaries, as the state law requires The legislature refused to submit the choice of Thornton to the popular vote At the state election (April 30, 1912) Luther Egbert Hall, the candidate of the reformers, was elected, and only 4,961 votes were cast for the Republican candidates This was less than the percentage required by state law to give an organisation official standing so that Republican candidates can be nominated only by petition, the law requires 1,000 signatures in each congressional district, and only in two districts (New Orleans) are there that many registered Republicans the November election the state was carried for Wilson by 61,035 votes to 9,323 for Roosevelt, 3,834 for Taft and 5 249 for Debs (2,538 m 1908) The state's representa tives in Congress (8 instead of 7 as in the preceding decade) will all be Democrats In New Orleans Martin Behrman (b 1864), mayor since 1906, was re elected to head the new commission government Murphy James Foster (b. 1849, Democrat, governor MAINE 821

1892-1900) was succeeded as US senator in 1913 by Joseph Eugene Ransdell (b. 1858) Democrat representative in Congress since 1899. In 1912 Robert F Broussard (b. 1864, representative in Congress 1897-1913) was chosen senator for the term be ginning 1915 to succeed John R Thornton On January 5. 1012, died Francis T Nicholls (b. 1834) who served in the US Army from 1855 when he graduated at West Point, to 1857 and in the Confederate Army in 1861-65 and was governor in 1877-80 and 1888-92 and a justice of the supreme court of the state after 1893

The state supreme court (Jan 2 1912) held that negroes may not be ejected from street cars reserved for whites if there are no seats in cars reserved for negroes—an important modification of the 'Jim Crow" law A negro accused of murder was lynched at Opelousas (Jan 29 1911) one on the same charge in Claiborne parish (July 24th) and one at Delhi (Nov 3rd) and one at Winnsboro (Sept 15th) for assault At Shreveport (April 9, 1912) a mob lynched a negro for insulting a white woman, and at Yellow Pine (May 3rd) another was lynched for insulting a white woman over a telephone At Delhi (April 25th) a negro was lynched another at Grand Cane (Sept 25th) three at Benton (Nov 8th) for murderous assault and one, convicted of murder at West Baton Rouge (Dec 23rd)

During a strike (called May 13 1012) of timber workers at Grabow there was (July 7th) a riot in which 4 men were killed The strike kaders were arrested and tried for murder but were acquitted (Nov 2nd) They said that they were fired upon by em

ployees of the lumber company

In March and early April 1912 heavy rains swelled the Mis. issippi and its affluents already full after a long winter with a heavy fall of snow. The danger mark 18 ft. of water was reached April oth Part of the US Army especially its engineers and commissary had been ordered to the help of the threatened districts by President Tatt on the 6th, and now Governor Sanders and Mayor Behrman began strengthening levees organising patrols and getting relief for the homeless. The condition was aggravated by heavy rains in the lower course of the river which could scarcely be carried off by ordinary methods of drainage A levee 6 m below Melville St Landry parish on the W bank of the Atchafalaya was cut by some one who wished to save the E bank large area was flooded and the patrols were strengthened Pointe Coupee and parts of Iberville Assumption and Feliciana parishes were flooded in Pointe Coupee the water was above the telegraph wires in May The damage was not confined to crops especial ly sugar cane which gives this low region the name of the Sugar Bowl 'but much live stock and hundreds of people were killed Ten breaks in the Louisiana levees flooded about 2 800 sq m and at least one of these breaks was probably due to weakening by crawhsh holes The flood was of unusual duration In the second week in June nearly 100 m of levees gave way and many railways were inundated and the water was still high in July Although the volume of the river may have been less than in the flood of 1807 the water was higher at almost every point than at any time since 1811 when gages were first used, and the provisional grades for levees will have to be changed all along the river (See A L Dabney, in Engineering News for June 13 1912 N C Frankenfield in same for April 18, 1912, and R M Brown in Bulletin, American Geographical Society, Sept 1912)

On April 30, 1912 the state celebrated the centenary of its admission to the Union Bibliography —Acts Passed by the General Assembly (Baton Rouge 1912) and other official publications John Rose Ficklen History of Reconstruction in Louisiana (Baltimore 1910) J A Robertson Louisiana Under Spain France and the United States 1785–1807 (1911)

Agriculture - The acreage in farms decreased from 6 299 946 to 6 296 859 between 1900 and 1910 and the improved land from 2 386 889 to 2 360 657 the average farm acreage 1900 and 1910 and the improved land from 2 386 889 to 2 360 657 the average farm acreage fell from 106 2 to 104.9 and the value of farm property increased from \$122 410.904 to \$199 271 998 (\$86.481 395 land \$73 138 231 huildings \$14.490 533 implements \$25 161 839 domestic animals) Of the land area 32 9 \(\frac{1}{2} \) was in farms. The average value of farm land per acre was \$13 73. Farms were operated largely by owners (56 654 by owners 699 by managers and 2 563 by tenants). In 1912 (preliminary estimates) the principal crops were. Indian corn. 640 000 bu. (16 000 A.) wheat 70 000 bu. (3 000 A.) oats 4 602 000 bu. (133 000 A.) barley 105,000 bu. (4 000 A.) buckwheat 412 000 bu. (14 000 A.) potatoes 23 166 000 bu. (117 000 A.) and hay 1.428 000 tons (1 231 000 A.). In 1909 (U.S. Census) crops were valued at \$39.317 647. \$15.115 821 hay and forage. \$10.224 714 potatoes. \$5.573 763 for. t products of farms. \$3.100.902 cereals. \$2.215 116 fruits and nuts. (\$2.121.816 apples) and \$2.153 003 vegetables other than potatoes. The value of poultry on farms was \$1.131 921 and of poultry, and eggs sold during the year. \$3.386 865. On on farms was \$1 131 921 and of poultry and eggs sold during the year \$3 386 865. On January I 1912 there were on tarms 109 000 horses 155 000 milch cows 98 000 other neat cattle 186 000 sheep and 101 000 swine

In 1911 a live stock sanitary commissioner was appointed by the governor to improve breeds of cattle and to study and prevent contagious diseases among them. For protection from g5 psy moths \$20 000 in 1911 and \$15 000 in 1912 was appropriated. The state experiment station in 1911-12 cooperated with the Federal department of agriculture in experiments in poultry breeding. In October 1912 the General Education Board granted \$8 000 for agricultural demonstration work in Washington Kennebec. Oxford and Cumberland counties under the State College of Agriculture.

Myural Products—Total value, 1911, about \$4,645,630. The largest item was stone.

Mineral Products — Total value 1911, about \$4,645 630 The largest item was stone valued at \$2 263 200 mostly granite Lime was valued at \$773 212 (considerably less than in 1910) clay products at \$625 214 and mineral waters bottled at 28 springs (including 3 resorts) at \$431 740 In output of slate \$263 516 the state ranked 3rd and in felspar

resorts at \$431740 In Output of state \$203 \$16 the state ranked 3rd and in feispar 25 976 tons valued at \$245 305 it ranked 1st

Manufactures —In 1904-09 the number of establishments increased from 3 145 to 3 546 and that of persons engaged in manufacturing from 82 109 (74 958 wage earners) to 84 476 (79 955 wage earners) the capital invested from \$143 708 000 to \$202 260 000 (40 7) and the value of products from \$144 020 000 to \$176 029 000 The six largest industries reported a little more than two-thirds the total value of products These were paper and wood pulp \$33 950 000 (more than one-eighth the total value for the United States) lumber and timber including wooden boxes \$26 125 000—more spruce and more balsam fir was cut in Maine than in any other state cotton goods \$1,1 932 000 whole worsted and felt wood \$18,000 000 boxes and shoes \$16,000 on proserving fruits veget. felt goods \$18 490 000 boots and shoes \$15 500 000 canning and preserving fruits vege tables (sweet corn) and fish and oysters \$7 689 000 Shipbuilding (largely at Bath) had a product valued at \$3 062 000 The value of marble and stone work was \$2 565 000

The 7 cities of 10 000 inhabitants or more manufactured together about three tenths of

the state s total by value Portland \$11 950,400 Lewiston \$10 475,400 (two thirds cotton goods) Biddeford \$9 011 600 (seven tenths cotton goods) Auburn \$8 842 600 (seven tenths boots and shoes) Augusta, \$4 662 175 Bangor \$3 345 700 and Waterville \$3 179 000 Transportation.—Railway mileage, January 1 1912 2322 17 In 1911 the legislature defined the trunk line of state highways and substituted for the three quarter mili tax for state highways an appropriation of \$250 000 In September 1912 a constitutional amend ment was adopted (80 619 votes to 21 454) for a bond issue of \$2 000 000 for improvement of coach, the fined to be residently as a substitutional of the fined to be residently as a substitutional of the fined to be residently as a substitutional of the fined to be residently as a substitutional of the fined to be residently as a substitutional of the fined to be residently as a substitutional of the fined to be residently as a substitutional of the fined to be residently as a substitution of the fined to be residently as a substitution of the fined to be residently as a substitution of the fined to be residently as a substitution of the fined to be residently as a substitution of the fined to be residently as a substitution of the fined to be residently as a substitution of the fined to the fi roads the funds to be raised by tax on automobiles The Federal government in 1911-12 completed the improvement between the mouth of the Kennebec river and Gardiner with a flood tide depth of 20 5 ft the removal of ledge at Rockport harbour entrance the deepen ing of East Boothbay harbour to 8 ft of Camden harbour to 10 and 12 ft and of Stockton harbour to 25 ft (formerly 18-20) the work of widening the channel of the Penobscot at Bangor was more than half completed and work had begun for a 7 ft depth on the Saco river from the head of navigation to the sea.

Government — The regular session of the legislature was held in 1911 from January 4th to March 3rd, a special session in 1912 from March 20th to April 6th On March 31, 1911 it ratified the proposed 16th amendment to the Federal Constitution providing for a Federal income tax, which had previously been rejected in the state An act for uniform ballet boxes at elections was passed by a referendum vote (72,810 to 33,884) in September 1912 Columbus Day (12th of October) was made a legal holiday

MAINE 1 223

department of labour and industry was established in 1912 to take the place of the office of factory inspection and of the bureau of industrial labour statistics, at its head is a commissioner Exemptions for debt no longer include bills for necessaries, but \$10 2 week is exempt from execution. The law of 1909 making ten hours a working day for women and children in factories is amended so that it does not apply to the manufactur ing of perishable products Packers of food in tin or glass must pay annually, for a per mit \$100 to go toward the cost of a monthly inspection of food packed. The penalty for false marking of a container of food is \$500 A stricter law was passed against the adulteration of milk or cream The laws for the sale of seeds commercial feeding stuffs fertilisers, drugs foods, and insecticides were revised and codified. The state forest commissioner is to maintain fire patrol along railways which must pay the expense

The legislature of 1911 passed many private and special laws in regard to fishing and trapping and prescribed closed seasons for scallops mink sable, fisher otter muskrat and eider ducks the closed term for caribou was extended to 1917 and for wood ducks to 1915 Game commissioners were authorised to declare an open season for beaver upon a written complaint that beavers were doing serious damage. Towns may greeten of clams and no clams may be taken in the beensed territory Towns may grant licences for the pro-

A charter giving a commission government to Gardiner adopted by the city September 11 1911 was the first in Maine The voters of Waterville defeated October 2 1911 a charter providing for commission government referendum initiative and recall Bangor adopted plans submitted by an expert for rebuilding the part burnt on April 30 1911 (with a loss amounting to \$3 500 000) widening the streets and grouping public buildings.

Finance -In 1909-11 the net debt increased \$1 151 502 an amount greater than the previous total Governor Plaisted urged the strictest economy masmuch as only \$300 000 a year could be rai ed by temporary loan. This amount was borrowed in 1911 and 1912 a year could be rai ed by temporary loan. This amount was borrowed in 1911 and 1912. The governor pointed out that in 1911 and 1912 it would be necessary to raise \$1 000 000 more than the amount of actual current expenditures. The appropriation bill for 1911 car ried \$4 044 140 (\$1 497 500 for school and mill fund tax due to townships) The net debt in January 1913 was \$1 249 664 Cash on hand January 1 1912 in the treasury was \$502 202

The reccipts for the year were \$5 3-1 711 and the expenditures \$5 366 785 leaving a balance of cash on hand January 1 1913 of \$457 1.8

The inheritance tix law of 1905 and 1909 was slightly amended in 1911 and previous laws for the tayston of express companies, the tayston of express companies, the tayston of express companies.

laws for the taxation of express companies steam railways insurance companies and telegraph and telephone companies were revised. Foreign corporations must pay a fee of \$10 before doing business and the same annually and their officers are liable jointly and separately. Banks and trust companies with savings departments must set apart assets equal to the aggregate savings deposits not hable for debts until all deposits are paid

Education—A law of 1911 introduced manual training into all normal schools and provided state aid for manual training in towns. The Washington state normal school at Machias established by law in 1909 was optned in 1911. The percentage of illiteracy in 1910 among the population 10 years of age and over was 4.1 (5 i in 1900)

For the year ending June 30 1912 the school population was 214 348 enrollment 139 957 average daily attendance 107 768 length of the average school year 163 days in primary and 173 in high schools receipts \$3 509 269 and expenditures \$3 151 917

In 1912 a new gymnasium for Bowdoin College was completed and occupied

Penal and Charitable Institutions -In 1911 a board of trustees (tive men and one woman) of juvenile institutions was created to manage the state school for boys and the industrial school for girls (formerly under separate management) and a board of seven hospital trustees one a woman to manage all state institutions for the insane and the feeble minded wife or the guardian of the children of any pri once convicted of desertion and employed at hard labour is to receive from the state 50 cents a day for the convict's labour

History - Frederick William Plaisted (b. 1865 mayor of Augusta in 1906-10) was elected (1010) the first Democratic governor since 1882, when his father held that office He and the Democratic legislature were pledged to resubmit to the people the question of prohibition The legislature repealed the Sturgis enforcement law of 1905 under which a state commission enforced the prohibition clause abolished the state agency for the sale of liquor, and (March 23rd) submitted a constitutional amendment providing for local option and repealing the clause (adopted 1884) prohibiting the sale of intoxicating higuors The amendment was defeated (Sept 11 1911) by 60,853 to 60 095 It was first reported adopted through a clerical error Every city Calais excepted, voted for the amendment. At the same election the Davies direct primary law (for all state and county officers and United States senators) was adopted (65,800

votes to 21,700), as was a constitutional amendment making Augusta the permanent capital. The repeal of prohibition was shelved for the time by the rejection in the legislature (March 23 1912) of another local option amendment (passed by senate 18 to 8, vote in house 71 for 64 against—a two thirds vote was necessary), and by the defeat (Sept 9, 1912) of Governor Plaisted by 3,300 plurality (67,748 to 71,043) for William T Haines, Republican, state attorney-general in 1896—1900. One seat in Congress (3rd District) was won from the Democrats by the Republicans the seats now being held by three Republicans and one Democrat (2nd District). There was no state Progressive ticket many of the Republican nominees being Progressive in sympathy. In the November election Wilson carried the state, by 51,113 votes to 48,493 for Roosevelt, 26,545 for Taft and 2 541 for Debs (1,758 in 198).

In 1911 (Jan. 17th) Charles Fletcher Johnson (b 1859), Democratic candidate for governor in 1892 and 1804 was chosen US senator to succeed Eugene Hale (b 1836) Republican who had served in the United States Senate since 1881 and upon the death of William Pierce Frye (1831-1911 Republican senator since 1881 and repeatedly president pro tem of the Senate) Obadiah Gardner (b 1852), Democratic candidate for governor in 1908 and (against Johnson) for senator in 1911 was appointed (April 3 1912) for the unexpired term to March 4 1913 To succeed him Edwin Chick Burleigh (b 1843 governor 1889-93, representative in Congress 1897-1911), Republican was chosen by the Republican primaries on June 17th (when the Democrats renominated Gardner) and by the legislature January 15, 1913

Three ex governors of the state died in 1912 on February 3rd Frederick Robie (b 1822) governor in 1883–87, on March 16th, John Fremont Hill (b 1855) a publisher and capitalist, governor in 1901–05 and prominent in the national organisation of the Republican party and on June 22nd, Henry Bradstreet Cleaves (b 1840) who served in the Civil War and was state attorney general in 1880–85 and governor in 1893–97

Bibliography -Acts and Resolves (Augusta, 1911) other state reports

MARYLAND

Population (1910) 1 295 346 9% more than in 1900 the absolute increase (107 302) was less than in any decade since 1860-70. The number of negroes decreased from 235,064 (198% of the total) in 1900 to 232 249 (179%) in 1910, foreign born whites increased from 79% to 80%. In density of population Maryland ranked 7th with 1303 persons to the sq. m. The rural population (in unincorporated places) was 455% of the total in 1900 and 438% in 1910 the urban in 1900 was 498% (in 14 incorporated places with 2500 or more) and in 1910, 508% (in 15 such places). In 1910 these 15 places were Baltimore 558,485, Cumberland, 21,330 Hagerstown, 16507 Frederick, 10,411 Annapolis, 8,609 Salisbury (town), 6690, Cambridge (town), 6,407 Frostburg (town), 6,028 Havre de Grace 4 212 Brunswick (town) 3,721, Crisfield (town) 3 468, Westminster 3,295, Easton (town) 3,083, Chestertown (town), 2,735, Westernport (town), 2,702

Agriculture — The acreage in farms decreased from 5 170 075 to 5 057 140 between 1900 and 1910 and the improved land in farms from 3 516 352 to 3 354 767 the average farm acreage fell from 112 4 to 103 4 and the value of farm property increased from \$204 645 407 to \$286 167 028 (\$163 451 614 land \$78 285 509 buildings \$11 859 771 implements and \$32 570 134 domestic animals) Of the land area 79 5% was in farms. The average value of farm land per acre was \$32.32 Farms were operated largely by owners (33 510 by owners 14 416 by tenants and 988 by managers) In 1912 (preliminary estimates) the principal crops were Indian corn 24,455 000 bu. (670 000 A) wheat 8,985 000 bu (599 000 A) oats 1,350,000 bu (45 000 A.) barley 108,000 bu. (47000 A) rye 418 000 bu (27 000 A) buckwheaf, 210 000 bu (12 000 A.) potatoes, 4 144 000 bu. (37 000 A.) hay 575 000 tons (381,000 A.) and tobacco 17 160 000 lbs (26 000 A) In 1909 (U S Census) the value of vegetables other than potatoes was \$7 729 400 of flowers and plants \$597 001 of nursery products \$456 900 of small fruits \$1.27 548 (strawbernes \$1.070 072) of orchard fruits \$1.517,400 (apples \$902,077) of grapes \$53,498 On January 1, 1912 there were on farms

The Socialist candidate for governor received 2,210 votes the Prohibitionist 1,204 See E B xvn 827 at 1827

103,000 horses 23 000 mules 168,000 milch cows, 119,000 other neat cattle 230 000 sheep and 345,000 swine. The Federal department of agriculture in 1611-12 carried on breeding and 345,000 swine. The recernal department of agriculture in 1911-12 carried on precuring experiments of poultry of Barbades sheep and of native and Saanen goats at the experiment farm of the Bureau of Ammal Industry at Beitsville. The state horticultural department has been campaigning against the importation to the state of nursery plants infested by brown tail moth and other pests. In 1911 the legislature voted aid to the high schools which give instruction in agriculture. In 1912 the appointment of a Maryland country life commission of seven members was provided for. The legislature provided for a state biological laboratory (after 1912) to test serums etc. and passed a law for the inspection analysis and

regulation of the sale of commercial fertilisers Mineral Products—Total value 1911 \$9,386,663 About two-thirds of this was the value of coal (\$5,197,066, 4,685,795 tons—considerably less than in 1910) and of iron ore (not separately reported) Clay products were valued at \$1,772,434 of which \$1,518,023 was the value of brick and tile Mineral waters (bottled at 12 springs including 2 resorts) were valued at \$150,966,47% more than in 1910

Manufactures—In 1904-00 the number of establishments represent from a 2011-2011

Manufactures -In 1904-09 the number of establishments increased from 3 852 to 4 837 Manufactures —In 1904-09 the number of establishments increased from 3 852 to 4 837 and that of persons engaged in manufacturing from 107 303 (94 174 wage earners) to 125 489 (107 921 wage-earners) the capital invested from \$201 878 000 to \$251 227,000 and the value of products from \$243 376 000 to \$315 669 000. In 1909 first in value among the products was men s clothing \$36 921 000—Maryland ranks 4th in this industry. In women s clothing (\$4,351 000) the state sanked 8th. Canning and preserving including vegetables fruits fish and oysters pickles etc. is a typical industry, the value of the output was \$13 709 000. Among other larger products were slaughtering and meat packing products \$13 683 000. lumber and timber products \$12 134,000 foundry and machine shop products \$11 978 000 tobacco. \$10 559 000 fertilisers. \$9 673 000 flour and grist mill products \$9 268 000 steam railway car construction and repair by railway companies \$9 059 000. All industries are largely centred in Baltimore, the value of whose product was \$186 978.

All industries are largely centred in Baltimore the value of whose product was \$186 978 ooo ranking the city 13th in the country Other important cities were Cumberland, \$4 534

ooo Hagerstown \$3 197 000 and Frederick, \$2 911 000

Transportation—Railway mileage January 1 1912 1 473 11 In 1912 an extension of the Western Maryland was completed, 87 m connecting Cumberland and Connellsville and forming an important trans-Alleghenv line with connections with New York Central lines The legislature of 1912 appropriated \$300 000 a year for public roads and \$50 000 for the completion of State Road No 1 and \$75 000 to connect the Maryland system of good roads with the proposed State Boulevard of Delaware In 1911 the Federal government finished widening the Fort McHenry channel near Baltimore.

Legislation —The legislature met in regular session from January 3 to April 1, 1912 It submitted for ratification at the general election in 1913 constitutional amendments providing for the method of condemning private property for public use, and allowing the legislature to excuse from penalty the seller of a vote and putting all the penalty Primary and election laws were repeatedly amended, but the old distinctions between different counties were kept in all these acts. A new registration with party affiliations was required bribery intimidation and corruption were for bidden at primaries A provision was made for first and second choice vote for nomi nees for state offices A presidential primary act requires delegates in the state con vention to vote for the candidates chosen by the vote of the district or county "as long as in their conscientious judgment there is any possibility ' of their being successful and the same requirement is made of delegates to national conventions but these delegates may go uninstructed and on presidential preference ballots there must be a separate column headed "For an uninstructed delegate' A new corrupt practices act was passed limiting a candidate's expenditures to \$10 per thousand registered voters (qualified to vote for the office in question) up to 50,000 and \$5 per thousand above 50,000 Agents must file statements within 20 days and candidates within 30 days of their expenditures at primaries or other elections. Any promise made by the wife of a candidate is to be considered as coming from the candidate. Three voting machines were authorised for use in Baltimore

In 1912 the Rule in Shelley's case (see E B xxiv 832) was abolished as had previously

been done by almost every other state

The powers of the public service commission were increased and it may order the issue of excursion commutation or of joint interchangeable mileage tickets. Occupational diseases must be reported by physicians to the state board of health Workmen and employers may contract that an employee may be insured against death or accident and the employer is thus relieved from damages. The benefits under this act are in case of death three years

wages but not less than \$1,000 (if there are no dependents not less than \$75 nor more than \$100); in case of total disability 50% of the weekly wages after the first week during the period of disability in manufacturing mercantile mechanical printing baking and period of disability in manufacturing mercantile mechanical printing baking and laundering establishments women are not permitted to work more than to hours a day or 60 a week (the old to hour law applied to cotton and woollen mills only and was practically a dead letter) nor more than 8 hours a day if any work as done before 6 A M or after 10 P M nor continuing more than 6 hours without a half-hour interval unless the working day is only 62 hours. Allegany county is excepted in establishments in that county where the average number of hours for the year is not more than 9 hours a day there may be overtime during 6 weeks because of seasonal demands. A new child labour law forbid the employment of children under 14 in most establishments except canneries and in any establishment during school hours. Children under 12 may not work in canneries nor children under 16 in dan gerous employments nor without employment certificates. Children under 18 may not be employed in certain very dangerous employments such as the manufacturing of explosives nor in places where liquor is manufactured or sold and no minor may be employed in a barroom No girl under 18 is to be employed in work where she must stand continually In cities over 20,000 no messenger under 18 is to be employed between 10 PM and 6 AM Boys under 12 and girls under 16 may not be employed in selling newspapers in cities of 20 000 or more except that boys may deliver papers on regular routes outside of school hours Laws were passed for the collection of vital statistics regulating the sale of narcotic drugs forbidding the use of common drinking cups in public places and on railway trains and requiring the registration and heensing of midwives. A bill extending local option in regard to the sale of intoxicating liquor to counties not prohibiting such sale passed the lower house but was defeated in the senate (April 1)

Finance - Two acts of 1910 provided for an oyster tax-one leving a tax of one cent a bushel and the other a tax of two cents The court of appeals declared the latter law un constitutional and a considerable part of the taxes collected in 1911 were restored. A loan of \$1 000,000 dated January 1 1914 was authorised to refund a state debt at 4 o or less of \$1 000,000 dated January I 1914 was authorised to retund a state debt at 4 or less 1 loan of \$400 000 for public buildings was authorised in 1912 and \$600 000 was appropriated for the payment of the interest on the public debt. On September 30 1912 there was a balance of \$1 826 230 (\$1,471 521 at the beginning of the fiscal year) the receipts for the year were \$8,908,454 and the expenditure \$8 553 745. The state debt was net \$5 880 967 gross \$13 028 096. In 1912 the banking department published the 'first annual roll of honor of state banks and trust companies to encourage substantial surplus funds.

Education — A general retirement law of 1912 for public school teachers gives a pension of \$.00 2 year to disabled teachers over 60 who have served for 25 years and who have no means of comfortable support. Special laws create boards of trustees for teachers retire ment funds in Baltimore county and in Allegany county. Teachers are to elect whether they come under the terms of the law or not. Funds are to be raised by assessments on teachers salaries the maximum assessment is \$28 80 a year in Baltimore county and \$15 00 in Allegany county

Retired teachers are to receive a salary (not a pension) equal to one half the average annual salary for the last 5 years (between \$360 and \$600 in Baltimore and between \$200 and \$400 in Allegany county)

The minimum salary for white teachers of ten pupils or more \$400 in Allegany county) The minimum salary for white teachers of ten pupils or more except in Garrett county was set at \$300 a year A stricter school attendance law was passed referring especially to the city of Baltimore but capable of extension to most of the other counties. A lean of \$600,000 was authorised for land and buildings (at Towson probably open in 1914) of the state normal school which is to be moved from Baltimore

The annual appropriation for schools, including normal schools the retired teachers fund and the department of education was \$1 450 000 Johns Hopkins University received \$600 000 and an annual appropriation of \$50 000 for free scholarships in applied science or advanced technology was required to erect a technology building (begun in 1912) to cot with its equipment \$600 000 and received its usual grant of \$25 000 a year for general scholarships. On October 25 1912 the University received \$200 000 from James Buchanan Brady for a prological institute. On April 10 1912 Ira Remsen (see E B xv 461 footnote) resigned the presidency of the university

For the year ending July 31 1912 the school population was 415 908 the enrollment in public schools, 228 425 average daily attendance, 146 408 and average length of school year 9 35 months The total receipts were \$4 356 542 and the expenditures \$4 351 046

In 1910 of the total population 10 years and over 7 2% were illiterate (11 1%, in 1900)

Of whites the percentage was 37 (52 in 1900) of negroes 23 4 (35 1 in 1900)

Of whites the percentage was 3.7 (5.2 in 1900) of negroes 23.4 (35.1 in 1900)

Penal and Charitable Institutions—In 1902 a commission was appointed to investigate the penal laws and penal system of the state. The legislature made as it usually does large appropriations for private charities appropriated \$15,000 for the purchase of Pine Bluff Sanitarium near Salisbury to be used as the Eastern Shore State Tuberculosis Sanitarium; \$200 000 for a state hospital on the Eastern Shore near Cambridge, Dorchester county and for additional scoomingations, buildings, etc. the following sums \$150 000 for the training school for feeble immided at Owings Mills hereafter to be called the Rosewood state training school \$175 000 for the Hospital for the Negro Insane (opened 1911) at Crownsville hereafter to be called the Crownsville Hospital \$100 000 for the Hospital at

Catonsville which is to be called the Spring Grove State Hospital and \$175 000 for new buildings at the Springfield State Hospital at Sykesville. To cover these appropriations for state hospitals the 1912 legislature authorised a loan of \$800 000 in addition to a loan of \$600 000 authorised in 1910. A state miners hospital is to be established at Frostburg. For main tenance \$125 000 was appropriated for the Maryland Tuberculosis Santarium at Sabillasville (1908)

History -In Baltimore there was an exciting contest at the primary and regular elections in 1911 In the former (April 4) John Barry Mahool (b 1870, mayor since 1907) a Democrat not entirely satisfactory to the machine 'was defeated for re nomination by James Harry Preston (b. 1860, speaker, house of delegates, 1804) by 9 000 out of 50,000 votes cast, and the Republican "reform" candidate. Charles H Forsch, was beaten by the nominee of the regular organisation, E Clay Timanus (about 1,000 to 4 600 votes) Preston was elected by a small plurality The first state primary (August 26) under the new law nominated for governor Arthur Pue Gorman (a son of the late Senator Gorman), whose supposed relations with Democratic boss rule in Baltimore worked against him in the campaign, and Phillips Lee Goldsborough Republican who was elected (November 7 1911) by a plurality of 3 000 (106,392 votes to 103 395 for Gorman) and who succeeded Austin L Crothers (b 1860 Demo crat) in January for a tour year term. All the other state officers and a large majority of the state legislature were Democrats Goldsborough came out for Roosevelt early in the year and Roosevelt carried the presidential preference primary (by 29 000 votes to 26 000 for Taft) Speaker Champ Clark was the Democratic choice for presidential candidate The Democratic National Convention was held in Baltimore The Pro gressive party nominated a full ticket for Congress but none was elected, the Democrats carrying the 6 districts including the 5th the only one which sent a Republican to the The state legislature (to be elected in 1913) in 1914 will choose a 62nd Congress successor to Isidor Rayner² (1850-1912) Umted States senator from 1905 to his death November 25 1912 ad interim the governor appointed (November 20) a Republican Wilham Purnell Jackson (b. 1868) Woodrow Wilson received the electoral vote of the state with II 674 votes to 5, 786 for Roosevelt 54 956 for Taft and 3 906 for Debs (2 3 3 in 1908) Taft ran third in Baltimore, but second (with nearly 60% more votes than Roosevelt) in the counties

In St. Mary's county a campaign for higher liquor licence, led by the Roman Catholic clergy was unsuccessful 857 to 611 votes (August 3 1912)

In Baltimore at the primary election of August 20 1011 there were palpable frauds in the 8th precinct of the 23rd ward no votes were returned for Thomas F McNulty who had opposed the party organisation candidate for sheriff and who secured affidavits from who had voted for him in the precinct. On September 22nd a grand jury presented indictments against six election officials of the precinct and on December 20th it indicted the officials of 38 other precincts in which Independent Democratic candidates seemed to have been defrauded. One judge (Republican) of the 8th precinct of the 23rd ward was acquitted (June 10 1912) three others were found guilty and sentenced to imprisonment and fine (August 22nd), but their cases were carried to the state court of appeals

A new charter submitted to the legislature by the Baltimore Committee of Fifty was not passed In April July 1912 there was a stevedores strike in Baltimore, in which employees of the Baltimore Copper Smelting and Refining Company joined (May 15), ending with a victory for the strikers The stevedores received an advance of 2 ½ cents

¹ Crothers studied law at the University of Maryland was admitted to the bar in 1880 was state senator in 1897-1901 judge of the 2nd Circuit in 1906 and governor 1908-12 He died May 25 1912

*Rayner was of Bavarian ancestry was educated at the University of Virginia was state senator in 1880-87 representative in Congress 1887-89 and in 1891-95 and state attor ney general in 1899-1903. He was counsel to W. S. Schley in the Santiago investigation (1901). In state politics he opposed the Corman machine but secured a Democratic nomination to the Senate and in the United States Senate he worked for arbitration for the abrogation of the treaty with Russia for tariff reform and against monopoles, and was a caustic critic of Roosevelt and one of the ablest debaters on the floor.

an hour A Baltumore ordinance (Dec 1910) forbidding a coloured family to hive in a block where the majority of the tenants were white, was declared invalid early in 1911, and on April 6th the city council provided that one "race" be excluded as soon as a block is inhabited entirely by the other, and—under a clause in the earlier law—forbade whites moving into blocks where the tenants were mostly negroes. A constitutional amend ment (the Poe" measure, prepared by Edgar Allan Poe, Democrat, attorney general) practically disfranchising the negroes was defeated at the November election in 1911 largely through the efforts of Senator Rayner. On Christmas Day 1911 a negroe accused of murder was lynched at Brooklyn near Baltimore.

In conformity with an act of the legislature of that year the mayor of Baltimore appointed on November 25 1910 a 'Commission on City Plan' Plans for a civic centre have been tentatively approved and in the autumn of 1912 actual construction of a street to serve as an approach to it was well under way

MASSACHUSETTS 1

Population (1910) 3 366,416 (51.4% of the total for New England) an increase of 20% since 1900. There was an increase in 1900-10 in the percentage of foreign born whites (29 9 to 31 2) and of whites of foreign parentage (32 to 34 8) but whites of native parentage decreased from 368% to 328% and negroes from 12% to 11% In density of population the state ranked 2nd to Rhode Island only (418 8 to the sq m) The highest density was 14 340 9, in Suffolk county (including Boston) Incorporated places with less than 2 500 inhabitants each comprised 7 200 of the total (8 500 in 1900) More than half the total (46% in 1900) was in cities or towns of more than 50 000 there were 104 cities and towns each with 5 000 inhabitants or more of which 55 had 10 000 or more each, and 25 had 25,000 or more These 25 were Boston 670 585 (in 1900 560 892) Worcester 145 986, Fall River 119 295 Lowell, 106 94 Cam bridge 104,830 New Bedford 96 652, Lynn 89,336, Springfield 88 926 Lawrence 8, 892 Somerville 77 236, Holyoke 57 730 Brockton 56 878 Malden 44 404, Haver hull 44 115 Salem 43,697, Newton, 39,806, Fitchburg 37,826, Taunton 34 259 Everett, 33 484 Quincy 32 642 Chelsea 32,452 Pittsfield, 32,121, Waltham, 27 834 Brookline (town), 27 792 Chicopee, 25 401

Agriculture — The acreage in farms decreased from 3 147 064 to 2 875 941 between 1900 and 1910 and the improved land in farms from 1 292 132 to 1 164 501 the average farm acreage fell from 83 4 to 77 9 and the value of farm property increased from \$182 646 704 to \$226 474 025 (\$105 532 616 land \$88 636 149 buildings \$11 563 804 implements \$20 741 366 domestic animals) Of the land area 55 9 % was in farms. The average value of farm land per acre was \$36 69. Farms were operated largely by owners (32 075 by owners 1,863 by managers and 2,979 by tenants). In 1912 (preliminary estimates) the principal crops were. Indian corn, 2 115 000 bu (47 000 Å) oats 272 000 bu (8 000 Å). The 56 000 bu (3 000 Å) buckwheat 42 000 bu (2 000 Å) potatoes 3 380 000 bu (26 000 Å) has 596 000 tons (477 000 Å) and tobacco 9 860 000 lbs (5 800 Å). On January I 1912 there were on farms 64 000 horses 167 000 milch cows 80 000 other neat cattle 35 000 sheep and 117 000 swine. In 1909 (U.S. Census) vegetables (other than potatoes) had an acreage of 37 220 and a value of \$6 190 000 flowers plants and nursery products 2 750 acres \$3 061 000 small fruits 9 552 acres \$1 676 790 (cranberries 6 577 acres \$1 062 205) orchard fruits. \$2.074 270 (apples \$1 780 290)

In place of the cattle bureau of the state board of agriculture a department of animal industry was created in 1912. A law of 1911 provides for the appointment of a state inspector of apparies and for the suppression of infectious or contagious diseases of bees. For the suppression of gypsy and brown tail moths \$150 000 was appropriated in 1911 and \$323 000 in 1912. An act of 1911 established a state bird and game preserve and in October 1912

the commissioners on fisheries and game reported 15 000 acres acquired for it

Fisheries — In 1911 93 760 109 ibs of fish with a total value of \$2 575,282 were landed
at Boston, this included \$31,200 ibs of salt fish, and of fresh fish, 47 687 300 lbs haddock
21 704,300 ibs cod, 5,095 \$40 ibs hake 2 916 800 ibs. cusk, and 2,588 694 ibs mackerel
At Gioncester the total was 91,393,258 ibs (value \$2,449 215), of which 40,157,577 was

1 See E B xvn, 850 et seq

salted the principal varieties of fresh fish were cod 12,272 \$43 lbs, pollock, 9 651,178 lbs, haddock 9 024 102 lbs, hake 6 759 243 lbs cusk 3 516 703 lbs.

Mineral Products — Total value 1911 \$6 623 077 The principal item was stone valued at \$3 502 000 — granute being valued at \$2 361 624 and trap rock and sandstone being next in importance. Clay products were valued at \$1 700 287 of which \$1 471 761 was the value in importance of brick and tile lime at \$695 662 ranking the state 6th, and mineral waters from 56 springs, at \$218 870

Manufa tures —In 1904-09 the number of manufacturing establishments increased from 10 723 to 11 684 and that of persons engaged in manufacturing from 532 481 to 644 399

from 10 723 to 11 084 and that or persons engaged in manufacturing from \$32 481 to 044 399 (wage earners from 488 399 to 584 559) the capital invested from \$965 949 000 to \$1 279 687 000 (32 5%) and the value of products from \$1 124 092 000 to \$1 490 529 000 (32 6%) In 1909 the state ranked 4th (as in 1880 and 1809) in manufactures

There were reported 76 separate industries each with a product valued at \$500 000 or more and of these 4 exceeded \$50 000 000 6 more exceeded \$25 000 000 and 16 more exceeded \$10 000 000

The most important industry with a value (\$236 343 000) more than one seventh the state state is total was the manufacture of boots and shoes the state was the largest producer in the Union with 46 i % of the country's total Cotton goods ranked second with a value of \$186 462 000 in this industry in woollen worsted and felt goods (\$141 967 000) and cordage twine jute and linen goods (\$16 632 000) as well as in all textiles combined (\$387 063 000) Massachusetts ranked ist Other important manufactures were foundry (\$387 063 000) Massachusetts ranked ist
Other important manufactures were foundry
and machine shop products \$86 926 000 slaughtering and meat packing \$44 403 000

Holyoke \$40 097 000 (chiefly textiles and fine writing paper) Somerville \$38 687 000 (80 8°,
slaughtering and meat packing) Haverhill \$35 377 000 (82 4' boots and shoes) Springfield
\$17 773 000 Fitchburg \$23 252 000 (40 2° textiles) Chicopee \$19 210 000 Chelsea \$17 002
000 Peabody \$15 160 000 (48 8°, jewelry) Salem \$14 576 000 and Plymouth \$11 618 000

Transportation—Railway mileage January I 1912 2 135 I In May 1911 the electric
installation in the Hoosac Tunnel was completed In 1912 the highway commission was
authorised to issue \$5 000 000 in scrip for construction of state highways in 1913–17, inclu

authorised to issue \$5,000,000 in scrip for construction of state highways in 1913-17 inclusive not more than \$1,000,000 to be expended in any one year. The Cape Cod Canal (see E B xv1 854a) was five eighths finished in 1912 the time for its completion was extended to June 1914. In 1911 the state dredged in Hingham harbour an anchorage basin 6 ft deep and a channel 75 it wide and 6 ft deep to connect this basin and the channel made by the Federal government which the state widened from 50 to 75 ft. The more important recent improvements in Massachusetts waters under Federal charge are new jetties at New bury port under an Act of 1910 85% completed in 1912 the removal of ledges in Gloucester harbour begun in 1911 and 10% completed in 1912 and the improvement of channel and turning basin in Lynn harbour 37% completed in 1912 deepening the lower Mystic river to 25 ft completed in 1911 widening and straightening Weymouth Fore river under Act of February 27 1911 (dredging 97 % ledge 60 completed in 1912) and dredging Wey mouth Back river completed in 1912 removal of shoals in Fall River harbour begun in 1911 and 50 completed dredging the channel of Boston harbour to 35 it depth completed Board of Port Directors of Boston created in 1911 is to expend \$3 000 000 in improving the harbour on December 24 1912 they voted to expend \$3 000 000 for a drydock in South Boston large enough to accommodate vessels 1 000 ft long and 120 ft wide. A state com mission on a free ship canal between Boston and Narragansett Bay to be built by the Federal government with the co operation of the state reported in May 1911 adversely

Legislation - Regular sessions of the legislature were held both in 1911 and 1912 In 1011 two constitutional amendments were adopted after submission to popular vote one providing for the use of voting machines if the right of secret voting be pre served, and the other authorising cities to take by condemnation proceedings more private property than might actually be required to widen public thoroughfares 1912 session submitted to the people an amendment to disqualify from voting those convicted of corrupt practices in respect to elections —carried 204 892 votes to 85, 689-and one permitting the legislature to tax wild or forest lands to 'develop and conserve the forest resources of the Commonwealth," which was adopted by 200,810 votes to 70,024 Two other amendments—one making women eligible as notaries and one permitting the legislature to refer statutes to the people for their approval were referred to the next session The legislature ratified (May 22, 1912) the proposed amendment to the Federal Constitution calling for the popular election of United States senators In 1911 the lower house approved but the senate defeated by one vote the proposed Federal amendment providing for an income tax. In 1911 the number of associate justices of the superior court was increased from 24 to 27. In 1912 a commission of economy and efficiency was established

In 1911 a direct primary was required for all state officers excluding presidential electors but including the district members of state party committees and delegates to the state party but including the district memoers of state party committees and delegates to the state party conventions. A law of 1912 requires the primary election of delegates to national party conventions in presidential years and the preferential primary for candidates for the presidency. The corrupt practices act of 1907 was amended (1911) by the definition of 'personal expenses and by limiting expenditure for primary or local election to \$25 for each 1 000 voters qualified to vote for the office—but permitting an expenditure of as much as \$150 no matter how few voters there are and no more than \$5 000 no matter how many voters there are In 1912 the law of 1908 prohibiting political contributions by business corpora tions was made more explicit

The provisions of the civil service law in regard to police were extended to the superint tendent or chief of police in all cities except Boston and in all towns accepting the civil service law and the removal suspension or transfer of any member of the civil service (except in Boston police the district police or the Metropolitan parl commission police) is to be reviewed on petition in a police district or municipal court

The governor was required to set apart the 14th of June as flag-day each year and the 12th of October (Columbus Day) was made a legal holiday

In 1912 the legislature established a state board of labour and industries A commission on the employment of women and children and especially on the establishment of wage boards and the question of minimum wage was created and a 1912 law makes the commission permanent and provides that if it decides that wages are too low in any indu try it may establish a wage board to report a minimum wage which the commission may approve after public hearing and which may be reviewed by the superior court upon an employer's filing his business A minimum wage was set for employees of the Metropolitan parks and the water and sewerage departments The 8 hour day must be observed by contractors working for the state or for a municipality that has adopted the 8 hour law but the act excepts the printing of ballots and work in public institutions Women and children under 18 are not printing of ballots and work in public institutions. Women and children under 10 are not to work in manufactories or mechanical establishments more than 54 hours (formerly 56) a week nor more than 10 hours a day but in seasonal employments they may work for 58 hours a week if the average is not more than 54 a week. Women and children under 18 are not to work more than 56 hours a week on the altering or repairing of garments in the store proprietor and in connection with a clothing store. The hours for street railway employees were made 9 or 91 a day on car platforms and all work over solutions for street failway employees were made y or 93 a day on car platforms and at work over service except in newspaper offices between 10 P M and 5 A M. No illiterate minor is to be employed in factories workshops mechanical or mercantile establishments without a certificate that he is 16 or over (1911) and illiterate minors under 21 (formerly 18) must attend evening school (1911). The age and schooling certificate must show that the child employed can read and write English as it is required for admission to the fourth grade (1911) The board of education was directed (1911) to report in January 1913 on the need of vocational and part time schooling for working children especially between the ages of 14 and 17

By far the most important recent labour legislation has been in regard to pensions and

retirement of employees. A retirement system for state employees—practically an assisted old age pension—was provided. Contributions from employees for the fund are voluntary in the case of present employees but are compulsory for those entering the service after the passage of the act Retirement may take place after service of 15 years on the recommendation of the head of the department. The employees share not only in the expenses but in the administration. One member on the board represents employees as one does the employers the third is the state treasurer. The system was extended to municipalities and to counties, and any town on the acceptance of the act by the voters in 1912 is permitted to pension an employee incapacitated for labour who is 60 years old and who has been em

ployed by the town for 25 years Besides, several acts were passed providing for the retire ment on half pay of veterans of the Civil War in municipal employ

A law for (elective) state insurance against accidents was passed in 1911 and slightly amended in 1912. If the employers choose the insurance system the common law defences are abnogated. To be compensated a disability mist last for more than two weeks. The amount of damages recoverable was increased in 1912. In case of death, it is 300 times

the half weekly wages but not less then \$4 nor more than \$10 a week and if there are no dependents \$200 in case of total disability 50% of the weekly wages (not less than \$4 nor more than \$10 d week with a limit of \$3 000 or 500 weeks) in case of partial disability 50% of the weekly wage loss but not more than \$10 a week nor longer than 300 weeks. All according to the weekly wage loss but not more than \$10 a week nor longer than 300 weeks. dents resulting in personal mury must be reported by the employer to the industrial accident board within 96 hours. The penalty for loss of life of a railroad employee through the neglig ence of the corporation employing him was increased from \$5 000 to \$10,000 (1912)

The state inspector of health is required to inspect factories for proper lighting and order necessary changes if he suspects damage to the eyes of employers (1911) Women may nor work in mercantile mechanical or manufacturing establishments two works before or four weeks after childbirth (1911) The state board of health is authorised to regulate the emweeks after children (1941) The state board of health is attriorised to regulate the employment of women in core rooms (1912). A homestead commission was established to report (in 1913) on building homesteads for workmen in suburbs of cities and towns. A tenement house act for towns was passed (1912). The state board of health received \$10 000 in 1911 and \$5 000 in 1912 for the investigation of infantile paraly is. A state subsidy of \$5 a week was voted (1911) for every indigent patient in a hospital (or ward 1912) for tuberculosis maintained by a city or town and cities and towns with more than 10 000 inhabitants must support dispensaries for needy tubercular patients the prevention of infantile blindness was made more definite in 1912. A The law for A medical milk commission may be incorporated for the supervision of the production of milk for sick rooms or infants (1911) The cold storage of certain food products was regulated (1912)

Local boards of health were required to establish sanitary stations in cities or towns with

populations above 10 000 (1911) Drinking water and individual cups are to be furnished in all railroad cars in the state (1911 and 1912) The sale (except wholesale) the rental or the leasing of firearms is to be licensed by the mayor and council of each city acting as a licen ing board (1911) and anyone who is arrested for felony and found in possession of a revolver or pi tol without a licence is liable to imprisonment from one to ten years (1911) The proposal to abolish capital punishment (which recurs annually) was defeated in 1912 by a much more decisive vote than usual (153 to 72)

Citics and towns were permitted (1911) to establish art commissions. Boston was empowered to spend \$1 000 000 in six years for a high pre sure fire service (1911). Ju tices of the Boston Municipal Court may retire at the age of 70 if they have served 20 successive

vears and may receive a pension equal to three quarters of their annual salary (1911)

Hyde Park was annexed to Boston (1911) Lawrence (November 7 1911 6027 to 2 214 for change 6 077 to 1 328 for commission charter over other charter submitted) and Lowell (December 19 1911) adopted new charters with commission form of government providing for recall initiative and referendum and no party names on municipal ballots both went into effect on January 1 1912 The municipal board of control a quasi-commission form of government which had been in use in Chelsea for 3 years (ever since the fire of April 1908) was replaced November 7 1911 by the old system of government by a mayor and aldermen it is said that the large Jewish population thought itself insufficiently represented on a small board. Cambridge also defeated a commission charter drafted by the legislature (1911) which provided for five department heads called supervisors (not commissioners) and for initiative referendum and two choice nominations. The people of Pittsfield with a choice Letween amending their old charter and adopting a new charter for government by mayor and aldermen or by commission form of government (1911) vo ed to amend the charter in force. The 1912 legislature drafted a two plan act for Salem giving the voters the choice between government by mayor and seven councilmen elected from districts and government by five commissioners elected at large. Both forms provided for recall, Both forms provided for recall, At the state election in 1912 the voters chose the latter by 2 830 initiative and referendum to 746 votes In 1412 the Metropolitan Plan Commission reported to the legislature recom mending the constitution of a Metropolitan Planning Board

Transce — The state tax in 1911 was \$5 500 000 (\$1 880 395 was on the city of Boston) and in 1912 \$6 250 000 (\$2 137 000 on the city of Bo ton) The 1907 inheritance tax law was replaced by an act of 1912 1 False or exaggerated statements about business concerns

1 This act divides the beneficiaries into three classes and provides that in cases of those not ¹ This act divides the beneficiaries into three classes and provides that in cases of those not near of kin—that is not in the other two classes—the inheritance tax be 5% if the bequest be less than \$50,000 for 6 if it be between \$50,000 and \$250,000 7% between \$250,000 and \$1,000,000 and 8/1000,000 and 8 taxation, or for the public use of any city or town in the Commonwealth

affecting the value of bonds are pumshable by a fine of \$500 imprisonment for not more than ten years, or both The office of supervisor of loan agencies was created and anyone who issues leans of \$300 or less at a rate, including interest and expenses greater than 12 % must secure a licence from the supervisor who is authorised to fix the rates of interest. In 1971 a law was passed against monopoles and one for the control and regulation of fraternal

a law was passed against monopoles and one for the control and regulation of fraternal benefit societies. A new code for co-operative banks was adopted in 1912. There was in the state treasury December I 1911, \$6,203 336. Receipts for the year were \$48 054 457 and expenditures \$47 892 827 leaving a balance, December I 1912 \$6 369 965.

Education —A code adopted in 1911 for state asided vecational schools permits industrial schools to be established under the local school board (formerly only under special board) and to receive state and if approved by the board of education. The board of education was authorised to investigate the advisability of establishing and maintaining in Taunton or Attleborough a school for designing silverware and jewelry. The school committee of any city or town was empowered (1011) to grant the temporary use of school buildings out of school or town was empowered (1911) to grant the temporary use of school buildings out of school hours for public educational purposes. Among the appropriations were \$100 000 annually for ten years to the Massachusetts Institute of Technology in return for 80 free scholarships but no appropriation in 1917-21 unless by that time the Institute should have \$1 000 000 additional endowment and \$50,000 annually to the Worcester Polytechnic Institute in return for 40 free scholarships with a similar proviso in regard to 1917-21 unless the Institute then have an additional endowment of \$350,000. The legislature authorised in 1912 the building of a model school for the Salem State Normal School, the contract for which was let in the autumn of 1912 and the establishment of independent agricultural schools in Bristol county and in Essex county on the approval of the voters which was granted in

In the school year ending July 1 1912 the school population between the ages of 5 and 15 was 577 160 the total enrollment (all ages) 546 914 the average daily attendance 458 065 and the length of the average school year 9.35 months. Expenditures were \$22 502 934

oos and the length of the average school year 9.35 months. Expenditures were \$22 502 9.34 (\$3 7.33 7.29 for new buildings etc.)

The percentage of illiteracy in 1910 of all 10 years and over was 5.2 (5.9 in 1900)

The Massachusetts Institute of Technology concluded arrangements in 1912 for removal to the Cambridge side of the Charles River Basin. It received several large gifts during 1911-12 about \$500 000 from T Coleman du Pont the same amount from the widow of W B Rogers the founder \$600 000 from the Francis B Greene Fund \$2 500 000 from an anonymous benefactor and \$50 000 from the bequest of Nathaniel Thayer of Lancaster who left the same amount to the General Hospital and \$250 000 to the Boston Museum of who left the same amount to the General Hospital and \$250 000 to the Boston Museum of Fine Arts. It also received in 1912 from Theodore U lail the George Edward Dering col rime arrs—it also received in 1912 from 1 neodore U vali the George Edward Dering col-lection (about 30 000 volumes) of electrical books and a bequest (not available within 21 years) from C. H. Pratt of \$750 000 for a school of naval architecture and marine engineering. On October 10 1912 work began on a new library (from plans by Horace Trumbauer) for Harvard University on the site of Gore Hall the old library it is to be a memorial to Harry Elkins Widener who was lost on the Titamic and whose excellent collection of rare books was given to the University. In 1912 work began on the new Germanic museum and plans were appropried and location fixed for three freshmen dermitages. A new house for the were approved and location fixed for three freshmen dormitories A new house for the president was completed and occupied late in 1912. In March an anonymous gift was an nounced to the Graduate School of Applied Science of a new electrical laboratory for the study of high tension currents and a location and plans were decided on In the same month the Collis P Huntington Memorial Hospital (for the study of cancer) was opened near the Harvard Medical School group of buildings on Back Bay Boston. In April 1912 by the will of A. I. Rotch, the Biue Hill Meteorological Observatory with \$50 000 for maintenance was given to Harvard University A bureau of research in municipal government was established at Harvard in 1911 Amherst College which has definitely returned to the humane or classical curriculum in May 1912 chose as president to succeed George Harris (b 1844) who resigned November 16 1911 Alexander Meiklejohn (b 1872) who graduated at Brown University in 1893 taught philosophy there and became dean in 1901. He was maugurated at Amherst on October 16 1912. On June 9 1911 Ellen Fitz Pendleton (b 1864) dean of Wellesley College was elected its president succeeding Caroline Hazard Mount Holyoke College on October 8 1912 celebrated with a pageant its 75th anniversary and completed an endowment fund of \$552 000. Lemuel Herbert Murth (b 1861) president of Baker University Baldwin, Kansas in 1894-1911 was inaugurated president of Boston University October 20 1911 By two acts of 1912 Wheaton Female Seminary (founded 1834) at Norton was authorised to hold \$1 000 000 of additional real and personal estate to change its name to Wheaton College and to grant the degrees of AB and AM Penal and Charitable Institutions—The Board of Trustees of the Massachusetts Training Schools was established in 1911 to replace the separate boards controlling the Lyman School at Westboro the Industrial School for Girls at Lancaster and the Industrial School for Boys

¹ No school had been established at the end of 1912 but certain evening courses were given in 1911 and 1912 in Taunton and North Attleborough schools for the benefit of silver ware and jewelry designers—half the expenses being borne by the state

at Shirley (opened 1909) Departments of defective delinquents were created at the Reformatory for Women, at the Massachusetts Reformatory and at the State Farm and criminal defectives from other institutions are to be turned over to these departments. The super vision of wayward and delinquent children was transferred in 1912 from the state board of thanty to a commission on probation. The use of solitary confinement rooms in reforma tories was forbidden and corporal punishment in the Lyman School was restricted. Prisoners of the state prison may be released on parole after serving two thirds of the minimum term of two years and the same provision was extended in 1912 to prisoners transferred from the state prison to the reformatory. The prison commissioner is required to arrange for the segregation of epileptic prisoners in any state institution. In 1911 Governor Foss freed so many convicts that the pardoning committee of the executive council adopted in 1912 stricter rules governing pardons

The state's appropriations for penal and charitable institutions are large and in almost every instance the appropriation carries a large amount from the receipts of the institution at the time in the treasury The plan of making goods for public use by the labour of prisoners was enlarged in 1912 The Worcester State Asslum is to be superseded by one on the was entarged in 1912 The Workester Asylum is to be supersound by one of the Grafton Colony (opened 1903 a a branch of the Workester Asylum) where additional buildings are to be completed in 1915 A commission was appointed in 1912 to report in January 1913 on the support of dependent minor children of widowed mothers Experiments in the cases of inebriates and users of drugs which had been carried on for many years at the Fox boro State Hospital for the insane led to the establi himent in 1912 of a separate institution for inebriates known as the Norfolk State Hospital and comprising 1000 acres and three groups of buildings in the town of Norfolk and Walpole In 1912 the psychopathic department of the Boston State Hospital was established in its new building on the Fenway in In 1912 the Perkins Institution for the Blind became established in its extensive new buildings begun in February 1911 in Watertown

History -In 1911 and 1912 the majority of the legislature was Republican and so were all state officers except the Democratic governor Eugene Noble Foss (b 1858), a prominent leather manufacturer and an advocate of tariff revision and reciprocity who had been a member of the Federal House of Representatives in 1010-11 In 1011 he defeated Louis Adams Frothingam (b. 1871) speaker, state house of representatives 1904-05 heutenant governor 1909) Republican by 214 897 votes (36 160 votes on Democratic Progressive ticket) to 206 705 the Socialist vote was 13 355 All candidates for state office at this election (November 7 1911) were chosen for the first time by direct vote at primaries the later election of the conventions being a mere formal acquiescence in the primary nominations In 1912 Governor Foss was renominated by the Democrats getting 63 000 votes in the primaries to 36 000 for Pelletier and was again elected in November, by 193 184 to 143,597 for the Republican candidate Joseph Walker speaker of the state lower house in 1909-11 and 12 602 for Charles Sumner Bird (b. 1855), Progressive a paper manufacturer With Foss, a Democratic heutenant governor was elected (with 3 465 votes less than for Foss) for the first time-David I Walsh, who had been defeated for the same office in 1911 by Robert Luce (b 186_), Republican The Democratic candidate for secretary was elected, but the Republicans elected treasurer auditor and attorney general. There will still be a Republican majority in the governor's council and a Republican plurality in the 1913 legislature (in which there will be a Socialist from Haverbill, and 8 Progressives)—assuring the election of a Republican as United States senator to succeed W Murray Crane (b 1853 governor 1000 02 senator 1904-13), who refused (May 21) to be a The principal Democratic candidate for the senatorship had candidate for re election been John Francis Fitzgerald (b. 1863) representative in Congress, 1895-1901, mayor of Boston 1906-07 and 1910-11) Republican candidates were ex governor Eben S Draper, William B Plunkett and Congressmen John Wingate Weeks (b. 1860. gradu ated U.S. Naval Academy 1881 representative in Congress since 1905) and S. W. Weeks was chosen January 13 1913 On January 18, 1011, Henry Cabot Lodge, Republican was re elected US senator

The primary contest for the presidential campaign was marked by the speeches of President Taft and of ex President Roosevelt in the state Taft carried the preferential primary (May 1, 1912) by 3,655 votes but the 8 delegates-at-large for Roosevelt were chosen-apparently because 13 000 ballots for the Taft candidates were invalidated on a technicality Roosevelt immediately instructed these delegates at large to vote for Taft. In November Woodrow Wilson carried the state receiving 173,408 votes to 155,948 for Taft 142 228 for Roosevelt and 12,616 for Debs (who got 10 781 votes in 1908) Of the 16 congressmen (14 under the previous apportionment) 9 are Republicans (10 in the last Congress)

Boston (January 10, 1911), North Adams Lowell and Lawrence (December 19, 1911) voted for the licence of liquor On October 14, 1912, Revere voted for annexation to Boston On December 3, 1912, municipal elections were held in 14 cities and may ors were re elected in more than half of these "No licence' was voted in Quincy and licence in Gloucester On December 10 municipal elections were held in 15 cities 12 of which chose mayors On the liquor question there was but one change, Newburyport going wet!" (by 3 votes) for the first time in 7 years The bar and bottle' law of 1910 forbidding the sale of bottled liquors (or those to be taken away) in saloons where in toxicants are drunk went into effect May 1, 1911, this has resulted in the immediate decrease of the number of licences issued and in force. In the 1911 election an unsuccessful attempt was made to recall Mayor John Francis Fitzgerald of Boston under the provision of the 1909 charter that in the middle of the mayor's four year term there shall be a vote whether he be recalled

An act reducing the maximum working hours for women and children from 56 to 54 hours a week-although the maximum was still 58 in New Hampshire and 60 in Vermont—went into effect January 1 1012 Due notice of this change was given but in the textile mills of Lawrence apparently no notice was given of a cut in wages following the reduction in hours (applied to all employees as more than half were women The cut in pav aggravated previous discontent with the bonus or premium system giving extra pay for increased output if not more over one day s work were lost, and on January 11 a strike began, in which 14 000 employees joined in the first few weeks, 23 000 were concerned at the most and about 17,000 were out when the strike practically closed March 14 There was little organisation when the strike began, a mule spinners union and some other crafts mostly English speaking, included 2 500 men -these were affiliated with the American Federation of Labor, which did not cooperate in the strike and whose representative John Golden head of the Textile Workers of America left Lawrence as soon as the strike began and denounced it as rev olutionary, and the Industrial Workers of the World had organised a few of the less skillful workmen regardless of crafts-probably it had 300 paid up members on its rolls at the beginning of the strike The municipal police were unused to strikes and on Jan uary 15 the local militia was called out for patrol duty Five days later Joseph J Ettor (b 1887) of New York City one of the 5 members of the general executive board of the Industrial Workers of the World (I W W), came to Lawrence to lead the strike a riot (January 29) Anna Lopizzo was killed-probably by a stray bullet, and two days later Ettor and his assistant Arturo Giovannitti were arrested as accessories to the murder the control of the strike then passed to William D Haywood an I W W leader formerly prominent in the Western Federation of Miners and in its strikes in Colorado On January 30 a Syrian boy was bayonetted because he did not on ' The same day Governor Foss (and February 8 a joint committee of the legisla ture) attempted intercession To secure sympathy and to lessen the number to be supported in Lawrence a plan which had been used in Europe was adopted—partly on the suggestion of the (Socialist) New York Call-and children were shipped to sympa thmers in other cities—about 120, February 10, to New York City, and later, 30 to Barre Vermont, 40 to Philadelphia, 90 more to New York and 40 to Manchester, New Hamp A newly appointed chief of police stopped the sending of more children and a city magistrate ruled that the parents action might be considered neglect A Federal enquiry into the action of the municipal authorities in preventing children from leaving the city was ordered February 27 1012 After nearly ten weeks the strike ended with a victory for the workmen, an advance of wages in nearly all the textile mills of New England and a change of the premium system so that it applies to two-week (instead of four week) periods The president of the American Woolen Company of Lawrence,

William M Wood, was arrested August 30, charged with ' planting dynamite during the strike to discredit the strikers On a similar charge the city clerk, John J Breen was arrested in January, was convicted and, October 1, was recalled from office by 3 373 As the time for the trial of Giovannitti and Ettor (at Salem, by change votes to 2 269 of venue) approached, trouble broke out again, Haywood was arrested in Boston (September 15) for inciting a strike of protest against the imprisonment of the two, there was an actual cessation of work, beginning September 27 with violence on the 79th and 30th, but the mills reopened October 3 Ettor, Giovanniti and a workman named Caruso were acquitted on November 26 The conditions of the strike were unusual in that the work men were of so many different nationalities-Italians, Portuguese, Belgians, Germans Polish Lithuanians, Syrians Armenians etc Several nationalities had cooperative associations which helped support the strikers by loans, by maintain ing soup kitchens, and in other ways 1

During the year there were several other strikes in the state on the Boston elevated railway (June 7 to July 29), a victory for the strikers who appealed to the state board of conciliation and arbitration a peaceful strike at New Bedford in the cotton mills (July 15-Sept 10), protesting unsuccessfully against a new system of grading, introduced after a strike in the spring a textile strike in Lowell (March 25-April 2 with some rioting afterwards) -like the preceding marked by quarrels between the IWW and the Federation of Labor a victory for the employees a strike of 2 000 cotton mill opera tive in Clinton (March 20-April 22) resulting in an increase of 10% with an unsuccess tul after trike (June 26) for the reinstatement of one man, a strike a month long. ending April 9 at West Warren cotton mills resulting in a victory, a weavers strike (August 5-16) at Adams in Lyan, a glaziers strike (September) and a shoe cutters' strike (October 16-November 1) and a longshoremen's strike in Boston (January 4-February 14), also successful

In Boston the 'Boston 1915' movement, an elaborate plan for city betterment under the chamber of commerce is doing much to improve the city and assist its In 1911 subway leases were extended to 1936, and work was begun on the Boylston Street and Dorchester tunnels and on an extension of the East Boston On March 23 1912 the subway from Park Street, Boston, to Harvard Square Cambridge, 3 miles, on which work was begun July 12 1909 was formally opened to the public In September 1912 work began on the Stadium Bridge, over the Charles River between Cambridge and Brighton, the gift of Larz Anderson In Concord the Orchard house was purchased in 1912 as a memorial to Louisa May In Pittsfield a company of 50 citizens established a community theatre for the presentation of good plays at low prices. In Northampton where there has been a municipal hall for theatrical performances for nearly 20 years the Northampton Players a municipal company was organised in the autumn of 1912 it is probably the first theatrical company owned directed and managed by an American municipality The town of Ahington celebrated on June 10 1912 its 200th anniversary and dedicated a memorial bridge and arch to the men who fought in the Civil War The town of Hingham on November 25, 1912 dedicated a memorial bell tower to its founders

Agriculture —The acreage in farms increased from 17 561 698 to 18 940 614 between 1900 and 1910 and the improved land in farms from 11 799 250 to 12 832 078 the average farm acreage increased from 86.4 to 91 5 and the value of farm property from \$690 355 734 to \$1 088,858 379 (\$615 258,348 land \$285,879 951 buildings \$49,916 285 implements, \$137 803 795 domestic animals) Of the land area 51 5 % was in farm. The average value of farm land per acre was \$32 48 Farms were operated largely by owners (172 310 by owner 1961 by managers and 32 689 by tenants). In 1912 (preliminary estimates) the principal crops were Indian corn, 55 250 000 bu (1,625 000 A) wheat 7 000 000 (700 000 A) oats 51 826 000 bu (1 485 000 A) barley 2 262 000 bu (87 000 A) re 4,921 000 bu (370 000 A) buckwheat 1 088 000 bu (64,000 A) potatoes 36 750 000 bu (350 000 A) hay 3 185 000 tons (2,95 000 A) and sugar beets 1 443 856 tons (145 83, A) In 1909 (US Census) the value of chicory was \$70 020 (1 584 A) of mint \$194 391 (6 ,60 A) of vegetables (excluding potatoes) \$6,286 645 of flowers and plants \$1 143 764 of small fruits \$2 028 865 of orchard fruits \$9 020,842 (apples \$5 969 080) of grapes \$1 531 057 On January 1 1912 there were on farms 634,000 horses 4 000 mults 806 000 mich cows 701 000 other neat catelle 2 276 000 sheep and 1 382 000 swine 701 000 other neat cattle 2 276 000 sheep and 1 382 000 swine

Laws of 1911 permit the incorporation of mutual insurance companies against damage by hail exempt private forest reserves from taxation and permit county boards of supervisors to levy a tax to advertise the agricultural conditions of the county. Juvenile corn growing associations have accomplished much in the state since 1908. Since 1904 there has been a

Michigan Corn Improvement Association

Mineral Products — Total value 1911 \$65 077 232 The largest item was copper 218 185 236 lbs (\$27 273 155) a little less than in 1910 and ranking the state and in copper production. From copper lodes were taken 497 281 oz of silver about one half more than in 1910 The state ranked 2nd (to Minnesota) in the amount of iron ore 8 944 393 tons (\$23 808 935) which was nearly one half less than in 1910 The output of pig iron was 304 654 tons (\$4 672 799 not included in the total given above) When the state board of tax commissioner appraised the mining property of the state in 1911 it was estimated that the reserves of iron ore in manes were £24,598 164 tons, ometring ores of 40 grade which can be mined in the Gogebic and Marquette ranges. The output of coal was 1 476 074 tons (\$2.791.461) The value of salt \$2,455 983 was greater than that in any other state though the amount was less than that of New York Cement (all Portland) was valued at \$3.024 576 from 11 produced at \$4.000 for the coal was 1 476 or \$4.000 for \$4.000 f ducing plants Clay products (almost entirely brick and tile) were valued at \$2 083 932

The state ranked 3rd in the output of gypsum and 2nd in grindstones and scythestones. A

little graphite is prepared from graphitic slate.

Manufactures—In 1904-09 the number of manufactories increased from 7 446 to 9 159

and that of persons engaged in manufacturing from 200 r96 (175 229 wage carners) to 271 071 (231 499 wage-earners) the capital invested from \$337 894 000 to \$553 947 000 (72 8%) and the value of products from \$429 120 000 to \$685,109 000. In 1909 the state ranked 7th in the value of all products and as in 1904 1st in the manufacture of automobil's with 38 8 (in 1904, 26 6%) of the value of the country stotal. The output in 1909 \$96 651 000 was more than 12 times as much as in 1904. Nearly one eleventh of the state s product value in 1909 was the value \$61 515,000, of lumber and timber. Furniture was valued at \$28,642 000 (\$12,630 000 from Grand Rapids). Other items were foundry and machine shop products, \$45,399 000 tobacco mostly cigars and cigarettes \$16 179 000 leather \$15,331 000 constant world world with \$3.00 000 replaced. paper and wood pulp \$13,922 000 brass and bronze products, \$13 890,000 ranking the state 3,61 sn this industry patent medicines, etc. \$13,475 000—in this industry Michigan ranked 2nd, slaughtering and meat packing \$13,435,000 chemicals \$12,890 000 ranking the state 4th food-preparations, \$11,492 000 beet-sugar, \$10 477 000 being niore than one fifth the output of the entire country. The principal manufacturing cities were Detroit \$252 992 000 in 1909 the 6th manufacturing city of the country. Grand Rapids \$42 231 000 of which three tenths was the value of furniture. Fifth \$24 118 000 three fourths being auto-making complexes and was the value of furniture. Fifth \$24 118 000 three fourths being auto-making complexes and was the value of furniture. mobiles carriages and wagons Battle Creek, \$20 174 000 nearly one-half being food prep arations Saginaw, \$18,823,000 principally beet-sugar and lumber Kalamazoo \$17,904,000 paper and wood pulp, and corsets Lansing \$16,567,000, one-half automobiles Jackson \$12,006,000 one third automobiles and Bay City, \$10,204,000 lumber Transportation—Railway mileage January 7, 1972, 9,700,98 The Federal government widened St. Mary s river in 1911 and in 1912 practically completed improvements in

the Amherstburg and Livingstone channels of the Detroit river and the 3,000 ft. long concrete superstructure of the breakwater at Marquette which by the River and Harbour Acts of 1910 and 1911 is to be extended 1 500 ft further

Legislation —Besides the regular session of the legislature in 1911 there were special sessions in 1912 adjourning respectively on March 20th and April 10th, On February 23 1911, the proposed 16th amendment to the Federal Constitution was ratified. In 1912 two amendments were proposed one giving women the right to vote and the other giving to electors in cities and villages power to make or amend their charters. In November 1912 the latter was carried (285,911 to 138,579), the former defeated by 248,135 to 247,375 votes

A law of 1912 provides for a presidential preferential primary. In 1911 the legislature amended the registration law created justice courts in cities of 100 000 inhabitants or more and abolished the office of the commissioner of mineral statistics. The law in regard to concealed wrapons was amended by including among prohibited weapons hatpins more than ten inches long. Married women have a right to their personal earnings. The legislature voted \$15 000 for the erection of a statue of Zachariah Chandler in the National Statuary Hall of the Capitol in Washington.

An employers hability law of the pseudo elective sort—the election both of employer and of employee being assumed unless notice to the contrary is given—was enacted in 1912 and went into effect on September 1st. It does not apply to farm hands and domestic servants. There is no compensation for a disability lasting less than two weeks and compensation be gins on the 15th day but on the first day if the disability lasts more than 8 weeks. In case of death the compensation is one half the average weekly wage for 300 weeks, but not more than \$10 nor less than \$4 a week. If the family left is only partially dependent compensation is proportional to the degree of dependence. If there are no dependents \$200 is the maximum. In case of total incapacity, the compensation is one half the difference between the wages before the accident and after the accident—not more than \$10 nor for more than 300 weeks. The act specifies compensation for maintings on the basis of wages paid. Death terminates a disability in demnity but a death benefit must be paid. One member of an industrial board (three members) and one person chosen by each of the parties to any dispute form a board of arbitration. Special provisions for the formation of mutual insurance companies of employers who elect to come under the employers liability law were passed in 1912. The number of free employment bureaus was increased from 8 to 10. The law of 1859 creating a state court of mediation and arbitration of labour disputes was repealed. All physicians are required to report to the state board of health the name the address the place of employment and the length of employment of the earting occupational diseases.

A new child inbour code of 1911 forbids children to work on the stage in shows pool rooms or dance halls where liquor is sold makes hours for children under 18 10 a day (average 9) and 54 a week in factories mills warehouses and workshops but not in canneries and requires employment permits to be issued (only to those completing the fourth grade) by school offluers or probate judges instead of by employees of the state department of labour. No girl under 18 is allowed to work in a factory and no child under 16 in a factory workshop mine or messenger service between 6 P M and 6 A M and no child under 18 in messenger service between 10 P M and 5 A M. City aid not more than \$3.00 a week for each child or \$6.00 for a family may be granted on the recommendation of truant officers to widows whose children's work is necessary for the support of a family. Tree text books also may be supplied.

A law forbidding breweries to own saloons (directly or indirectly) was passed in 1912. The supreme court held unconstitutional a clause in the local option prohibition law exempting from the prohibition the manufacture of wine and cider from home grown fruits. A medical milk commission may be incorporated in any city village or township to supervise milk supplies for infants and sick rooms. The office of state fire marshal was created and the marshal must enforce a law that schools have fire drills once a month. The sale and use of toy pistols guins and cannon shooting blank cartridges was forbidden as well as the use of fireworks containing pieric acid or fire crackers above specified size and explosive force. Immoral advertising is forbidden and pandering is made punishable by 30 years imprisonment.

Telephone lines and companies are made common carriers under the control of the state rathoad commission and express rates are regulated by an amendment to the common carriers act. A uniform bill of lading act was passed.

act A uniform bill of lading act was passed
Under a home rule law East Jordan Fremont Pontiac (Jan 30th in effect Apr 10th)
and Wyandotte adopted commission governments in 1911 Port Huron adopted a commission charter November 5 1910 Lansing adopted a home rule charter on August 27 1912
in effect Ottober 7, 1912 amendments may be proposed by satistative petition A new charter
proposed for Grand Rapids was defeated by 6 878 votes to 5,596 on February 20 1912 it
was a Federal plan with legislative (council of 12 aldermen, one from each want) adminus-

trative and indicial departments—the mayor to appoint four general managers to be heads of departments of public works health and safety parks and public property and finance and revenue—St Joseph adopted a commission charter in 1912—Charter commissions in

Holland and Sagnaw have not yet reported

Finance—In 1911 a special tax commission was appointed to investigate the entire system of taxation, and a state board of equalisation was created. The board of tax com missioners under a law of 1911 inventoried and appraised all mining property and mineral rights these are all taxable under this act. The legislature provided for a tax of 5 mills on mortgages and hens and for taxes on railway stock bonds interest coupons etc. by an act which requires corporations to deduct the tax from dividend interest or principal to be paid to the holders of bonds. A uniform accounting system is to be adopted in all state depart ments as well as institutions and boards the system was not introduced throughout in 1912 Maximum rates of interest to be charged by pawn brokers were prescribed. In 1912 a tax Maximum rates of interest to be charged by pawn brokers were prescribed. In 1912 a tax of \$2 060 000 for 1912 and one of \$1,063 000 for 1912 were made for appropriations for which the legislature had provided no special tax. The state treasurer's report for the year ending June 30 1912 showed a balance on hand of \$8 980 404 (as compared with \$2 235 425 at the end of the preceding year) and receipts of \$14 190 498. Of the total amount on hand \$5 466 584 was primary school interest fund and \$3 372 608 general fund. Nearly one half of the receipts was from county treasurers and nearly as large a proportion—partly included in the

other class — was from business corporations \$5 317 205

Education — The compulsory education law of 1911 has been described above Districts that do not maintain high schools must pay tuition to one of the three nearest high schools for children who have completed eight grades — Any school district may establish a vocational school or a gymnasium and is empowered to accept gifts and legacies this law enabled the schools of West Saginaw to accept a bequest for vocational education. In the autumn of 1912 an industrial co-operative department was opened in the Lansing high school Physical training must be taught in public schools in city school districts with a population greater than 10 000 and in all state normal schools. The township unit law was amended by an act which permits women to vote on the question of reorganising under this law. Fraternities and school societies were abolished in all public schools. In 1910 the percentage of illiteracy in the population 10 years and over was 3 3 (4.2 in 1900). In the school year ending June 30 1912 the number of children between 5 and 20 was 783 770 the total enrollment 545 279 and the average daily attendance 75 /₀ of this number. The average length of the school year was 9 1 months in city and graded districts and 81 months in ungraded districts. The total number of teachers employed was 18 207 at an average monthly salary for men of

\$79.84 and for women of \$53.53

The extellence of the public school system is largely due to Luther I amphear Wright (b 1856) state superintendent since 1907 who has attempted to discard text books in

language work and arithmetic and urges the adoption of a 12 months school system (See Kathleen Nicholson 'The Michigan Schools in Educational Review June 1912)

Penal Institutions —The 1911 legislature provided that prison labour should be used on the state prison at Jackson and on the House of Correction and the branch of the prison in the Upper Peninsula. Convicts may be employed on state roads but not to displace skilled labour and are to be paid a minimum of 50c a day plus a bid price bonus. A house of correction with a public account system and wages like the system in the Detroit House of Correction. tion (which is a municipal institution) may be established in any city with more than 100 000 inhabitants. The governor may parole any life convict who has served 25 years or 25 years less a proportional time for good conduct. In September 1912 there were serious riots in the state prison at Jackson, where convicts got control of the institution and militia had to be The warden's friends found the reason for the outbreak in the contrast between his strict discipline and previous slackness his enemies in poor food furnished to the con Immediately after the not the prison warehouse was burned

History - Chase Salmon Osborn (b. 1860), Republican editor and proprietor since 1901 of the Saginaw Courser Herald, having defeated the Democratic candidate Law ton Thomas Hemans (b 1864, author of History of Michigan, 1906), by 202,863 to The legislature elected on a radical 159 670 votes became governor January 1, 1911 Republican platform chose (Jan 18th) Charles Elroy Townsend (b 1856, representa tive in Congress 1903-11 and chosen for 1911-13) to be United States senator to succeed Julius C Burrows (b 1837), conservative Republican, representative in Congress 1873-75 1879-83, 1885-95 and senator 1895-1911, whom he had defeated in the first senato nal primary in the state, September 7 1910 In state and local elections April 3, 1911 the Republicans were in general successful, and in Flint a strong Socialist vote was cast and the Socialist candidate for mayor was elected. There were local option elections in April 1912, and at the end of the year 35 (of 83) counties were 'no heence" At the primaries (Aug 27, 1912) about 150 000 Republican votes and only about 6,500 Progress-

sive votes were cast, but the Republican organisation was Progressive in character The presidential preferential primary law of 1912 (approved March 20th) did not go into effect for oo days (although it provided for a primary on the first Monday of April 1012) since it did not receive the two-thirds vote necessary to make it an emergency measure immediately in effect. At the Republican state convention at Bay City (April 11th) the Taft and Roosevelt factions quarrelled so violently that troops had to be ordered out It chose two district delegations-at large to the National Convention, where (June 12th) the 6 delegates instructed for Taft were seated in spite of the protests of the Progressives ' Amos S Musselman was nominated for governor by the Republicans, Woodbridge Nathan Ferris (b. 1853) head of Ferris Institute Big Rapids, since 1901 candidate for governor 1904) by the Democrats, and L Whitney Watkins by the Progressives who put in the field a ticket of 12 congressional candidates ernor Osborn had first endorsed Woodrow Wilson but later turned to Roosevelt who carried the state by 214,584 votes to 150 751 for V ilson, 152 -44 for Taft and 23,211 for Debs (11,586 in 1908) But Ferris the Democratic candidate for governor, was elected by 194 017 votes to 169 963 for Musselman and 155 372 for Watkins being far ahead of the rest of the state ticket which was defeated The (Republican) legislature re elected (Jan 14 1913) to the United States Senate William Alden Smith (b 1859) who had suc ceeded Russell A Alger in 1907 the choice of the Democratic primaries was Alfred Luck ing The congressional delegation (13 under the new apportionment including 1 at large -instead of 12 as before) will be a Republicans 2 Democrats and 2 Progressives

The union employees, numbering 6 000 of the furniture factories of Grand Rapids went on strike April 19 1911 and stayed out for 17 weeks

Upon the report of a citizens committee several employers agreed to a 9 hour day

The economic effect of the strike was felt immediately in reduced municipal appropriations for public schools etc

In Grand Rapids the City Plan commission submitted to the mayor and common council a report for a city plan made by Carrere and Brunner April, 1909. There has been no organised movement to carry this plan into effect. Detroit has a city plan and improvement commission created in 1909 and in 1912 this was considering a new city plan.

932,000 bu (2,048 000 A) barley 42,018 000 bu (1,490 000 A) rye, 6 026 000 bu (262 000 A) buckwheat 126,000 bu (6 000 A) potatoes 33 075 000 bu (245 000 A) flavseed 4 121, cos bu (203 000 A) and hay 2 541 000 tons (1 661 000 A) In 1909 (U S census) the walke of vegetables (excluding potatoes) was \$3,359,052 of small fruits \$493,406 of orchard fruits, \$301 112 (apples, \$769 114) On Jan 1 1912 there were on farms 806 000 horses 6 000 mules 4 107,000 milch cows, I 151 000 other neat cattle 600 000 sheep 1,702 000 swine

The legislature in 1911 created a state forestry board which is to appoint a state forester

The legislature in 1911 created a state forestry board which is to appoint a state forester Railways must provide fire patrolmen and use spark-arresters on railway locomotives for the prevention of forest fires. Sub-experiment and demonstration farms were established one near Duluth, and one near Waseca. A new state fish hatchery was established near Detroit. The office of state inspector of apiaries was created and a law provides for the prevention and suppression of contagious disease among bees state of grasshoppers \$6.000 was appropriated and \$25.000 for grass and clover seed to be distributed to farmers whose lands were burnt over in the fires of 1910. An appropriation of \$25.000 was made for an experiment station for the dairy and food department near Albert Lea. The experiment station recently originated new varieties of winter wheat of oats of Indian corn and of flax which have become commercially valuable.

Indian corn and of flax which have become commercially valuable.

Mineral Products — Total value 1911 \$53 460 561 The only large item is iron ore of which the state was the largest producer with 23 398 406 tons valued at \$48 447 760 six mines each had more than 1 600 000 tons output—all of hematite— and these and five other mines were the largest producers in the country. Clay products almost entirely brick and tile were valued at \$1 693 478 mineral waters bottled at 17 springs at 270 039

Manufactures — In 1904-09 the number of establishments increased from 4 756 to

Manufactures —In 1964—69 the number of establishments increased from 4.756 to 5.564 and that of persons engaged in manufacturing from 83.301 (69.636 wage-earners) to 104.406 (84.767 wage-earners) the capital invested from \$184.903 000 to \$275.416 000 (49.6) and the value of products from \$307.858 000 to \$409.420 000 (33.7) The principal manufactures in 1909 were flour and grist mill products \$139.1.6 000 Minnesota ranking 1st in this industry lumber and timber products \$42.253 000 (about five sixths of the timber cut was white pine and this was more than one third of the white pine cut in the United States) slaughtering and meat packing products \$25.754.000 and butter cheese and condensed milk \$2.528,700 (\$4.581.000 being butter) Minnesota ranking 4th Other important products were foundry and machine shop products \$15.609 000 car construction by steam railway companies \$12.631.000 linseed oil \$11.037.000 malt liquors \$10.568.000 and boots and shoes \$7.568.000 the manufactures of Minneapolis were valued at \$105.405.000 nearly three fifths being flour and grist mill products mine-tenths of the linseed oil made in the state was manufactured here. Other cities of importance were 5t Paul \$58.900 000 Duluth \$17.80.000 (in 1800.57.811.000) and Winnoa \$11.200.000 chieft, flour and patent medicines.

180 000 (in 1899 \$7 811 000) and Winona \$11 200 000 chiefly flour and patent medicines Transportation—Railway miliage January I 1912 8812 92 In 1912 the Federal government had about half completed work on Lock and Dam No I on the Mississippi be tween Minneapolis and St Paul where the lift is to be increased from 13 3 to 30 ft with the intention of developing a passenger traffic on this part of the river and had nearly completed improvements in Duluth Superior harbour A constitutional amendment establishing a road and bridge fund and authorising an annual tax for roads and bridges was adopted in

November 1912 by 195 724 votes to 51 135

Legislation — The regular biennial session of the legislature was held from January 3 to April 10, 1011 It submitted constitutional amendments which were voted on in November 1912 by the people requiring the state auditor to levy an acreage tax on farm lands at the option of owners for an insurance fund against damage to crops from wind or hail (adopted 145,1/3 to 60 439), authorising the investment of school funds in loans on improved Minnesota farm lands (adopted 168 440 to 39 483) allowing incorporated cities or villages desiring incorporation as cities to frame charters, and classifying cities for general legislation (adopted 157 086 to 41,977), and reapportion ing the state, providing for 63 senators, no county to have more than 7 and empowering the legislature to determine the number of representatives (adopted 122,457 to 77,187)

The legislature urged the adoption of I ederal laws to prevent Federal courts from enjoining a state official from enforcing any state law before the constitutionality of the law had been passed on by the state courts, leaving the United States Supreme Court to correct any decision of the state court and the creation of a permanent non-partisan Federal tariff board Aspecial session (June 4-18 1912) ratified on June 12th the proposed 16th and 17th

amendments to the Federal Constitution.

An act of 1911 provides for direct nomination of United States senators and candidates for the legislature may promise to vote for the choice of the primary for senator, but need not sign any pledge. An elector may vote for presidential electors or state officers or on constitutional amendments in a precinct of the state other than that in which he resides and usually casts his vote. The 1912 session passed a new registration, primary and general election law it provides that judges and county superintendents of schools be nominated by

non partisan primary ballots, the two having the highest votes at the primary to be the nominees for a method of rotation on primary ballots and for second choice voting at primaries. In 1912 a new corrupt practices act was passed. Permitted expenses are specified by classes and the maximum expenditures for each office. Political advertisements must be headed paid advertisements, with a statement of the amount paid and by whom. Any candidate or member of a political committee having a financial interest in any newspaper must file with the county auditor a statement of the amount of his interest. Campaign hterature must bear the name of its author. Treating electors and wagering on elections are forbidden. All campaigning disbursements must be reported each calendar month. A board was appointed to promote uniformity of legislation in the different states especially laws on marriage and divorce insolvency the form of notarial certificates, the descent of property acknowledgment of deeds, and the execution and probate of wills.

The legislature created the Fort Ridgely State Park (about 80 acres, opened 1911) in Nicollet county and required the superintendent of public instruction to proclaim between October 1st and May 1st a day (Minnesota Day) on which special exercises should be held in public schools. The county of Pennington (county seat ThieRiver Falls) was created from the N. W. part of Red Lake county by executive proclamation on November 23 1910. A new child labour law of 1912 forbids the employment of children under 14 at any time

A new child labour law of 1912 forbids the employment of children under 14 at any time in factory mill workshop mine or building construction or engineering work or during school hours in any employment. Children under 16 may not be employed more than 8 hours a day or 48 hours a week nor between 7 P M and 7 A M nor in certain specified dangerous occupations. Theatrical exhibitions are excepted by the law on the written consent of mayor or village president. In messenger service no boy under 18 may be employed between 9 P M and 5 A M nor any girl under 21 at any time. A report on workmen s compensation was published in 1912 by the state bureau of labour

The railroad and warehouse commission was instructed to make rules for joint rates be tween common carriers. Railways must keep accounts showing revenue per mile. Five cents is the minimum rate for carrying a passenger from one station to another. The state rate law setting 2 cents as the maximum per mile was held invalid (April 21 1911) by a circuit court a unfair to inter tate transportation at higher rates the case was carried to the Federal Supreme Court, which had handed down no decision by March 1913.

The state and not the Federal census is to govern the classification of cities. Cities of the first class under a home rule charter may establish a purchasing department. One city may join another to form a public corporation for the development of water power. By a law of 1912 Minneapolis. St. Paul and Duluth were required to have non partisan primaries for municipal offices. Cities over 50 000 may issue 4½ bonds for \$600 000 for land and buildings for public libraries. Cities of this size have a fire marshal and the laws for fire protection in hotels. In the etc. and to prevent fires started by locomotive sparks are made much stricter. Railway crossings must be protected and inspected by the railroad and warehouse commission and tracks at crossings must not be at different levels. In cities of \$0 000 or more the mayo is to appoint a city chemist and cities of this class with home rule charters may regulate the sale of liquor in hotels. It was made a gross misdemeanour to entice a minor into a saloon and was declired illegal to sell liquor to a student in a state school to an intoxicated person to an Indian, to an habitual drunkard or to a spendthrift for one year after a notice by any person annoyed by such a sale and the selling or giving away of malt liquors even if they are not intoxicating, was forbidden except in licensed places. Any one selling intoxicating liquors is liable to act in for damage done by an intoxicated person to whom he has sold such liquor. No intoxicated person is allowed to enter a railway train the drinking of intoxicating liquors on trains is forbidden and a conductor on any train in the state may seize intoxicating liquors on trains is forbidden and a conductor on any train in the state may seize intoxicating liquors that must give a receipt redeemable within 10 days. A department of weights and measures under the supervision of the railroad and warehouse commission was established. A standard of pure milk was set. County boards are authorised to appropriate money to prevent the sp

Finance.—The inheritance tax law was amended in 1911. The tax levy for the general revenue fund for 1912 and 1913 is to be 19 mills or less and \$2 200 000 was the amount to be raised an 1912. A law of 1911 requiring railways to pay a tax of 4% on gross earnings derived from all sources was repealed in 1912 by an act (in effect 1913) making the rate 5% and the tax commission was bidden to report to the 1913 session on the property of railways and to have it assessed and taxed (including back taxes). In its third annual report in preparation in December 1912 the tax commission proposes sweeping reforms in the direction of more equitable levying of taxes. An annual tax of 3 mills on each dollar of the fair cash value of moneys and credits was levied no offset is allowed for debts and the tax does not apply to money or credits of an incorporated bank situated in the state. On August 1 1971 the balance in the treasury was \$3 508 491 and on July 31, 1912 it was \$2 992 726. The recepts for the fiscal year were \$15 80, 302 and the expenditures, \$16 321,065. There is no state debt. Trust funds invested and drawing interest amounted to \$27,210 768.

¹ This tax was put in the constitution by an amendment adopted November 1912 (184,612 votes to 41,130)

Education —The legislature of 1911 passed a compulsory education law which was called by the Federal commissioner of education the most comprehensive one enacted in the year by the Federal commissioner of education the most comprehensive one enacted in the year it requires a complete school censis makes poverty no excuse for non attendance allows children to be excused from attendance if their bodily or mental condition necessitates it or if they have finished the work of the eighth grader and except in cities of the first and second class permits children over 14 to be excused between April 1st and November 1st if their help is needed in any permitted occupation in or about the home. The state director of school hygiene in 1912 introduced a "health grading outline" for all school children. Instead of 10 high schools 30 may now receive \$2 500 a year for courses in agriculture home economics and manual training for which the state appropriated \$105,000 a year A bonus of \$1 000 is given to each of 50 high schools with any one of the three special courses mentioned An association for retirement fund pensions for teachers may be formed in cities of 10 000 inhab stants or more—the limit was formerly 50 000 or more. A new law regulates prices of text books and on the vote of the district or of the school board books may be supplied free or sold at cost An educational and professional qualification for county superintendents was

adopted by constitutional amendment (167 983 votes to 36 584) in November 1912
On April 1 1911 Cyrus Northrup president of the University of Minnesota was succeed
ed by George Edgar Vincent (b 1864) who had been dean of the faculties of arts literature
and science in the University of Chicago and president of the Chautauqua Institution since 1907 The schools of medicine and engineering occupied new buildings and a chemistry building was constructed. There is a university extension movement on Chautauqua lines. In the law school the case system has been introduced.

In 1910 of the population 10 years and over 3% was illiterate (41% in 1900). The

total school enrollment in 1911-12 was 445 995 the school revenue about \$20 000 000 and

the expenditures about \$17 000 000

Penal and Charitable Institutions - A law of 1911 provides for the indeterminate sentence of prisoners convicted of any crime except treason and murder and for a state board of parole. Life imprisonment was made the punishment for murder in the first degree. A new act was passed for the government of the hospital farm for inebriates finished late in 1912

History —At the beginning of 1911 the governor Adolph Olson Eberhart (b. 1870) elected heutenant-governor 1907, succeeded on the death of Governor John A Johnson September 1909 re-elected 1910), all the state officers, and a large majority of the state legislature were Republicans Moses Edwin Clapp (b 1851), United States senator since 1901 was re-elected January 17, 1911 In 1912 before the actual opening of the presidential campaign Eberhart was one of the governors who urged Roosevelt's candidacy, but when the Republican National Convention in which the state's delegates were instructed to vote for Roosevelt, nominated Taft Eberhart refused to leave the He was re-nominated (Sept 17 1912) by the Republicans who it must be remembered were at least partially radical in their sympathies, and who re nominated Knute Nelson (b. 1843, representative in Congress 1883-89, governor 1893-95. United States senator since 1805) for the Senate The Progressives nominated P V Collins for governor and no other candidates save secretary of state and one railroad and ware house commissioner—no candidate for Congress Eberhart was re elected, with the entire Republican ticket, getting 120,688 votes to 99,659 for his Democratic opponent Peter M Ringdal and 33 455 for Collins The congressional delegation (10, including 1 at large, formerly only 9) will consist of 9 Republicans and (from the 2nd district) 1 Democrat Senator Nelson's re-election by the legislature (Jan 21, 1913) was insured by a Republican legislature and by a primary vote of 173,074 for Nelson to 102 691 for Daniel W Lawler, Democrat The first returns coming from the cities, pointed to a niurality for Woodrow Wilson, but when the rural districts were heard from it was found that the state was carried for Roosevelt, by 125,856 votes to 106,426 for Wilson, and 64,334 for Tast, and 27,505 for Debs,2 who had 14,527 in 1908

Duluth (May 7, 1912) adopted by 5 331 votes to 1,296 a charter amendment for mitiation of legislation (the charter already provided for initiation of amendments to the charter), for referendum and for recall. Immediately thereafter the municipal council adopted a resolution for the purchase of a lighting plant, to which it had been opposed There was a street-car strike in Duluth from September 9 to November 7, 1912, when it

¹ At the state s first state wide primary in which the second choice on the ballots caused much confusion to voters and to canvassers *One Socialist from Two Harbors was elected to the lower house of the legislature

was called off because the strikers were in actual need This strike led to the senous consideration by the city council of the acquisition of the railway system by the city On February 6 1912, the city adopted four charter amendments, one providing for a board of public welfare and one for an issue of \$700,000 bonds for a lighting plant, and December 3, 1912, it adopted (5 500 to 3,400) a new charter of the commission form with provisions for referendum, recall and preferential voting St Paul (May 7, 1912) adopted the commission plan of government (by 20,640 to 4,137 votes),—this at the very time that a home rule charter commission had prepared a new charter (federal plan) for the city which will be submitted at a special election. Ten days later the state supreme court upheld the constitutionality of the commission plan in the charter of Mankato and in an act of 1909 Faribault (Feb 7, by 688 to 185 in effect April 11, 1911), Tower and St Cloud (Nov 28 by 3 to 1) adopted the commission plan in 1911 At the November election in 1912 Wallace C Nye was elected mayor of Minneapolis by 22,282 votes to 19 498 for Thomas Van Lear Socialist who had not entered the non partisan primaries in whichW G Nye received the largest vote 2 Socialists were elected aldermen In December 1911 the city of Two Harbors authorised the establishment of a municipal coal yard. In 1911 a civic commission in Minneapolis submitted plans for a fourth diagonal highway and for neighbourhood parks at intersections Bibliography - General Laus (2 vols St Paul 1911 and 1912) and other public docu

ments W H Winchell ed The Aborigines of Minnesota (Minn Historical Society 1912)

MISSISSIPPI 1

Population (1910) 1 707 114 (15 8% more than in 1900) whites constituted 43 $\frac{1}{2}$ (in 1900 41 3) and 43 2% were native born whites The proportion of negroes was 58 5% in 1000 and 56 200 in 1010 (Indians and Asiatics o 200 in 1000 and o 100 in 1010) Den sity 38 8 per sq m The urban population (99 municipalities each with more than 2,500) was 11 5% of the total compared with 7 7% (27 municipalities) in 1900 The 15 municipalities of 5 000 or more were Meridian 3 285 Jackson 21,262 (7 816 in 1900), Vicksburg 20 814 Natchez, 11 791 Hattiesburg 11 133 (4 175 in 1900) Greenville 9 610, Columbus 8,988, Laurel 8 465 (3 193 in 1900), Biloxi 8 049 Yazoo 6 796, Gulf port 6 386 (1 060 in 1900) McComb 6 237 Greenwood 5 836 Brookhaven 5 293, Cornth 5 020

Agriculture - The acreage in farms increased from 18 240 736 to 18 557 533 between 1900 and 1910 and the improved land in farms from 7 594 428 to 9 008 310 the average farm 1900 and 1910 and the improved land in farms from 7 594 428 to 9 008 310 the average farm acreage fell from 82 6 to 67 6 and the value of farm property increased from \$204 221 027 to \$426 314 6,4 (\$254 002 289 land \$80 160 000 buildings \$16 905 312 implements \$75 247 033 domestic animals) Of the land area 62 5 / was in farms. The average value of farm land per acre was \$13 69. Farms were operated largely by tenants (181 491 by tenants 825 by managers and 92 066 by owners). In 1912 (preliminary estimates) the principal crops were. Indian corn. 56 840 000 bu (3 106 000 Å.) wheat 96 000 bu (8 000 Å.) oats 1 966 000 bu (11,000 Å.) potatoes. 890 000 bu (10 000 Å.) hay 297 000 tons (201 000 Å.) cotton 1 109 000 bules (177 lbs per Å.) inc. 77 000 bu (2 200 Å.). In 1909 (U.S. Census) the value of vegetables (excluding potatoes) was \$5 868 275 of small fruits. \$107 171 of orchard fruits. \$1 325 506 (peaches and nectarines. \$925 288) of figs. \$107 609 of nuts. \$90 855. On January 1 1912 there were on farms 234 000 horses. 277 000 mules. 443 000 milch cows. 566 000 other neat cattle. 214 000 sheep, and 1 577 000 swine.

566 000 other neat cattle 214 000 sheep and 1 577 000 swine

The pest of crayfish in the Houston clay lands where crops of cotton and Indian corn have often been destroyed just after the plant appears has been investigated by an agent of the Federal department of agriculture and poisoning them in their holes has proved the simplest and most effective way of ridding fields of them. Crayfish seriously weakened levees and dikes also. The 1912 legislature passed elaborate acts in regard to drainage districts In 1911 and 1912 the experiment station reported on scale insects apple growing

cotton experiments and cut over lands

Mineral Products — Total value 1911 \$1 052 842 The value of clay products was \$687,836, 83% more than in 1910 Sand and gravel were valued at \$286 206 and mineral waters (from 8 springs including 6 resorts) at \$75 050 being 71 more than in 1910.

Manufactures - From 1904 to 1909 the number of establishments increased from 1 520 to 2 598 and that of persons engaged in manufacturing from 42 966 (38 690 wage earners) to 56 761 (50 384 wage earners) the capital invested from \$50 256 000 to \$72,393 000 and

1 See E B xviii 599 et seq

the value of products from \$57 451,000 (\$33 718,000 in 1899) to \$80 555 000 Of the total lumber and timber constituted 53 1% (\$42 793,000) more than four fifths of the total cut was yellow pane. In the manufacture of turpentine and rosin (\$1 474 600 37 7% less than in 1904) the state ranked 4th in the manufacture of cottonseed oil and cake (\$15 966 000) and. The value of railway car repairs was \$3,233 000 cotton goods \$3,102 000 more than twice that of 1899 ferthisers—excluding the by product (\$616 000) of cottonseed oil mills,—\$2 125 000 more than thrice that of 1899 Meridian had a product of \$4,237 500 principally cottonseed oil and fertalisers Jackson \$3,113 000 Vicksburg \$2 229 350 Hattiesburg \$1 250 900 Natchez, \$1 114 000

Transportation - Radway suleage January 1, 1912, 4 402 08

ment by acts of 1911 and 1912 has secured a 23 ft basin and channel at Gulfport

Legislation —A special session of the legislature was held in 1911 (from Nov 1st to 15th) and the regular session in 1912 from January 2nd to March 16th It submitted to the people for approval in November 1912, constitutional amendments allowing a verdict in civil suits from nine jurors and providing for the initiative and referendum Each of these failed to get the necessary majority of all votes cast at the election though 28,064 votes were cast for and only 14,255 against the former and 25 153 for and only 13 383 against the latter A bribery immunity act of 1011 was repealed in 1012 a monument on the capitol grounds to the Mississippi women of the Confederacy \$7,500 was voted and the cornerstone was laid on June 3 1912

By an act of 1912 cities may adopt the commission form of government (with a charter providing for the recall and initiative) at an election held after a 10% petition therefor providing for the recail and initiative) at an election field after a 107 perificial interestor. After six years under commission government any city may vote to abandon its charter Gulfport had adopted a commission charter on December 12 1911 in effect January 1 1913 and Clarksdale on August 30 1910 Charleston Jackson (September 24 in effect January 6 1913) and Mendian (May 9 in effect January 6 1913) also adopted it in 1912 Vicksburg amended its charter (July 1912 in effect January 14 1913) so that it has a commission government in all but name. A child labour law applying to factories making cotton word or other fabrics and to camprise and establishments where children are commission government in all but name. A child labour law applying to factories making cotton wool or other fabrics and to cannegies and establishments where children are employed indoors at work injurious to health or in operating dangerous machinery and not applying to fruit canneries prohibits the employment of any girl under 14 or any boy under 12 and for more than 8 hours a day or 48 hours a week or between 7 P M and 6 A M or any boy under 16 or any girl under 18 No child under 16 may be employed without or any boy under 16 or any gut under 18 No child under 16 may be employed without the consent of his guardian Ten hours a day except in cases of emergency was made the maximum for employees in manufacturing or repairing establishments

Railway corporations were made hable for damage from fire set by sparks from loco motives and are permitted to have an insurable interest in property on the route board of health was ordered to establish a bureau of vital statistics which was in operation Tips in hotels restaurants dining and other cars are forbidden the penalty is not

to exceed \$100 and copies of the act are to be posted in cars and eating places

Finance—The state tax for 1912 and 1913 was 6 mills. The proportion for annual interest charges on different state bonds and for the Chickasaw school fund amounted to \$119,025 and \$610,500 for 1912 and \$615 500 for 1913 was appropriated to repay money borrowed for the state by the governor. The special session of 1911 was devoted almost entirely to appropriations. Many privilege taxes were laid those on sleeping and palace cars and on railways were increased freight lines and equipment companies were taxed 3 on their gross earnings. An income tax of 5 mills on all incomes (that is gross profits) in excess of \$2 500 2 year was levied. New permanent factories of certain classes established before 1918 were exempted from tax for 5 years The highest contract rate of interest was made 8% instead of 10%. The hierard report of the treasurer for the year ending October 1 1912 shows cash on hand October 1 1911 \$572 047 The receipts were \$4 179 283 and the expenditures \$4,500 331 leaving a balance in the treasury \$250 999

Education -A normal school authorised in 1910 was established in 1911 at Hatties The legislature in 1912 voted \$1 500 a year for each county agricultural high school, or \$3,000 for a joint school the special session of 1911 authorised municipalities to issue bonds for agricultural high schools. Greek letter and other secret societies were abolished and prohibited in 1912 at the University of Mississippi. The governor and the state super and prohibited in 1912 at the University of Mississippi The governor and the state super intendent of education were made ex officio members of the board of trustees of the higher educational institutions of the state (a law of 1910 had forbidden the presence on this board of any stare officers or legislators) other members are to be chosen by the governor General Education Board (which had previously given \$25,000) in October 1912 gave \$100-000 to Musishipps College (1826 Baptist) at Chiton

In 1910 of the total population to years and over, 22 4% was likterate (32% in 1900) whites 5 3% (8% in 1900); negroes 35 6% (49 1% in 1900). For the school year ending in the summer of 1912 the acknown was 737 356 (425 967 negroes) length of the average school year 6 months the total revenue for schools about \$3 500 000

Charitable Institutions —A law of 1912 requires that poor and needy persons be admitted for treatment in any charity hospital supported by the state. Among the appropriations were \$450 000 annually for Confederate veterans and their widows and \$98 000 biennally for the Confederate veterans home at Beauvoir

History —The chief political issue in 1911 and 1912 was the United States senator ship After a deadlock lasting seven weeks Le Roy Percy (b 1861) was elected, Febru ary 22 1910 to serve the unexpired term (ending March 4 1913) of Anselm Joseph M. Laurin (1848-1909 governor 1896-1900 senator 1901 to his death) State senator Theodore G Bilbo (elected lieutenant governor in 1911) testified that he had changed his vote from Percy's opponent James Kimble Vardaman (b. 1861, governor in 1904-08) to Percy for money paid him by L C Dulaney another state senator who was indicted for bribery Percy urged a thorough investigation and the case broke down complete ly apparently the notes that Bilbo claimed he had been bribed with came from a local bank after the date of the supposed bribery The state senate exonerated Percy and his campaign managers and came within one vote (two thirds vote necessary) of expel But in the primaries August 1 1911 Vardaman's candidacy for the senate was successful 1 The legislature elected on the senatorial issue asked (March 5 1912) for the resignation of Percy who had offered at the time of the bribery charge to refer his claims to the voters of the state who had received only 21 500 votes out of a total of 132 400 at the August primary and who was therefore considered discredited by Vardaman's followers Percy had promised immediately after the August 1911 pri maries to resign in January 1912 unless in self defence he was forced to keep his seat by continued attacks upon him and he refused to retire (March 9, 1912) Vardaman's accession to the United States Senate was deprecated by many because as governor be had indulged in much severe criticism of negroes In November 1911 a suit in chancery was brought against Vardaman for the restitution of public moneys but the suit was dis missed March 2 1912 after an investigation by the legislature Earl L Brewer, governor for 1912-16 -elected without opposition -is a Democrat, and the legislature and the congressional delegation (8 as before) are Democratic The Republican state convention split and chose rival delegations one for Taft and one for Roosevelt but the former was seated and many contests were withdrawn at the last moment In the presidential campaign the state primary elections were for Underwood and in November the vote was overwhelmingly large for Woodrow Wilson who received 57,164 votes to 5 6-7 for Roosevelt, 1 311 for Taft and 2 017 for Debs (978 m 1908)

There were severallynchings in the state in 1911-12 of a negro for murder at Rockport (March 25 1911) 2 negroes for attempting to poison a family at Louisville (May 5th) a negro accused of murder at Chunky (June 16th), one for murderous assault on a white man at Lockhart (Nov ,th) one at Sucarnoochee (Jan 15 1912) for murder one at Starkville (Feb 14th) for rape one at Greenville (May 7th) for the same offence and another on the same day at Macon for murder A negro was killed in a gambling raid at Gunnison (Feb 15 1911) and a race war for a time seemed imminent

The state suffered from floods in the spring of 101. A dike at Greenville burst April 12th and about 1,300 sq m in the lower Yazoo district was inundated

There was a serious strike centering in the state on the Yazoo & Mississippi Valley Railroad A federation of railway employees in June 1911 demanded recognition, not merely in Mississippi from the 'Harriman' lines. Of the 9 unions included in the federation, 7 had contracts which called for 30 days' notice before action on change in relations, the officials of the railway, on this ground refused to recognise the federation. The men went out, September 25 1911, and there was violence at Vicksburg and Mc Comb City, when new men tried to work, so that the militia had to be called out. No settlement of the strike was made in 1911 or 1912.

The state supreme court on December 10 1912 ruled that the "Jim Crow" law (for separate cars for negroes) applies to through sleeping cars as well as day coaches

¹ The other senator from Mississippi is John Sharp Williams (b. 1854 representative in Congress 1893–1909 minority leader 1903–09) He succeeded for 1911–17 Hernando de Soto Money (1839–1912) senator from 1897 to 1911 who died on September 18 1912

MISSOURI 1

Population (1910) 3 293 335 (6% more than in 1900) Negroes made up 4 8% (5 2% in 1900), native whites 88 2% (87 9% in 1900), and foreign born whites 6 9° 0 (unchanged) Density to the sq m 47 9 (11,262 8 in St Louis) The urban popula tion (in 62 municipalities of 2,500 or more) made up 42 5% of the total (in 1900 50 cities made up 36 3%) there was a decrease from 53 7 to 46 6% in the purely rural population There were 27 municipalities of 5,000 or over, as follows St Louis 687,029 (575,238 in 1900), Kansas City, 248 381 (163,752 in 1900), St Joseph, 77 40, Springfield 35,201, Jophin, 32 073 Hannibal, 18 341, Sedalia, 17 822 Jefferson City 11,850, Webb City, 11,817, Moberly, 10,923, Independence 9 859, Columbia 9 66. Carthage 9 483 St Charles 9,437, Cape Girardeau, 8 475, Wellston 7 312 Nevada 7 176, Webster Groves 7 080 (1,895 in 1900), Poplar Bluff 6 916 Kirksville 6 347 Chillicothe 6,265 Mexico 5 939 Brookfield, 5 749, Trenton 5 656, Lexington 5 24 Fulton, 5,228, Flat River, 5,112

Agriculture.—The acreage in farms increased from 33 997 873 to 34 591 248 between 1900 and 1910 the improved land in farms from 22 900 043 to 24 581 186 the average farm acreage from 119 3 to 124 8 and the value of tarm property from \$1 033 121 897 to \$2 052 917 488 (\$1 445 982 389 land \$270 221 997 buildings \$50 873 994 implements and \$285 839 108 domestic animals) Of the land area 78 6, was in farms. The average value of farm land per acre was \$41 80. Farms were operated largely by owners (192 285 by owners 2 001 by managers and 82 958 by tenants). In 1912 (preliminary estimates) the principal crops were. Indian corn. 243 904 000 bu. (7 622 000 A.) wheat 23 750 000 bu. (1 900 000 A.) oats 37 125 000 bu. (1 125 000 A.) barley 149 000 bu. (6000 A.) rije. 222 000 bu. (15 000 A.) buckwheat 30 000 bu. (2 000 A.) barley 149 000 bu. (95 000 A.) hay 4 143 000 tens (3 187 000 A.) cotton 59 000 bales (267 lbs. per A.) tobacco. 6 000 000 lbs. (6 000 A.) flaxseed 72 000 bu. (12 000 A.). In 1909 (U. S. Census) the value of vegetables (excluding potatoes) was \$8 268 281 of small fruits. \$1 761 409 of orchard fruits. \$6 582 578 (apples. \$4 885 544 peaches and nectarines. \$1 110 550). On January 1 1912 there were on farms. 1 095 000 horses, 333 000 mules. 822 000 milch cows. 1 504 000 other neat cattle. 1 755 000 sheep and 4 491 000 swine. In 1912 the agricultural experiment station pursued various studies of Indian corn and of hog cholera and continued its rotation experiments conducted for more than twenty years on the same field. With the Federal department of agriculture it co-operates in investigations of farm management.

Mineral Products.—Total value. 1911. \$52 636 348. Of greatest importance were. Agriculture.-The acreage in farms increased from 33 997 873 to 34 591 248 between

for more than twent? years on the same field With the Federal department of agriculture it co-operates in investigations of farm management

Mineral Products—Total value 1911 \$52 636 348** Of greatest importance were lead 182,207 tons (\$16 398 630) being about 95% of the total output in 1911 of the Central States and zinc 127 540 tons (\$14 539 560) more than from any other state. About five sixths of the lead comes from central and S. E. Missouri and almost all the zinc from the S. W. part of the state. From the lead ores of S. E. Missouri there was recovered 49 100 oz of silver (\$26 500) and 640 411 lbs. of copper (\$80 051 nearly seven times as much as in 1910). The coal mined in 1911 was 3 760 607 tons (\$6 431 066). Clay products almost all brick and tile were valued at \$6 274 353 and sand and gravel at \$1 042 674, ranking the state 4th. Mineral waters, bottled at 24 springs were valued at \$86 747. The value of natural gas was only \$10 496 and that of barytes—of which more is found here than in any other state—\$81 380. In 1911 new deposits of tripoli were found at Stella about 25 m. E. of Seneca, where deposits had already been worked.

Manufactures—In 1904—09 the number of establishments increased from 6 464 to 8 375 the number of persons engaged in manufacturing from 156 585 (133 167 wage-earners) to 185 705 (152 993 wage-earners) the capital from \$379 369 000 to \$444 343 000 and the value of products from \$449 549 000 to \$574 111 000. The most important industry was slaughtering and meat-packing (\$79 581 000). In the manufacture of boots and shoes Missouri ranked 2nd (4th in 1904 8th in 1899) with a product of \$48 751 000. Other important manufactures were flour and grist mill products \$44 508 000 printing and publishing \$29 651 000 malt liquors \$27 447,000 lumber and timber \$23 261 000 men s clethage, \$15 407,000 foundry and machine shop products \$44 508 000 printing and wagons, \$8,460,000; copper tin and sheet iron \$7 827 000 and patent medicines \$7 639 000. St. Louis was by far the most importan

Government — The legislature met January 4 to March 20, 1911 On February 5th the state capitol building (built 1838) was struck by hightning and burned. At a special election the people on August 1st voted (144 644 to 45,468) an issue of \$3,500,000 in 13 year bonds to rebuild the capitol on nearly the same site. Tracy, Swartwout & Linch field of New York were chosen architects on October 7, 1912

The following constitutional amendments were submitted by the Tegislature for vote by the people in November 1912, to provide that free public education must be furnished for children between 5 and 5 and for those over 20—defeated, 367 032 votes to 207 298 two amendments changing municipal limits of indebtedness both defeated, one to change the qualifications for electors by omitting the clause in the constitution of 1875 which permitted males of foreign birth to vote if they had declared intention of becoming citizens of the United States,—defeated 378 263 to 172 140 and one empowering the legislature to provide for registration of voters in St. Louis county (defeated, 385,698 to 151 694). Four constitutional amendments proposed by initiative were defeated, one changing the tax system so that land and franchises only would be taxable after 1919 (508,137 votes to 86 647) one substituting a tax commission appointed by the governor for the state board of equalisation (475 151 to 96 911) one revising the election and registration law (548,495 to 197 643), and for a one mill tax for schools (401,843 to 154 952)

The legislature ratified on March 16th the proposed amendment to the Federal Consti

tution providing for an income tax.

The supreme court was authorised to appoint four commissioners to assist it in preparing statements of fact and opinions and to sit with it when required Ballots for primary elections are no longer to have names arranged alphabetically but in rotation in different districts so that the advantage of position on the ballot will not be everywhere the same

In factory mechanical or mercantile establishments including laundries and workshops no woman is allowed (or suffered) to work more than 9 hours a day or 54 hours a week. The working day for children under 16 is limited to 8 hours (not between 7 P M and 7 A M) and a working week to 48 hours. Children under 15 may be engaged only in agricultural and domestic service. Boys under 10 and girls under 16 are not allowed to sell on streets or in public places. The act strikes out the previous exemption of children from school attendance if it is shown that a child's labour is absolutely necessary for the family support.

attendance if it is shown that a child's labour is absolutely necessary for the family support. Express companies are required to post schedules of tariffs and are placed under the supervision of the board of railroad and warehouse commissioners, which also fixes railway passenger rates. The liability of common carriers may not be limited by contract. The state anti trust law was upheld. April 1 1912 by the U.S. Supreme Court in an appeal on the ouster of the Standard Oil Company and Republic Oil Company. In November 1912 there was an ouster against the International Harvester Company. The adulteration and misbranding of foods was forbidden and provisions were made for the sanitation of bakeries canner ies packing houses and other establishm into producing foods. False statements tending to injure bank trust or guaranty companies are punishable by a fine of \$1000 imprisonment in the county jail for one year or less or by both. The law permitting third class cities and special charter cities to erect and own public utility plants was extended to include fourth class cities and towns and villages under special charter with a population less than 30 000. The legislature of 1911 appropriated \$5,000 for a monument to General Sterling Price in Price Memorial Park Keytesville and \$1000 for a monument to him in Riverview Park, Hannibal 1 for this monument Frederick C. Hibbard of Chicago was chosen as sculptor The contract for the latter monument calls for its completed by June 1 1913 and the former is expected to be completed during the summer.

former is expected to be completed during the summer

In St Louis an ordinance of March 27 1911 created a city plan commission succeeding the (unofficial) city plan association which was the outgrowth of a committee of the Civic League of St Louis. In 1912 the commission reported favourably on a central traffic parkway to be built by the city after condemnation of blocks bounded by Market, Chestnut and Twelfth streets and Jefferson Avenue it began work on a report on the river front St Louis in November 1912 adopted a charter amendment (62 359 to 41 243) for imitative and referendum

In 1911 the city established a municipal reference library

In Kansas City the board of public welfare has a research bureau which has charge of the charities registration bureau the charities endorsement department and of the sociological library and museum. It has published a Report on Housing Conditions.

Finance—In 1911 a paragraph on the incorporation of mortgage loan companies to be under the supervision of the Bank Commissioner was added to the law in regard to banking

¹ His early home was presented to the city of Hannibal May 15, 1912

companies. The balance in the treasury on January 1 1911 was \$1 829 546 receipts for the calendar year \$7 598 067, disbursements, \$7 388 902 and balance on January 1 1912 \$2 038 712. The state debt was \$284 000 capifol building bonds and \$4 398,839 school fund certificates.

Education—For public schools the legislature appropriated one-third of the ordinary revenue paid into the treasury for the fiscal years July 1 1910—June 30, 1912 and for higher education for 1911 and 1912 \$2 352 975 Pupils highing more than half a mile from a public school are to be carried to school free if the board of directors in the district approves. Boards school are to be carried to school free if the Doard of directors in the district approves. Boards in cities with more than 55,000 inhabitants and less than 500 000 (that is St. Joseph and Kan sas City) may erect public libraries art galleries, museums and auditoriums even though these are not used strictly for school purposes. School districts may issue bonds to erect library buildings. The requirements for teachers certificates were raised in 1911. In October 1912, he General Education Board gave \$75,000 to Central College at Lafayette. In 1912 the total population of school age was 958.623, the total enrollment 696.893, the average daily attendance 488.619, the average length of the school term 155.4 days total when the school term 155.4 days total

school revenue \$77,101 000, and expenditures \$14,200 000

The percentage of illiteracy in 1910 of population 10 years and over was 4.3 (6.4 in 1900)

Penal and Charitable Institutions— he labour of convicts by a law of 1911 is not to be let farmed or sold convicts are allowed to work in the binding twine plant and in manufacturing for state institutions supplies which are not to be purchased elsewhere if it is possible for convict labour to supply them. A law of 1911 allows counties with a popula tion of 250,000 to 500,000 (Jackson county including Kansas City was the only one in this class) which have a juvenile court to appropriate not more than \$12,000 a year for the support of mothers (of children under 14) who are widows or whose husbands are prisoners and who would otherwise have to work away from their children Cities of 500 000 or more (St. Louis only in 1910) may create a board of children's guardians to manage public institutions of the city for delinquent dependent or defective children. Juvenile courts for children under 17 were established in counties with a population of 50,000 or more Tuberculosis hospitals are to be established in special districts called Tuberculosis Hospital Districts In June 1911 two tuberculosis hospitals (for men and for women) were opened at the State Hospital at Nevada in June 1912 one was opened at Fulton Buchanan county voted for a hospital in November 1912 and in the same month in Kansas City, in accordance with an appropria

tion of \$50 000 made in 1911 a site was chosen for a city hospital

History — The legislature, being strongly Democratic chose (Jan 18 1911) the nominee of the Democratic primaries (over David R Francis) James A Reed (b 1861 Reform Democratic mayor of Kansas City 1900-04) as United States senator to succeed Wilham Warner (b 1840, Republican, representative in Congress 1885-80) whose term expired March 4 1911 Herbert Spencer Hadley (b 1872) Republican governor in 1909-13 was at one time suggested as a compromise" Republican candidate for the presidency 1 In the National Republican convention2 he was considered the ablest and fairest of the speakers for Roosevelt but eventually he refused to join the new Progressive party, definitely announced himself for Taft (Oct 3 1012) and after the death of Sherman was the choice of most of the Republican National committeemen to succeed him on the Taft ticket for vice president. In the contest for governor the Republicans in the state nominated John C Mckinley heutenant governor in 1905-09 whose suggestion in the party platform to use convict labour in printing school books roused the opposition of labour unions and publishers but he was defeated by Elliott W Major (b. 1864) Democrat, attorney-general of the state in 1009-13 ceived more votes than McKinley (Rep.) and A. D. Nortom (Prog.) together while McKinley received about twice as many votes as Nortoni (Major 337,010 McKinley The entire Democratic state ticket was elected,—an un 217,819 Nortoni, 100,146) usual thing in the state, where Hadley had some Democratic administrative officers and a Democratic majority in the legislature and Folk was the only Democrat on the state ticket elected in 1904 The next legislature will be composed of 25 Democrats and 9 Republicans in the senate and 113 Democrats, 28 Republicans and 1 Progressive in the house. There were no Progressive candidates for Congress and the delegation of 16 will have 14 Democrats and 2 Republicans (m 62nd Congress, 3 Republicans 3 all from

Hadley's predecessor as governor. Ioseph Wingate Folk (b 1869) Democrat was considered a possible Democratic candidate but withdrew (Feb 10 1912) in favour of another Missourian, Champ Clark.

Eight delegates for Roosevelt were seated by the National Convention after contests
One of these, Theron E. Cathin, was unseated (August 12th) by a partisan vote of the

St. Louis) Woodrow Wilson carned the state with 330,746 votes to 207,821 for Taft 124,371 for Roosevelt and 28,466 for Debs (15 43t in 1908).

In 1911 there were two lynchings in the state on the same day (Oct 17th) at Caruth ersville, where a negro suspected of tobbery and one accused of an assault were taken from jail and shot

The state suffered greatly from the terrible flood of the Mississippi and Missouri rivers. About 700 sq. m in the Upper St. Francis Basin were mundated and New Madrid was entirely cut off in April 1012

In St Louis a joint committee on public morals representing 30 organisations, recommended late in 1912 after an exhaustive investigation the creation of a permanent commission to fight the social evil. In November 1912 charter amendments for initiative and referendum were adopted but amendments for a bond issue for a free bridge and for an increase in salary of members of the municipal assembly were defeated. The League of Missouri Municipalities at its 5th annual convention (December 17, 1912) at St Louis adopted resolutions favouring the calling of a convention to revise the state constitution.

Agricultur—The acreage in farms increased from 8 344 454 to 13 545 603 between 1900 and 1910 and the improved land in farms from 1 7-5 7-0 to 3 640 309 the average farm acreage fell from 885 9 to 516 7 and the value of farm property increased from \$110 225 423 to \$347 885 770 (826 771 302 land \$24 854 628 buildings \$10 539 653 implements \$85 663 187 domestic ammals) Of the land area 14 5 was in farms in 1910. The average value of farm land per acre was \$16 74. Farms were operated largely by owners (23 365 by owners 505 by managers and 2 344 by tenants). In 1912 (preliminary estimates) the principal crops were Indian corn 612 000 bu (24 000 Å) wheat 19 346 000 bu (803 000 Å) oats 22 848 000 bu (476 000 Å) barley 1 424 000 bu (39 000 Å) re 235 000 bu (10 000 Å) potators 6 105 000 bu (37 000 Å) has 1 216 000 tons (640 000 Å) and flavseed 5 520 000 bu (460 000 Å). In 1909 (U.S. Cen us) the value of vegetables other than potators was \$928 906 of flowers and plants \$104 601 of nursery products \$174 427 of small fruits \$86 586 of orchard fruits \$609 078. On January 1 1912 there were on farms 347 000 horses 4 000 mules 91 000 milch cows 732 000 other neat cattle 5 011 000 sheep and 143 000 swine. In 1909 about one third of the farms of the state were irrigated (two-thirds in 1889) and

In 1999 about one third of the farms of the state were irrigated (two-thirds in 1889) and dry farming was used largely in Cascade Chouteau and Fergus counties. To 1910 the total cost of irrigation had been \$22 970 958 and the estimated final cost of evisting projects was \$32 407 452. Of hay and forage crops 58 was irrigated of oats 47 9 / and of barley 34 %. Of the Federal projects the Huntley (Yellowstone county) and the Lower Yellowstone (Dawson county) were practically completed in 1911–12 and irrigated respectively 12 000 acres (sugar beets cereals alfalfa) and 21 800 acres partly in North Dakota (wheat) the Milk River 15 5 % completed irrigated 2 000 acres and the Sun River 9 % with 7 170 acres. The Flathead project in 1912 was 15 % completed the Little Portupare unit of the Fort Peck project was practically completed and of the Blackfeet project the Two Medicine unit was 73 % completed the Badger Fisher unit 25 % and the Piegan unit 33 5 % The U S department of agriculture established in 1911 an experimental farm on the Huntley of the project was practically to the State of
The US department of agriculture established in 1911 an experimental farm on the Huntley reclamation project the bureau of entomology has worked successfully to control the bark beetle pest near Columbia Falls and this bureau the biological survey and the state agricultural experiment station in 1912–12 studied the origin of the spotted fever, so danger

House on the recommendation (July 19th) of the Committee of Elections because he spent \$13,000 in his campaign, \$662 being the maximum under the state law

ous to domestic sattle and to man in the Bitterroot Valley and discovered that the tick which carries it infests most frequently the ground squirrel (Citellus columbianus) which is besides a pest in the grain fields. The state has 19 demonstration dry farms and two sub stations for firy farm work and one horticultural sub-station. A state board of poultry husbandry was established in 1911. For 1912 the legislature appropriated \$22 500 for the experiment station and \$20 000 for dry land farm demonstration work.

Mineral Products — Total value 1911 \$53.454 926 In copper the state ranked 2nd to Arizona, with 271 814.491 lbs. Second in importance were silver (12 163 900 oz) and gold (176 554 oz) together valued at \$10 218 200 The output of zinc was 22 115 tons (40° more than in 1910) of lead 2 499 tons (more than double that of 1909) and of coal 2 976 358 tons (\$5,342 168) New deposits of phosphate rock were found in 1911 in the SW part of the state. Graphite property near Dillon Graphite county was being developed Manufactures — From 1899 to 1909 the number of establishments increased from 395 to

Manufactures — From 1899 to 1909 the number of establishments increased from 395 to 677 wage-earners from 9 854 to 11 655 invested capital from \$38 225 000 to \$44 588 000 and value of products from \$52 745,000 to \$73 272 000 The principal manufactures were copper smelting 2nd refining products (not valued separately) lumber and timber \$6 334 000 (102 9 % more than in 1904) car construction and repairs by steam railway companies \$2 811 000 malt liquors \$2 440 000 flour and grist milling products \$2 175 000 and slaugh tering and meat packing products \$2 054 000 The largest manufacturing centres were Butte \$2 464 000 Creat Falls with large copper smelters Helena \$1 303 000 Billings \$1 243 000 and Missoula \$1 171,000

Transportation - Railway mileage January 1 1912 4 360 72 Hauser Lake Dam across the Missouri 18 m. below Helena was completed May 21 1911

Legislation - The 12th regular session of the legislature was held from January to March 2, 1911 The proposed 16th amendment to the Federal Constitution providing for a Federal income tax was ratified on January 31 The legislature memorialised Congress for a constitutional convention which should recommend an anti-polygamy clause in the Federal Constitution urged an amendment to the Federal Constitution providing for the direct election of United States senators and asked for the opening to settlers of the Crow Indian Reservation and for the segregation of agricultural lands in national forest reserves. The Oregon plan of direct vote for United States senators and for pledging state legislators for the choice of senators was adopted. The legislature ceded to the United States Glacier National Park, created the country of Musselshell from parts of Fergus, Meagher and Yellowstone counties, making Roundup the temporary country seat, and established a fish hatchery (partly built in 1912) near Somers Flathead country. An elaborate law for the registration of voters was passed

The use of the third degree or of torture in obtaining confessions from prisoners was forbidden. Common councils of first or second class cities must (others may) provide free employment bureaus. Eight bours was made a working day except in emergency for men in underground mines or tunnels. A new coal mining code raised the requirements and in creased powers of coal inspectors and included provisions for safe guarding the lives and health of miners. At the October 1911 term the state supreme court declared unconstitutional the coal miners compensation act passed by the legislature of 1909. The liability of railways for the death of their employees was increased contributory negligence is no longer a bar to recovery but damages may be diminished therefor there is no assumption of risk if the accident happens through the negligence of an employee or of a fellow employee and hability may not be avoided by contract. The secretary of the bureau of child and animal protection was authorised to appoint a deputy for each of the six more important cities.

The penalty for the white slave traffic was made imprisonment from 2 to 20 years in the

The penalty for the white slave traffic was made imprisonment from 2 to 20 years in the state prison or 3 fine of \$1 000 to \$5 000 or both imprisonment and fine. A statute forbids the drinking of intoxicating liquors on passenger trains except in buffet sleeping and dining cars. No city or county may issue more than one licence for every 500 inhabitants except that two saloons may be heened in any city or town. In unincorporated cities or towns saloons are not to be open between I A.M. and 6 A.M. A statute forbids the sale and manufacture of adulterated fungicides and insecticides and all misbranded or adulterated food and drugs and regulates the sale of dairy products. The offices of state fire marshal and state scaler of weights and measures were created. Teachers in public and parochial schools must instruct their pupils in the danger of fire and a state text book was authorised for this purpose. Cities may adopt the enumission form of government (with provisions for recall for referendum and initiative for nomination by petition and for strict civil service regulation) at an election after a petition by 25% of the electors. Missoula adopted the commission plan May 26 in effect July 27 1911. On May 14, 1912 Polson adopted it in effect July 20th

and margine for quantation by perition and for safety as evide regulation) at a receiving after a petition by 25% of the electors. Missoula adopted the commission plan May 26 in effect July 27 1911. On May 14 1912 Polson adopted it in effect July 20th Figure — For 1911 and 1912 there was a levy of 2% mills for general state purposes and of 4 mills for state sinking fund. A hience tax of \$100 was levied on every sleeping car operated within the state. Unincorporated banks must be examined by the state examiner

and the commissioner of insurance may examine into the affairs of any insurance concern and and the commissioner of instructions of the standard of the st

Education—In 1911 manual and industrial training was made a part of the public school curriculum and school districts with a population greater than 5 000 must (others may) establish one manual training school. A commission was appointed in 1911 to codify the school laws of the state. A law school was established (and opened in 1911) at the University of Montana and \$5 000 was appropriated for a biological station at the university this was opened in the summer of 1912 The percentage of illiteracy in 1910 of the population 10 years and over was 4 7 (6 I in 1900) For the year ending August 31 1912 the school population was 98 687 enrollment 68 335 average daily attendance 49 330 length of the school

year 7 months revenue for school purposes \$4,966,756 and expenditures \$3,519,933
In 1912 Edwin Boone Craighead (b. 1861) president of Tulane University of Louisiana since 1904 was chosen president of the University of Montana

Penal and Charitable Institutions—By a law of 1911 district courts have jurisdiction as juvenile courts county committees on juvenile improvement appointed by the court confer on juvenile cases A state tuberculosis sanitarium—especially for miners consumption—was established and also an institution at the state insane asylum at Warm Springs to cure persons suffering from mental affliction caused by the use of drugs or intoxicants

History —There was a long legislative deadlock over the election of a United States senator to succeed Thomas Henry Carter 1 Republican The legislature was Demo cratic on joint ballot (by 6 votes) but Carter's political influence was so strong that he came near re election The deadlock was broken March 2 by the choice on the 19th ballot of Henry L. Meyers (b. 1862) Democrat and district judge. In November 101. the state was carried by Woodrow Wilson who received 28 230 votes to 18 404 for Taft (who had carried the Republican primaries in May) 22 448 for Roosevelt (who was supposed to be bitterly opposed by the Amalgamated Copper Company a great influence in the state) and 10 808 for Debs (5 855 in 1908) The two congressmen elected are Democrats and the legislature with a Democratic majority of 25 on January 14 1913 elected Thomas James Walsh Democrat of Helena United States senator to succeed Joseph Moore Dixon (b. 1864) who was the manager of the Progressive party's campaign for the election of Roosevelt and who received less votes in the November election than Judge H C Smith the Republican candidate The whole Democratic state ticket was elected with Samuel V Stewart as governor receiving 25 375 votes to 2 800 for Harry L Wilson (Rep.) and 18 858 for Frank J Edwards (Prog.)

In Butte a socialist was elected mayor (1 834 plurality) and 5 (out of 16) councilmen of the same party were elected April 3 1911 and the Socialist mayor of Butte Lewis I Duncan running for governor received more votes than Debs On the eve of election in November 191 there was a riotous attick on the governor and on the Democratic candidate for governor after a Socialist demonstration

The Federal Supreme Court (Quong Wing v Kirkendall January 22, 1912) decided that on the grounds on which the test was brought there was no unconstitutionality in a law taxing hand laundries employing less than two women the ground that the law was aimed at the Chinese was not urged

The confessed murderer of a woman was lynched at Forsyth, April 18 1912 Bibliography - Laws Resolutions and Memorials (Helena 1911) other official documents notably Montana (stid 1912) issued by the Bureau of Agriculture etc

Mineral Products — Total value 1911 \$1 316 168 Clay is the only mineral product of majortance and in 1911 the value of clay products was \$795 894 Linestone was valued at \$263,501 and sand and gravel at \$156 777

mportance and in 1911 the value of clay products was \$795.894 Limestone was valued at \$263,501 and sand and gravel at \$156.777

Manufactures — From 1904 to 1909 the number of establishments increased from 1.819 to 2.500 and that of persons employed from 25.356 (20.260 wage earners) to 31.966 (24.336 wage-earners) capital invested from \$80.235.000 to \$99.901.000 and the value of the product from \$154.918,000 to \$199.019,000. The principal manufactures were slaughtering and meat packing products \$92.305.000 (46.4% of the state s total and ranking Nebraska 4th in this industry) flour and grist mill products \$17.836.000 butter cheese and condensed milk \$7.681.000 (130.9% more than in 1904) mostly butter car construction and repairs by steam railway companies \$4.642.000 malt liquors \$3.335.000 (100.4% more than in 1904) foundry and machine shon products \$2.020.000 lumber and timber products \$0.021 1904) foundry and machine shop products \$2 930 000 lumber and timber products \$2 021 000 The principal manufacturing cities were South Omaha \$92 436 000 chiefly slaughter ing and meat packing (96.9% of the state s product) Omaha \$60 855 000 Lincoln \$7 010 000 and Grand Island \$1 837 000

Transportation - Railway mileage on January 1 1912 6 223 17

Legislation — The regular session of the legislature was held from January 3 to April 6, 1911 It re districted the state into 28 senatorial and 77 representative districts The legislature submitted several constitutional amendments to popular vote in Novem ber 1912 for initiative and referendum both statutory and constitutional, which was adopted by 189,200 to 15 315 votes, changing the pay of members of the legislature to \$600 a year (formerly \$5 a day) and 100 a mile for mileage and providing that no bills shall be introduced after 20 days (formerly 40 days) of the 60-day session had elapsed, except on the recommendation of a message from the governor—adopted, 1/3 225 to 26,355 creating a board of commissioners for state institutions—adopted, 174,039 to 25,439 and for biennial instead of annual general elections—adopted 174 151 to 25 048 The legislature ratified the proposed income tax amendment to the Federal Constitution on February 11 1911 and it sent a resolution to Congress asking for an amendment to the Federal Constitution prohibiting polygamy An important primary law was enacted which provided a method of electing delegates to National Conventions and a method of preferential voting for presidential and vice-presidential candidates. The governor was anthonsed to appoint a code commission to report a new code for 1913 The 12th of October was hinde a legal holiday as Columbus Day

: Trainments amorbing hours are limited to 16 in succession to be followed by 10 hours off if any trainman is busy 16 hours not in succession within a period of 24 hours, he must have 8 hours off before he is on duty again Train dispatchers must work not more than 9 hours

Acts were passed to protect workmen on buildings, and for the sanitation of fac tories where eight or more workmen are employed and employers who do not comply with

these acts are held to strict hability for injuries or death of employees

All schools are required to observe the first Friday in November as State Fire Day and
teachers must give at least 30 minutes in each school month to instruction in the danger of A hotel commission insures the comfort and protection of guests and the law provides for individual towels for all guests for bed sheets 99 inches long att. The food, drug and dairy commission was reorganised. It was made unlawful for minors under 18 to smoke tobacco in any form. Houses of ill fame are declared a nuisance, and the act provides for the abatement thereof on a permanent injunction for maintaining such a nuisance a tax of \$300 is assessed on the building and on the ground Pandering is made punishable by imprison ment in the county jail from six months to a year by a fine of \$1 000 or less or by both and a second offense by imprisonment from three to ten years in the penitentiary testimony is competent against her husband and marriage is not a defence A wife a

Cities of 5 000 or more under a constitutional amendment (adopted November 5 1912 by 164 579 to 32 041) may frame their own charters. They may by statute adopt commission form of government. A special election is to be called on the petition of 25 % of the voters but if the commission plan is not adopted at this election, the proposal may not be re-submitted within two years. Omaha adopted commission government on September 2 1911 (5 477 to 2 294 votes—out of a voting population of nearly 25 000) the first effection was held May 7 1912 and the commissioners took office on May 14th Commission government was adopted by Beatrice October 4 1911 in effect April 8 1912 Nebraska City January 16 1912 in effect April 8 1912 and Lincoln April 19 1912 (1 982 votes to 1 911) in effect May 1913 Grand Island voted against it March 19 1912

Finance—The state banking law was amended in 1911 The occupation tax for corpora

tion, was revised the tax to be \$5 a year if the capital stock is \$10 000 or less and \$200 if \$2 000 000 or more The organisation of trust companies in the state was authorised the requisite capital is scaled to the population of the city in which the company is to do busi nes and pecified security d posit mu t be made with the tate auditor. On December 1 1910 there was a balance of \$601 290. The total receipts for the two years ending Novem

ber 30 1912 were \$10 862 142 and the expenditures \$10 890 122 leaving a balance of \$575,510

I ducation —In 1911 the legislature appropriated \$15,000 to enable all districts levying a maximum school tax to have a five month school term. The method of instruction in the State School for the Deaf was changed to the oral or lip reading method. A raggirulture was established and in 1911–12 was built at Curtis. Frontier county A new school of So that the course in the medical college may be given entirely at Omaha (instead of two years at Lincoln and two years at Omaha) an appropriation of \$100,000 was made for a laboratory building in Omaha The legislature created a legislative reference bureau including a special depart ment on municipal affair to be affiliated with the department of political science and sociol ogy and with the college of law of the State University. It is to give instruction and furmsh facilities for training in legislative reference to students of the university

In illiteract in 1910 of the population 10 years and over the percentage was 1 9 (2 3 in 1900)

ranking the state third from the lowest (lows 17 Oregon 189 a)

For the year ending July 1912 the school population was 381 194 the enrollment 285 220
the average daily attendance 213,488 the average school year 146 days receipts for schools
810 461 720 and expenditures \$8 757 288

Charitable and Penal Institutions —The juvenile court law was amended in 1911 and a

A law for an indeter The 2nd of September board of control for dependent and neglected children was created minate sentence gives paroles to the charge of the state prison board. The 2nd of September the birthday of John Howard is made a legal holiday in all penal and reformatory institutions and is to be called. Howard's Day. A state hospital for the indigent tuberculous was opened at Kearney in January 1912. In the state penitentiary a deputy warden was falled by a convict on February 11 1912 and on March 14th the warden a deputy and an useer were murdered by three escaping convicts, two of whom were killed resisting capture. In vestigation showed that appropriations had been small, that the office of warden had been a political gift that prisoners credits had been exchanged for cash, and that there had been a regular trade in liquor drugs etc 1

History-In 1911-12 the state had a Democratic legislature but the governor, Chester H Aldrich, and administrative officers were Republican On January 17, 1911, as United States senator to succeed Elmer Jacob Burkett (b 1867 Republican, representative in Congress, 1899-1905, U S senator, 1905-11), the legislature elected Gilbert Monell Hitchcock (b 1859 Democrat editor Omaha World-Herald, representative in Congress 1903-05, 1907-11), whose father Phineas W Hatchcock (1831-81) was senator from Nebraska in 1871-77 he was chosen by primary vote (Nov 1910) and some Republican legislators voted for him who were pledged to follow the primary choice.

See a paper by Judge Lincoln Frost in the March 19 1912 Nebraska State Journal

In the Dumocratic party there was a split on the liquor question, a county option law. resembling that urged by William Jennings Bryan, was defeated in the state senate in Exhruary 1911, by a single vote But in the state convention many party differences were glossed over and Mr Bryan's followers did not insist on an endorsement of him by the state platform 1 In the Republican convention the Taft followers, fearing an open declaration for LaFollette, did not force the issue of re nominating Taft In the pri manes Clark received 21,027 votes to 14,289 for Wilson and 12,454 for Harmon, and Roosevelt, 46,795 to 16 785 for LaFollette and 13,341 for Taft Governor Aldrich was one of the seven state governors who voiced the call for Roosevelt's candidature, and the state Republican primaries were carried by Roosevelt over Taft Norris Brown (b 1863 state attorney-general, 1904-06, U S senator 1907-13) was defeated for renomination at the Republican primaries by a member of the more Progressive wing George William Norris (b 1861, representative in Congress, 1903-11) who received in November on the preferential vote for senator 126 022 votes to 111,946 for the Democratic nominee, Ashton C Shallenberger (b 1862 governor 1909-11) Norris was chosen by the legislature, January 21, 1913 Larly in September the Progressives decided not to run a separate state ticket 2 but in spite of this governor Aldrich was defeated by the Demo cratic nominee, John H. Moorehead president of the state scrate who received 123,097 votes to 114 075 for Aldrich The state senate will be Republican the lower house Democratic, on joint ballot the Democrats will have a plurality of 5 The failure of the Republicans to "spht" lost the Democrats two seats in Congress, the new delegation will be 3 Democrats and 3 Republicans,—that of 1911-12 was 3 Democrats and 1 Republican. Woodrow Wilson carried the state with 109 008 votes to 54 16 for Taft, 72 689 for Roosevelt and 10 185 for Debs (in 1008 1 524)

There was one lynching in the state in 1911 (June 19th) at Valentine where a white

man was killed after a quarrel with cattlemen over land rights

The state supreme court October 23 1912 decided that only the Taft electors could appear on the official ballot as Republicans. In the 6th dustrict, the Progressive nominees for Congress polled only 84 votes (out of more than 50 000)

Elsewhere Republican nominees were Republican and Progressive and Democratic were Democrat and Progressive Independent

See B B xix 450 et seq-

tion enterprises to July I 1910 was 6 271 924 and the estimated final cost of improvements begun was \$12 188 756 Of cereals 96 5% by acreage in 1909 was grown on irrigated land and of Indian corn 91 6 / of oats 92 8 % of barley 98 2 %, if the 1909 was grown on irrigated land and of Indian corn 91 6 / of oats 92 8 % of barley 98 2 %, if the 1911 a new state code was adopted for the organisation and government of irrigation districts. The Truckee-Carson project (see E B xix 452b) was 72 % completed in 1912 and in 1911 irrigated 34 000 acres mostly in alfalfa At Fallon in the district irrigated by this project, a large beef sugar factory opened in 1911. The legislature of 1911 appropriated \$12 000 for a state agricultural experiment farm. The U S department of agriculture has an experiment station of the Truckee-Carson reclamation project

Mineral Products—Total value 1911 \$34 148 101 The largest items were gold 875 438 oz (\$18 096 900 more than in 1910) ranking the state 3rd silver 13 185 900 oz (\$7 120 400) and copper 65 561 015 lbs ranking the state 5th Copper production from the Verington district of Nevada began early in 1912. The output of zinc was 1 595 tons

mostly from Clark county In the I ake Lahontan district at Fallon deep drilling for potash salts was begun in 1911 but there were no important discoveries

Manufactures — The total value of products in 1909 was \$11 887 000 (283 9 °, more than in 1904) the capital invested \$9 807 000 (239 1 % more than in 1904) the number of establishments. lishments 177 and the number of persons engaged in manufacturing 2 650 Car construction and repairs by steam railroads was first in value \$1 033 000 second flour and grist mill products \$598 000 Reno had a factory product of \$1 862 000 Transportation—Railway mileage January 1 1912 2 207 63

Legislation - The state legislature met in regular session from January 16 to March 16 1911, and there was a special session February 23-29 1912 On February 18 1911 the legislature approved the proposed Federal income tax amendment The legislature urged the adoption of an amendment to the Federal Constitution calling for a direct vote for United States senators The following constitutional amendments were adopted by popular vote in November 1912 for initiative and referendum on a petition signed by 10% of the voters (9.956 to 1.027) for the recall of any public officer six months in office at an election called on petition signed by 25% of the qualified electors (9.636 to 1 1,3), allowing the attorney general or district attorney to cause an arrest on informa tion without action of the grand jury (8 239 to 1,504), and permitting women to be notaries (8 603 to 2,241)

The primary law was amended a single registration is required for primary and regular elections and on primary ballots all parties must appear on the same ticket. The signature of each voter is required in registration. Candidates for the legislature are required (as in Oregon) to promise whether they will follow implicitly or regard merely as a recommendation the people's choice at the primary for United States senator.

A state bureau of industry agriculture and irrigation was created it is required to advertise the state to study industrial problems and control the Carey Act lands. The railroad commission was made a public service commission. In 1911 the legislature requested the commission to take action to reduce the evorbitant express rates in the state but no accident compensation law (compulsory) for especially dangerous trades was passed suits for damages are permitted in lieu of compensation—special contracts are forbidden—the bur den of cost is on the employer no compensation is allowed unless the disability continues more than 10 days the compensation for death is three years earnings not less than \$2 000 nor more than \$3 000 and \$300 if the workman leaves no dependents For total disability it is 60% of the weekly earnings with certain specified increases for certain mainings, the maximum amount being \$3 000 contributory negligence is to be measured and the compensa tion reduced proportionally

Las Vegas formerly a precinct was incorporated as a city with commission government and provision for the recall of elective officers Mineral county (county seat Hawthorne) was created out of the northern part of Esmeralda county Yerington supplanted Dayton

as the county seat of Lyon county in 1911

A state board of health was established in 1911 The director of the Nevada agricultural

A state board of health was established in 1911 The director of the Nevada agricultural experiment station was made the official sealer of the state and treble damages are allowed to a sufferer by short weight. The sale of liquor is not to be heensed within 5 m of a construction camp and no house of ill fame may be within 800 yds, of a school house or church Financa.—Under the laws of 1911 the full value of property is to be assessed, leas mortgages deeds of trust or other obligations securing a debt, and these are to be assessed, the holder of the mortgage etc. Express companies are to be taxed and the cash value of their property and franchise is to be an amount on which the net profit for the preceding calendar year would pay a dividend of 8%. The accounts of state county and city officials are to be examined semi annually by expert accountants. A new banking act makes the

minimum capital \$25 000 requires every bank to have available funds amounting to 15% of its deposits and requires the limitity to be less than 25°, of the capital stock and surplus. The governor is to appoint a bank examiner. A law of 1901 requiring the acceptance and collection of grants and gifts to the state was repealed in 1911 because it was used as a gover for forcing the collection of repudated bonds of Southern states notably North Carolina. A constitutional amendment adopted in November 1912 (8,418 to 1 683) permits the investment of school funds in bonds of any county in the state

The cash on hand January I 1912 was \$322 065 receipts for the year \$1 269 432 expenditures \$1 212,469 and the balance on December 31 1912 \$579 028

Education — The legislature in 1911 adopted a code drafted in the main by a committee of the state teachers institute. The school tax rate was increased Nevada already spent more than any other state per pupil in public schools. School districts may borrow money on bonds to complete and equip schools for industrial training domestic science and agri-culture. Better provision was made for enforcing school attendance. A non partisan commuttee was appointed to prepare a law for free text books in public schools. A college of education has been established in the University of Nevada

For the school year 1912 the school population was 12 652 enrollment 12 403 length of the school year a little over 8 months receipts \$600 000 and expenditures \$587 508 In 1910

the percentage of illiteracy of the population 10 years and over was 6 7 (13 3 in 1900)

Charitable and Penal Institutions —State convicts may be detailed for work on roads and for each month of faithful work they are to receive an allowance of ten days extra time off and besides they are to receive 25c a working day. Among the appropriations were \$50,900 to the orphans home in Carson City and \$7,500 for the training of juvenile delinquents still carried on in institutions of adjoining states

History — The legislature, although Democratic re-elected (Jan 25, 1911) as United States senator George Stuart Nixon Republican, who carried the primary in November and whose Democratic opponent, Key Pittman had made with him a ' gentleman's agreement to abide by the results of the primary 5 191 and a week later Governor Tasker L Oddie (b 18,0 Republican) appointed pending election by the 1913 legislature first Nixon's business associate George Wing field who dechned, and then W A Massey, formerly chief justice of the state supreme court He was re nominated for election by the Republicans for the term expiring in 1917 Key Pittman being the Democrat candidate and Sardis Summerfield the Progres sive Pittman was chosen by the Democratic legislature. The other senator is a Democrat Francis G Newlands (b 1848 representative in Congress 1893-1903 and senator since 1903, prominent in reclamation legislation) whose term ends in 1915 There was no election for governor in 191. Oddie's term ends December of 1914 One Socialist was elected to each house of the legislature In the presidential campaign the delegates to the Republican National Convention were instructed for Taft and the state was carried for Woodrow Wilson by 7 986 votes to 5 605 for Roosevelt 3 190 for Taft and 3,313 for Debs. E. E. Roberts, Republican representative in Congress, was re-elected. The defeat of Judge William D Jones, a candidate for re election to the lower house of the legislature, may result in the repeal of his ' open door and 'time lock" law, requiring physical presence in the state (not intent) for divorce. If this law is repealed, Nevada, and particularly Reno, will no longer be a centre for the whole United States for securing divorces

In October 1912 there was a strike of miners at Ely beginning on the 2nd and end ing on the 28th with a victory for the strikers Martial law was proclaimed on the 17th Bibliography — Slatutes (Carson City 1911) departmental reports Agricultural Nevada p Francisco 1911), C. Agriculture—The acreage in farms decreased from 3 609 864 to 3 249 458 between 1900 and 1910 and the improved land in farms from 1 076 829 to 929 185, the average 1900 and 1910 and the improved land in larms from 1 076 879 to 929 185 the average farm acreage fell from 123 I to 120 I but the value of farm property increased from \$85 842 cop6 to \$103 704 bp6 (\$44 519 047 land \$41 397 014 buildings \$5 877 657 implements \$11 910 478 domestic animals). Of the land area 56 2 / was in farms. The average value of farm land per acre was \$13 70. Farms were operated largely by owners (24,493 by owners 681 by managers 1 879 by tenants. In 1912 (preliminary e-timates) the principal crops were Indian corn 1 058 000 bi. (23 000 A) oats 468 000 bi. (12,000 A) barley 28, 000 bi. (1000 A) buckwheat 31 000 bi. (1000 A) potatoes 2 380 000 bi. (17 000 A) hav 625 000 tons (501 000 A) and tobat co. 170 000 lbs (100 A). On January 1 1912 there were on farms. 16 000 horses 07 000 milch cow. 65 000 other neat cattle 43 000 sheep and may 628 000 tons (501 000 %) and tonated 170 000 his (100 %). On january 1 1912 there were on farms 46 000 horses 97 000 milch cow 65 000 other neat cattle 43 000 sheep and 53 000 swine. In 1909 (U.S. Census) the value of vegetables excluding potatoes, was \$1 071 551 (from 8 855 acres) of orchard fruits \$719 777 (apples \$637 990) of small fruits \$107 305 (strawberries \$68 552) and of maple sugar and syrup \$182 341. The decrease in acreage of cereals in 1899–1900 was more rapid than that in the acreage of vegetables.

Laws of 1911 provide for stricter protection of state forests and regulate the sale of concentrated commercial feeding stuffs. In 1911, the National Forest Reservation Commission recommended the purchase of 72 252 acres in Coos and Grafton counties for a national forest under the Weeks Act of March 1 1911.

Mineral Products—Total value 1911 \$1 727 645. The only large item is granite \$1 017 272. Clay products were valued at \$430 748. Mineral waters bottled at 6 springs including 1 resort were valued at \$139 130. In each of these items the total was less than the breedure very large. in the preceding year. In sev thestones the state ranked first. Other products were garnets used as abrasives mica and fluorspar

Manufactures - From 1904 to 1909 the number of establishments increased from 1 618 to 1 961 and that of persons engaged in manufacturing from 59 758 (65 366 wage-earners) to 84 191 (78 638 wage earners) capital invested from \$109 495 000 to \$139 990 000 and value of products from \$123 611 000 to \$164 581 000 The principal products were boots and shoes \$30 440 000 cotton goods \$33 602 000 woollen, worsted and felt goods \$16,731 ooo lumber and timber products \$15,284,000 paper and wood pulp \$13,904,000 flourdry and machine shop products \$4,947,000 hosterv and knit goods \$4,764,000 flour and grist mill products \$3,167,000 and marble and stone work \$1,818,000. The principal manufacturing cities were Manchester \$46,812,000 Nashua \$17,326,000. The principal manufacturing cities were Manchester \$46,812,000 Nashua \$17,326,000. Concord \$6,476,500 Dover \$6,370,000. Berlin \$5,896,600 Lacoma \$3,818,500 Keene \$3,483,000 and Portsmouth \$2,871,000 (not including \$1,153,000 from Kittery, Navy, Yard).

Tansportation—Railway mileage January 1,1912, 1,253,12 Freight rates in force were yardated upon the charge that the

were validated until July 1913 after an investigation had started upon the charge that the Boston & Maine railway with a practical monopoly of the rail traffic in the state was charg ing higher rates than in 1889 when a law forbade the increase of rates by roads uniting or consolidating thereafter. The Boston & Maine agreed to restore the previous rate if the kgislature granted it no relief On December 2 1912 the public service commission recom mended the establishment with the railway s consent of rational maximum rates the Federal government began work on improvements of the Exeter river and on improving Portsmouth harbour on the Maine side at Pepperclis Cove where the depth over the ledge is to be increased from 5 to 121 ft and the harbour depth from I-II to 12 ft

Government —A constitutional convention (called by the legislature in 1911) met at Concord in June 1912 and submitted to the people for their approval at the regular election in November 1912 twelve amendments to the state constitution received the requisite two thirds vote (1) Disfranchising and making ineligible for office anyone convicted of treason bibery or wilful violation of election laws unless restored by the supreme court, to which this amendment gives this power (22,383 to Making the election of the governor, councilors and senators by plu rality instead of majority vote (21 1 0 to 9 801) — this will render impossible a recur rence of the situation which arose in 1919 when no candidate was chosen at the popular election (see History below) (3) Empowering the legislature to give police courts origi nal jurisdiction to try criminal cases where the punishment is less than imprisonment in the state prison—subject to the right of appeal and trial by jury (18,506 to 8,201) and (4) Making the division of the state and of councilor districts dependent upon population

and not upon the proportion of public tax (19,196 to 6,901). Among the rejected amendments were one providing that representation in the senate (the membership of which was to be increased to 36) was to be based on population and not the proportion of direct taxes paid by different districts, two by which the legislature was empowered to impose a graduated inheritance tax, and an income tax on 'public service corporations and voluntary associations in lieu of a direct tax upon their property 'one striking out from the Bill of Rights the word. Protestant' in a provision for maintenance of "public Protestant teachers of piety, religion and morality" and the phrase 'rightly grounded on evangelical principles" which now modifies the words 'morality and piety" in the same article and one giving the governor the power to approve or disapprove any separate appropriation in any bill or resolution passed by the legislature. On all the rejected amendments there was a plurality vote for the amendment the smallest vote for an amendment 16,555 to 14 315 was for the omission of the word 'Protestant' and of the reference to 'evangelical principles.'

The legislature met from January 3 to April 15 1911 and on March 2 the senate voted unfavourably on the proposed 16th amendment to the Federal Constitution. The districts for state representatives were reapportioned towns with a population of less than 600 choose a representative for a proportional time that is for different sessions of the five occurring during the next decade. A public service commission of three members serving for six years was established (in place of the old railroad commission) it is to investigate railway affairs and to fix reasonable rates to pass on any proposed extensions of railways or any exercise of eminent domain and upon stock and bond issues of any public service corporation. Political advertising in newspapers must be designated and signed. The giving or soliciting of campaign contributions by corporations is forbidden. The party circle is

Political advertising in newspapers must be designated and signed. The giving or solucting of campaign contributions by corporations is forbidden. The party circle is omitted from ballots and there is no special provision for straight voting. Bribery at election was made a misdemeanour and conviction disqualifies for office and suffrage. Political committees must publish campaign receipts and expenses 3 days before and within 15 days after the election violation disqualifies for nomination or election.

The state appropriated \$100,000 to take Crawford Notch as a forest reservation and state park and the state took possession by eminent domain —compensation of the owners

is to be fixed by referees appointed by the supreme court

An employer's liability law in effect January 1 1912 provides for elective compensation in dangerous employments which the act enumerates. The election of the employer must be made in writing with a proof of his financial ability or a bond. None of the common law defences is abrogated but assumed risks fellow service and contributory negligence are restricted by the provisions for liability. The compensation in case of death is 150 times the weekly earnings but not more than \$3,000 (or if there are no dependents only \$100) in case of total disability 50% of the average weekly earnings—not more than \$10 nor for more than 300 weeks and for partial disability 50% of the wage loss with the same limitation as to the maximum amount and time.

A new child labour law provides that in mills factories workshops telegraph telephone or messenger service etc. no child under 12 shall be employed no child under 14 during school session and no illiterate under 16 unless he is mentally incapable. Boys under 16 and girls under 16 are not to be employed in the street trades no child under 18 in messenger service between 10 PM and 5 AM and no child under 16 in any employment without an employment certificate. To carry out labour laws arbitrate in labour disputes and attempt to settle strikes and lockouts a bureau of labour was substituted for the commission.

The state board of health was authorised to prohibit the use of common drinking cup in public places and forbade their use after July 1 1912 on railway trains in railway stations, in public and private schools and in the state educational institutions. All cases of tuberculosis must be registered and recoveries of patients must be reported. The board of health is to draw up rules for certified and inspected milk. Renovated butter must be labelled. Food or drink containing wood alcohol must not be sold. Baby farms and lying in hospitals are to be licensed supervised and regulated and a law was passed to prevent infantile blindness. A board of registration in optometry was established. Portable steam mults must be fitted with spark arresters, and a penalty of \$50 was decreed for failure to exinguistic camp fires and careless shooting by hunters was made punishable by a fine up to \$1000 or 2 years imprisonment. A law forbids drinking of intoxicating figuors on street cars or railway cars except buffet or dining cars. Pandering was made punishable by imprisonment from six months to one year and by a fine of \$300 to \$1000 or by both and on second conviction by one to ten years in the state prison it is punishable though partially committed outside of the state, the victim may testify, and marriage is no defence.

Philipse —In 1911 a permanent tax commission was created it is to determine the tax rate to assess public service corporations and to equalise the state tax biennially. The act requires railways to be taxed at the average rate upon the actual value of the property in

the state used in their business which would not be exempt from taxation if owned by a A new law was passed for taxing savings banks and money loaned at 5° or natural person less and secured by a mortgage on real estate in the state or by note is exempt from tax Trust and banking companies must have a cash reserve equal to 15% of their deposits and must put aside a guarantee fund of 10% of net annual earnings until this amounts to 25% of the capital stock Stockholders in such companies are personally liable. The balance in the treasury on September I 1911 was \$.83 987 receipts for the year \$2.797.894 and expenditures \$2.514.054 leaving a balance August 31 1912 of \$567.827. The net state

debt was \$1 387 038

Education—The appropriation for weak school districts was increased from \$80 000 to \$115 000 For the school year ending September 30 1912 the school population was 75 337 the enrollment 63 186 the average daily attendance 49 524 and the length of the average school year 33 8 weeks The revenue was \$2 047 033 and the expenditures \$1 883 059 In 1910 the percentage of illuracy (10 years and over) was 4 6 (62 in 1900)

There are good industrial courses in rural high schools notably Colebrook Academy see H A Brown The Readjustment of a Rural H gh School to the Needs of the Community (Washington 1912 US Bureau of Education Bulletin 492)

Edward Thompson Fairchild b 1854) state superintendent of schools of Kansas in 1907–12 was elected president of the state college of agriculture and mechanic arts in 1912

Penal and Charitable Institutions - In 1911 a committee was appointed to investigate the operation in other states of the system of centralised supervision of penal and charitable institutions Among the appropriations was one of \$20 000 for the treatment of tuberculosis

History—In 1911–12 the state government was Republican of the 'progressive' type and both party platforms in 1010 had contained promises of definite reform legislation which were so slow in fulfillment that in March 1911 the legislature was upbraided for its failure to pass these measures by Governor Robert Perkins Bass (b. 1873) promi nent in improving forestry and farming) Bass was not renominated. The Progressives nominated Winston Churchill (b. 1871), a member of the state legislature in 1903 and 1903 but better known as the author of Richard Carrel and other popular novels The Democratic nominee was Samuel D Felker representative from Rochester and the Republican Franklin Worcester former state senator. There was no choice of governor by the people as no candidate received the necessary majority of all votes cast and the legislature (senate 15 Republicans and 9 Democrats house 208 Republi cans and 197 Democrats) early in 1913 chose Felker On March 13 1913 Henry French Hollis (b. 1869 Democrat) was chosen to succeed H. E. Burnham (b. 1844 Republican) United States senator The tour electoral votes of the state went to Woodrow Wilson who received 34 724 votes to 32 927 for Taft (for whom most of the Republican dele gates to the national convention had been instructed) 17 704 for Roosevelt (who was sup ported by Governor Bass and by Winston Churchill) and 1 981 for Debs (who received Two Democratic representatives were elected to Congress to 1 99 votes in 1908) succeed two Republicans Cyrus Adams Sulloway (b 1839) who had served in Congress for 18 years and Frank Dunklee Currier (b 1853) who had been in Congress since 1001 In 1912 202 towns voted no licence 21 voted for licence and in 1 town there was a tie

Agriculture—The acreage in farms decreased from 2 840 966 to 2 573 857 between 1900 and 1910 and the improved land in farms from 1 977 042 to 1 803 336, the average farm acreage decreased from 82 0 to 76.9 and the value of farm property increased from \$189 533 660 to \$254 832 665 (\$124 143 167 land \$92,991,352 buildings \$13 109 507 implements \$24 588 639 domestic animals) Of the land area 53 5 was in farms The average value of farm land per acre was \$48 23 Farms were operated largely by owners (24 133 by owners 1 060 by managers and 8 294 by tenants) In 1912 the principal crops (preliminary estimates) were Indian corn 10 374 000 bu (273 000 A) wheat 1 462 000 bu (79 000 A) oats 1,849,000 bu (67 000 A) rye 1 260 000 bu (72 000 A) buckwheat 264 000 bu (12 000 A) were Indian corn 10 374 000 bu (273 000 A) wheat 1 462 000 bu (79 000 A) oats 1,849,000 bu (67 000 A) rye 1 260 000 bu (72 000 A) buckwheat 264 000 bu (12 000 A) potatoes 9 936 000 bu (92 000 A) and hay 521 000 tons (362,000 A) In 1909 (U S Census) the value of veg tables other than potatoes was \$7 566 493 of flowers and plants \$2 857 709 of nursery products \$681 814 of small fruits \$1 954,125 (strawbettres \$929 108) of orchard fruits \$1 975 044 (apples \$956 108 peaches and nectarines \$652 771) of grapis \$132 957 On January 1 1912 there were on farms 91 000 horses 4 000 miles 150 000 milch cows 68 000 other neat cattle 30,000 sheep and 165 000 swine

In 1911 a department of poultry husbandry was established in the agricultural experiment station and the office of state plant nathologist was created. The pathologist is to examine

station and the office of state plant pathologist was created. The pathologist is to examine nursenes destroy plants incurably diseased and prevent the spread of disease entomologist was required to inspect all amaries for diseased bees

Mineral Products —Total value 1911 \$27 559 246 In clay products the state ranked 3rd below Ohio and Pennsylvania with a total value of \$18 178 228 of which \$8 401 941 was pottery in which the state was exceeded only by Ohio Almost all the zinc produced in the East comes from the Franklin Furnace mines in this state the total was 15 128 tons rane comes from the Frankin Furnace mines in this state the total was 15 128 tons valued at \$1724,592 in 1911. Pig from was valued at \$583,300 (not included in the total given above) and iron ore 350,721 tons was valued at \$1 158 271. Sand and gravel were valued at \$1 058,926. Portland cement at \$3 259,528 stone at \$1 597,410 (of which \$1 136,385 was the value of trap rork) lime at \$113,784 and mineral waters from 12 springs at \$270 123 (58% more than in 1910). The greensand marks of the state with a potash content of 3½ to 6½? are being studied as a commercial source of salts for fertiliser.

Monufactures —In 1904—09 the number of establishments, increased from 7 010 to 8 817 and that of persons engaged from 20 262 (266 326 wage-earpers) to 271 265 (226 222 wage

and that of persons engaged from 296 262 (266 336 wage-earners) to 371 265 (326 223 wage earners) capital invested from \$715 060 000 to \$977 172,000 and the value of products from \$774 369 000 to \$1 145 529 000 (47 9 %) ranking the state 6th in the Union

In 1909 24 separate industries reported products valued at \$10 000 000 or more. The

three most important manufactures were copper refining and smelting products, \$125 651 000 (twice as much as in 1904, and much more than in arry other state) silk and silk goods \$65,430 000 (52.6% more than in 1904 one third the country's total) and foundry and machine-shop products \$65,398,000 (29.4% more than in 1904). Other important manufactures were slaughtering and meat packing products \$37,583,000 woollen, worsted and felt goods including hats \$33,939,000 wire \$28,858,000 (\$17,777,000 being copper wire—two fifths of the country's product) leather \$28 431,000 electrical machinery \$28 365 000 tobacco \$24 177 000 chemicals \$22,824 000 ranking the state 2nd malt liquors \$20 184 000 ranking the state 2nd cotton goods especially thread \$13 729,000, spap \$13,674,000 lumber and timber, \$13 511 000 jewelry \$13 272 000 pottery

729.000, soap \$13,674,000 lumber and timber, \$13 511 000 jewelry \$13 272 000 pottery terracotta and fire-clay products \$13 139 000—the state was 2nd in this industry point and varifish; \$12 767 000 iron and steel rolling mills \$12 014 000 copper tim and sheet iron products, \$14 124 000 and oilcloth \$10 143 000—in this industry New Jersey ranked 1st.

The leading manufacturing cause were Newark \$202 511,500 the 11th city in the Umon avalue of imanufactures its principal products being refined copper leather (\$18 858 000) foundry and machine-shop products (\$15 482,000) jewelry (\$13,152 000) malt liquors (\$12 361 000), and paint and varnish Jersey City \$128 775 000 including slaughtering the mest-packing (\$22 384,000) tobacco (\$1 065 000), foundry and machine shop products one is a synone \$23 641 000 periodent refining Perth Amboy \$23 002 000. copper refining soap Bayonne, \$73,641,000; petroleum raining Perth Ambay \$23,093,000, copper refining Paterson \$69,584,000 (silk \$40,358,000) Camden \$49,138,000 Trenton \$49,000,000 Passaic \$41,729,250 (textiles \$20,536,000) Elizabeth, \$29,147,000 Hoboken \$20,413,000

Transportation — Railway mileage January 1 1912 2,350 5 In 1912 a commission composed of the governor the attorney general and Mr Bennet Van Syckel (former supreme court indge) reported to the legislature in favour of the abandonment of all claims on the Morris Canal to the Lehigh Valley Railroad Company the holder of almost all of the capital stock of the Morris Canal and Banking Company the original owner of the canal which by its charter was to become the property of the state in 1973. The legislature arranged for the appointment of a committee of twelve to report on the property owned, its use and its value what the state would receive under the arrangement suggested by the previous commission and what obligations it would incur in the taking over of the water rights as recommended by the previous commission what the net proceeds to the state would probably be whether a part of the canal could be operated and whether the Morris Canal and Banking Company and its lessee had forfeited the charter

In 1911 the New Jersey ship canal commission was created to examine the plan and the route of a proposed canal from New York Bay to Bordentown on the Delaware river Its preliminary report in 191. recommended a 25 ft depth and a bottom width of 125 ft

A new code was adopted in 1912 for the improvement and maintenance of public roads. The county board of chosen freeholders may require any township through which a road passes to pay 10 of the cost of the road in the township and two or more counties may cooperate in road improvement. Plans must be approved by the Commissioner of Roads. Certain roads are to be taken over by the state as state highways.

In 1912 the legislature passed a law requiring every railway in the state within three months after the act went into effect (Sept 1 1012) and within the same period yearly there after to remove one grade crossing for every 30 miles or fraction thereof of road operated by it in the state. The bill passed the assembly (where it originated) on the 29th of March and the senate on the 28th on the 11th of April it was returned by the governor with his verous because of the injustice in his opinion of the requirement that every railway remove crossings for every 30 miles and because the act did not forbid the creation of new grade crossing nor attempt to classify the present crossings. The legislature had been in recess from Alarch 29th to April 10th, and the attorney general filed an opinion that the bill was not a law and that the governor's veto was valid but the assembly passed a resolution that in the judgment of the House of Assembly said bill is now a law since more than five days excepting Sundays had elapsed between the presentation of the bill to the governor and its return to the assembly which had not been prevented by adjournment. On September 27 1912 the supreme court held that the act had never become operative

In December 1911 the Delaware Lackawanna & Western Railroad opened for passenger service a cut off of 28 45 m between Hopatcong and Slattford Junction, which saved 11 m (411 m reduced to 400 m from New York to Buffalo) over the old route reduced the maximum grade per mile from 60 2 ft to 29 04 ft one fill 110 ft high and more than 3 m long E of Andrew is supposed to be the largest in the world

long E of Andover is supposed to be the largest in the world
The Staten Island and New Jersey channel was dug to a depth of 14 ft in 1911 and the
10 ft channel from Staten Island Sound 10 8 m up the Passaic river was completed and
work further up the river was begun by the Federal Government

Legislation—The legislature meets annually and its regular sessions were held in 1911 from January 10th to April 21st in 1912 from January 9th to April 21st, with a recess from March 29th to April 10th. The new legal procedure act of 1912 is intended to insure speed by trials it simplifies pleadings abolishes bills of exception and writs of error although allowing an appeal to be taken on error and provides that no judgment be reversed on a technical error unless it injuriously affects the substantial rights of the party to the case new evidence is admissible on appeal. A law of 1912 permits a married woman to sue or be sued without joining her husband, if he would be an unnecessary party were he not her husband. A commission was appointed (1912) to report on the reorganisation and consolidation of state departments with unrelated functions and one in 1911 to consolidate the law on primaries and general elections.

The Geran Election law of 1911 substituted for separate party, ballots a blanket ballot with an alphabetical arrangement of candidates by office groups. No election district is to contain more than 400 voters candidates for boards of registry must take civil service examinations candidates for governor and congressmen are to be mominated directly at primaries at which there is to be a preferential vote for candidates for the presidency. The law includes the Oregon plan putting candidates for the legislature on record whether they will follow implicitly or not the recommendation of the primary for United States senator. The law required a primary register, as well as registration for the general election, the register to be by house to-house canvass in municipalities of less than 5,000 but elsewhere to be personal. In 1911 all laws providing for the use of voting machines were repealed. A corrupt practices act of 1911 (amended in 1912) limits election expenditures to \$200 for an assemblyman and \$2 500 for a candidate for governor requires a sworm statement of expenses to be filed within five days and allows the party organisation to employ agents (but

not watchers) at the polls and to provide transportation only for such voters as are physi-

cally unable to go to the polling place.

Larget a new law was passed for the government of the public utility commission whose thembers are to have a six year term and a salary of \$7,500 each. The commission is empowered to investigate and fix rates to appraise property classify service standards methods set, and the act regulates public utilities forbidding unjust discrimination and unfair rate. chassification On December 27 1912 it reduced the price of gas from \$1 10 to 0 90 per M cu ft in the Passase division in effect February 1 1913

In 1911 the competitive class in the civil service was divided and enlarged the civil service commission was authorised to admit non-residents for examinations to posts requiring technical training and in 1911 and 1912 additional groups of state and local employees were

brought under the civil service rules

An employers hability law of 1911 was in most respects like the New York Act of 1910 which was declared unconstitutional on March 24, 1911, the objectionable clauses being omitted it provides for an elective compensation system covering all industries. The election is presumed in the absence of written notice to the contrary. The act abrogates the defences of assumed risk fellow service and unless wilful contributory negligence. Suits for damage are not permitted after election for compensation. To be compensated disability must be for two weeks at least the compensation for death is 25 to 60 % of the average wages not less than \$5 nor more than \$10 for 300 weeks, and is limited to \$200 if the deceased leaves no dependents For complete disability compensation is 50 / of the average wage (not less than \$5 or more than \$10) for 400 weeks and for partial disability the compensation is proportional on a fixed scale Medical and surgical aid for the first two weeks of disability must be paid for by the employer but the maximum cost of such service is to be \$100

The act excludes from this provision non resident alien beneficiaries

Children under 14 are not allowed to work in a mercantile establishment during school hours and no child under 16 is to work more than 58 hours a week nor between 7 P M and 7 A.M. except that on one day in the week work may be continued until 9 P.M. and that these hours do not apply to the ten days immediately before Christmas. No child under 18 (or under 21 in cities of the first class) is to be employed in messenger service between 10 P.M. and 5 A.M. except on written permission from the commissioner of labour. Eight hours in the commissioner of labour. a working day in state or municipal employ A law of 1912 makes 10 hours a day and 60 hours a week the maximum for women in manufacturing or mercantile establishments bakeries laundries or restaurants but not in mercantile establishments for the six days before Christmas—the act does not apply to canneries A new law was passed (1911) for fire protec tion and especially for fire exits in factory buildings In 1912 a commission was appointed to revise and codify the laws relating to mechanics liens Various important laws were passed Occupational dis-(1911 and 1912) to protect the lives and health of employees in factories eases such as anthrax, compressed air illness phosphorus arsenic or mercury poisoning must be reported within 30 days to the state board of health under a penalty of \$25 by a law of 1912 following the California law of 1911 A state board of examiners of nurses was appointed in 1912 with authority to regulate and register nurses. Registered nurses are permitted to use after their names the letters. R. N. and these letters may not be used by any one else in the state. In 1911 the pure food law of 1901 and 1906 was supplemented by stricter requirements for the cleanliness of dairies and other places where food products are handled and a law of 1912 forbids the adulteration and regulates the sale of skimmed milk Goods placed in cold storage must bear the date of storage The use of public drinking cups was restricted A law of 1912 provides for the establishment of county mosquito extermina tion commissions. A state superintendent of weights and measures was appointed in 1911 under a law for a uniform standard of weights and measures

In 1911 counties were re-classified the first class contains all with a population greater than 300 000 and the government of these was re-organised in 1912 the second class contains those between 50 000 and 300 000 the third those between 20 000 and 50 000 and the fourth all other counties. Catles of the first class were authorised to appoint a city plan commission to remodel the city in Jersey City the commission has done educational work mainly in Newark several definite plans of improvement have been proposed. In cities of the first class a police pension fund was created in 1911 from an assessment of 1% of police salaries the deficiency to be made up by the city. Anyone 60 years old who has been in the service for 20 years may be retired on half pay and must be retired if he asks for retirement and anyone who is 55 and has been in the service for 25 years is to be retired on half pay upon application. The law provides for retirement for disability and for a pension for a police man s widow so long as she remains his widow and for his children under 16 The commis man s widow so long as she remains his widow and for his children under 16 son form of government may be adopted upon a favourable vote in any city, town or borough. An amendment provides for the recall the initiative and the referendum. Cities which adopt the commission government may revert to their original charter after six years at an election called by a perlindu signed by 25% of the electors. Two or more cities may join to adopt the commission government may revert to their original charter after six years at an election called by a perlindu signed by 25% of the electors. Two or more cities may join to adopt the conditional disease. ministrain garbage disposal plants. Any municipality may spend \$5,000 a year for publicity. The law for borough government was adopted by Hawthorne Margate City Ocean City Passaic Ridgewood and

Trenton and in 1912 by Atlantic City Deal Long Branch Longport, Nutley Ridgefield Park and Wildwood It was rejected in 1911 by Bayonne Cape May East Rutherford Garfield Holoken Irvington Jersey City Metuchen New Brunswick Orange Paterson Rahway and Salem and in 1912 by Elizabeth Emerson Glen Rock, Ventnor City and Westwood

In 1912 the legislature granted a pension of \$1 200 a year to the widow of any former governor and \$10 000 for a monument in the National Cemetery at Arlington to Gea. Philip Kearny whose remains were removed in 1911 from Trinity Churchyard in New York

Finance—In 1912 a commission was appointed to investigate assessments for taxes and the Department of Accounts was reorganized. An inventory and appraisal of railroad and canal property was begin in 1910 and completed in 1912. The balance in the treasury on November 1 1911 was \$3,309,781 and a year later \$2,270,672 the receipts during the year \$9,657,366 and the disbursements 7,696,475. The state has no bonded debt

Education —In 1911 as the result of a two years investigation of the public school system by the board of education working with the legislature several important school laws were passed. A new board of education of 8 members with an 8 year term was organised and took office on June 30 1911. The board is non partisan and besides having the powers of the prayious board is to appoint an inspector of buildings and district inspector of accounts. and to prescribe a uniform system of book keeping for school accounts The office of state superintendent of education was abolished and the governor appointed in 1911 as commission er of education (to hold office for five years and to receive a salary of \$10 000 a year) Calvin Noves Kendall superintendent of schools of New Haven (1895-1900) and of Indianapolis (IQ00-II) The commissioner appoints four assistant commi sioners one to supervise ele mentary schools one secondary schools one industrial education including agriculture and one to hear controversie and disput s in regard to school laws subject to appeal to the state board of education and appoints also county superintendents of schools who have a 3 year term. In 1911 the time of the distribution of school funds was set for the September follow. ing the receipt of taxes so there might not be a delay such as there had been in the distribution of the fund. A law of 1912 specifies the manner in which the funds are to be apportioned by county superintendents. The commissioner of charities and corrections is required to prepare standa d plans for school houses of the different sizes and on request to inspect any school building After 35 years service (of which 20 years must be with the board by which the teacher is retired) any teacher in the public schools of the state may be retired upon half Special classes are to be organi ed in public schools for blind and deaf children who cannot be received in institutions for the blind or deaf

The centennial of the Princeton Theological Seminary was celebrated on the 5th and 6th of May 1912. On January 11 1912 John Grier Hibben (b. 1861) professor of logic was elected president of Princeton University he was inaugurated on May 11. George Brinton McCklian formerly mayor of New York City was appointed professor of economic history. Of the population 10 years of age and over 5.6 % were illiterate in 1910. 5.9 in 1900. For the year ending June 30. 1912 the total enrollment in public schools was 459.189, the

For the year ending June 30 1912 the total enrollment in public schools was 459 189 the average daily attendance 348 238 and the length of the average school year 9 months 2 days Receipts were \$26 436 005 and expenditures \$21 840 574

Receipts were \$26,436,005 and expraditures \$21,840,574

Charitable and Penal Institutions—In 1911 cities of the first class were authorised to main tain detention homes for juveniles. A law was passed requiring the appointment of female guards in country jails and penitentiaries. Prison contracts are not annulled, but prisoners must be employed in manufacturing supplies for public institutions and offices this law was slightly amended in 1912 so that prisoners may be employed on roads and children in state homes may be indentured. A prison labour com mission was created and in December 1912 the first experiments were made in working con victs on roads A house of detention for convicts or criminal insane on the grounds of the State Hospital at Trenton was begun late in 1912 Indigents with incurable diseases such as locomotor atavia paralysis and chronic rheumatism are to recui e from the state not more than \$365 a year. A new poor law code was enacted in 1911 and amended in 1912 and a new law was passed in 1912 for the government of a state reformatory for women at Clinton (to Physicians are required to report to the township assessor cases of epilepsy be opened soon) and mental deficiency In 1911 \$1.00 000 was appropriated for buildings of the New Jersey State Village for Epileptus at Skillman—5 of which were nearly completed in November 1912 There is question as to the constitutionality of a law of 1911 requiring (upon recom mendation of an expert board) the sterilising of feeble minded epileptics and criminal insane in state institutions Counties of the first class were authorised in 1912 to establish parental schools and juvenile courts and these courts are to hear cases affecting the domestic relation. The state is to give \$200 a year to any blind person who wishes to take a course in a higher educational institution (not for the blind) in the state A commission on old age insurance and pensions was created in 1911 but made no report in 1912. The system of pensions for state employees was extended to employees of penal institutions and reformatories.

History — With Woodrow Wilson (Democrat) as governor was elected a Republican See John P. Murray. New Jersey School Conditions. Educational Review. Nov. 1912.

senate in 1910 The primary vote for United States senator was for James Edgar Martine (b 1850), but this did not pledge members of the legislature to choose him, and he was opposed by James Smith, Jr (b 1851), the 'boss" of the state organisation, United States senator in 1893-99 and a candidate for re election He argued that only a minority of the Democrats of the state voted for Martine and that under the constitu tion the choice of senators was the function of the leg slature and not of the people Governor Wilson defended the primary vote and roused public opinion so that on the first joint ballot in the legislature Martine received only one vote less than was needed to elect him whereupon Smith (who had received 10 votes) withdrew assuring the election (Jan 25 1912) of Martine to succeed John Kean (b. 1852). Republican senator This contest made it evident that the governor considered himself the lead er of the Democratic party in the state In 1912, after Wilson was nominated for the presidency, James Smith again became a candidate for the U S Senate, to succeed Frank Obadiah Briggs (b 1851) Republican, whose term ends March 4, 1913 Gov ernor Wilson used all his influence against Smith and in the primary (Sept 24 1012) William Hughes (b 1872 representative in Congress 1903-05 and 1907-13) was named by the Democrats and Briggs by the Republicans In the (legislative) state elections in November 1911 although 160 184 Democratic votes were cast and only 157 184 Republican votes in Essex county¹ the Republicans were successful—possibly as Gov ernor Wilson's friends thought, because of the opposition to him of Smith and J R Nugent (city counsel of Newark) Democratic leaders in the county both houses of the legislature were Republican (senate 11 to 10 assembly 37 to 23) but the legislature in 1913 will have 12 Democrats and 9 Republicans in the senate and 50 Democrats and 10 Republicans in the assembly Woodrow Wilson's term as governor did not expire until January 19 1914 his successor for the unexpired term from March 1913 is, under the constitution the president of the newly elected senate chosen at the organisa tion of the senate in January 1913 James F Fielder was chosen president of the senate January 13 1913

In the presidential campaign New Jersey was prominent because of the part taken by her governor, Woodrow Wilson in his successful effort for the Democratic nomination for the presidency, and his election and because as in Massachusetts before the primaries both Roosevelt and Taft made a speech making tour of the state. In the primaries (May 28th) Roosevelt received 17 000 votes more than Taft and Wilson received 48,336 votes to 522 for Clark 60 for Harmon and 47 for Bryan. In the November election Wilson carried the state with 178 289 votes to 145,410 for Roosevelt 88,835 for Taft and 15 801 for Debs (10,253 in 1908). Of 12 congressmen (under the new apportionment) 11 are Democrats and 1 from the 1st district Republican. The representation in the 62nd Congress was 7 Democrats and 3 Republicans. Throughout the state there were many voters disfranchised by the Geran election law, which the state supreme court (Nov. 4, 1912) interpreted to require registration as well as enrollment

In Newark after being bitterly attacked on the charge that he permitted disorderly houses to remain open, Mayor Haussling (Dem) was re-elected in 1912 by 25 831 to 19 343 for Aronson (Rep) and 2,142 for Reilly (Socialist) — In 1911 and 1912 corruption among city officials was discovered in Atlantic City by detective W J Burns

In 1912 there were strikes among the textile workers in Paterson and Passaic There was no violence in Paterson, where the broad silk workers struck (March) under the leadership of the Detroit branch of the Industrial Workers of the World In Passaic a strike lasted from the middle of April to May oth, when most of the strikers returned to work They were led by Haywood and others of the Chicago ("direct "action) branch of the International Workers of the World In Perth Amboy there were violent strikes during June among employees of the American Smelting and Refining Co, the Barber Asphalt Co, etc., and three were killed on the 14th, and one on the 25th In December striking coal-handlers of the New York, Susquehanna & Western Railway at Edgewater

¹The county was carried by the Democrats in 1912 in all state and local contests, but Roosewelt received 33,714 votes to 26 229 for Wilson and 16 981 for Taft.

killed two detectives and wounded nine on the rith, but were driven off on the rith They struck for an increase of pay from 20 to 25 cents an hour

On November 19 1912 the Court of Errors and Appeals upheld the supreme court in its decision that women cannot vote for civil officers or presidential electors or on questions submitted to the people The case rested on the claim that the provision of the first constitution (1776) which gave the suffrage to 'all inhabitants

of full age worth 50 pounds proclamation money, etc, had never been

legally rescinded

In Hoboken the Robert L Stevens Fund for municipal research was established in 1910, and a Citizens' Federation in Hudson county and a bureau of municipal research in Jersey City in 1912—all these are private agencies

B bliography —Acts of the Legislature (Paterson 1911 and Trenton 1912), E J Fisher New Jersey as a Royal Province from 1738 to 17,6 (N Y 1911)

Agriculture —The acreage in farms increa ed from 5 130 878 to 11 270 021 between 1900 and 1910 and the improved land in farms from 326 87, to 1 467 191 the value of property in m 5.3 767 8.4 to 8159 447 990 (\$98 806 497 land \$1, 0.4 50. buildings \$4 122 312 implements \$43,404 679 domestic animals) Of the land area 14.4 \(\) was in farms The average value of farm land per acre was 88 77 Farms were operated largely by owners (33 398 by owners 321 by managers and 1 9.57 by tenants) In 1912 (preliminary estimates) the principal crops were Indian corn 2 083 000 bu (93 000 A) wheat 1 232 000 bu (59 000 A) oats 1 839 000 bu (53 000 A) barlet 70 000 bu (2 000 A) potatoes 900 000 bu (6 0 000 A) and hav 436 000 tons (187 000 A) In 1909 (US (ensus) the value of vegetables other than potatoes was \$67 154 of orchard fruits \$519 677 On January 1 1912 there were on farms 185 000 horses 15 000 mules 53 000 milch cows 900 000 other neat cattle 3,300 000 sheep and 50 000 swine The total acreage irrigated in 1909 was 461 718 (126 5 0 more than in 1899) 398 592 acres were supplied from streams The total cost of irrigation enter prises to July 1 1010 was \$9 154 897 and the estimated final cost of improvements begun was \$11 040 091 Of cercals 51 80 by acreage in 1909 was grown on irrigated and and of wheat 79 6 0, of barlet 68 9 and of alfalfa 96.4 The (Federal) Carlsbad project completed in 1909 irrigated 13 673 acres in 1911 and the Hondo project 1 000 acres The great Rio Grande project was 20 0, completed in October 1912 and in the preceding year irrigated 25 000 acres partly in Texas The Federal department of agriculture has a station at Tucumcari for the investigation of dry farming

The constitution provides for a department of agriculture under the regents of the State College of Agriculture and Mechanic Arts. The legislature of 1912 created a state land office and the office of county inspector of bees and apianes appropriated annually \$15,000 for gauging stream flow for irrigation purposes passed a law for the organisation and operation of drainage districts and authorised the commissioners of community ditches to grant free irrigation of three acres or less to blind men or their widows

Mineral Products —Total value 1911 \$7 869 918 The only important stems were copper 2 860 400 tons (about 34 of the output in 1910 a new company began work in the Santa Rita district) zinc 3 778 tons (40 less than in 1910) and coal 3 148 158 tons (\$4 525 925) Mineral waters from 5 springs (2 resorts) were valued at \$41 853 Salt mica and fluorspar were found in small quantities

Manufacturer —Between 1899 and 1909 the capital invested increased from \$2 161 000 to \$7 743 000 and the value of products from \$4 061 000 to \$7 898 000. The larger industries were steam railway car construction \$2 251 000 and lumber and timber \$2 162,000. In Albuquerque there were one tenth of all the establishments with a product \$1 288 000 nearly one-sixth of the total

Transportation —Railway mileage January 1 1912, 3 079 In 1912 by a statute the Territorial roads commission became a state highway commission with control of the state

See E B xix 520 et seq

road fund, and county road boards were created in place of road supervisors. A bond issue of \$500,000 was authorised for constructing and maintaining state highways authorised to issue bonds for roads and bridges.

Government — The convention which met at Santa Fe from October 3 to November 21 1910 drafted a constitution (adopted Jan 21, 1911 by a popular majority of 18,000) to which one amendment in regard to the method of amending the constitution was made at the general election in November 1911. The bill of rights in the constitution is unusual only in that it alludes to the privileges guaranteed by the Treaty of Guadalupe Hidalgo The capital may be removed from Santa Fé by popular vote, but not before The article (IV) on legislation provides that the people 'reserve the power to disapprove suspend and annul any law enacted by the legislature" except general appropriation laws and emergency acts, petitions of "disapproval" must be filed four months before a general election and must be signed by 10% at least of the qualified electors of each of three fourths of the counties (the aggregate to be at least 10% of the total number of votes cast at the last general election) The measure is annulled if a majority (at least 40% of the number of votes cast at the last general election) vote against it If a petition of disapproval is signed by 25% of the qualified voters and is filed within 90 days after the legislature adjourns the measure disapproved is rendered inoperative until the general election The senate consists of 24 members (each at least 25 years old) elected for four years and the house of 49 members elected for two years In 1912 an amendment was adopted striking out the requirement that legislators and state officers must be able to read write speak and understand English A statute of 1912 excludes from public office or employment persons convicted of felonious or in famous crime Legislators receive \$5 a day during sessions and 10 cents a mile for mileage. At special sessions called by the governor no business may be transacted not specified in his proclamation. Any bill may originate in either house. The govern or may veto within three days Sundays excepted any measure or in an appropriation bill any item and bills may be passed over his veto by a two-thirds vote of the members present and voting in each house General appropriation laws and special emergency acts if passed by a two-thirds vote and containing an emergency clause go into effect immediately, other laws not until oo days after the legislature adjourns ture is to "enact laws to prevent trusts, monopolies and combinations in restraint of trade" Bribery or the undue use of influence for legislation is declared a felony punish able by a maximum fine of \$1 000 or by one to five years imprisonment the statutes of 1912 include a corrupt practices act and a bribery law

The executive officers are elected for four years and must be citizens of the United States at least 30 years old residents of New Mexico for five years. They are governor (annual salary \$5 000) lieutenant governor secretary of state state auditor state treasurer attorney general superintendent of public instruction and commissioner of public lands. In 1912 the governor was authorised to appoint a legal adviser and a department of fish and game was created. There are a supreme court with three justices (the legislature may increase the number to five after 1920) elected for eight vears (salary \$6 000) eight district courts (1 judge in each district term six years salary \$4 500) and probate courts in each county. Suffrage is granted to every male citizen of the United States over 21 resident in New

Suffrage is granted to every male citizen of the United States over 21 resident in New Mexico 12 months in the county 90 days and in the election precinct 30 days excepted are idiots insane persons convicted of felonious or infamous crime (unless restored to political rights) and Indians not taxed. By statute railway employees if necessarily absent from the precinct in which they registered and qualified may vote elsewhere. At school elections which must be held at different times from other elections women possessing the same qualifications of age and residence may vote—unless a majority of the qualified voters of a district 30 days before the election petition the board of county commissioners—against wo man suffrage. There must be a similar petition for women s voting before they are restored to suffrage. Women may hold office on boards of education or be school directors or county school supermatendents

Amendments to the constitution may be proposed in either house and if passed by a majority vote in the legislature must be advertised in one newspaper in each county (both in English and Spanish, if there are newspapers in both languages) at least two weeks before the general election, and at the general election must receive a majority of the votes cast on

This amendment was adopted because Congress had refused to admit New Mexico to statehood unless the provision in the original constitution were changed.

the amendment to become operative. The requirements for franchise and sections in the article on education providing for instruction in Spanish can be amended only by a three-fourths vote in the legislature and at the general election. Within 25 years a constitutional convention may be called by a three fourths vote of the legislature, thereafter by a two-thirds vote, if approved by popular vote. The draft of the convention is not valid until ratified by the people

A state corporation commission of three members elected for six years charters and regu lates corporations other than municipal and is empowered to fix rates of public service charges The constitution contains an employers liability clause forbids the lease of convict labour and makes eight hours a day s work on state county or municipal jobs Statutes of 1912 forbid blacklisting limit continuous hours of service on railways to 16 and include a coal mining code providing for a state inspector of mines to be appointed after examination

The first regular session of the legislature was held from March 11 to June 8 1912 urged the United States Congress to allot and open the Navajo and other Indian reservations to settlers to restrict making reservations by executive orders and to modify the law in rela tion to the Pueblo Indians which puts them on the same footing as tribal Indians and overlooks their treaty rights as former citizens of Mexico

The 12th of October Columbus Day was made a legal holiday

Finance—The constitution provides for a revenue tax of four mills on the dollar other state taxes may not be more than ten mills (12 mills for the first two years) travelling auditor state auditor secretary of tate and attorney general form a state board The tate may borrow no more than \$200 000 to meet casual deficits or for ses The legislature of 1912 created a board of loan commissioners to deterof equalisation necessary expenses mine the Territorial debt and to arrange for the issue of refunding bonds by state and coun these the commission agreed to an issue of state bonds for \$1.125 000 in December 1912 to take up railway bonds of Grant and Santa Fe counties which had been declared invalid by the Federal Supreme Court but were later validated by Congress Provision was made for a uniform system of accounting auditing and reporting for all public officers under administration of the travelling auditor and bank examiner

The balance in the treasury on November 30 1911 was \$568 199 and on November 30 1912 \$655 376 the receipts during the year were \$2 382 275 and the expenditures \$2 295 098 Education—The constitution provides for a state board of education and requires school attendance of every child of school age (of sufficient physical and mental ability) By statute the public school curriculum must include the study of the nature of alcoholic drinks

For the school year 1911-12 the school population was 100 045 the enrollment 57 436 average daily attendance about 41 000 length of the average school year a little over 6 months total expenditures \$997 891 (\$265 766 for new buildings and improvements) Of the population 10 years ind over 20 2 were illiterate in 1910 (33.2 in 1900)

Penal System --The Territorial mounted police has been continued as a state force Convicts who work as mechanics foremen or trusties or outside of the penitentiary receive ten days a month additional good time. Prisoners using explosives or deadly weapons in an attempt to escape from confinement are liable to imprisonment from 25 to 50 years

History—The state election of November 7 1911 resulted in the defeat of the gubernatorial candidate of the Republicans (who had been uniformly successful in the Territorial elections) by a combination of Democrats and Progressive Republicans Wilham C McDonald (b 1858) who had been chairman of the Democratic Territorial Committee was elected governor by 3 000 votes plurality The state senate contained 16 Republicans 7 Democrats and 1 Progressive Republican (term ends Jan 1017) and the house of representatives 28 Republicans, 17 Democrats 3 Progressive Republicans The state was formally admitted to the and 1 Independent (term ends Jan 1915) Union January 6, 1912 On March 27 1912 the legislature chose Thomas Benton Ca tron and Albert Bacon Fall, both Republicans, to be United States senators drew the short term (one year) and was again chosen for 1913-19 by a joint session June 6, 1012 in which, after divided counsels 2 members of the lower house (out of 40 including the Democrats and Progressives) refused to vote and the election pro ceeded amidst much disorder Governor McDonald doubted the legality of Fall's re election and refused to sign the election certificate

In the November 1912 election there was no vote for state officers Woodrow Wilson carried the state receiving 20 437 votes to 17,733 for Taft 8 347 for Roosevelt and 2.850 for Debs A Democratic representative in Congress was elected

Mineral Products —Total value 1911 \$42 392 180 The output of pig fron was 1 537, 201 tons valued at \$23 924 194 (not included in the total just given) much less than in 1916. The state ranked 4th in iron ere 1 057 984 tons (value \$2 959 009) In stone its rank wa 2nd with a quarried output of \$6 895 466 (limestone \$2 857 797 sandstone \$2 353 995 trap rock \$959 966) The value of clay products was \$10 184 376 (\$8 006 212 being brick and the ranking 4th) of Portland cement \$2 669 194 (besides natural cement of which the state is the largest producer) of sand and gravel \$2 414 452 and of lime \$524 845. The state was the largest producer of gypsum with 472 834 tons more than one fifth the country's total. The output of salt was larger than that of any other state but less in value than that of Michigan. In the group of facts the output of petroleum was dec 515 bils. (\$1 288 050) total The output of sait was targer than that or any other state but less in value than that of Michigan In the group of fiels the output of petroleum was \$52.515 bbls (\$1.248.950) and the value of natural gas \$1.418.767 Mineral waters bottled at \$51 springs were valued at \$939.003 In pointe and in millistones the state ranked 2nd It is still an important producer of garnets emory and graphite both natural and at Niagara Falls artificial Manufactures—In 1904-1909 the number of establishments increased from 37.194 to

Manufactures —In 1904—1909 the number of establishments increased from 37 194 to 44 935 and that of persons engaged in manufacturing from 996 725 (856 947 wage-earners) to 1 203 247 (1 003 981 wage earners) capital invested from \$^2 031 460 000 to \$2 779 497 000 (36 8°) and the value of products from \$\$_488 346 000 to \$3 369 490 000 (35 4°) ranking the state first in the Union. By far the most important industry in 1909 was the manufacture of clothing its value being nearly one sixth the total for all industries of the state viz women's clothing \$272 518 000 (\$^36 558 000 bein the value of the product in Manhattan and Bronx beroughs of New York City and \$206 477 000 for the entire city)—and men's clothing including shirts \$260 075 000 of which \$\$_18411 000 was the value of the product of New York City. The stat product of \$56 5, of the clothing (in these two classes) manufactured in the country. class is) manufactured in the country Second in importance was printing and publishing. \$216.946 000 of which \$183.509 000 was in New York City. The output was 29.4° of that of the entire country, and the state and the city ranked 1st. Other important manufactures were foundry and machine hop product \$15.4.3°0.000 New York ranking 2nd slaughtering and meat packing \$1.7.130.000 the state ranking 3rd malt liquors \$77.7.0 ono making the state 1st tobacco mostly (1gar and cigarette) \$76.662 ono the state ranking 1 t lumber and timber products \$72.530 000—in this industry the state was 2nd flour and grist mill products \$69.802 ono ranking New York next to Minnesota hossery and kint goods \$6" 130 000 New York ranking 1st millinery and lace good \$52.106 000 being 60.7% of the total for the country electrical machinery apparatus and supplies \$49.290 000 (New York ranking 1st) paper and wood pulp \$48.860 000 (18.3% of the output of the entire country and more than that of any other state) boots and shoes \$48.186 000 the state ranking below Mas achisetts and Mi souri butter cheese and condensed milk \$42.458 000 (15.5% of the cuntry s total but less than that of Wisconsin) men's fur mishing goods \$42.107 000 (\$15.897 000 collars and cuffs being 92.3% of the total in the United States) furniture and refrigerators \$41.929 000 ranking the state first with 17.5% of the country sproduct fur goods \$41.501 000 being 73.8% of the product value for the whole country iron and steel steel work and rolling mills \$30.532 000 blast furnaces \$26.621 000—in these two industries the state ranked 4th copper tin and sheet iron \$48.452 000 ranking the state Irst patent medicines compound and driggists preparations \$37.543 000 the state being 15t in this industry also as n chemicals \$35.346 000—70.00 of 000 making the state 1st tobacco mostly ugar and ugaretter \$76 662 000 the state rank \$37,043,000 the state being 1st in this industry also as n chemicals \$35,346,000—30° of the country, total musical instruments \$3,3,600,000 being three eighths of the country is

\$37,43 000 the state being 1st in this industry also as in chemicals \$35,340 000—30° of the country's total musical instruments \$3,3 650 000 being three eigh his of the country's product value and much more than the output of any other state automobil's \$30,90 000 (627 2 0 mere than in 1904) ranking New York 3rd paint and varnish \$28,559 000 (more than the product of any other state) tanned curried and finished leather \$-7,642 000 New York being 5th silk and silk goods \$-6,519 000 ranking the state 3rd carpets and rugs (not rag) \$25,606 000 ranking the state 1st and confectionery \$-5,540 000 In fourteen other industries New York ranked 1st aming the states. The principal manufacturing cities were New York \$2,0.9 692 600 (Manhattan \$1,388 408 000 Brooklyn \$417,222 800 Queens \$151 680 000 Bronx, \$42,680 800 Rich mond \$29,701 000) more than any state except Pennsylvania (21 industries producing more than \$20,000 000 cach) Buffalo \$218 804 000—9th in the United States—(slaughtering \$25,116 000 foundry and machine shop products \$20,775 000 flour etc \$19,942 000 automobiles \$9,598 000 soap \$8,653 000 inseed oil) Rochester \$112 676 000—20th in the United States—(men's ciothing \$18,879 000 photographic apparatus boots and shoes, \$13,450 000) Yonkers, \$59,334 000 (sugar refining carpets and rugs, foundry and machine shop products \$2,837 000) Syracuse \$49,435 000 (automobiles foundry and machine hop products \$5,601 000 typewriters) Schenectady \$38,165 000 (electrical apparatus steam locomotives) Troy \$37,980 000 (collars and cuffs \$13,639 000 men's clothing \$6,976 000) Utica \$31,199 000 (textiles \$15,977 000) Niagara Falls \$28,650 000 (chemicals \$11,997 000—mostly manufactured by electrolysis food preparations flour) Albany \$2,2826 000 Transportation —Railway mileage January 1,1912,116,39,72 m. The public service commission was authorized in 1911 to determine the maximum and reduce rates in railway fares and in 1912 to have the control of the reorganisation of corporations under its jurisdic

fares and in 1912 to have the control of the reorganisation of corporations under its jurisdiction. In 1911 separate appropriations amounting to \$12,945,000 were passed for the improvement completion or expedition of different state highways. In both years many

routes of state highways were changed and altogether more than a dozen routes or sub routes were added to the previous list. There were large appropriations for the state proportion of repairs on highways one bill in 1911 carried \$1,795,254 and another \$1,207,079 and in 1912 separate bills carried respectively \$2,519,399 \$95,641 and \$1,833,182 for maintenance and repairs. In 1911 \$1,030,000 was appropriated for interest on the debt for the highway and in 1912 two bills carried a total of \$9,345,000 for highway improvements. The highway law was generally amended in 1912. At the regular election the people voted (637,548 to 281 265) for the issue of \$50 000 000 in bonds for highways. A commission was appointed to investigate the operation of a barge canal \$30,000 000 was appropriated for the improvement of the Erie and Oswego and Champian canals \$6,000,000 for the Cayuga and Seneca Barge Canal \$3 230,000 to pay off a part of the principal on the canal debt \$12 000 000 for canal terminals and facilities and \$2 883 850 for interest on the canal debt In 1911 bonds amounting to \$19 800 000 were authorised for terminals for barge canal traffic At the close of 1912 the barge canal on which it was expected that boats 275 ft long 30 ft wide 12 ft draught will be used, was two-thirds completed the final opening being set for 1916. A commission was appointed to act with the New Jersey authorities and the Federal authorities in the investigation of operating conditions and a terminal station commission for Buffalo and a freight terminal act was passed for New York City giving the board of estimate the power to plan terminals approved by the commissioner of docks. A section on freight terminal corporations was added to the law on transportation corporations. A law regulating the terminal of the New York Central & Hudson River R. R. in New York City provided for the abolition of the use by railways of streets at grade. In 1912 a revision of the rapid transit law gave additional powers to the public service commission and made possible an addition to New York City's rapid transit facilities—In June and July 1911 a part of the new subway construction (mostly into the outlying parts of the city) was awarded to the Brooklyn Rapid Transit Company and a part to the Interborough system—which had built the earlier subways early in 1913 the terms of the contracts were still under discussion ways early in 1913 the terms of the contracts were still under discussion. The question of lengthening city piers for the accommodation of trans oceanic passenger steamers aroused much public interest in 1911–12. The United States department of war in 1911 gave temporary permission to lengthen certain piers outward is e toward the river channel but in 1912 the Secretary of War refused to permit this permanently and many new plans were suggested for new piers along Riverside Drive above 72nd 5t for piers running into the land obliquely—to save room in the river channel for docks in South Brooklyn etc.

The Federal government practically completed in 1912 the Ambrose and the Coney Island channels in New York harbour and the breakwater (1 565 ft long) at Plattsburg had more than half finished the improvement of East River and Hell Gate and had begun the improvement of the Niagara river (12 ft channel) of Ogdensburg harbour and of Jamaica Bay (18 ft entrance channel). On December 14 1912 New York City began work in Jamaica Bay in co-operation with the Federal government.

Bay in co-operation with the Federal government

Legislation — The legislature met in regular session from January 4 to October 6 1911 and from January 3 to March 29, 1912 At the latter session the newly surveyed boundary line between New York and Connecticut was put on the statute books

The 1911 session (April 19th and July 12th) ratified the proposed 16th amendment to the Federal Constitution providing for a Federal income tax which had been defeated in the previous session, largely because of the opposition of Governor Hughes the amendments to the state constitution submitted by the 1911 session to the people at the November election in 1911 were defeated. Among them was one raising the salary of assemblymen from \$1,500 to \$3,000 and of senators to \$3 500 and making the mileage instead of roc a mile for the trip once in each session, 3c a mile once in each week of actual attendance at the session raising the governor's salary from \$10,000 to \$20,000 giving partial home rule to cities and changing the requirements as to condem nation proceedings The 1912 session passed three amendments which go over to the 1913 session providing for condemnation "by the supreme court with or without a jury, but not with a referee " and giving the legislature power to authorise any city to take more land than it needs in condemnation proceedings to secure control of certain property-practically the same as two amendments defeated in 1911, securing to the legislature the right to pass a workmen's compensation act, and revising the system of

An elaborate election and primary law was passed in 1911. A clause (to prevent fusion) forbidding the repeating of the name of any candidate in different columns of a ballot was held unconstitutional on March 7 1912 the clause requiring personal registration in rural districts was declared invalid on October 10 1911 (Hopper v. Britl 203 N Y 144 Court of Appeals) and the requirement of 1 500 names for a petition for independent nomination

was declared unconstitutional in October 1912 the law contained a provision for direct primaries except for officers chosen by the state at large. In presidential years there must be separate ballots for presidential electors and state officers. The law was revised as regards party committees and delegates in 1912. An act of 1911 declares that no ballot is void be-

cause the cross made in voting is irregular in shape
In 1912 a board was appointed to simplify civil practice. It has the same personnel as
the board of statutory consolidation. Several important amendments to the law of procedure were passed in 1911 A Conservation Department was created in charge of a commits soon with powers and duties previously belonging to the forest purchasing board the forest fish and game commission the commissioners of water power on Black river and the state water supply commission and in 1912 the law of lands forests and public parks was revised water supply commission and in 1912 the law of lands torests and public parks was revised and a new article on fish and game was added to the conservation law. In 1911 a state athletic commission was created by a law which regulates boxing and sparring. A new personal property law was passed (1911) in relation to the sale of goods in nearly the form desired by the commissioners for the promotion of uniformity of legislation in the United States. The office of supervisor of records was created and that office and the office of state historian were put under the department of education. The legislature appropriated \$40 000 to buy the house (built 1761-62) in Albany in which General Philip Schuyler had lived and which in 1011 was the same Farners de Sales Author it reasons to reservate to and which in 1911 was the Saint Francis de Sales Asylum it was bought on February 10 After the capitol fire \$100 000 was appropriated for the safety of the capitol and \$2 000 000 for the reconstruction and decoration of the building in 1911 and \$1 000 000 for the same purpose in 1912 when \$550 000 was appropriated for continuing the construction and \$200 000 for the equipment of the State Education Building (opened October 1912) and \$500 000 for the re establishment of the State Library

The inferior courts of New York City were re arranged in accordance with the report (1910) of the Page Commission York City were re arranged in accordance with the report [1910] of the Page Commission. The mayor was empowered to create a public recreation commission. A relief and pension fund was created for street cleaners. The legislature passed a law making the Borough of the Bronx a separate county, and this was approved by the voters of the borough (about 39 350 votes to 27 870) in November 1912, but the appellate division of the supreme court declared the referendum invalid (January 17 1913).

In 1911 the department of labour was reorganised, and a commission was appointed to supreme court that the department of labour was reorganised and a commission was appointed to supperfict the page 18 and 18 a

investigate manufacturing conditions in first and second class crites before January 15 1913 On March 24 1911 the state court of a This report was to go in On March 24 1911 the state court of appeals decided that the workmen's compensation law of 1910 (applying to certain dangerous employments) was unconstitutional as taking property of employers without due process of law. This ruling was harshly criticised—see for instance the statement signed by fourteen professors of law. in the New York Outlook July 29 1911 and opinions of prominent lawyers in The Survey April 29 1911 The commission on employers liability made a valuable report in four volumes but the legislature took no action on this except to propose the additional constitu-tional amendment already mentioned. Women may not work in factories or mills within four weeks after childbirth. The medical officer of the department of health must make a thorough physical examination before issuing employment certificates for children in first class cities. Working hours a day were reduced (beginning October 1 1912) from 10 to 9 and a week from 60 to 54 for males under 18 and all females in all factories—except where there is overtime so that there may be a short sixth day in a week or overtime not more than three times a week The maximum hours for this exception are 10 (formerly 12) a day and 54 (formerly 60) a week The law does not apply to fruit canners between June 15 and October 15 Its constitutionality was being tested in the courts at the close of 1012 A October 15 Its constitutionality was being tested in the courts at the close of 1912 A law of 1911 added to places in which children could not be employed more than 54 hours or sax days a week theatres places of amusement barber (and shoe polishing) shops and for bids the employment of children between 12 and 14 during summer school vacation in villages and cities of the second and third classes Misrepresentation in regard to employ ment was made a misdemeanour Much stricter requirements for sanitation and inspection were adopted for bakenes and confectioneries Doctors were ordered to report to the bureau for the surface of the confection of the second stricts. of labour statistics all cases of industrial poisoning or other occupational disease The use of compressed air in caissons was regulated in 1912 by a law which includes a schedule of work ing hours per day under different pressures

In 1911 the State Institute for the Study of Malignant Disease (succeeding the Patholog cal Laboratory of the University of Buffalo and the Gratwick Laboratory) was established at Buffalo. The legislature appropriated \$65,000 for a cancer hospital adjacent to the Gratwick Laboratory and \$35,000 for maintenance in 1911 (and \$60,000 for equipment and maintenance in 1912). The office of state fire marshal was created and in 1912 a much stricter fire prevention law was adopted for factories. There must be fire drills in all factories and automatic fire enriphless must be installed in factories. and automatic fire sprinklers must be installed in factories and in buildings more than seven stories or ninety feet high which have wooden flooring or wooden trim. A general fire prevention law was passed applying to New York City only supplementing an amendment

¹ Evidence brought before a legislative commission in 1912 showed that there were grave abuses in these canneries —especially in regard to child labour

to the New York charter made in 1911 The tenement house law was clearly made applicable to the New York charter made in 1911 Ine tenement house law was clearly made applicable to apartment of New York City) distinguished between tenement houses and apartment houses. A new vital statistics law was passed in 1911 The discharge of sewerage into rivers was regulated In 1912 the governor was authorised to appoint a board of three a surgeon neurologist and practitioner of medicine to be examiners of the feeble minded criminals and other defectives they are authorised to recommend the sterilisation of dangerous criminals. The requirements for the practice of medicine were increased and after September 1 1912 chropodists must be heeneed By a law of 1911 the possession and use of false weights and measures creates presumption of knowledge of their falsity. A law of 1911 required that cold storage foods be labelled and be kept not more than one year A commission was appointed to study market facilities and the prices of food and in August 1912 it reported that distribution added 40 / to the cost of foodstuffs and recommended the authorisation of cities to establish departments of markets. A strict law was passed regulating the sale or possession of dangerous weapons—more stringent in many respects than the previous law against concealed weapons. Among important measures defeated in the 1911 legislature were a new charter for New York City a bill granting suffrage to women and one relieving racing associations from the responsibility of gambling at race-tracks—a measure which would have lessened the effectiveness of the anti-gambling legislation of 1908 and 1910

Finance—The state tax for 1912 was 396 mills for the general fund 383 for the canal det sinking fund 03 for the barge canal terminals sinking fund 1885 for the highway improvement sinking fund and 0125 for the sinking fund for the Palsades Interstate Park debt sinking fund In 1911 bequests to charities outside the state were made the previous law had applied only to charities within the state. The double taxal contents the previous law had applied only to charities within the state. exempt the previous law had applied only to charities within the state. The double taxa tion of inheritances was practically stopped. Money and securities of non residents taxed in the state and their shares in New York corporations were made exempt even if there is no reciprocal arrangement with the other state. Sccured debts were taxed ½ of 1 of their face value and thereby exempted from any other tax. The stock transfer tax was changed both in 1911 and 1912 and the person who make the sale or transfer of stock must procure and affix a tax stamp

In New York City assessments begin on April 1 instead of the first Tuesday in September

Statements of valuation must be forwarded to the state board of tax commissioners not to the comptroller as formerly and the board certifies to the comp troller He is required to collect statistics of taxation revenue and debt

For the fiscal year ending September 30 1912 the revenue was \$50 213 405 (for the preceding year \$38 045 353). Among the larger items were inheritance tax \$12 153 189 corporations \$10 349 165 (and \$472 960 for organisation of corporations) (new) direct state tax \$6,326 823 excise \$9,412 364 stock transfer stamp tax \$3,653 037 and (new) secured debt tax \$3,626 823 The expenditures for the same year were \$44,658 678 and the cash surplus at its close \$8,808 265

Education—In 1911 a teachers retirement fund was created for all parts of the state except where there was local provision for a similar fund. Teachers are assessed 1 / of their salaries and may retire after 25 years service (15 of which must be in the part of the state covered by the act) on an annuity of half of the annual salary at the time of retirement this to be not more than \$600. Any teacher retiring after 15 years for disability gets an annuity bearing the proportion to the retirement annuity that the number of years he has served bears to twenty five. Annuities are to be granted only if the teacher has paid a sum equal to 30 , of the annuity but the difference if any, may be made up by the teacher. In 1912 the law for retirement of teachers in state institutions was made more liberal. The previous age limit of 70 was omitted, and the requirement that the teacher must have been employed for 10 years immediately preceding retirement was changed by omitting the words imme The maximum allowance for teachers was raised from \$750 to \$1 000 diately preceding In 1911 the law in regard to the education fund was radically changed. The county loan commissioners were abolished and the complete control of the fund was vested in the state comptroller In the same year a new salary law was passed for teachers in New York City which states that there shall be no discrimination based on sex, this went into effect January 1 1912 and added nearly \$3 850 000 to the annual pay roll. A law of 1912 provides that eligible lists for vacancies in New York City schools should not be merged but that one list must be exhausted before nominations are made from a later list. On a question of teachers licenses the state supreme court in November 1912 held that the state commission of educa tion had jurisdiction over all school departments in the state including that of New York City One of the most discussed points in the proposed charter for New York City was a paid board of education which Mayor Gaynor defended against the almost universal crit City icism of educational experts. In 1912 was celebrated the 25th anniversary of the service of William H. Maxwell (b. 1852) as superintendent of schools in New York City (See his article in Educational Educations for educa tion were \$125,000 to secondary schools for training of teachers \$500 500 for normal schools \$3.175,000 for common schools and \$650 000 for secondary departments and libraries
For the year ending July \$1.1912 the school population was 2.143,580 the total enroll

ment 1 457 391 the average daily attendance 1,164,992, and the average school year about 169 days. The total expenditures were \$59 663 976

In 1910 the percentage of illuteracy (10 years of age and over) was 5,5 as in 1900 Elmer Ellsworth Brown (b 1861) U S Commissioner of Education in 1906-11 was chosen chancellor of New York University on April 24, 1911 and was installed on November In 1911 Columbia University became closely affiliated with the Presbyterian Hospital and received the bequest of Joseph Pulitzer for the establishment of a school of journalism which opened for instruction in the autumn of 1912 with Talcott Williams (b 1849) of the which opened for instituction in the automin of 1912 with Tarcott winning to 1049, or expended philadelphia Press (since 1881) as its head. In 1912 a dramatic museum was established in Philosophy Hall of Columbia University. A 'Politics Laboratory was established at Columbia in 1911. A gift of George F. Baker (b. 1840) a banker of New York City. made in November 1912 will be used to ally the Cornell Medical College and the New York Hospital. The Crocker Research Fund of Columbia University for study of cancer was announced late in 1912 to amount to \$1 565 635 it was supplemented in the same year by a bequest of Augu tus W Openhym The cornerstone of a dispensary at Syracuse University was laid December 14 1912 Hamilton College Clinton celebrated its centennial in 1912 and planned to make its entrance requirements broader and beginning in 1913 to introduce a group system of electives in the econd third and fourth years of the course Greek is still required for the degree of Bachelor of Arts but the degrees of Ph B and B S are given without Creek In September 1912 the College of St Francis Agrier in New York City became a part of Fordham University though each kept its former name and charter

Penal and Charitable Institutions - In 1911 an investigation of state prisons and prison industries resulted in the discovery of much corruption and mismanagement and in the resignation of the state prison commissioner Corneliu V Collins In 1911 a new law wa passed for the government of Letchworth Village and in 1912 one for the Woman's Relief Corps Home at Oxford The name of the commission in lunacy was changed to the State Hospital Commission and its medical member became practically president of the commission. In 1911 a farm industrial colony for tramps and vagrants was established and in 1912 a state reformatory for misdeameanants for which \$50,000 was appropriated. A site in Dutchess county \$21 acres 20 m S of Poughkeepsie was approved by the governor in September 191.

The Creat Meadows prison at Comstock Washington county was opened. A Bureau of Deportation created in 1912 may order the deportation of insane in ioii The board of parole may issue an absolute discharge to any paroled prisoner is could be done only if the prisoner had an indeterminate sentence. In Nov. immigrants -formerly this could be done only if the prisoner had an indeterminate sentence 1912 a site for the New York (its farm for inebriates (controlled by a board created in 1910) was chosen in Orange county near Greycourt 60 m from the city In 1912 work was begun on a laboratory of social hygiene at the Bedford (state) reformatory for women

The legislature of 1911 incorporated the Phelps-Stokes fund for the erection of tenements etc under the will of Caroline Philps Stokes who died in 1893 and the Carnegie corporation to which Andrew Carnegie has delegated the work of carrying on his various philanthropies to which he save \$25,000,000 November 10, 1911, and \$100,000,000 in the following year and which he has made his residuary legatee. In 1912 the principal appropriations were \$70,000 for the maintenance of the state prison for the state hospitals \$5,804,891 and for charitable institutions including reform itories asylums etc \$1,999,929. The total number of inmates in state charitable and reformatory institutions not including insane asylums on September 30 1912 was 10 744 (10 6-5 in 1011)

A Free Employment Bureau in Schenectady was established on January 24 1912 and on March 7 was transferred from the charities department to the department of public works

History —On January 1 1911 John Alden Dix (b. 1860 Democratic candidate for heutenant governor in 1908 manufacturer of wall paper and lumber) the first Democrat to hold the office since 1894 was inaugurated governor. The legislature was strongly Democratic in both houses for the first time in 17 years. Its session the longest in the Instory of the state lasting until October 5th was broken by two recesses one following the partial destruction of the state capitol by fire on March 29th, when the state library was almost totally destroyed and there was a loss of several millions of dollars, and another during the month of August Under the control of the leaders of Tammany Hall, the Democratic organisation in New York City a mass of partisan primary and electoral legislation was introduced, some of the bills were to eliminate bi partisan boards and replace them with partisans appointed by the governor and others were salary 'grab" bills especially for New York City Some passed but were subsequently partially invalidated by the courts because of faulty drafting or flagrant violations of the constitution, others notably the proposed New York City charter which was backed by Tammany and favoured by Mayor Gaynor, and the cardinal aim of which was to increase the powers of the mayor and lessen those of the existing city officers elected on

the mits Fammany platform in 1909, were defeated after a long and bitter fight—the charter on September 30, 1911 Ten weeks in the early part of the session were occupied by a deadlock over the election of a successor to Chauncey M Depew (see E B viii 36), United States senator since 1899 Neither of the original contestants, Edward Morse Shepard 1 supported by the independent and anti-Tammany elements who re fused to enter the Democratic caucus, or William Francis Sheehan (b. 1859), a New York corporation lawyer and in 1892-95 heutenant governor, was successful, the elec tion finally going on March 31st to James A O Gorman (b 1860), a justice of the supreme court (since 1900), who, although at one time an active Tammany man, was not originally favoured by the Tammany leaders In 1912 he was active in Woodrow Wilson's interests at the Baltimore convention and during the presidential campaign

The character of the legislation passed at the session of 1911 was the principal cause of the overwhelming victory in the autumn elections (Nov 7, 1911) of the Republicans in the state and in most local and municipal contests. The Republicans, helped in some districts by fusion with other anti Tammany elements and largely on the issue of the attempted Gaynor charter, carried for the first time a majority of the assembly dis tricts in New York City In Kings county (Brooklyn) a Republican and Independent fusion elected the entire county ticket. The senate elected for two years in 1910 remained Democratic but the division in the lower house showed 102 Republicans to 47 Democrats and 1 Socialist—in the preceding session there were 83 Democrats 65 Republicans, I Independent Democrat and I Independence Leaguer The Socialists elected the Rev George R Lunn² mayor and a nearly complete city ticket including 8 of 13 aldermen in Schenectady city and gained control of the Schenectady county board of supervisors, electing 8 out of 18 members

The control of the senate by the Democrats and of the lower house by the Republi cans made partisan legislation impossible although the party machines sought by bi partisan alliances to divide the patronage The primary in March the first under the new law brought out the defects in that statute Uniformly the Roosevelt delegates to the National Republican convention at Chicago were defeated and delegates favour able to President Taft's renomination were chosen by the regular "party organisation The Democrats by an alternative provision of the law, did not choose delegates by primaries in New York City Both parties held state conventions in April the Republi cans adopting a stand pat " platform and declaring for President Taft's renomination and the Democrats choosing state delegates to the Baltimore convention bound by the unit rule and selected largely by the Tammany leaders At the national convention at Chicago the Republican delegation from the state cast 76 votes for Taft and 8 for Roose velt, and 6 delegates did not vote William Barnes Ir (b 1866), publisher of the Al bany Journal and the reputed 'boss" of the Republican machine was prominent in Taft's interests, and James S Sherman 3 a leader in the conservative or stand pat wing of the party in the state was renominated for vice president. Timothy Lester Woodruff (b 1858), whom Barnes succeeded in 1911 as chairman of the Republican state committee and who had been only less well known than Barnes for his connection with the Republican organisation, identified himself with the followers of Roosevelt

Shepard was born in New York City in 1850 and died on July 28 1911 Orphaned at six he became the ward of Abram S Hewitt graduated at the College of the City of New York in 1869 and was admitted to the bar in 1875. He was a founder and leader of the Brooklyn Democratic Club and of the Independent Democracy opposed David B. Hill and Tammany Hall but was Tammany's nominee for mayor of New York in 1901, when he was defeated by Seth Low whom he had supported against Tammany in 1897 worked for the Gold Democrats in the presidential campaign of 1896 supported Bryan in 1900 opposed the court remocrats in the presidential campaign of 1890 supported Bryan in 1900 opposed his nomination in 1904 but again supported him in 1908 to secure tariff revision. He with drew his manie from the senatorial nomination hoping to insure the election of some other independent Democrat. He wrote an excellent biography of Martin Van Buren (1899). He was formerly a Dutch Reformed clergyman. In June 1912 he appointed to the municipal board of public welfare Helen Keller.

18 died immediately before the election (see Obtwarts) and no name was officially substituted for his on the fieldor. But the only electoral votes cast for Taff those of Litah.

substituted for his on the ballots But the only electoral votes cast for Taft those of Utah and Vermont were for another New Yorker Nicholas Murray Butler for vice president

The presidential campaign resulted in Woodrow Wilson receiving the 45 electoral votes of the state. The popular vote was for Wilson, 655,475, for Taft, 435,428 for Roosevelt, 390,021, and for Debs, 63,381 (38,451 in 1908) The Democratic machine it was supposed, would not exert its utmost strength for Woodrow Wilson, whose nomination it had opposed at Baltimore, where the delegation voted (as a unit) for Judson Harmon on the first mine ballots and thereafter for Champ Clarks, and because Wilson had urged the nomination for governor of no machine candidate 2 The press of the state was less favourable to Wilson much less favourable to Roosevelt and more kindly disposed to Taft than that of any other part of the country And the Republican party organisation, which had long been hostile to Roosevelt, suffered less from schism and gave to Taft a stronger support than in almost any other state state's representation in Congress 3 43 under the new apportionment, instead of 37 will be composed of 30 Democrats 10 Republicans and 3 Progressives. W Bourke Cockran (b 1854) a New York Democrat, who had campaigned for McKinley in 1806 and was representative in Congress in 1887-89, 1891-95 and 1904-09, joined the Progressive party and was a candidate for Congress

In August the new Progressive party organised separately

In the primaries of Septem

ber 17 Progressives largely refrained from taking part. The anti Tammany wing elected
about a third of the delegates to the Democratic state convention. Early in September the
Progressives met in an unofficial convention at Syracuse. A split threatened between the
followers of two rival candidates for governor. One of these was William H. Hotckhiss
formerly state commissioner of insurance chairman of the convention who repeatedly refused
to have his name considered but who was still urged as a candidate by his followers the
other William A. Prendergast comptroller of the city of New York who had the backing of
Timothy L. Woodruff. The convention was stampeded by a single speech (September 6)
for the nomination for governor of Oscar Solomon Straus (b. 1850), ambassador to Turkey
in 1887–89. 1898–1901 and 1909–10 a member of the Hague permanent court of arbitration
since 1902 and secretary of commerce and labor (1906–09) in the cabinet of President
Roosevelt. A full state ticket and local Progressive candidates were subsequently nominated
by petition. The Republican state convention met at Saratoga on September 25 adopted
a state platform with many progressive features and nominated (September 27) for governor
Job Filmer Hedges (b. 1862). a New York lawyer known as a wittv campaigner and after
dinner speaker. The Democrats at Syracuse nominated (October 3) for governor William
Sulzer (b. 1863) who had been a member of Tammany but had not been closely identified
with that organisation and who had been a representative in Congress in 1896–1912 where
he was prominent on the foreign relations committee especially in connection with the
question of passports in Russia. Governor Dix was a candidate for renomination but his
weakness and vacillation had made him unpopular. Most of the state officers elected with
Dix in 1910 were renominated and at the general election. November 5 the entire Democrats
state ticket including two judges of

There were no local elections of importance in New York City either in 1911 or 1912 in 1911 the anti-Tammany judicial and county officers were successful and the fusion forces won control of the board of aldermen from the Democrats who elected a sheriff by only 2 200 votes William J Gaynor (b 1851 justice of the New York state supreme court 1893-1909) over a divided opposition was elected mayor in 1909 on the Tammany ticket but he was from the Borough of Brooklyn where there is no fammany organisation and his earliest political fame had been gained in crushing a corrupt ring in Brooklyn. On the whole he kept his administration free from extremely partisan control. In general he acted in harmony with the fusion majority in the board of estimate elected with him and furthered reforms in the direction of efficiency in many city departments. He delayed a decision in

¹This solid vote of New York for Clark helped to turn Bryan and his followers against Clark and to lose him the nomination See United States Political History

² But the Wilson and Marshall electors received more votes than were cast for the Democratic candidate for governor or for any state office except leutenant governor and controller

¹ Two congressmen died in 1912 on July 5 George R. Malby (b 1857) Republican, in Congress since 1907 and on October 30 Richard E Connell (b 1857) Democrat

regard to subways by opposing the majority of the board of estimate and apportionment in the Culien-Foley (modified Gaynor) charter there was a provision empowering the major to veto contracts let by this board. He insisted it was generally believed, on being in actual control of the police and enforced his théories of personal liberty and of non interference on the part of the police with gambling and other vice. Possibly as a result of the weakening of the power of the police came a wave of lawlessness and licence which culminated in gang serrorism on the lower east side of Manhattan and in the assassination of a gambler. Herman Rosenthal July 16 1912 who was on the point of making disclosures to the county district attorney of the relations between gamblers and the police. Charles Becker a police lieutenant was accused of instigating the murder because Rosenthals disclosures would cut off the income he was deriving from protecting gamblers. He was tried and convicted (October 24) and immediately afterwards four gangsters or gunmen were convicted as the actual slayers of Rosenthal. A Citizens. Committee was organised to study police problems and an enquiry was begun by a special committee was organised to study police problems and an enquiry was begun by a special committee of the board of aldermen (the Curtan Committee) which at first was openly opposed by Mayor Caynor who upheld the administration of the police department. The city chamberlain Charles H. Hyde was indicted by a grand juty on May 7, 1911 for accepting a bribe from the Carnegie Trust Company. He was stoutly defended by the mayor who urged him not to resign but he withdrew on the ground that the charges made against him would embarrass the administration. After a long delay procured by the counsel for the defence he was convicted on November 29, 1912. This conviction and those in the Rosenthal case were largely due to the efforts of the county district attorney. Charles Seymour Whitman (b 1868) assistant corporation counsel in 1901-02 city magi

The Democratic senate through a committee in 1912 investigated the city government of Albany the capital of the state controlled by a Republican machine organisation led by Wilham Barnes Jr the Republican state boss and showed the presence of corruption On March 29 the senate adopted the report of the committee and recommended the removal

of Mayor James B Mckwan

There were several serious labour disturbances in the state in 1911 and 1912. In New York City drivers and helpers in the street-cleaning department struck on November 5 1911 asking for the abolition of night work and for increased wages but they were all employed under civil service rules and were tried and dismis ed. The strike was broken by the end of the month. There was rioting on November 12. The strike was broken by the end of the month. There was rioting on November 12. This strike and that of New York City hotel waiters (May 31 to June 25) were marked by violence. Other strikes in New York City were those of tailors (September 14-16 1911) of furners (June 20-September 8 1912) and of theatre aniscians (July 19-August 4) the latter was broken by the use in many theatres of mechanical pianos etc. At the very close of 1912 a garment workers strike began. At the New York cotton mills near Utica there was a strike from March 26 to April 23, 1912 the militar were called out early in April to check disorder and the strikers went back to work having gamed nothing. A strike at a knitting mill in Little Falls begin ming October 23, 1912 was led by the Industrial Workers of the World it was marked by rooting and by the afternity of the police to prevent Socialists from speaking in the streets Mayor Lunn of Schenectarly was arrested (October 15 and 17) for addressing the striker and was sentenced to fine or imprisonment. On December 28 1912 there were two riots Two days before this the State Department of Labor had begun an investigation of the strike.

and was sentenced to fine or imprisonment. On December 28 1912 there were two riots Two days before this the State Department of Labor had begun an investigation of the strike. The strike ended early in January 1913.

In New York City the completion of the Pennsylvania terminal (31 33 3ts 7th and 8th Ave.) in 1911 and the opening in 1912 of part of the new Grand Central Station (42d st and Park Ave.) were events of architectural and economic importance. The new city Public Library (Fifth Ave. 40-42 sts.) was opened in May 1911 and the great Municipal Office building (probably the largest municipal building in the world) immediately E. of City Mail park was nearing completion in 1912. New hotels completed in 1911-12 were the Ritz Carton (Madison Ave. and 46 st.) the Vanderbit (34 st. and Park Ave.) and the McAlpin (Broatway and 34 st.). The two last call attention to the development of the city in the district near the Pennsylvania terminal. The Woolworth Building. 760 ft. high was fin ished in 1912. A city plan association in Albany was organised in 1911 and by an ordinance of lanuary 15, 1912 it employed as expert Arnold W. Brunner of New York City.

Population (1910) 2,206,287 (165% more than in 1900) The proportion of ne groes decreased from 33% in 1900 to 31 6%. The native whites made up 66 5% of the total in 1900 and 6" 7% in 1910 (foreign born whites in 1910 0 3%) Density 45 3 to the sq m Of the total 75.8% (in 1000, 82 3%) lived in rural (unincorporated) territory There were 20 cities and towns which had more than 5 000 each as follows 34 014, Wilmington, 25,748 Raleigh, 19 218, Asheville 18 762, Durham, 18,241 (6,679 in 1900), Winston, 17,167, Greensboro, 15,895 Newbern, 9 961 High Point 9,525 (4 163 m 1900), Concord 8,715 Ehzabeth City (town) 8 412 Rocky Mount (town), 8,051 (29,57 m 1900) Salisbury, 7153, Fayetteville (town) 7,045 Kinston, 6,995 Wilson (town) 6 717, Washington, 6 11 Goldsboro, 6 107 Gastonia (town), 5,759 and Salem (town) 5 5.3

Agriculture — The acreage in farms decreased from 22 749 .56 to 22 439 129 in 1900—1910 but the improved land in farms increased from 8 327 106 to 8 813 050 the average farm but the improved land in farms increased from \$ 327 106 to 8 813 050 the average farm acreage fill from 101 3 to 88 4 and the value of farm property increased from \$233 834,693 to \$537 716_10 (5,343 164 945 land \$113 459 662 buildings \$18 441 619 implements \$62 649 984 domestic animals) Of the land area 71 9 was in farms. The average value of farm land per acre was \$1,29. Farms were operated largely by owners (145 320 by owners 1 118 by managers and 107 287 by tenants). In 1912 (preliminary estimates) the principal crops were. Indian corn. \$1 106 000 bu. (2.88 000 A.) wheat \$322 000 bu. (598 000 A.) oats 3.794 000 bu. (204 000 A.) rye 409 000 bu. (44 000 A.) buckwheat 175 000 bu. (10 000 A.) potatoes \$50 000 bu. (30 000 A.) hay \$31 000 tons (293 000 A.) cotton 878 000 bales (271 lbs per A.) tobacco. 110 980 000 bs. (179 000 A.) and rice 10 000 bu. (400 A.). In 1909 (U.S. Census) the value of vegetables other than potatoes was \$6,496 308 of small fruits. \$653 076 (strawberries. \$712 1.6) of orchard fruits. \$5,248 0.50 (apple...\$2014 670 peaches and nectarines. \$1.041 767). On January. I. 1912 there were on farms 173 000 horses. 182 000 mules. 312 000 milch cows. 380 000 other neat cattle. 10,000 shep and 1.405 000 swine. In 1912 the National Forest Reservation Commission recommended the purchase of the Mt. Mitchell. aria. (18 701 acres. McDowell county.) and the Nantahala area. (27 815 acres. Macon and Swain counties) under the Weeks. Act of March 1. 1911 for national forests. The state experiment station in 1012 seemed to have succeeded in removing toxic properties.

The state experiment station in 1912 seemed to have succeeded in removing toxic properties from cottonseed meals

Mineral Products —Total value 1911 \$2 707 155 Clay products were valued at \$1 280 126 and stone at \$826 928 In mice the state ranked 1st with an output valued at \$217,299 Gold mostly from siliceous ores was valued at \$71 900 Of mineral waters the value in 1911 was \$31 108 being 45 % more than in 1910 Valuable emerals were found near Shelby in 1911 and amethy sts near Raleigh and in Warren county Graphite was found near Franklin Monazite zircon barytes millstones and garnets are minor products

Manufactures - The state is one of the most important in the South in manufactures the capital invested from \$141 001 000 (only \$08 283 000 in 1899) to \$217 186 000 and the value of products from \$142 521 000 (\$85 2 -1 000 in 1899) to \$217 186 000 and the value of products from \$142 521 000 (\$85 2 -1 000 in 1899) to \$216 656 000 In 1909 more than three fourths of the total wa from the following cotton goods \$72 680 000 ranking the state 2nd (in 1889 10th) tobacco \$35,987,000 lumber and timber products \$33,525,000 ranking the state 2nd and furniture \$7,885,000 (more than thrice as much as in 1899) cotton seed oil and cake \$8,504,000 (over twice what it was in 1904) and flour and grist mill products \$8,501,000. Other important products were—fertilisers \$6,316,000 (four times as much as in 1899) a large part being complete fertilisers and the industry being dependent largely on the manufacture of cottonseed oil tanned curried and finished leather \$5,415,000 hosiery and kint goods \$5 152 000 and carriages and wagons \$3 283,000 In 1909 not quite two sevenths of the total product value came from cities in 1899 about one sixth. The principal manufacturing cities in 1909 were Durham \$23 271 500 Winston \$16 778 000 Charlotte \$10 400 000 Asheville \$3 250 000 Wilmington \$3 005 000 Raleigh \$2 376 000 and Greensboro \$2 032 000

Transportation — Railway mileage, January 1 1912 5,000 98 The legislature in 1911 incorporated the trustees of the Central Highway 480 m long from Beaufort Harbor to the Tennessee state line. County commissioners may appropriate annually not more than \$50 a mile for the highway and municipalities may appropriate \$100 and \$25 for every 1 000 inhabitants above the first one thousand in the municipality. In 1912 work on this highway in 18 (out of 19) counties was in progress and it was estimated that it would be completed

¹ See E B xix 771 et seq

by the close of 1913. Similar appropriations are permitted for a state highway from Char lotte to Wilmington but little work had been done on this in 1912.

The Federal river and harbour act of 1910 provided for slack water navigation on the Upper Cape Fear river above Wilmington, with a depth of 8 ft and work on this project was begun at 1911. The same act and a law of 1911 made appropriations for a depth of more than 20 ft in parts of the lower river. The canal from Pamiko Sound to Beaufort Inlet 10 ft deep being the third unit of the inside route from Norfolk Va to Beaufort was completed in January 1911. The river and harbour act of July 25, 1912 appropriated \$500,000 to purchase the Chesapeake & Albemarie Canal and \$100 000 for improvement and maintenance

Legislation —The regular session of the legislature was held in Raleigh beginning January 4, 1911 On February 11th it ratified the Federal income tax amendment The governor's salary was increased from \$4,000 to \$5,000 a year

Children under 18 are not to be required to work in manufacturing industries more than 60 hours a week the law apparently permits a greater number of hours if the employee consents. There are the same exemptions as there were in the 66 hour law. The hours of There are the same exemptions as there were in the 66 hour law railway employees are limited to 16 hours in succession to be followed by 10 hours off an employee works for 16 hours (not consecutive) in any 24 hour period he must have at least 8 hours off Train despatchers are not to work more than 9 out of 24 hours in night and day offices nor more than 13 in day offices but in emergency they may work 4 hours more three days in a week

Married women may contract as if they were unmarried and if their husbands are insane

are permitted to sell property for their support

The health laws of the state were amended and a state board of health was created act provides for a superintendent of health who in some cases is a quarantine officer and

medical inspector of schools with special instructions to investigate hook worm disease

Procurers are to be punished by six months or one year in jail and by a fine of \$300 to
\$1 000 The sale of substitutes for beer is forbidden. The law does not apply to sales to pharmacies or to sales of domestic wines and wines in sealed packages or of sacramental wine or of flavouring essences or carbonated drinks with $\frac{1}{10}$ of 1 $\frac{9}{0}$ of alcohol tions are forbidden to handle or sell intoxicating liquors Clubs and associa

Injuring or obstructing a railway is made a felony instead of a misdemeanour as it was merly. The powers of the corporation commission which discharges the functions of railway commissioners were increased it may abolish grade crossings or require interlocking automatic signals at crossings or bridges and may control ticket selling in railway stations

The county of Avery was established (county seat Elk Park) from parts of Mitchell Watauga and Caldwell counties it was named in honour of Gen Waightstill Avery (1745-1821) one of the signers of the Mecklenburg Declaration Hoke county (county seat Raeford) was established from parts of Cumberland and Robeson counties. All lakes in Bladen, Columbus and Cumberland counties containing 500 acres or more are to remain state property forever for the use of the public The city of Wilmington was re chartered with a commission government which was adopted (March 15 1911) The legislature drew up a commission form of government for Winston and changed the charter of Raleigh by providing for three commissioners appointed from primary nominations and for no party names to appear on municipal ballots but Raleigh voted down the change by 886 to 437 (out of 2 500 voters) and the commission form was defeated in Winston also. The commission form with the recall was adopted in February 1911 by popular vote in Greensboro ratifying the charter drawn by the legislature

Finance —In 1909 the legislature appropriated \$300 000 more than the revenues for that year and in 1911 the treasurer was authorised to issue a two year note for this amount. An issue of \$550 000 in 44 year 4% bonds for refunding the state debt was oversubscribed in December 1912 although the plan was attacked by the Corporation of Foreign Bondholders of London which holds repudiated bonds of the state. The legislature authorised the government of the state of the state of the state of the state of the state. nor to appoint commissioners to settle claims of indebtedness with the United States after the appointment of commissioners by the Federal government. An act was passed making shareholders in any state bank which has become bankrupt defendants in original action against that bank. The corporation commission was made a board of state tax commissioners with a general supervision of the tax system and with the powers of a board of equality sation it is required to investigate other state systems of taxation Real property is to be assessed at its true value. The tax levy for 1911 and 1912 imposes a poll tax on all males between 21 and 50 of \$1 29 a year and an ad valorem tax of 4.5 mills —2 I mills for state pur poses 4 mills for pensions and 2 mills (formerly 1 8 mills) for schools Without the authority of the legislature municipal corporations may not lay a tax of more than 10 mills Business corporations are subject to tax on their capital stock payable to the state treasurer. The general tax law of 1911 as for several years, provides for an inheritance tax graded to degrees of relationship and amount of bequest (15% on sums above \$50 000 if the legatee

See Highways of North Carolina 'by Joseph Hyde Pratt State Geologist, in American Motorist April 1912

is not a relative) and for a tax of 1 of on incomes above \$1 000 from property not taxed. In the fiscal year ending November 30 1912 receipts were \$3,413 656 and exponditures \$3 341 021 leaving a balance December 1 1912 of \$290 856 in face of unpaid obligations amounting to \$1 095 709 The total state debt was \$7 8,32 950

1 1912 of 299 of the total state debt was \$7 8,2 950

Education —In 1911 the legislature voted to establish in each county after a favourable vote therein a country farm life school to which stat aid is to be given. A school at Vance boro Craven county under this law will open in 1913. Under a special act for Grifford county there are three agricultural high schools. The name of the Baptist University for Women in Raleigh was changed to Mercuth College and the name of the Croatan normal about the Indian normal school of Robeson county, the name of Croatan Indian had the Indian normal school of Robeson county. school to the Indian normal school of Robeson county (the name of Croatan Indians becoming officially Indians of Robeson county) Among the appropriations in 1911 was \$100 000 for weaker school districts to bring their term up from four to five months a year

For the school year 1911-12 the school population was 762,607 the enrollment in public schools 525,507 the average daily attendance 332,546 the average school term 109 days the receipts for schools \$4,448,752 and the expenditures \$4,078,768 Of the population 10 years and over in 1910 185 (287 in 1900) were illiterate of whites 12 3 (194 in 1900) of negroes 31 9 (476 in 1900)

Penal and Charitable Institutions — The legislature in 1911 appropriated \$60,000 for a calculation to the feetber minded over 6,000 for a calculation became at kinston I enough

school for the feeble minded over 6 years of age a site has been chosen at Kinston Lenoir county. A reform and manual training school for negroes between 7 and 16 was established

History — Governor William Walton Kitchin! (b. 1866) who had been a representa tive in Congress in 1897-1900 was not renominated for governor for the term 1913-17 but entered the campaign to succeed Furnifold McLendel Simmons (b. 1854) senator 1901-13) also a Democrat, as United States senator, he was defeated at the November election (which in this state includes what is practically a Democratic senatorial pri mary), Simmons receiving about 30 000 more votes and Chief Justice Walter Clark about 25 000 less votes than Kitchin The ten (Democratic) representatives in the 62nd Congress were reelected in 1012. In the campaign for governor, Locke Craig (b 1860 member state house of representatives 1899 and 1901) Democrat was elected by 149 975 votes to 43,6 5 for Thomas Settle (b. 1865 representative in Congress, 1893-97), Republican, 49,930 for Iredell Meares Progressive of Wilmington who had refused (Oct 28th) the offer of the Republicans to withdraw the Taft electors if the Progressives would support Settle for governor The Republican (43 625) and the Progressive (49 930) votes were so small that the parties cannot be officially recognised The next legislature in the state—50 000 votes is the minimum for an official party will have 46 Democrats in a senate of 50, and 106 Democrats in a lower house of 1 o Woodrow Wilson carried the state with 144 507 votes to 69 130 for Roosevelt 29 139 for Taft and 1,025 for Debs In the presidential campaign Josephus Daniels (b. 1862) editor of the Raleigh News and Observer, took a prominent part as a member of the Democratic National Executive Committee and in charge of the publicity bureau

At Pinehurst a negress was lynched for murder on June 25 1912

Charles Brantley Aycock born 1859 Democrat, governor in 1901-03 and a leader in the campaign for state wide prohibition, died April 4 1919 He was a candidate for See his Life and Speeches by R. D W Connor and Clarence Poe US senator in 1911 (Garden City N Y 1012)

Population (1910) 577,056 (80 800 more than in 1900) Foreign born whites con stituted 27 1% (35 3% in 1900), native whites of native parentage 28 2% (20 6% in 1900) Density 8 2 to the sq m The rural (unincorporated) territory contained 72 1% of the total (in 1900 77 7%) The 10 places of 3 000 or more contained together 11% of the total They were Fargo, 14,331, Grand Forks, 12 478, Minot, 6,188 (1,277 in 1900), Bismarck, 5,443, Devils Lake, 5 157, Valley City 4 606 Jamestown, 4 358, Mandan, 3 873 Dickinson, 3 678 and Williston, 3,124 (763 in 1900)

¹ His father William H Kitchin (1837–1902) was in the Federal House of Representatives 1879–81 and his brother Claude (b. 1869) a representative in 1901–13 reelected 1912 See E B xix, 779 et seq

Agranulture The acreage in farms increased from 15,542 640 to 28,426 650 in 1900-10 the suproved land in farms from 9,644 520 to 20,455 092 the average farm acreage from 342 9 to 382 3 and the value of farm property from \$255,266 751 to \$074 814 205 (\$730 380 131 land \$92 276 613 buildings \$43 907 595 implements \$108,249 866 domestic animals). Of the land area 63.3 % was in farms. The average value of farm land per acre was \$25 6 Farms were operated largely by owners (63.212 by owners 484 by managers and 10 664 by tenants). In 1909 69 farms (10 248 acres \$,243 in Williams and 850 in McKenzie county) were irrigated; the acreage of which present enterprises were capable was 21,917 and that of projects was 38 173. About one-sixth of the acreage irrigated was under the U.S. reclamation service. Wheat (1,268 acres) and wild grass (1 057) were the largest irrigated crops. In 1912 (preliminary estimates) the principal crops were Indian corn 8 758 000 bu (328 000 Å) wheat 143,820 000 bu (7 990 000 Å.) oats 95 220 000 bu (2 300 000 Å) barley 35 162 000 bu (1 176 000 Å.) rye, 864 000 bu (48,000 Å); potatoes 6 656 000 bu (52 000 Å) hay 510 000 tons (364,000 Å.) and flaxseed 12 086 000 bu (1 246 000 Å.) In 1909 (U.S. Census) the value of vegetables (excluding potatoes) was \$1 069 125. On January I 1912 there were on farms 691 000 horses, 8,000 mules 272 000 milch cows 446 000 other neat cattle 287 000 sheep and 359 000 swine. cattle 287 000 sheep and 350 000 swine

The legislature in 1911 appropriated \$15,000 to advertise the state's agricultural possibilities through the department of agriculture and thus offset the advertising of farm lands in Canada A had insurance department was created with the commissioner of agriculture and labour as had commissioner. The Buford Trenton unit of the (Federal) Missouri River pumping project was 38 % completed in November 1912 and in 1911 irrigated 1 240 acres and the Williston unit on which the Federal department of agriculture maintains a field completed in November 1912 and in 1911 irrigated 2 240 acres. station was 64 /o completed in November 1912 and in 1911 irrigated 3 800 acres state experiment station has recently bred successful new varieties of alfalfa. Indian corn blue stem wheat and a hardy and fertile winter rye Plant industry demonstration farms

blue stem wheat and a hardy and fertile winter rye and trial gardens at Mandan were established in 1912 by an act of Congress passed in August Mineral Products — Total value 1911 \$957 425. The only important items were coal 502 628 tons (\$720 489) clay products \$210 616 and natural gas \$5 738

Manufactures — In 1899—1909 the average number of wage earners more than doubled (1 358 to 2 789) the capital invested increased from \$3 512 000 to \$11 585 000 and the value of the product from \$6 260 000 to \$19 138 000. The largest single industry in 1909 was flouring and grist milling \$11 685 000. Printing and publishing \$1 910 000 and the manufacture of butter cheese and condensed milk \$1 029 000 were the only other industries with a product value greater than \$1 000 000. The products of Fargo were valued at \$2 477 000 and those of Grand Forks at \$1 910 000

Transportation.- Railway mileage January 1, 1912 4,703 21

Legislation.—The 12th regular session of the legislature was held from January 3 to March 3 1911 On February 31 it ratified the proposed 16th amendment to the Federal Constitution, providing for an income tax Three amendments to the state constitution, on which the preceding legislature had voted favourably were submitted to the people for their approval, at the regular election in 1912 one empowering the legislature to erect, lease, purchase and operate terminal elevators for grain in Minnesota and Wisconsin or in either of these states was carried (56,488 to 18,864), another govern ing the sale of school lands to railways was ratified (47,717 to 22 871) and the third making the term of judges of the state supreme court ten years was defeated by 42,415 Various amendments, referred to the next session of the legislature votes to 27 802 provide in different ways for the initiative both as regards statutes and constitutional amendments for the referendum, and for the recall of public officals and for the taxation of railway and public utility property, and for the permanent location of certain state institutions The amendments for initiative and referendum are opposed by the Prohibitionists, who think that their cause would be endangered

The legislature adopted a state flag A commission was appointed to revise the probate code, and district juvenile courts in counties were empowered to have jurisdiction over

offenders and to keep a separate juvenile record

The state was re apportioned into three congressional districts and the legislature is to consist of 50 senators and 112 representatives until the end of 1914 when there are to be 47 senators and 112 representatives. United States senators are to be nominated at primaries like candidates for state offices, and delegates to national nominating conventions are also to be chosen at primaries. An act was passed requiring party affiliation registration Lobbying is forbidden and tobbyins are not permitted to go on the floor of either house of the legislature Second choice momentations were provided for in the case of United States sena tors or congressmen or any afficer of the state. If no candidate receives 50% of the first choice, the one of the two having the most first choice votes is to be chosen who has more

of the second choice votes. A rigorous corrupt practices act was passed. A publicity pamphlet is to be sent to all voters by the secretary of state. Space is sold in it to candidates at rates per page proportional to the importance of the office. A ballot law provides for rotary arrangement of names when two or more persons are to be elected to an office

A commission of three was established to investigate employers liability and workmen's compensation and to report to the next legislature. Children between 8 and 15 must attend school but a child may be excused if his labour is necessary for the support of the family. The law says that no child shall be employed in hours when (formerly 'any part of the term during which) school is in session so that the requirement is made more lax than be Children under 16 may be employed not more than 48 hours formerly 60 hours a week

An anti pass law contains the usual exceptions to the provision that no free tickets or passes be granted Public vehicles must be disinfected once every thirty days during the time they are used Local boards of health must disinfect schools once every thirty days except in vacation time Theatres and places of amusement are not to be opened on Sunday Ball games and horse-racing are prohibited on Memorial Day before 2 PM The practice of medicine is regulated by an act which requires a licence from a state board of medical ex aminers and there is a separate board of examiners for practitioners of osteopathy board of dental examiners was established and the qualifications for the registration of phar Disorderly houses are declared a nuisance and may be abated by an macists are prescribed injunction Intoxicating liquors must not be drunk on passenger trains in the state except in buffet or dining cars. The penalty for the disposal of liquors at any private or public sales of property was made a fine of \$200 to \$1 000 and imprisonment in the county jail for ninety days to one year.

An act was passed for the A bird reserve was created on the islands of Devils Lake

inspection and regulation of nursers stock shipped into the state

Any city or village with 500 inhabitants or more may adopt the commission form of government unless it has been rejected within four years immediately previous if the majority of the voters so decide at an election called upon the petition of 10 / of the qualified elec tors Voters in cities under the commission form of government may exercise the right of recall initiative or referendum. Any city after six years under the commission form of recall initiative or referendum. Any city after six years under the commission form of government may abandon it and return to the state law for cities of its class or to its previous special charter after a favourable vote therefor at an election called by a petition signed by of the qualified electors Incorporated cities are empowered to fix and adjust reasonable rates for public utilities

Finance - A permanent non partisan state tax commission was established in 1911 it made its first report in December 1912 pointing out that the assessment is only 15 to 20 of the actual value Corporations issuing or selling bonds or other evidences of obligation must report to the state bank examiner upon his request and the state banking board is to take charge of any such state corporation if it is satisfied that it is insolvent or mismanaged The balance at the beginning of 1912 was \$2 121 and at the end \$60 940 receipts for the vear \$1 418 664 and expenditures \$1 359 845. In September 1912 the city of Fargo declared a dividend of $6\frac{1}{2}$ / on the tax levy credited to tax payers March 1st 1913. Education—The 1911 legislature appointed a commission to report in 1913 on the educational system of the state and passed a school code which added one month to the

minimum school year and made attendance compulsory for children between 8 and 15 Lessons in nature study and elements of agriculture were added to the curriculum for all common schools and agriculture is an optional subject for a teacher's certificate Another act contains excellent and strict provisions relating to the building, sanitation and fire protection of school houses State aid of \$2 500 a year was voted to schools with agricultural departments each to have at least ten acres of land for a school garden this went into effect in June 1912 County agricultural and training schools are to be established by the board of education if approved by a vote taken after a petition of 300 or more freeholders and are to be maintained in part by the state Joint schools may be established by two or more counties A state agricultural and training school board was created Among the appropriations were \$10 000 for the Public Health I aboratory (opened in 1907) Medical Depart

ment, State University and \$25,000 for the Mining Experiment Station and sub-station
In 1912 the school population was 167,326 the enrollment 139,361 the average daily
attendance 99,686 the average school year about 7,5 months the total revenue \$5,666,934

and the expenditures \$5 597 154

In 1910 the percentage of illiteracy (10 years of age and over) was 3 1 (56 in 1900)

Penal and Charitable Institutions — The superintendent of the Society for the Friendless was required in 1911 to assist convicts on probation or parole to find work.

The legislature established a state board of control of charitable reformatory and penal institutions. A State Tuberculosis Sanitarium at Dunseith, Rolette county was opened on October 24, 1912

History -In 1911 and 1912 the governor was a Democrat, John Burke (b 1859, governor since 1907), but the legislature was Republican (senate, 44 Republicans and 5 Democrats, house, 87 Republicans and 13 Democrats) On the death of Martin

Nelson Johnson¹ (Rep.) in October 1909, Governor Burke appointed as U.S. senator Fountain Land Thompson (b 1854) Democrat who resigned for ill health February 1 1910, and was succeeded by William E Purcell (b 1856), Democrat, also appointed Asie J Gronna (b 1858), Republican, representative in Congress in 1905-11 was the choice of the primaries for the unexpired term (ending March 3, 1915) and was elected by the legislature, January 18, 1911 On the same day Porter James McCumber (b 1858, Republican, senator since 1899) was re-elected for the term 1911-17

In 1911 Judge John F Cowen of the Devils Lake District was impeached before the state senate on charges brought by Governor Burke He was acquitted after a trial

lasting two months and costing the state nearly \$100,000

The first state wide presidential preference primary in the United States held March 19 1912, gave Robert M LaFolicite 34,123 votes to 23 669 for Roosevelt and 1 876 for Taft This result was a great surprise, as the LaFollette boom had seemed to die out it was not however a sign that that boom was reviving but probably expressed the intense radicalism of the state and possibly the antipathy of the farmers to Roose velt s original support of reciprocity with Canada and to the support given to Roosevelt by George W Perkins-because of the hatred of the North Dakota farmers for the ' Harvester Trust' with which Perkins was identified
Democratic candidate for the presidential nomination

Governor Burke was the only
Woodrow Wilson carried the state (5 electoral votes) with 29 555 votes to 25 726 for Roosevelt2 23 090 for Taft and 6 o66 for Debs (2 421 in 1908) P D Norton Republican, secretary of state of North Dakota in 1911-12 was elected as a third Republican Congressman, under the new apportionment, which makes three districts The Republican nominees for Congress were endorsed by the Progressives The legislature elected in 1912 will be strongly Republican in each house In the campaign for governor Frank O Hellstrom (Dem) and W D Sweet (Progressive's) were defeated by the Republican nominee Louis Benjamin Hanna (b. 1861) who was representative in Congress in 1009-13, and the remainder of the Republican state ticket was elected Hanna received 39,811 votes Hellstrom 31,544, Sweet 9 406, and A E Bower, Jr (Socialist) 6 835

On November 7 1912 a prisoner in the county jail at Steele accused of murdering his wife and her father was lynched

A statue of Rollo the Northman given by the City of Rouen to the Norse race in America, was unveiled in Fargo on July 12 1012

The principal manufacturing cities were Cleveland 5th in the United States \$271 961000 Cincinnati 12th \$194 516 000 Youngstown \$81 271 000 1st in the state in steel and iron Akron \$73 158 000 1st in the country in manufacture of rubber, Toledo \$61 229 500 Dayton \$60 378 000 1st in the country in the manufacture of cash registers and calculating

machines Columbus \$49 032 000 Lorain \$38 987 000 Canton \$28 583 000 Steubenville \$21 187 000 Springfield \$19 246 000 and Hamilton \$18,184 000

Transportation—Railway mileage, January I 1912 9,406 I The legislature in 1911 voted to abandon the Hocking Canal and to sell or lease the lands connected with it It gave to counties the power to issue bonds or give aid otherwise to the establishment of water ways and canals and it created a state highway department with a state highway commission er and 3 deputy commissioners. Parts of the Ohio Canal were abandoned sold or leased a part of the Magin and Eric Canal was leased to Cincinnate as a public boulevard. The slack water in the Scioto river was abandoned for canal purposes and the rights transferred to Columbus, the Columbus feeder to the Ohio Canal being abandoned.

The Federal government in 1911-12 began work on six dams on the Ohao river and in 1912 had practically completed four others it also had about three quarters finished improvements on Toledo and Fairport harbours and about half finished Ashtabula harbour

In Cleveland on June 1 1911 as the street railway interest fund had increased to \$700 000 (from \$500 000) fares were reduced to 3 cents with 1 cent for transfer and a 1 cent rebate — the first of eight cuts provided for before the minimum is reached of 2 cents cash fare 1 cent transfer and no rebate

Constitution—At the state election in November 1910 the people authorised the legislature to provide for a constitutional convention—Members of the convention were elected in November 1911, and the sessions began on January 9, 1912 and ended on the last of May—The 42 amendments as drafted by the convention were voted on by the people on September 3rd, at a special election—Eight were defeated for woman suffrage (by 269,693 to 242,735), due partly to the opposition of liquor interests, for a bond issue of \$50 000,000 for good roads (274 582 to 272 564) prohibiting certain out door advertising (262,440 to 261,360) for statutes regulating labour injunctions and contempt proceedings (257 302 to 240,896), abolishing capital punishment (302 246 to 258 706) providing for the use of voting machines (288,652 to 242 342), permitting appointment of women to certain offices (284 370 to 261 806), and omitting the word "white" from the suffrage requirement (336,875 to 249,420)

Of the amendments adopted all go into effect on January I 1913 except that for referen dum and initiative (on October 1 1912) that for educational administration (on July 14 1913) and that for municipal home rule (on Nov 15 1912) The Elson amendment (345 686 to 203 953) gives the legislature power to authorise by statute a three fourths jury verdict in civil cases. The number necessary to form a grand jury and the proportion required for a verdict are to be provided by statute. A clause (291 717 to 227 547) provides for depositions from witnesses unable to attend court and for the presence of the accused with course at the taking of a deposition. "No person shall be compelled in any criminal case to be a witness against himself but his failure to testify may be considered by the court and jury and may be made the subject of comment by counsel Statute is to provide for suit against the state (306 764 to 216 634) Damages for death by wrong neglect or default shall not be limited by law (355 605 to 195 216) There is provision (312 592 to 231 312) for state and municipal by law (355 605 to 195 210) I here is provision (312 592 to 251 312) to state and municipal mutative (upon petition signed by 10% of the electorate for constitutional amendments by 3% for statute laws—a very low percentage which would make initiation possible by the Socialist vote) and for referendum upon 6° petition against all or part of any law filed within 30 days of the passage of the law but emergency measures passed by two-thirds of the elected members of each house are not subject to referendum. Other laws (or part of the law to the laws of the laws of the laws to the laws of the laws) do not go into effect after a referendum petition is filed against them until they are ratified by popular vote. The veto power of the governor is limited (282 412 to 245 186) by the requirement of a three-fifths instead of a two-thirds vote of the legislature to pass a bill over his veto but he may veto items in appropriation bills. Each house of the legislature is empowered to make investigations (348 779 to 175 337). Laws may be passed providing for mechanics and builders liens (278 582 to 242 385) for minimum wages and general welfare of employees (335 588 to 189 728) for workmen 5 compensation (321 558 to 211 772) for the conservation of forests and other natural resources (333 307 to 212 898) for the recall ot state officers including legislators (347 333 to 185 986) for regulating expert testimony (336 987 to 185 986) for registering and guaranteeing land titles (346 373 to 171 807) and for the occupation of prisoners—prison contract labour is abolished (333 034 to 215 208) Eight hours a day and 48 hours a week is a maximum on public works except in extraordinary emergencies (333 307 to 232 898). The legislature when it is in special session may pass no laws not named in the call for special session by the governor (319 100 to 192 130). The judiciary is remodelled in place of the circuit courts created by the amendment of 1883 courts of appeal are created (so that there is one trial and one review) each with three judges with a six year term and the present circuit judges become judges of the appellate the requirement of a three-fifths instead of a two-thirds vote of the legislature to pass a bill judges with a six year term and the present circuit judges become judges of the appellate court for the district in which they reside the number of supreme court justices is increased to siven (chief justice and six judges) and the appellate jurisdiction of the court is in part defined by the constitution (264 922 to 244,375) common pleas judges for each county (no longer for common pleas districts) are elected for six years (301 891 to 223,287) Justices of the peace are abolished in large cities where there are municipal courts other than mayors courts (264.8 x to 252 936) Monination for state district county and manicipal offices must be by cheet primaries except in political units of less than 2 000 population where denot pennanes may be secured by majority petition statutory provision is to be made for a preferential vote for United States senator and delegates to national nominating conven-tions must be chosen by direct vote and on ballots for delegates there must be given the name of each delegate's first and second choice for president (349 801 to 183, 112) A super intendent of public instruction replacing the state commissioner of common schools (statu

tor, official) in July 1913, is to be appointed for four years by the governor (256 615 to 251 946). Statutes may provide for the regulation of insurance rates charged by companies 251 940) Statutes may provide the state (321 388 to 196 628) To the prohibition of a poll tax is added the prohibition of any service required by the state, which may be commuted in money or other thing of value.

The clause for exemptions from taxation limits the exemptions m money or other thing of value. The clause for e tion of public or school bonds "now outstanding and the personal property exemption is increased from \$200 to \$500 There may be statutory provision for inheritance taxes (exempting a part of any estate less than \$20000 in value) for income taxes (exempting a increased from \$200 to \$500 part of an income of \$3 000 or less) for excuse and franchise taxes and for taxes on the production of coal oil gas and other mineral products at least one half of income and inheritance taxes collected must be returned to the local government unit from which the tax originated (269 039 to 248 684) Bonded indebtedness may not be incurred or renewed without legisla tive provision for a tax to pay interest on bonds and to create a sinking fund for their redemption Corporations may be classified and controlled by statute (300 466 to 212 704) Bank-stockholders are hable for corporation debts in proportion to the amount of their stock at par in addition to the amount invested in their shares (377 272 to 156 688) and statute shall provide for the inspection of private banks. State printing may be done by the state (319 612 to 192 378). A clause permitting the grant of licences to traffic in intoxicating (319 612 to 192 378) A clause permitting the grant of licences to traffic in intoxicating liquors (except where there was local prohibition under the Rose county option law of 1908 and the Beal municipal option law of 1902) but limiting the number of saloons to one for every 500 inhabitants was voted on in a separate column of the ballot with space for a vote for licence and one for a vote against lilence. The vote was 273 361 for and 188 825 for licence and one for a vote against licence. The vote was 273 361 for and 188 825 against. Civil service appointments and promotions in state county or city mu t be on merit ascertained if possible by competitive examinations (306 767 to 204 580)

Candidates for a constitutional convention must be nominated by petition and there shall be no emblem or party designation on the independent and separate ballot on which their names appear. There must be a vote every twentieth year beginning 1932 on the call of a constitutional convention (271 827 to 246 68.) An entirely new article (\$\frac{1}{2}\$\text{III}\$) on municipal corporations (adopted by 301 861 to 215 120) classifies corporations over 5 000 as cities and under 5 000 as villages and provides for home rule statutes for the government, of municipalities other than general laws become operative in a municipality only when they are approved by popular vote municipalitic may own lea e and operate public utilities (even without their corporate limits) if an ordinance therefor within 30 days after its passage is not opposed by a 10 petition calling for a referendum and municipalities may frame their own charters (not in conflict with general laws) or adopt a commission form of government. The vote on the schedule for amendments was 275, 002 to 213 979.

Legislation —The legislature met in regular session from January 2 to May 31 1911 and ratified January 10th the proposed amendment to the Federal Constitution for an income tax. It provided for a vote for Umted States senators on primary ballots and for statements by candidates (like those in Oregon) that they will follow the people's recommendation. The law in regard to registration for election was revised. A corrupt practices act requires the accounting of campaign funds, strengthens the law against bribery and specifies a maximum campaign outlay for candidates in different offices. Candidates violating the law may be disqualified for office. There is to be a separate independent judiciary ballot to be marked. Judicial Ticket, for all elective judges and on this no names of parties are to appear.

The initiative and referendum are provided for in municipal corporations giving the initiative by a petition of 30 of the qualified voters to be filed within 120 days of the date of the first signature. A measure thus initiated must be voted on at the next general election if it is not passed within 60 days after its submission without change by the council. Franchise grants bills providing for expenditures etc. must be referred to the people if within 30 days of their passage a petition therefor is signed by 15° of the qualified electors. Acts of city councils do not go into immediate effect unless they are declared to be emergency measures and receive a three fourths vote in the council and even then may be vetoed by a referendum vote. A bill drafted by the Cleveland Chamber of Commerce provides that no city council may have more than 32 members the minimum is 7. The musance of noise and smoke in a city may be abated by the municipality. Cities are permitted to establish municipal pawn departments. An elaborate building code was adopted.

A public service commission was created to take the place of the railroad commission it has power to supervise and regulate public utilities and railroads—not including street rail wave and other utilities operated by municipalities—to investigate and fix rates to establish uniform accounts and to grant permission after a public hearing for the consolidation of

¹ The constitution of 1851 forbade the grant of liquor hoences but allowed the legislature by law to ¹ provide against evils resulting therefrom There was a state tax of \$1,000 on each person or corporation trafficking in intoxicating liquors

competing lines. Public utilities companies are forbidden to give rebates or unjust or un

reasonable preferences

The legislature created a commission to codily and revise laws pertaining to children at reported in 1912 a new code which will be submitted to the next legislature. Ten hours a Ten hours a day and 54 hours a week was made the maximum for working women but canneries and establishments preparing perishable goods are exempted the constitutionality of this law was upheld in January 1912 by the state supreme court

A state insurance fund (elective) was created for the benefit of injured workmen and the dependents of killed employees -to be administered by a state liability board of awards The insurance fund is made up from premiums pard by employers and employees, 90% by employer and 10% by employees the latter amount being deducible from the payroll Em ployers who pay the premium are not responsible in damages under common law or statute unless for injury received through wilful failure of employer or employer s agent to comply with law or ordinance and in this case the claim for damages may be made against the employer or may be for compensation under this act. The act provides that an employee receive two-thirds (if between \$5 and \$12) of his full wages during temporary disabilitythe total not to be more than \$3,400 nor to continue more than six years from the injury For permanent injury the payment is two-thirds of the average weekly wage (between \$5 and \$12 if less than \$5 his whole wages) until death as a benefit to dependents the rule is not less than \$1 500 nor more than \$3 400 for that part of six years after the injury beginning with the employees death the payment being two thirds the average weekly wage. This law was upheld by the state supreme court in a test case in January 1912

The legislature appropriated \$5 000 for the purchase of land for the Perry Memorial in

Put in Bay to be dedicated in 1913 the centennial of the Battle of Lake Erie

The Cleveland Chamber of Commerce has a committee on municipal art and architecture
(until 1908 the Group Plan Committee)

The Federal Building (dedicated March 20 1912) the county court house (completed Jan 1912) the city half (begun 1911) and the public library were built in accordance with its recommendations. The city council made no appropriation for the work of the (official) municipal planning commission so that although

not formally discharged by the mayor it was in 1912 practically out of office

Finance — The annual interest on the irreducible debt (largely educational) is \$325,000 The 1911 legislature passed in important tax limit levy law A budget commission was created for each county to pass on local appropriations This consists of the county auditor created for each county to pass on local appropriations This consists of the prosecuting attorney and the mayor of the largest city in the county The law of 1911 the prosecuting attorney and the mayor of the largest city in the county. The law of 1911 provides for a depository for state funds, not more than \$50 000 to be kept as a reserve in the state treasury vault. The tax commission law of 1910 was revised and more power was given to the commission especially in enforcing the excise tax on corporations.

On November 16 1911 there was in the state treasury \$3,768 116 Receipts for the following fiscal year were \$14,036,902 and expenditures \$13,122 181 leaving a balance (Nov 15 1912) of \$4,682 838 There is practically no state debt

Education—The legislature in 1911 appropriated \$2,475,000 to be distributed to the common schools. For normal school buildings at Kent \$50,000 was appropriated and the same amount for buildings at Bowling Green. These normal schools were authorised in

Agriculture is to be taught in common schools except in city school districts and after September I 1912 agriculture is a required subject for teachers in any village township or special school district. The legislature authorised the erection of a high school building on the grounds of the Ohio State University to be used as an observation and practice school for the university's college of education this had not been built in 1912. The Cleveland School Read in 1913 with a subject of the school sc School Board in 1911 voted that any public school in the city not in use in the evenings might be thrown open for public meetings on the petition of 15 tax payers

For the year ending August 31 1912 the school population (between 6 and 21) was I 231 946 enrollment in public schools 853 002 excluding 90 000 in parochial schools average daily attendance 659 044 length of average school year 34 weeks total revenue for schools \$48 939.820 and expenditures \$31 031,678
In 1910 the percentage of illiteracy (10 years of age and over) was 3 2 (4 in 1900)
In 1911 Western Reserve University completed an endowment of \$1 000 000 for its medi

An attempt in 1912 to tax part of the endowment of Oberlin College was un cal school

Charitable and Penas Institutions - The legislature in 1911 created a board of administra tion to take the place of separate boards controlling the seven state hospitals the hospital for epileptics the institute for feeble-minded, the state schools for the deaf and for the blind the Ohio soldiers and satiors home the Madison Home (formerly called the Home of Ohio soldiers sailors, etc.), boys' industrial home girls industrial home and the state reformatory peniten trary and sanatorium as well as the Ohio reformatory for women (established in 1911 not yet open) All employees of institutions under the board were put on the civil service classified inst. A woman resident physician was appointed for the Girls Industrial School and a chief matron of the school takes the place of the superintendent. A committee of the legislature was sufficient to investigate the Ohio pententiary to study convict labour and especially the advisability of farm labour for convicts omoぎゃ

History -In 1911-12 the Democrats controlled the state, the only state officer who was a Republican being the treasurer Judson Harmon (b 1846), who had been attor ney general of the United States under President Cleveland (June 8, 1895-March 5. 1807) governor since 1909, was the choice of the Democratic state convention in 1910 for the Democratic nomination for the presidency in 19121 and in the National Conven tion received 148 votes on the first ballot, 127 on the ninth, 31 on the tenth and 12 (all from Ohio) on the 46th and final ballot The Democratic heutenant governor, Atlee Pomerene (b 1863) was elected United States senator (Jan 11, 1911, two days after his inauguration) to succeed Charles Dick (b 1858), Republican, who had succeeded M A Hanna in 1904 The other senator from Ohio is Theodore Elijah Burton (b 1851), Republican, whose term expires in 1915, so that the legislature of 1913 will not elect a senator Pomerene's election was largely due to Harmon's influence and was opposed by the Democratic "machine," which preferred Edward W Hanley Late in the session the legislature carried over Governor Harmon's veto, a measure calling for the immediate payment to legislators of their next year's salaries The radical element of the Democratic party opposed Governor Harmon in his candidacy for the presidency and January 2, 1912 organised a league against him Both Roosevelt and Taft spoke in the state before the Republican primaries for district delegates to the National Con vention which were favourable to Roosevelt but in the state convention the 6 delegates at large chosen were instructed for Taft In November the state (24 electoral votes) was carried by Wilson who received 423,152 votes to 271,066 for Taft (a native of the state) 220 327 for Roosevelt, 80,030 for Debs (33 705 in 1908), and 11 459 for Chain (Prohibition) In the campaign Dan R Hanna son of M A Hanna was a prominent worker for Roosevelt For governor the Republicans nominated (July 2 1912) Judge Edmond B Dillon who declined (July 27th) and then chose (Aug 10th) Robert Burns Brown (b 1844) of the Zanesville Courser commander in chief of the Grand Army of the Republic in 1806-07 the Progressives (Sept 5th) Arthur L Garford and the Democrats James M Cox (b 1870 head of the News League of Ohio, composed of Cincinnati Dayton and Springfield papers and representative in Congress 1909-13) who was elected by 439 3°3 to 272 500 for Brown and 217 903 for Gartord Only 3 (out of 22) representatives in Congress will be Republicans The state legislature will be Democratic by 72 on joint ballot

In Cincinnati George B Cox, Republican boss ' of the city was indicted for per jury (Feb 27 and Mar 31, 1911, the indictments were quashed, May 20th) and in November although the machine Republican nominee for mayor was endorsed by Presi dent Taft a Democrat, Henry Thomas Hunt (b 1878) prosecuting attorney of Hamil ton county in 1909-11 was elected by a plurality of 4 000 In Cleveland Newton Diehl Baker (b 1871), Democrat, city solicitor since 1902 and a friend and follower of Tom L. Johnson was elected mayor by a plurality of 17 838 votes and the Socialist vote was Socialist mayors were elected in 1911 in Barberton Cuyahoga Falls Lima Lorain Mansfield St Marys (with all other Socialist nominees) and Salem (by 104 votes) and a Socialist mayor of Canton was elected in November 1912 by only two votes

Following the indictments (Nov 1910) of hundreds of citizens of Adams and Hamil ton county for corruption at the polls, 41 persons were indicted for vote selling in Scioto county (Feb 11, 1911), and in 1912, in an investigation of the state legislature repre sentative George B Nye of Waverly pleaded guilty to bribery and revealed systematic corruption (Oct 9 1912), and two state senators were convicted of taking bribes and were sentenced to 3 years and 9 months in the penitentiary See United States, History

At Cleveland in August 1912 the mayor opened a municipal dance hall

Population (1910) 1,657,155 (109 7% more than in 1900), 83% (in 1900 70%) were negroes 84 8% (in 1900 82 2%) were native whites, and 2 4% (in 1900 2 6%) were foreign born whites. Density 23 9 to the sq m The urban population (in 46 cities each having more than 2 500 inhabitants) was 19 3% of the total (in 1900, in 13 such cities, 74%) and the rural decreased from 821% in 1900 to 668% in 1910 1910 the 14 cities having 5,000 or more inhabitants were Oklahoma City 64 205 (32,452 in 1907) Muskogee 25,278 (14 418 in 1907) Tulsa 18,182 (7,298 in 1907) Emid 13,799, McAlester 12 954 Shawner, 12 474 Guthrie 11,654 Chickasha 10 320 Ardmore 8 618 Sapulpa, 8,283 (4,259 in 1907) El Reno, 7,872, Lawton, 7 788 Bartlesville, 6 181, and Durant, 5 330

Agriculture —The acreage in farms increased from 22 988 339 to 28 859 353 between 1900 and 1910 and the improved land in farms from 8 574 187 to 17 551 337 and the average farm acreage fell from 212 9 to 151 7 but the value of farm property increased from \$277 525 433 to \$018 198 882 (\$649 066 668 land \$89 610 556 buildings \$27 088 866 implements \$152 432 792 domestic animals) Of the land area 65 % was in farms. The average value of farm land per acre was \$22 49 Farms were operated largely by tenants (104 137 by tenants 85 404 by owners and 651 by managers). In 1909 (U.S. Census) 137 farms (4388 acres 2.769 in Harper county) were irrigated by enterprises capable of irrigating 6397 acres. The acreage included in projects was 8,258. Streams are almost the only source utilised (97 10 in 1909). Alfalfa (1.383 A) and wheat (969 A) are the largest irrigated crops. In 1909 (U.S. Census) the value of broom corn was \$2.559 235 (216 350 A) of vegetables (excluding potatoes). \$2.610 239 of orchard fruits. \$943 464 (apples \$573 076). In 1912 (pre liminary estimates) the principal crops were Indian corn. 101 878 000 bu (5.448 000 A) wheat 20.096 000 bu (1.570 000 A.) oats 23.494 000 bu (29 000 A.) barley 160 000 bu (8.000 A.) rye 48 000 bu (4.000 A.) potatoes 1.740 000 bu (29 000 A.) hav 481 000 tons (385 000 A.) cotton 1.039 000 bales (184 lbs per A.) and flaxseed 9.000 bu (1.000 A.) On January 1.1912 there were on farms 750 000 horses 272 000 mules 504 000 milch cows. 1.242 000 other neat cattle, 72 000 sheep and 1.410 000 swige.

A statute of 1911 made the larceny of live stock a felony. In 1911 the legislature exempted from taxation for not more than five years anyone successfully using gravity underflow. Agriculture - The acreage in farms increased from 22 988 339 to 28 859 353 between

from taxation for not more than five years anyone successfully using gravity underflow water for irrigation and domestic purposes the act permits cities and towns to exempt such persons or corporations from municipal taxation on their property. The Federal Reclamation Service is investigating the feasibility of irrigating lands in Beaver and Woodward counties from the Cimarron river or from underground waters of the Cimarron Valley

In November 1912 the people voted (164 530 to 63 586) to amend the constitution so as to remove the present board of agriculture and to replace it with a new board

Mineral Products — Total value 1911 \$42 678 446 In value of petroleum \$26 451 767 (one third more than in 1910) the state ranked 2nd and in natural gas, \$6 731 770 (about 16 times as much as in 1907) 4th The output of coal was 3 074 242 tons valued at \$6 291 494 Asphalt was valued at about \$400 000 The output of stone was worth \$795 879 of sand and gravel, \$97 539 and of clay products \$756 639 The only important metals were zinc 2 247 tons \$256 158 and lead 1 925 tons \$173 250 Mineral waters bottled at \$10 springs were valued at \$44 200 nearly three as much as in 1010

were zinc 2 247 tons \$250 158 and lead 1 925 tons \$173 250 Mineral waters bottled at 10 springs were valued at \$14,290 nearly thrice as much as in 1910

Manufuctures —In 1904—09 the number of establishments increased from 1 123 to 2 310, the number of persons engaged in manufacturing from 7 456 (5 456 wage earners) to 18 034 (13 143 wage-earners) the capital from \$16 124 000 to \$38 873 000 the value of products from \$24 459 000 to \$53 682 000 The most important separate manufactures were flour and grist-milling products \$19 144 000 cottonseed oil and cake, \$5 187 000 lumber and tumber, \$4,439 000 (mostly yellow pine and oak) refining and smelting zinc \$3 002 000 team radius of the products \$1 371 000 from the products \$1 371 000 fr steam railway car construction \$1 702 000 foundry and machine shop products \$1 371 000 artificial ice \$1 273 000 butter cheese and condensed milk \$1 150 000 and brick and tile \$1,029 000 The principal manufacturing cities were Oklahoma City \$7,868 000 End \$2 453 000 Muskagee, \$2 279 000, and Shawnee \$2 081 500 Transportation.—Ratiway mileage January 1 1912 6 179 77

Legislation - There was an extraordinary session of the legislature from November 28 to December 16 1910, taken up almost entirely with the question of moving the state 1 See Z. B xx. x 57 et sea. +

capital It passed a law giving to the state supreme court exclusive original jurisdiction in regard to the removal of the state capital or any state institution and declared Oklahoma City the permanent seat of government and created a state capitol commis On May 29, 1911 in Coyle v Smith (221 US 559) the Supreme Court of the United States decided that after it has come into the Union a sovereign state cannot be limited by conditions in the act " under which the new state came into the Union, which would not be valid and effectual if the subject of Congressional legislation after admis sion —in other words that the state had the right to change its capital in spite of the provision in the enabling act. An initiative petition for moving the capital back to Guthrie was defeated in November 1912 by 103 106 to 86,549

The regular session of the third legislature was held from January 3 to March 11 1911 It asked for a Federal Constitutional Convention to propose an amendment prohibiting polygamy and urged Congress to permit the sale of segregated coal and asphalt lands of the Choctaw and Chickasaw Nations and to distribute among the Osage Indians the tribes mineral holdings

A revised code compiled by a commission appointed in 1909 was adopted in 1911 commission was appointed to promote uniform legislation in the different states and to investigate especially laws in regard to marriage and divorce insolvency descent and distribution of property etc. A supreme court commission of six was appointed for two

years to relieve and assist the supreme court

A state flag was adopted with a red field and a white five pointed star with blue edges and with 46 in the centre of the star to show that the state was the forty sixth to be admitted to the Union. The legislature appropriated \$5,000 for a statue of Sequovah (see £ B viv 482c) to represent Oklahoma in the statuar, hall in the capitol at Wa hington D C Mrs Vinne Ream Hoxie his been chosen as the sculptor. The 12th of October was made a legal holiday as Columbus Day. The state department of labour was divided into four bureaus of statistics of arbitration and conciliation of free employment and of factory inspection. An act for the sanitation of bikerie and food stuff factories and the venti-lation of all factories gives the factory inspector police powers and permits him to order the repair of unsafe buildings. The office of state fire marshal was created. The state law for enforcing the constitutional provision for the prohibition of the

sale of intoxicating liquors (adopted when the state came into the Union) was made more strict but the governor is authorised to regulate the sale of pure grain alcohol and of denatured alcohol for medical and industrial purpo es and to apothecaries who give a bond of \$1 000 or more that none is to be used except for compounding prescriptions and medicines such as may be sold without paying a federal tax. The governor was authorized to establish warehouse, to handle orders for industrial alcohol. The possession in a place of business. amusement or resort of more than one quart of intoxicating liquor with one half of 1 of (or more) of alcohol by volume was made unlawful by this act except for bonded apoth ecaries druggists etc and it was made unlawful to keep more than one gallon of intoticating liquor in one's residence. But these provisions were declared unconstitutional (119 Pacific Rep 1019) by a court which pointed out that such possession might be made by statute presumptive evidence of intent to violate the law. Transportation companies are required to keep record of shipments of liquors and an original package containing intoxicat

required to seep record of simple in finding and art original particle containing into the terms in gliquor may not be opened on the premises of the transportation company

Finance — The state banking law was unended in 1911 mostly in details in regard to the depositors guarantee fund Provision was made for the issuing of \$3,000 000 worth of 5 to public building fund bonds in 28 ergs. The United States Supreme Court on May 13 1912 decided that the state could not tax lands belonging to Indians of less than half blood It held the bank guarantee law (see $E\ B$ xx 60c) constitutional (219 U S 104) and on February 19 1912 declared that the state law requiring a report of gross receipts of cor

porations and taxing them was valid only for receipts from intra state commerce

On December 1 1910 there was a balance in the treasury of \$653,710. The total receipts for the two years ending November 30 1912 were \$7,688,435 and the expenditures \$7,218,321 leaving a balance of \$1,123,824. There is no bonded debt Education—The state board of education was newly organized in 1911 to take over not merely the work of the old board of education but also that of the state text book commissions. son of the board of regents of the industrial state boards of the preparatory schools at Tonkawa and Claremore and the boards controlling the state normal school the Oklahoma industrial school for girls at Chickasha the school of mines the school for the deaf the school for the blind the boys training school the orphans home the institution for the feeble minded, the deaf blind and orphans home for negroes and the agricultural and normal university for negroes—so that its work will be in the field of charity as well as education

 $^1\,\mathrm{On}$ April 3 $\,$ 1911 the U S Supreme Court declared that it was not called upon to enforce the state prohibitory law

On October 21 1912 Dr Stratton Duluth Brooks (b 1869) who had been superintendent of schools in Boston since 1906 was inaugurated president of Oklahoma University. For the school year ending June 30 1911 there were 556 852 children of school age an enrollment of 443 227 (17 354 negro) and an average daily attendance of 260 018. The average length of the school year was 65 months. The receipts for school purposes were \$8 076 310 and expenditures \$6 759 413. At the election of November 1912 the people adopted (100,042 to 65,436) a constitutional amendment for state and to districts in which the local tax of 5 milks is not enough to keep school for 5 months.

In 1910 of the whole population 10 years of age and over 5 6 % (12 I in 1900) was illiter ate of whites 3 6 % (7 9 in 1900) of negroes 17 7 (37 in 1900)

Penal and Chartable Institutions — The penal and charitable work suffers from the newness of organisation and the lack of buildings for the institutions and in 1911 large appropriations were made for new buildings An act gave to the commissioner of charities and corrections the authority to appear as next friend before a county court having probate jurisdiction for minor orphans defectives dependents and delinquents in public The state commissioner of charities and corrections is a woman Miss Kate institutions. Barnard to whom the success and efficiency of the department are largely due She was largely responsible for constitutional and statutory provisions in regard to compulsory education child labour prison laws etc. The department has a public defender who appears in cases for orphans and minors whom the peculiar status of land holdings espe cially of Indians in the state makes singularly likely to be defrauded of their property farm colony for discharged prisoners is proposed

History -In 1911-12 the legislature was Democratic (by 57 on joint ballot) and all the administrative officers were Democrats. Lee Cruce (b. 1863), Democrat in 1910 was elected governor for 1911-15 by 120 218 votes to 99 527 for McNeal (Rep.) and 24,707 for Cumble (Socialist) in 1907 a much larger total vote was polled but only 9 303 votes were cast for the Socialist candidate for governor In the elections of November 1912 the Democrats were successful Woodrow Wilson received 119 156 votes the Republican electors 90 786 and Debs 42 262 (in 1908 21,734) The reapportionment of 1010 gave the state 8 representatives in Congress, instead of 5. Of the five in the 62nd Congress two were Republicans and three Democrats and these five were re elected from districts in 1912 but the three chosen at large were Democrats In the 4th and 5th districts the Socialist candidates received only a few less votes than the Republican candidates-100 (out of 46 000) in one and less than 1 000 (out of 52 000) in the other Robert Latham Owen (b. 1856), Democrat, United States senator in 1907-13 carried the senatorial primary (Oregon plan) by 126,418 to 83,420 for his Republican opponent Judge H B Dickerson, and was the choice (Jan 21, 1913) of the strongly Democratic legislature (senate 36 Democrats, 8 Republicans, house 80 Democrats, 18 Republi The other senator from the state is Thomas Pryor Gore (b 1870), senator since 1967, whose term ends in 1915, he is totally blind

The adoption of the 'grandfather clause, August 2, 1910 (by 135 443 to 106 222), tending to disfranchise negroes, seemed likely to provoke a contest between Federal and state authorities Under instructions from the attorney general election officials refused to register negroes in certain districts or to allow them to vote and in 1910 some The only conviction was of two election officers were indicted by Federal grand jury officials2 for fraudulently hindering a voter—this was not a test of the constitutionality of the 'grandfather clause," which the state supreme court (27 Okla 292) upheld but which Federal judges in the eastern and western districts in obiter dicta denied. In the eastern district there were prosecutions for enforcing the "grandfather clause ' in registration and at the primary of August 6 1912, and several officials were bound over to await the action of the grand jury In the western district the Federal attorney be fore the general election of 1912 warned election officers that the ' grandfather clause" was unconstitutional and the enforcement a violation of the laws of the United States

There were several lynchings in the state in 1911 a negress and her son, accused of murder at Okameh, May 25th a negro shot and burnt for rape at Durant, August 13th another accused of rape, burnt at the stake at Purcell August 23rd when sheriffs

Of the Republican electors 7 were for Roosevelt and 3 for Taft
Frank Guinn and J J Beal convicted September 1911 and sentenced to 1 year in the penitentiary at Leavenworth and to pay a fine of \$100 appealed

OREGON See

attempting rescue were locked in the courthouse one for robbery and killing officers at Manford, December 3rd and one for rape at Valliant, December 5th. A race riot in Coweta October 22nd was averted by the presence of militia, the city attoracy was shot and killed by a negro, who was lynched. On January 1, 1912 a negro was lynched at Muldrow for murder

In Guthrie a commission form of government was adopted, June 20, 1911, and the commissioners took charge on a writ of ouster—But the aldermen were restored by the state supreme court is decision, September 13, 1911 that the commission government was not in power—On a rehearing the same court restored the commissioners, March 13, 1912—A freeholders commission charter was adopted by Holdenville on April 25, 1911 (183 to 103 votes) and went into effect on July 4, 1911—by Enid, September 22, 1909 in effect December 20, 1909 by Oklahoma City on March 9, 1911—in effect May 9th by McAlester on May 26, 1910, in effect October 4, 1910—by Aingfisher, April 5, 1910—by Bartlesville August 2, 1910—by Tulsa—July 3, 1908—in effect January 5, 1909—by Wagoner October 4, 1910—in effect April 25, 1911—by Ardmore November 17, 1908—in effect April 1909—In 1912 the commission government was adopted in Ada (April 30th in effect July 1st) and Okmulgee—in Collinsville it was defeated by 7 votes—The mayor of McAlester was recalled on April 4, 191

Population (1910) 67° 765 (6° 7° 0 more than in 1900) The proportion of Indians and Asiatics decreased in the decade from 43° 0 to 24° 0 that of the foreign born whites increased from 13° 0 to 153° 0 Density 7 to the sq m (in Multnomah county 5017) Unincorporated places or rural territory contained 41° 0 of the total (556% in 1900) There were 11 incorporated places in 1900 which had each 2500 or more (322° 0 of the total) in 1910 456° 0 was in 18 such places as follows Portland 207,214 (90426 in 1900) Salem 14094 (4258 in 1900) Astoria 9590 Eugene 9009 (3236 in 1900) Medford 8840 (1791 in 1900) Baker City 6742 Ashland 5020 (2634 in 1900) The Dalles 4880 St Johns 4872 (inc., 1903) La Grande 4843 Roseburg 4,38 (1690 in 1900) Corvallis 455°, (1819 in 1900), Pendleton 4460 Oregon City 4287 Albany 475 Grants Pass, 3897, Marshfield (town) 2980, and Klamath Falls (town) 2758 (44, in 1900)

Agriculture —The acreage in farms increased from 10 071 328 to 11 685 110 between 1900 and 1910 and the improved land in farms from 3 328 308 to 4 274 803 the average farm acreage fell from 2810 to 256 8 and the value of farm property increased from \$172 761 287 to \$528 243 782 (\$411 696 102 land \$43 880 207 buildings \$13 205 645 implements \$59 461 828 domestic animals) Of the land area 19 1 was in farms in 1910 The average value of farm land per acre was \$35 23 Farms were operated largely by owners (37 796 by owners 847 by managers and 6 859 by tenants) In 1912 (preliminary estimates) the principal crops were Indian corn, 630 000 bu (20 000 Å) wheat 21 018 000 bu (842 000 Å) oats 13 714 000 bu (359 000 Å) barley 4 284 000 bu (119 000 Å) rye 352 000 bu (22 000 Å) potatoes 10 075 000 bu (65 000 Å) and hay 1 738 000 tons (790 000 Å) In 1909 (U S Census) the value of vegetables except potatoes was 22 448 917 of flowers and plants \$268 833 of nursery products \$783 020 of small fruits, \$641 194 (strawberries \$395 349 currants \$150 729) of orchard fruits \$3 339 845 (apples \$1 656 944 plums and prunes \$838 783 cherries \$269 934 pears \$366 977) of grapes \$08 776 On January 1 1912 there were on farms 989 000 horses 10 000 mules 180 000 milch cows 457 000 other neat cattle 2 592 000 sheep and 258 000 swine. The total acreage irrigated in 1909 was 686 129 (76 7 more than in 1899) 646 866 were supplied from streams. The total cost of irrigation enterprises to July 1 1910 was \$12 760 214 and the estimated final cost of improvements begun was \$39 216 619 Of cereals, 5% by arreage was grown on irrigated land in 1909 and of barley 16 9% of alfalia 83 6% wild salt or prairie grasses 63 3% and of sugar beets 74 5%. The Umatilla reclamation project (on which the Federal government has a field station) was in November 1912 82 % completed and in 1911 irrigated 27 693 acres, partly in Cali-

OREGON 802

formations, In 1911 a new experiment farm for growing grain on dry lands was established at Burns, Harney county. The legislature adopted (1911) a new code for irrigation districts. The office of state immigration agent was created in 1911 to work with the Oregon Development League in developing the agricultural resources of the state and a state board of forestry was established. Besides appropriations for experiment stations, the state appropriated \$15,000 for the investigation of crop and fruit pests and diseases and of horticultural colleges and \$5000 for the investigation of crop and fruit pests and diseases and of horticultural colleges and \$5000 for the investigation of crop and fruit pests and diseases and of horticultural colleges and \$5000 for the investigation of crop and fruit pests and diseases and of horticultural colleges. problems by the State Agricultural College and \$20 000 a year (in addition to the \$5 000 a year appropriated in 1905) for co operation with the Federal government in making topo graphic maps and in investigating water resources. A survey fund was created from fees for licence for water power it is to be used for the study of stream flow etc.

for hience for water power if is to be used for the study of stream flow etc

Mining — A state bureau of mines was created in 1911 to be carried on by the department
of mines of the state agricultural college — The total value of mineral products in 1911 was
\$3 198 796 — The value of gold was \$634 200 (more than twice as much as in 1909) mostly
from the Republic district. Ferry county and that of silver \$24 200 — The output of copper
125,943 lbs was thrice that of 1910 that of lead 11 tons. Of platinum 117 02 were reported
partly from placers and partly from beaches — Of coal 46 661 tons were marketed valued at
\$108 033 — Clay products were valued at \$1 081 025 stone at \$583 398 and lime at \$38 216

Manufactures — In 1904—09 the number of establishments increased from 1 602 to 2 246
and that of persons engaged in manufacturing from 22 018 to 34 722 (wage-earners from
18 523 to 28 750) the capital sinvested from \$44,024,000 to \$89 082 000 (102 3 6) and the
value of products from \$5.525 000 (\$36 503 000 in 1800) to \$0.3 005 000 More than one.

value of products from \$55 525 000 (\$36 593 000 in 1899) to \$93 005 000 More than one half of the total product value was reported from the following industries lumber and times the second conditions the second condition ber \$30 200 000 (nearly twice as much as in 1904) flouring and grist milling \$8 891 000 slaughtering and meat packing \$5 880 000 (more than double the value in 1904) butter cheese and condensed milk \$4 920 000 (57 6 butter 13 % cheese) and canning and preserving \$3 207 000 Foundry and machine-shop products \$3 135 000 malt liquors \$1 857 000 leather goods \$1 629 000 and copper tin and sheet iron \$1 611 000 were some of the other

leather goods \$1 629 000 and copper the and sheet from \$1 011 000 were some of the other larger products. More than half of the product value was reported from Portland \$46 861 000 (63 6 ° more than in 1904). The product of Salem was valued at \$2 208 000.

Transportation—Railway mileage January 1 1912 2 602. The Federal government in 1911 completed dredging in Tillamook Bay (co operating with the Tillamook Port Commission) and in 1912 was dredging in the Coquille river and had nearly completed dredging operations in Coos Bay inside channels. An act proposed by initiative creating a state. highway department was deleated by 83 846 votes to 23 872 in November 1912 when an initiated law for county road systems also was deleated 56 713 to 49 699 but an amendment excluding indebtedness for state roads from the constitutional debt limit of 2 of the taxable property of the state was carried (59 452 to 43 447) and so was a similar amendment in regard to county roads and county debt limits (57 258 to 43 858). A measure fixing the per centage that freight rates on small shipments bear to carliad lots and establishing minimum weights and maximum freights was adopted in November 1912

Legislation —The legislature was in session from January 9 to February 18 1911 On January 30 it ratified the income tax amendment to the Federal Constitution

Thirty-seven laws and constitutional amendments (including several amendments in regard to taxation, see Finance) were referred to the people in November 1912. An amendment creating the office of heutenant governor was defeated (61,644 to 50 562 Another amendment would have radically changed the requirement for amend ing the constitution by substituting the words 'majority of total number of electors voting or casting ballots at said election for a majority of the votes on the amendment This was favoured by a 'Majority Rule League' but was bitterly opposed by the Peo ple's Power League and was defeated by 70 325 votes for 32,934. A similar proposed change in regard to initiative measures was defeated by 68 861 to 35 721 votes. An amendment, approved by the People's Power League, but defeated by 71 183 to 31,020 votes, would have abolished the state senate, given to the governor and all defeated party candidates for governor membership of the one-chamber legislature and em powered the governor alone to introduce appropriation bills. An amendment for woman suffrage (defeated 1900, 1906, 1908 and 1910) was proposed by initiative petition and was adopted by 61,265 to 57,104

The legislature urged Congress to give Alaska an organised Territorial government to submit to the states an amendment to the Federal Constitution providing for direct election of United States senators, to set aside 30 000 acres in the Klamath Indian Reservation and the Ceater National Forest for army manoeuvres, to give to Oregon one half of the proceeds from mational forests within the state in order to make up the loss in taxes to the countries

and to secure the completion of the Klamath and Umatilla projects.
On February 19 1912 the U.S. Supreme Court (in Klernan v. Portland and Pacific

Telephone & Telegraph (o v Oregon) held that the effect of the adoption of initiative and referendum on the republican form of government guaranteed by the constitution was a political question to be determined by Congress

A law proposed by initiative and approved by the people on November 8 1910 requires A law proposed by intriative and approved by the people on invovember to light requires presidential preference primaries the state pays the necessary expenses up to \$200 of delegates to national party conventions.

The legislature appointed a committee for the revision of the registration and election law. An act requires rotation on ballots of the names of candidates for the same office. A committee of seven was appointed by the governor to propose and recommend a revision of the judicial system and of state court practices. Judges must decide within three months upon any question submitted to them unless sickness of unavoidable casualty prevent. In civil cases three fourths of a jury may render a verdict

The legislature created a state purchasing board (governor secretary of state and state treasurer) to purchase supplies for state institutions as far as practicable from lowest bidders a state printing board (composed of the same officers) to supervise a state printer to be elected first in 1914 and a state board of fish and game commissioners. The taking of any lobsters in the state before January I 1916 was prohibited appropriations were made for several

salmon hatcheries and wild bird and game refuges were created

Railways must not work their employees for more than 14 consecutive hours after which the employees are to have 10 hours off. Train despatchers in day offices are not to work more than 9 out of 24 hours. In an emergency an employee may work 4 hours above this schedule in any 24 but not more than 3 days a week. No child under 14 may work in a factory work shop mercantile establishment restaurant hotel office etc., or at all during the term of the public schools and no child under 16 to is work in telegraph telephone or public messenger service the certificate law for child labour is made more severe. Acts prohibiting boy cotting and picketing in strikes and the use of parks or public places for speech making without the mayor's written permit were referred to the people in November 1912 and were defeated. An amendment making 8 hours a day s work on state or municipal contracts and requiring contractors to give bonds against filing claims or liens on buildings was adopted.

An act empowering the railroad commission to regulate all public utilities was referred on

petition to the people and was adopted in November 1912 65 985 to 40 986 votes. A law proposed by initiative petition and approved by the people on November 8 1910 requires, for the protection of workmen that materials be inspected that safety rails be used in construction and that there be a system of signals and that all supports bearing live wires be specially coloured. The law declares that there is no statutory limit of damages for its viola.

Railways are forbidden to give rebates

No saloon is to be located and no liquor is to be sold within 6 miles of public construction work (state or Federal) unless in an incorporated city. The licence tax for the sale of liquor was set at \$400 a year—\$...00 for the ale of mult liquors only The use of intoxicating liquors was forbidden in engines cars trains and railway stations of common carriers. After June 15, 1912 it is illegal to sell or explode a fire cracker larger than 2½ in X in

The legislature created a state board of examination and registration of graduate nurses the law permits registered nurses to add after their name R N and forbids the use of these initials by any other person. For protection against bubonic plague, cholera and other menacing Asiatic diseases \$5,000 was appropriated. White slave traffic was made a felony punishable by a fine of \$100 to \$10,000 one to ten years in the penitentiary or both

The legislature passed two laws requiring uniform insurance policies against accidents and disease and against fire a law for the control of fraternal benefit associations and one increas-

ing the powers of the state insurance commissioner

Ports with more than 100 000 inhabitants (a e Portland) are to be governed by seven commissioners appointed by the governor with a four year term instead of the regular city government

The legislature provided The 12th of October (Columbus Day) was made a legal holiday for the appointment of trustees to preserve the home of Dr John McLoughlin in Oregon City this was done in 1912) and authorised the erection in the national statuary hall in the Capitol in Washington of a statue of George Henry Williams (1823-1910) United States senator from Oregon in 1865-71 and attorney general in President Grant's cabinct (1872-75)

Finance —The situation in regard to takes from November 1910 to November 1912 was an impasse

In 1910 two amendments submitted by the legislature repealing the uniform

tax requirement on all property and permitting the legislature to classify property for taxation or to exempt it were defeated at the polls and a third constitutional amendment submitted by initiative petition was adopted. This provided that no poll tax should be imposed that by initiative petition was adopted. This provided that no poll tax should be imposed that no statute of the legislature in regard to taxation should be in effect until the people had ratified it at a general election and that the people of the several counties be empowered to regulate taxes within the counties subject to any general law passed thereafter were no enabling acts to carry out county option in taxation which had been thus approved by the people and as the legislature (under the amendment just adopted) could pass to tax by the people at the effective until it was approved by the people at the next general election in 1912 three new amendments were submitted by the legislature to the people at this general election—two practically the same as those that were deleated in 1910 and the third practical

OREGON 894

ly repealing all parts of the one adopted in 1910 except the provision in regard to the poll tax. All three were opposed by W. S. U. Ren, and the first and second were defeated by fairly close votes, but the third was adopted by 63 881 votes to 47 150. An initiated act exempting from taxation debts stock (except bank stock) and bonds was defeated (66 540 to 42 491 votes) and so were a revision of the inheritance tax (by 63 839 to 38 609 votes) a single tax measure (82 015 to 31 534 votes) and an amendment providing for an income tax (52 948 to 52 702) But household furniture and goods actually in use were exempted from tax. A new banking code was passed in 1911—the governor secretary of state and state treasurer making up the state banking board which is to appoint a superintendent of banks. Each bank must report at least five times a year to him and directors of incorporated state banks must appoint each year a committee of stockholders (not officers) to examine the affairs of the banks at least once every six months. A blue sky law like that of Kansas supervising and licensing the sale of stocks and bonds was defeated by popular vote in November 1912 A popular vote of 82 981 to 21 738 approved a constitutional amendment making stockholders in banking corporations hable for the par value of stock held

on September 30 1910 the balance in the treasury was \$424 913 and on September 30 1912 the balance in the treasury was \$424 913 and on September 30 1912 the balance was \$933 736 the receipts for the two years were \$8 307 182 and the expenditures \$7 738 359 There is no state debt.

Education—A new compulsory education law of 1911 made 9 to 15 years the limit instead of 8 to 14 A county educational board was established in every county having more than 60 school districts. The county school tax was increased from \$7 00 to \$8 00 for every child tion of teachers for a retirement fund association in districts with 10 000 children of school age and for the government of the University of Oregon Large appropriations were made for the State Agricultural College and its experiment station—\$273,500 in a single act and \$70,000 annually for the State Agricultural College For the University of Oregon \$175 000 was appropriated for a library and museum and \$328 259 for an administration building additional land equipment etc. but these two acts were held up by a referendum to the ing additional land equipment etc. but these two acts were held up by a reterendum to the people who voted against them in November 1912 (79 376 to 27 310 and 78 985 to 29 437 respectively), when they also defeated (57 279 votes to 48 701) an act proposed by initial tive levying a $\frac{1}{10}$ mill tax for university and agricultural college and creating a single board of regents for the two. A bill appropriating \$50 000 for a dormitory at the Monmouth Normal School was held up by a referendum petition but a majority of the names on this petition were false signatures, and the appropriation was not voted upon by the people. In Portland in September 1911 was opened Reed College (non sectarian co-educational) on a foundation. The Reed Institute endowed by a bequest in 1904 of Mrs. Simeon G. Reed in accordance with the wishes of her husband, who died in 1805. In the autumn of 1012

the first buildings were opened on the permanent campus (86 acres) beautifully situated on the E side of the Willamette river. The work and plans of the college have aroused much interest because the endowment is large (between \$2 000 000 and \$3 000 000) because the college is working up from no previous educational institution and because the new faculty is composed so largely of young men

The president is William Trufant Foster (b 1879) a Harvard graduate (1901) for a time professor at Bowdoin and in 1910 lecturer on educa tional administration at Columbia University Several other members of the faculty were in their thirties or younger The choice of many who have taught in secondary schools is indicative of an intention to correlate college and preparatory work. The Reed Extension Courses were opened in December 1911 one course on the East Side and the other in the West Side of Portland The college will admit no conditioned or special students and its entrance requirements do not rigidly prescribe subjects to be offered it undertakes to pay its teachers fair salaries to keep the ratio of students to instructors low (in 1912-13 10 to 1) and to make a comparatively high expenditure per college student (about \$410 a year)

For the school year 1912 the school population was 189 425 total enrollment in public schools 130 268 average daily attendance, 112 057 length of the average school year 1431/2 days total revenue \$8 643 701 and total expenditures \$6 638 225

In 1900 the percentage of illuteracy of the population 10 years of age and over was 1 89 (3 3 in 1900) ranking Oregon next to the lowest (lowa 1 7%) among the states

Penal and Charitable Institutions—In 1911 the legislature created a parole board to in

vestigate the cases of indeterminate sentence, but the governor alone has the power of parole

The name of the state Reform School was changed to the State Training School. An appro printing of \$200,000 was made for the Eastern Oregon State Hospital which was begun in June 1910 and opened in December 1912. The building of the Oregon School for Deaf Mutes was transferred to the Sanitonium for the treatment of tuberculosis (1910) in 1911. Two acts proposed by initiative petition and adopted November 1912 abolish contract prison labour of state and of county city or town convicts and authorise their employment on public works and highways (73,800 to 37,492 votes and 71 367 to 37,731 respectively) A measure abolishing capital punishment was referred to the people and defeated in November 1912 (64 578 to 41 951) An honour system by which convicts are piedged to observe certain rules and are not constantly policed and kept in confinement has been successfully introduced, largely through the efforts of Governor West (See articles in Collier's May 4 1912 and Review of Reviews (New York) Jan 1912)

History — The legislature in 1911 was Republican (by majority of 80 in joint session) but the governor elected for the term 1911-15, was a Democrat, Oswald West (b. 1873), who had been state land agent in 1903-07 and a member of the state railroad commis sion in 1907–10 He took a particular interest in the state penal institutions, introducing the 'honour" system referred to above and putting convicts to work on roads and in state institutions In June 1911 he personally captured a convict who escaped while at work at the state Home for the Feeble Minded at Salem He supported the measure abolishing capital punishment defeated in November 1912 Pending the result of the vote on this measure he had reprieved all condemned murderers On December 13 four such criminals were hanged The political history of the state centres around its direct legislation rather than the issues of the old political parties. Many of the more radical measures were drafted (and strongly urged) by the People's Power League of Oregon the secretary of which is William Simon U Ren (b 1859) the leading exponent Oregon ideas The publicity pamphlet published by the state and containing all measures (and arguments thereon) to be voted upon by the people in 1912 contained 256 pages—exclusive of local acts inserted in copies for six counties of the state. The regular ballot was 18 × 34 in In the presidential primaries Woodrow Wilson received 9 588 votes to 7 8,7 for Clark and Roosevelt 28 905 to 22 491 for LaFollette and 20 517 for Taft but the Progressives failed to re nominate for United States senator Jonathan Bourne Jr (b 1855) president of the National Progressive Republican League and as well known outside the state as U Ren was within it as a promoter of direct legislation The Progressives nominated for United States senator A E Clarke, the Republicans Ben Selling president of the state senate and the Democrats Harry Lane Bourne was nominated by petition and appeared on the ballot as an Independent Progressive The election was a close contest between Selling and Lane but the latter was successful and his choice was ratified by the legislature January 21 1913 Two Republicans and 1 Republican Progressive were elected representatives 1 in Congress in the 6 nd Congress there were 2 Republicans—the state has 3 representatives under the new apportionment The new legislature will have a Republican majority of 62 (.6 in senate and 36 in house) Woodrow Wilson carried the state receiving 47 o64 votes to 37 600 for Roosevelt, 34 673 for Taft and 13 343 for Debs (who had 7 539 in 1908) The Portland Oregonian which has consistently opposed initiative, referendum and recall was the only im portant Taft organ

On December 19 1912 at Warrenton the first woman was elected mayor of a municipality in the state she received a plurality of only 16 votes. In November 1912 Baker voted to retain its commission charter and a commission charter for Portland was defeated by a narrow margin.

PENNSYLVANIA 2

Population (1910) 7,665 111 (216% more than in 1900) In density (171 to the sq m) the state ranked 6th. The foreign born whites increased from 1, 6% in 1900 to 188% in 1910, native born whites decreasing proportionally. The percentage of negroes remained the same (25). The urban population increased from 547% of the total (in 1900 places each having more than 2,500 inhabitants) in 1900 to 604% (in 263 such places) in 1910. Rural (unincorporated) territory contained 368% of the total in 1900 and 32% in 1910. Of the urban population nearly one-half was in two

¹ There was one Progressive nominee for representative

cities with more than 500 000 inhabitants about one-eighth in the 8 cities between 50,000 and 500 000 about one fifth in the 53 places between 10 000 and 50,000, and an other fifth in the 200 places between 2,500 and 10,000 (84 between 5,000 and 10,000 and 116 between 2,500 and 5,000)

The following places had more than 25,000 each Philadelphia I 549,008 (1 293 607 in 1900), Pittsburg, 533,905 (451,512 in 1900), Scranton, 129,867, Reading 96, 071 Wilkes Barre, 67,105, Erie, 66,525, Harrisburg 64,186 Johnstown, 55,482 AI toona 52,127 Allentown, 51,913 Lancaster, 47,-27 York, 44 750, McKeesport 42, 694 Chester, 38,537 New Castle, 36 280 Wilhamsport 31 860 Easton, 28 523 Norris town (borough), 27,875, Shenandoah (borough), 25 774 Hazleton, 25,452

Agriculture — The acreage in farms decreased from 19 371 015 to 18 586 832 between 1900 and 1910 and the improved land in farms from 13 209 183 to 12 673 519 the average farm acreage fell from 86 4 to 84.8 and the value of farm property increased from \$1 051 629 173 to \$1 253 274.862 (\$630 430 010 land \$410 638 745 buildings \$70 726 055 implements \$141 480 052 domestic animals) Of the land area 64 8 was in farms in 1910 The average value of farm land per acre was \$33 92 Farms were operated largely by owners (164 229 by owners 3 951 by managers and 51,105 by tenants) In 1912 (preliminary estimates) the principal crops were Indian corn 61 582 000 bu (1,449 000 A) wheat 22 320 000 bu (1,240 000 A) oats 36 377 000 bu (1 099 000 A) barley 192 000 bu (7 000 A) rye 4 935 000 bu (282,000 A) buckwheat 7 405 000 bu (306 000 A) potatoes 28 885 000 bu (265 000 A) hay 4 537 000 tons (3 173 000 A) and tobacco 64 090 000 lbs (44 200 A) In 1909 (U.S. Census) the value of vegetables other than potatoes was \$10 013 920 of flowers and where \$2,802 418 nursery products \$202 560 small fourtees \$1,100 (strawbergers) 31,351 175 cherries \$90,975 plums and prunes \$350 005 and pears \$350 240 on mulch cows 627 000 other near cattle 883,000 sheep and I 141 000 swine

The state college co-operating with the Federal department of agriculture carries on investigations in animal nutrition and manufactures Swiss types of cheese. The Federal department has a field dairy laboratory at Troy. Bradford county. In 1911 the legislature passed a law requiring that apianes be inspected twice each summer and forbidding the keep. ing of diseased bees and created a commission to investigate chestnut blight it appropriated \$50 000 a year for encouraging agriculture through county commissioners. In February 191... a conference representing 20 states was held at Harrisburg to consider what could be done to check the chestnut tree blight In September a report was made to the governor by the commission which said that no remedy had yet been found but that attempts to arrest the

progress of the disease had met with some success

Muneral Products -- Total value, 1911 \$414 112 373 In coal the state ranked 1st with 90 464 067 tons of anthractic (\$175 189 392) and 144 754 163 tons of bituminous (\$146 347 858) in natural gas 2nd \$18 010 796 (less than in any year since 1903) and in petroleum 5th \$10 894 074 (less than in 1910) A company at Dickson City in 1911 manufactured nore than one-third of the briquettes made in the country another briquette plant at Lansford was rebuilt in 1911. In pig iron Pennsylvania ranked 1st with 9.581 109 tons valued at \$136,328 507 (not included in the grand total). The value of iron ore was \$539,553 (514,929 tons). In slate the state ranked 1st with an output valued at \$3,431 351 three fifths of the total for the country, and it was 1st in sand and gravel (\$3,025,267), and in clay products \$20 270 033 (more than one-tenth being potters) 1st in Portland cement \$19 306 349 (the state has two large natural cement plants) and in stone \$8 147 505 (more than one tenth of the total) the largest stem being limestone (\$5 243 045) and 1st in lime \$2 688 374

(more than one-sixth of the country s total)

Manufactures —In the value of products manufactured Pennsylvania has ranked 2nd since 1839 and in 1909 was 2nd to New York. In 1904-09 the number of establishments increased from 23 495 to 27 563 and that of persons engaged in manufacturing from 855 392 to 1,002 171 (wage earners from 763 282 to 877,543) capital invested from \$1 995 837 000 to \$2 749 006 000 and value of products from \$1 955 551 000 to \$2 626 742 000 One third of this total was reported from three industries in each of which the state ranked 1st iron and steel works, including rolling-mills \$500,344,000, being more than one half the country total for this industry foundry and machine shops \$210,746,000—and iron and steel from blast furnaces \$168,578,000 (56.9%, more than in 1904) being nearly four fifths of the total for the country. Other industries were tanning currying and finishing leather \$77,926,000 the state ranking 1st in this industry the manufacture of woollen worsted and felt goods \$77,447 000; car construction and repairing by steam railway companies \$76 035,000 silk manufacture \$62,061 000 (57 8 /0 more than in 1904), lumber and timber \$57 454 000 refining petroleum, \$53,088 000 Pennsylvania ranking 2nd slaughtering and meat packing, \$51 851 000 coke manufacture \$51 860 000, in which the state ranked 1st tobaco manufactures \$50,161,000 hossery and knst goods \$49 058,000 in which the state was 2nd brewing malt

squors \$47.713 000 the stafe being 2nd flour and grist milling, \$44.783,000° men sclothing \$39.682,000 and women a clothing \$32.837 000 cotton goods \$33.917 odo glass \$32.818 000 the state being 1st electrical machinery \$31.351.000; railway cars not made by railway companies,\$27,510,000 the state being 1st tin and tense plate manufactured, \$25,034,000 in which has state being 1st tin and tense plate manufactured, \$25,034,000 in which the state tanked 1st carpet and rug making excluding rag carpet \$24.870 000 and boot and

shoe manufacturing \$26,219 000
Philadelphia ranked 3rd among the manufacturing cities of the country with a product value of \$746 076 000 including 12 % of the state soutput in hossery and knit goods, 31.8% of the carpets and rugs 12.6% of the woollens and worstuds, and more than 90% of the womens slothing Pittsburg (\$243 454 000) was 7th and there were many large establishments just outside the city limits the blast furnaces rolling mills and foundries furnished more than half of the city s total. Other important manufacturing centres were Reading store than hall of the city s total. Other important manifacturing centres were Reading \$51 135 000 Johnstown \$48 106 000 Mcheesport \$42 494 000—principally pipes and tubes, of which the city is the largest producer in the country. New Castle, \$38,037 500 South Bethlehem \$26 417 000 Scranton \$26,385 000 principally silk. Allentown \$26,263,000 Erie \$24 226,000 and Harrisburg \$22 725 000 principally silk. Allentown \$26,263,000 Erie \$24 226,000 — Railway mileage January 1 1912 11,639 72. In 1911 the legislature passed a uniform bill of lading act established a state highway department and planned the development of nearly 300 routes for state highways. The Federal government in 1911 completed the work of increasing the death of the Delaware below Philadelphia and began work

pleted the work of increasing the depth of the Delaware below Philadelphia and began work on a channel (12 ft deep 200 ft wide) in the Delaware between Philadelphia and Trenton completed two locks on the Monongahela river and began three dams on the Ohio in the state.

The Erie harbour was practically completed in 1912 In Philadelphia the first of a series of

municipal piers for trans-Atlantic steamships was completed in 1911

Legislation —The legislature meet in regular session from January 3 to May 25 1911 It submitted to the people constitutional amendments (ratified in Nov. 1911) exempting from the debt limit all debts of the City and County of Philadelphia for subways docks wharfs etc changing the district courts and common pleas courts of Philadelphia to five common pleas courts each with three judges and replacing the number of common pleas courts in Alleghen, county by one common pleas court. Several other amendments went over to the 1913 legislature, one making it possible for the state to issue bonds for \$50,000 000 for improving and rebuilding highways another adding to the list of local or special laws which the legislature shall not pass another on the election of judges another for the gradation of property for assessment and taxation and a new article providing that municipal obligations for waterworks subways etc (except in the case of the City of Philadelphia) should not be considered in reckoning the constitutional debt limit.

Instead of two annual election primaries there is to be one each year an autumn primary in September of odd numbered years and a spring primary in April of even numbered years Unnaturalised foreign born residents are subject to taxes laid in the state except poli taxes for voters. The term of the director of the legislative reference bureau was changed from during good behaviour to four years and he was made an ex officio advisor to the legislature. A court of common pleas is required (formerly was permitted) to have jurisdiction in divorce cases, and a new code regulates divorce procedure a new marital code was passed in

The salaries of state judges were increased—e g that of the chief justice of the supreme

court to \$13 500 that of associate justice to \$13 000 etc

The 12th of October (Columbus Day) was made a public holiday

The term of mayor in all cities was made 4 years, that of select councilmen 4 years and that of common councilmen 2 years in the second class cities the legislative branch was made one council (instead of a select council and a common council) of 5 members with one additional member for each 75 000 of population in the case of cities between 200,000 and 500 000 the governor appointed the first council to act until January 1912 Governor Tener's appointees in Pittsburg were re-elected in November

A city plan commission in Philadelphia was organised in 1911 Departments of supplies

and of city planning and an art commission were added to the ten executive departments in second class cities and a department of recreation in first class cities. In cities of the first class all plumbers must be licensed and registered and the act specifies the necessary attengs for all buildings. Cities of the second class are allowed to regulate the smoke nussance.

A commission on the proper and safe construction of buildings was appointed to report to the legislature of 1913 and a committee was also appointed to report on vaccination Fire drills are required in public schools and in factories and industrial establishments which The office of state fire marshal was created, and that of fire marshal in employ women. The use of fire or state fire marshal was created, and that of fire marshal in first class cuties. The use of fire crackers and of blank cartridges was regulated by two acts, one dealing with their size and another with their contents. There are to be county and city inspectors of weights and measures. A bureau of standards was created as a part of the state department of internal affairs. All baby farms must be licensed and all indivives must be increased and registered. Pandering and engaging in the white slave trade were made punish able by imprisonment at hard labour for a nunminin term of ten years. Laws forbid the adulteration of sausage, of milk and of drugs, and the state pharmaceunical examining board was required to build a drug testing laboratory. emplay women

An elaborate code for bituminous coal mining was passed and guls are forbidden to work in such mines. Boys under 16 may not work unless an employment certificate is filed and boys under 18 may not load coal unless they are working with an older working. Inside buildings in all coal mines must be of incombustible materials. A commission was appointed to codify the anthracite mining laws and a commission was created on industrial accidents its report with an elective compensation bill will be acted upon by the 1913 legislature. Hoisting engineers in mines are not to work more than 8 hours a day. Tannerses were omitted from the list of places in which boys under 18 were forbidden to work. If the lather of a minor does not contribute to his support for an important place in the soliciting or receiving by an employer or foreman of a price for giving employment.

Finance.—The governors of Ohio West Virginia and Maryland were invited to a conference on taxing oil gas and betuminous coal, but nothing was done by these states. The tax commissions of 1909 reported in 1911 and was continued for another two years. County sinking fund commissions were created in each county. The insurance laws were thoroughly revised by an act creating an insurance department, the commissioner of which is appointed by the governor. A uniform stock transfer law was passed and directors of banks and of banking concerns were required to take oath of office to administer dispersity and honesely. By a law of 1911 estates passing to legally adopted children are not subject to a collateral inheritance tax. There was in the treasury on December 1 1911 \$12 923 370. The receipts for the fiscal year ending November 30 1912 were \$32 374.890 and the expenditures \$35 516. Allo leaving a balance of \$9.781,850.

The state debt was \$651 160 and a sinking fund had

a surplus of \$126 351 over the amount of this debt

Education—In 1911 a school code, drafted by a commission appointed in 1907 and amend ed by the legislature was passed. It does away with independent districts under special laws and classifies districts by population, each class having uniform laws—independent districts—in the future will be districts not co-extensive with other governmental units—and will be controlled by laws for the class to which they belong. A state board of education is created but it has no very great power and the superintendent of public instruction is still in control. The state school fund and its income are to be managed by the board of education—ats principal function. The state is gradually to take over the 13—state—normal schools which formerly received state recognition and aid but were local or stock company schools. There will be a larger degree of state control over other teachers training schools. The new code makes definite provision for industrial education and authorises the superintendent to appoint an expert assistant is this branch—one in agricultural education and one in drawing. It provides for a medical inspection of pupils. In cities of the first class members of the board of education are appointed by judges of the court of common pleas but boards of school visitors for each ward are elected by popular vote—In all other districts directors are elected. The school fund is distributed one half-on the basis of the number of paid teachers and the other half on the basis of the school population in the district. The board of directors of any district may establish a retirement fund for teachers—The minimum salary for any public school teacher is raised from \$40 to \$45 and after two years of successful teaching from \$50 to \$55. The legislature appropriated for the two years 1912–13 \$15,000 000 for the support of public schools and normal schools and \$260,000 for the normal schools

For the school year ending June 5, 1911 the enrollment in the public schools was 1 286 273 the average daily attendance, 1 028,290 and the length of the average school year 8 52

months The total expenditures for school purposes were \$42 137 647

In 1910 of the population 10 years of age and over \$ 9 % (6 1 in 1900) was illiterate. The Polish National Alhance College at Cambridge Springs was opened on October 26 1912 with an address by President Taft it had 335 students registered and a faculty of 10 (7 Poles) On June 5, 1911, Eugene A. Noble (b. 1865) then president of Coucher College Baltimore was elected president of Dickinson College Carlisle he took office September 1 1912. The year 1912 was marked by a reorganisation of the faculty and administration of the University of Pennsylvania. Late in the year work was begun on graduate school buildings for the University. Bryin Mawr College in 1911 received a bequest of \$750 000 from Miss Carola. Woershoeffer (1885–1911) of the class of 1907. The death in 1912 of the widow of R. N. Carson of Philadelphia releases his bequest of \$6 000 000 for a college for fatherless guits at Langhorne. On August 28, 1912 the new Allegheny Observatory was deficiented in Riverview Park, Pattsburg. On April 24, 1912 Allegheny College Meadville. Pastalutions—The state hospital for the criminal insane at Fairview.

Found and Chardoble Institution: The state hospital for the criminal insane at Fairview was practically completed in 1912, and the homocopathic state hospital for the insane at Allentown, is more its use. The 1912 legislature authorised the release of first offence con viets on probation, and the establishment of psychopathic wards, with the permission of the

³ She was a weating New Yorker who unostentationally did much for factory workers in New York and was an investigator of the state bureau of immigration at the time of her premature death in an accident. See the Life (Bryn Mawr 1912) by her college classinates with introduction by Ida Tarbell and C M Sylond in New England Magnaine October 1912.

board of public charities, by hospitals which maintain both medical and surgical staffs and give lectures on mental diseases. For indigent patients treated in such wards the state pays \$2 a day. A state commission appointed in 1911 is to report on the condition of the feeble-minded and epileptic in the state and on the advisability of those being segregated. The legislature appropriated \$25,000 for the state miners hospital near Shamokin (and \$60,000 to complete buildings). \$94,500 for the samilar hospital at Hazleton \$24,000 for that at Mercer \$180 000 for that at Fountian Springs \$2 900,000 for the care and treatment of indigent insane. \$87,500 for improvements at the south-eastern insane hospital (Norristown). \$230,000 for buildings for the Philadelphia institution for the feeble-minded. \$277,500 for the eastern Pennsylvania institution for feeble minded and epileptics at Spring City (and \$280,000 for building), and large sums to many private charities, hospitals etc. The state has purchased 5,000 acres (mostly farming land) in Centre county, for a new western penitentiary at the end of 1912 construction work had not begun. Philadelphia has begun an experiment on the Byberry tract in farming for the mildly insame.

History—The most interesting tendency in the politics of the state in 1911-12 was a movement towards reform, the force of which was affected by quarrels between state politicians and also by the establishment of the National Progressive party. In 1910 a Keystone Independent party nominated two Democrats and two Republicans for the major state offices. The Republican state ticket was elected, but its candidate for governor John Kinley Tener (b. 1863 a professional baseball player in 1886 and 1888-90 a representative in Congress in 1909-11) received only 415 611 votes to 382 127 for the Keystone candidate William H. Berry (b. 1852. Democrat, state treasurer in 1906-10). The Democratic candidate, Webster Grim (b. 1866. state senator since 1903), had only 120 305.

In the municipal elections of 1911 (November 7) Rudolph Blankenburg (b. 1843) defeated by 4 495 votes George Howard Earle (b. 1856), a lawyer who had been chosen at the Republican primaries (September 30) over William S. Vare, whose brothers had been state senators and city contractors implicated in the charges against the previous (Republican) administration of Mayor John Edgar Reyburn. The other Republican nominees were elected. In the Democratic Keystone fusion primaries Blankenburg, a manufacturer and philanthropist, had defeated D. Clarence Gibboney president of the Philadelphia Law and Order Society and in 1910 candidate of the Keystone In dependents for heutenant governor. In Pittsburg a fusion candidate was elected judge of the common pleas court. Socialists were elected to office in New Castle, Wheatland and Pymatuning (township)

An attempt was made to reorganise and purify the Democratic organisation in 1911 James McClurg Guffey (b 1839) was replaced as state chairman of the party by George Wilkins Guthrie (b 1848), who had been mayor of Pittsburg in 1906-09, and Vance Criswell McCormick (b 18,2) mayor of Harrisburg in 1902-05, was prominent in the reorganisation

In the presidential campaign of 1912, Roosevelt carried the Republican primaries (April 13) and delegates at large were instructed for him by the state convention (May r) In the primaries, at the Republican national convention, until the delegation bolted '(June 19) and in the campaign after his nomination by the National Pro gressive party, he had the support of E. A. van Valkenburg, editor of the Philadelphia North American and of William Flinn, a contractor of Pittsburg, and a political rival of Boies Penrose (b. 1860) Republican, United States senator since 1807 attacked on the alleged ground that he was an agent in the U.S Senate of the Standard Oil Company, and an attempt was made to discredit the candidacy of Taft because he was supported by Penrose. Roosevelt secured control of the state party organisation to such a degree that Flinn proposed that electors pledged to him should be put on the This was not done but on the official ballot there were 8 ballot as Republicans electoral tickets the Roosevelt electors appearing thrice, under the headings Roosevelt Progressive, Bull Moose and Washington ¹ This was of course, of some advantage to Roosevelt, and he carried the state (38 electoral votes), receiving a popular vote of 444,425, to 395 619 for Woodrow Wilson 273,287 for Taft, and \$5,915 for Debs, A state organisation of Progressives was called the Washington party.

whose vote in 1908 was 33.913 The state representation in Congress was increased under the new apportionment from 32 to 36 by the addition of 4 representatives at large All the representatives at large and 16 elected by districts were Washington party men, 4 were chosen as Republicans (not on Washington ticket) and 12 as Democrats? There will be no change in the United States Senate, where Penrose's term expires in 1915, and George Tener Oliver (h 1848), elected in 1909 to fill out the un expired term of Philander Chase Knox (who became Secretary of State in President Taft's cabinet) was elected for 1911-17 on January 1, 1911 The Washington party elected a state treasurer and auditor general, and will be strong in the next legislature, where many Republicans were elected by fusion The Republican membership is 34 in senate and 127 in house, Democrats, 15 in senate and 56 in house Washington, without fusion 1 in senate and 15 in house, and 9 Keystone candidates in the house Probably only one senator and only six members of the house are affiliated with Penrose and the "stand pat" wing of the Republican party On December 12 1912 the House of Representatives of the United States by 153 to 119 declared vacant the seat of Charles C Bowman of the 11th Pennsylvania district charged with bribery

The Harrisburg Capitol building fraud cases (see E B xiii 21d) culminated in 1912 in civil suits compelling an accounting and a restitution of certain moneys

On August 13 1911 a hegro accused of killing a policeman while resisting arrest was taken by a mob from a hospital in Coatesville and was burned to death. The state constabulary was ordered out. There were threats of more disorder on October o when a negro assaulted a white girl. In the lynching case although many members of the mob were recognised at the time. It was impossible to secure a conviction or a change of venue. On May 3, 1912 a prisoner who had confessed complicity was declared not guilty by a juty.

A coal strike in the anthracite region lasted from April 1 to May 18 1012 The strikers got recognition of the umon, an increase of wages of about 5% (they had asked for 20%) and a four year agreement (they had wanted an agreement lasting for one year only) There was much rioting and disorder in Scranton and Wilkes Barre Another coal strike in the Irwin Greensburg region Westmoreland county began in March 1910 and ended in a failure on July 5 1011

On September 30 1911 the dam of the Bayless Paper and Pulp Company at Austin broke and 76 persons were killed. About 200 men working at Austin struck on October 6 for an 8 hour day, they were driven out of the state by the state constabulary. In May 1911 about 6,000 shopmen of the Pennsylvania Railroad struck for 1600 into of the union they were unsuccessful. A strike of 9,000 miners in Panther Creek Valley for the discharge of two non umon workmen ended late in September 1912 with a victory for the strikers. In June 1912 the employees of the National Tube Company of Pittsburg went on strike for nicreased pay and greater conveniences in their working places. They got most of their demands. At Homestead and Braddock there was in November 1912 a serious strike of steel workers, to whom a wage increase was granted but whose leaders were discharged. On November 29 the mills attempted in vain to resume work. On the same day the Industrial Workers of the World tried to call a general strike.

After the street-car strike of 1912 the Stotesbury management of the Philadelphia Rapid Transit Company introduced an elaborate co-operative plan with definite wage increases pensions and death benefits

RHODE ISLAND

Population (1910) 542,610, 26 6% more than in 1900 The state is the most densely populated in the Union in 1910 it had 508 5 to the sq m In 1900 31 4% were foreign born and 32 8% of foreign parentage, in 1910 32 8% and 35 9% The percentage of native whites decreased from 66 6 to 65 4 that of whites of native parentage from 33 8 to 29 5 In 1910, 96 7% of the total was in 25 incorporated places each with more than 2,500 inhabitants in 1900, 95 1% in 23 such places. In 1910, 67 8% was in the 4 cities and one town which had each more than 25 000 The following places had more than 5,000 each Providence, 224 326 (in 1900 175,597), Pawtucket 51 622, Woonsocket, 38,125 Newport 27,149 Warwick (town) 26,629 Central Falls, 22 754 Cranston 21,107 East Providence (town) 15 808 Cumberland (town) 10 107 Lincoln (town), 9,8 5 Westerly (town) \$ 696 Bristol (town), 8,565 Burrillville (town), 7 878, Warren (town), 6 585, Johnston (town), 5 935 Coventry (town), 5,848, North Providence (town) 5 407, and South Kingstown (town), 5,176

Agriculture —The acreage in farms decreased from 455 602 to 443 308 between 1900 and 1910 and the improved land in farms from 187 354 to 178 344, but the average farm acreage increased from 82 9 to 83 8 and the value of farm property from \$26 989 189 to \$32 990 739 (\$15 009 981 land \$12 922 879 buildings \$1 781 407 implements \$3 276 472 domestic animals). Of the land area 64 9% was in farms in 1910. The average value of farm land area 64 8 Farms were consisted largely to express 40 88 by overage 321 by per acre was \$33.86 Farms were operated largely by owners (4,087 by owners, 251 by managers and 954 by tenants) In 1912 (preliminary estimates) the principal crops were Indian corn 456 000 bu (11 000 A) oats 57 000 bu (2 000 A) potatoes 565 000 bu (5 000 A) and hay 66,000 tons (58 000 A) In 1909 (U S Census) vegetables other than potatoes were grown on 5,275 acres and were valued at \$636 656 and orohard fruits were worth \$197 639 (apples \$147 125) On January I 1912 there were on farms 10 000 horses, 23 000 milch cows II 000 other neat cattle 7 000 sheep and 16 000 swine

In 1912 the state agricultural experiment station made important studies of fowl cholera experiments in manuring and in soil deficiency and field experiments on individual farms

Mineral Products — Total value 1911 \$1 088,475 Stone was valued at \$958 758

Clay products another important item were not reported separately. Mineral waters from 8 springs were valued at \$27 036 (22 a less than in 1910).

Manufactures—In 1904—00 the number of establishments increased from 1 617 to 1951. and that of persons engaged in manufacturing from 104 299 to 122 641 (wage-carners from 97 318 to 113 538 20 9 % of the total population) the capital invested from \$215 901 000 to \$290 901 000 and the value of products from \$202 110 000 to \$280 344 000 The principal products were woollen worsted and felt goods \$74 600 000 (nearly twice as much as in 1899) ranking Rhode Island 3rd in this industry cotton goods \$50 313 000 (nearly twice the 1899 product value) the state being 4th jeweln \$20,685 000; foundry and machine shop prod ucts \$20 612 000 dyeing and finishing textiles not otherwise reported \$43 956 000 electrical machinery apparatus and supplies \$6,410 000 silverwase and plated ware \$6,198 000 silk and silk goods \$4,384 000 gold and silver reduced not from ore \$4,442 000 hosery and knit goods \$3,866 000 printing and publishing \$3,780 000 malt liquors \$3,579 000, and slaughtering and meat packing \$3,156 000

The principal manufacturing centres were Providence, \$120,241 000 including one-

fourth of the state s textiles 98.4% of the manufactures from the precious metals and seven tenths of the foundry and machine shop products Pawtucket \$37,696,000 53 \$ 16 being textiles mostly cotton Woonsocket, \$28,218,500 seven tenths being textiles mostly woollen

Warwick, \$10 589,000 of which three quarters was tertiles mostly cotton, Cumberland \$9 827,000 (more than five times as much as in 1899) East Providence \$7 146,000, Cranston \$5 625,000 (four times as much as in 1899) and Central Falls \$5 471 000

Transportation,—Railway! mileage January I 1912 211 77 The Southern New England Railway Company (chartered April 1910) secured in 1911 the necessary approval for a line from Palmer Mass to Providence which would give the Central Vermont (1991) trolled by the Grand Trunk) a through line from Montreal to Pravidence but November p. 1912 work on this extension suddenly stopped. It was suspected that this was the result of an agreement (some terms of which were published) between the Grand Trunk and the New York New Hayen & Hartford Railway which has almost a monopoly of transportation in New England but it was publicly announced that the cessation of work was a part of a general policy of retrenchment by the Grand Trank due to the unsettled money market in Europe A Federal Grand Jury began investigation of this cessation of work on December 3 and on the 23rd indicted the presidents of the Grand Trunk and the New York. New Haven and Hartford railways for conspiraty

The Grand Trunk had contracted for two steamers to be run from Providence to New York.

In 1911 the Federal government began work improving

Providence river and harbour (Act of 1910) the dredging of an 18 ft anchorage area in Newport harbour and the widening and deepening of the Pawtucket (Seekonk) river

Législation — The legislature of Rhode Island held its regular sessions in January 1011 and in January 1912 An amendment to the constitution providing for biennial terms and biennial elections of the governor, heutenant governor, secretary of state, attorney general, general treasurer and state senators and representatives was approved by popular vote on November 7, 1911 A statute of 1912 regulates lobbying and re quires the registration on a legislative docket of agents and counsel appearing in behalf of measures before the legislature, and there were created a board of control and supply to control all state institutions—a board of state charities has advisory powers and is a visiting body only—and a public utilities commission of three members ap pointed by the governor and holding office for six years The commission is to regu late public utility rates to require a reasonable service and to insure public safety and safe equipment of common carriers and for public utilities. An appeal his to the supreme court Rebating and unjust discrimination are forbidden

Physicians are required (1911) to report to the secretary of state all cases of tuberculosis cerebro-spinal meningitis and infantile paralysis. The state board of health is directed to investigate conditions connected with such cases and to aid in the suppression of the disease An annual appropriation was made (1911) for medical inspection of schools Cities with 20 ooo or more inhabitants accepting provisions of an act of 1911 for the abatement of the smoke nuisance are to elect a smoke inspector as a regular officer On currew streets to be designated by the police commissioner or by the chief of police no child unaccompanied by an adult may lotter after 9 PM Providence was authorised to issue \$150 000 in bonds for public playgrounds and to choose its city officers bienmally instead of annually. A state board of examiners of trained nurses was created and the act provides for the registration of all trained

A workmen s compensation act of 1912 (in effect Oct 1) resembles the Michigan law except that it contains no provision for the administration of the fund by a state commissioner of insurance. The law does not apply to domestic service casual labour or agriculture but applies to all other employers of five or more workmen. The acceptance of the act is filed by the employer with the commissioner of industrial statistics and the defense of negligence. of fellow employee s fault and of assumption of risk are abrogated. Night messenger work between 5 F M. and 10 A M may not be done by those under 21 A usury law makes 30 the maximum for an actual loan greater than \$50 and on a loan less than \$50 5°, for six months and thereafter 21/2% per month Laws were passed (1911) forbidding rebating by insurance

companies, and the misrepresentation of terms of an insurance policy

Frame, and the insrepresentation of terms of an insurance policy frame, and the insrepresentation of terms of an insurance policy frame, and the insrepresentation of terms of an insurance policy frame, and inscellaneous corporation must report annually to the tax commissioners and must pay an annual tax of 4 mills on its "corporate excess"—e a portion of its intangible property as determined by the commissioners. Bank stock less the value of real estate and United States or state bonds owned by the bank, must pay a tax of 4 mills. Public service corporations are appreciated by the bank of the bank of the bank of the property and the commissioners. tions must pay I % but telegraph cable and telephone corporations 2 % and express corpora tions must pay 1% but telegraph cable and telephone corporations 2% and express corporations 3%, on annual gross earnings. Shares of stock in the hands of owners are exempt from tax if the corporations pay a tax on their gross earnings. Towns are to pay to the state freasurer 9 of a mill on all ratable property. Mutual insurance companies must pay 1 on their gross premiums other insurance companies 2°. On November 7 1911 the people approved the issue of \$600 (800 in 4 /a, thirty year bonds the third state highway construction to an The annual report of the treasurer for the year 1912 shows cash on hand January 1 \$152 401 receipts \$3,250 632, expenditures, \$3,335 013 leaving a balance in the treasury December 31 of \$68 020. The bonded debt was \$4,900 507 and the floating debt \$150 000 Education —Any city or town may build open air schools. Towns providing manual training and instruction in household arts are to receive from the state one half of the cost of sponsatus. The state board of education is to arrance for nost-graduate courses in education

training and instruction in household arts are to receive from the state one half of the cost of apparatus. The state board of education is to arrange for post-graduate courses in education in Brown University and to appoint persons to take such courses each year.

In 1910 of the population to years of age and over 7.7% was illiterate (8 4 in 1900). For the school year 1912 the school population (5 to 18 years) was 122 571 total enrollment, 81,709 average-daily attendance 64,878 average school year 9 mos. 13 days school revenue for the year, \$2,4576,506, and expendence \$2,404,652.

In 1912 a fund of \$1,000,000 — the third in the administration of President Faunce,—was collected for Brown University.

Charitable and Penol Institutions.—A law of 1911 provided for paying working prisoners committed for non payment of fine and costs fifty cents a day for the first thirty days of their work and then \$1 oo a day. In 1912 the president of the metal trades department of the

Providence Council of the American Federation of Labor headed a movement of protest against the state's entering again into contracts for the disposal of convict labour

History -In 1911 and in 1912 the state gubernatorial elections resulted in the re election of Aram J Pothier (b 1854) a French Canadian by birth freasurer of several textile mills in the state, mayor of Woonsocket in 1894-93 heutenant governor of the state in 1898 and governor since 1909—a longer term than that of any other governor of the state. He was affiliated with the conservative Republicans, who were perulearly strong in this manufacturing commonwealth. In 1911 he defeated his Demoscratic rival Lewis A Waterman by 7 394 votes (in a total vote of 71 155) in 1912 his plurality was only 2 112 (34 433 to 32 321) over the Democratic nominee, Theodore Francis Green (b 1867) a prominent lawyer of Providence the Progressive candidate Albert H Humes, receiving 8 274 The Progressive vote with criticism of the governor for favouring the 'machine" explains his decreased plurality. The Socialists polled 1 661 votes for governor (1 392 in 1911) the Prohibitionists 724 and the Socialist Labor Party 260 The 1913 legislature is Republican but has more Democratic members than the 1912 session—6 in the senate (out of 38) and 39 in the house which has 100 The state (for the first time) gave its vote to the Democratic presidential electors as Roosevelt had a much larger following than Humes the vote was Woodrow Wilson 30 412 Taft1 2, 703 Roosevelt, 16 8,8 and Debs 2 049 (1 365 in 1908) Nelson W Aldrich United States senator in 1881-1911 announced that he was not a candidate for re-election and Henry Frederick Lippitt (b. 1856) a cotton manu facturer and a conservative Republican was elected January 18 1911 to succeed him As successor to George Peabody Wetmore (b. 1846), Rep., United States senator 1895-1013 the new legislature chose (January 21 1013) Le Baron Bradford Colt (b 1846) circuit judge since 1884 Two Democrats and one Republican represent the state (which had only two Congressmen—one Democrat and one Republican in 1011-12 under the former apportionment) in the 63rd Congress George Herbert Utter (b 1854) Republican owner and editor of the Westerly Sun secretary of state in 1801-04 heutenant governor in 1904 governor in 1905-06 and representative in Congress in 1911-13 was a candidate for re election but died two days before the election W Bliss, heutenant governor in 1912, nominated in his place was defeated (by 271 votes) by Peter Goelet Gerry Democrat, great grandson of Elbridge Gerry dence, as usual voted for the licence of the sale of intoxicating liquors and it elected as mayor a Democrat, Joseph H Gainer (unsuccessful in 1911), over Henry Fletcher Republican who had served four terms New Shoreham and West Greenwich for the first time voted for liquor licence, and Smithfield against it, making 30 licence and 8 'no licence towns hereafter the vote on licence will be biennial, instead of annual In Newport (December 3 1912) Patrick J Boyle, mayor for 13 years was defeated by William MacLeod, who promised a 'business administration

On June 4 1912 died Royal Chapin Taft (b 1823), textile manufacturer and capitalist, and Republican governor of the state in 1888

(m. 1906, 12.8% in 20 places), each having more than 2,500 inhabitants there were 13 places with 5 000 or more, as follows Charleston, 58 833 (in 1900, 55 807), Columbia 26,319, Spattanburg, 17,317, Greenville, 15,741, Anderson, 9,654 Sumter, 8 109 Rock Hill 7,216, Florence 7,657 Greenwood 6-614, Orangeburg, 5,906 Union (town) 5,623 Georgetown, 5,530, and Newberry (town), 5,028

Agriculture.—The acreage in farms decreased from 13 985,014 to 13 512 028 between 1900 and 1910, and the improved land from 5 775 741 to 6 097 999 the average farm acreage fell from 90.0 to 76.6, but the value of farm property increased from \$13, 591,159 to \$392 128 314 (\$268 774 854 land, \$64,113,227 buildings, \$14,108 853 implements \$45,131 380 domestic animals). The average value of farm land per acre was \$19.89. Of the land area 69.2 % was in farms in 1910. Farms were operated largely by tenants (111 221 by tenants 64 350 by owners and 863 by managers). In 1912 (preliminary estimates) the principal crops were ladian corm, 34 278 000 bu (1915 000 A.) wheat 727 000 bu (79 000 A.) cats 6,966 000 bu. (324 000 A.) rye, 28 000 bu (3 000 A.), potatoes 900,000 bu (19,000 A.) hay 223 000 tons (194 000 A.) cotton 1 184 000 bales (219 lbs per A.) tobacco 24 500 000 lbs (35 000 A.) and rice 200 000 bu' (8 000 A.). In 1909 (U.S. Census) the value of vegetables other than potatoes was \$3,705 991 of small furts \$113,254 of orchard fruits \$656,376 of grapes \$88 620.0 On January 1 1912 there were on farms \$2,000 hores 166 000 mules, 185 000 milch cows 215 000 other neat eattle, 34,000 sheep and 797 000 swine.

milch cows 215 000 other neat eattle, 34,000 sheep and 797 000 swine

The legislature gave scholarships in Clemson Agricultural and Mechanical College to the
winners in the corn growing contests in boys corn clubs in 1911 and scholarships in Winthrop
College to girls who had cultivated corn and tomatoes extensively. The establishment of
boys corn clubs and of girls tomato clubs was largely due to J. E. Swearingen state superin
teadent of education who though totally blind has done much for practical education and
scientific farming. A crop pest commission was created in 1912 and was empowered to
appoint a state entomologist and a state plant pathologist. The legislature also created a
state warehouse commission to establish a system of warehouses throughout the state to
store cotton and other commodities. The trustees of Clemson Agricultural and Mechanical
College were authorised in 1911 to establish two or more experiment stations. In 1912 the
name of the state department of agriculture, commerce and urrigation was changed to the
department of agriculture, commerce and urrigation was changed to the

name of the state department of agriculture, commerce and irrigation was changed to the department of agriculture commerce and industries

Mineral Products — Total value 1911 \$1 804 115 Phosphate rock all land rock market ed was valued at \$673 156 (169 196 tons tons mined 182 289) The value of clay products was \$669 794 (all but \$6,000 brick and tile) A little gold is still recovered from dry ore in 1911 the value was \$20 100 In that year for the first time a little barytes was reported from the state. The value of mineral waters was \$2 2090 Granite was quarried worth \$193 748 and martile limestone etc brought the total for stone up to \$336 467

Minufactures.—In 1904-09 the number of establishments increased from 1 399 to 1 854 and that of persons engaged in manufacturing from 63 071 to 78 040 (wage earners from 59,441 to 73,046) capital from \$113,422 000 to \$173 221 000 and value of products from \$79 376 000 to \$113 236 000. In 1909 the products of cotton milis were valued at \$65 930 000—58 2 % of the total for all manufactures this was about eight mints more than in 1899 and ranked the state 3rd among the cotton manufacturing states a remarkable showing in view of the recent development of this industry in the South. Among other important products were lumber and timber \$13 141 000 cottonseed oil and cake, \$10 903 000 and lettlisers \$9 025 000 ranking the state 3rd in this industry. The principal manufacturing cities were Charleston, \$6 951 000 Columbia \$5 872 000 Spartanburg \$3 276 000, and Greenville \$21,12,000

Transportation — Railway mileage January I 1912 3,489,64 In 1912 the Federal government had nearly completed the inland waterway between Charleston and Alligator Creek and had made the Charleston harbour channel 26 ft deep and 500 ft wide—the depth projected is 28 ft and the width 1,000 ft

Legislation —The regular session of the legislature was held from January 10 to February 18 1911, and a special session from January 9 to February 29 1912. In 1912, the legislature reorganised the supreme court which now consists of a chief

sors the legislature reorganised the supreme court which now consists of a chief instant and four associate justices, who held office for ten years; a majority of the justices must agree on a decision and there must always be an odd number of justices on the hench. The legislature passed concurrent resolutions in 1912 urging the adoption of the reciprocity treaty with Canada and an amendment to the Federal Constitution providing for a direct vote for United States senators, and in 1912 asking for aid from the Federal government for the Catawba Indians of the state.

The legislation both in 1911 requires marriage licences. The legislation both in 1911 and 1912 was very largely on special and local matters. Counties which voted in 1909 on the adoption of the dispensary system may vote for or against in August 1913 the sale of intoxicating liquors.

,

In 1912 Jasper county (county seat Ridgeland) was created from Beguifort and Hampton counties and the creation of ill shaped counties, more than four times as long as their width was forbidden. The power of the public service commission was extended to Charleston formerly exempted as Maron. Spartanburg Summer Union and County will are.

Children under 16 are not permitted to work between 8 PM and 6 A.M. in factories mines

Children under 16 are not perintted to work between 8 PM and 6 AM metactories mines or textule establishments, except to make up time lost by accident or by breakdown of machinery. No child under 12 is to be employed in them at all. Women are not to work in mercantile establishments more than 60 hours a week or 12 a day nor after 16 PM. In these of 5 000 inhabitants of more no child under 14 (and between 16 PM and 5 AM none under 18) may work as a messenger. A law of 1912 prohibits betting pool-selling and book making

Finance—By a law of 1911 no bank or trust company may act as a guardian administrator or trustee. All municipal county and school bonds were exempted from taxation. For laterest on the bonded debt the appropriation in 1912 was \$295,980 the total general appropriation was \$1,993,678. The report of the treasurer for the year 1912 showed a balance on hand January 1 of \$725,356. The receipts were \$3,246,677 the expenditures \$3,205,817 and the balance December 31. 1912. \$766,216. The state debt was \$6,529,646 funded and \$164,350 fundable.

\$164 359 fundable

Education. A commission to examine and revise the school law submitted its report in January 1911 but although the new code was favourably reported in both houses of the legislature it did not become a law either in 1911 or 1912 Fifty-one beneficiary agricultural scholarships were created in 1912 in Clemson Agricultural and Mechanical College. The General Education Board in October 1912 voted \$5 000 to the Penn School at Helena

For the year ending June 30, 1912 the school enrollment (no school census is taken) was 331 587 (175,307 negroes) the average daily attendance 227 011 (114 033 negroes) and the length of the school year ranged from 23 5 weeks for whites in cities to 13 8 weeks for negroes in the country. The receipts for school purposes were \$2 904 039 and the disbursements \$2 034 169 for whites and \$346 545 for negroes.

In 1940 m illiteracy the state's percentage 25.7 of the whole population to years of age and over was exceeded only by that of Louisiana 29.9 Among whites the percentage

was 10 3 (13 5 in 1900) among negroes 38 7 (52 8 in 1900)

Penal and Charitable Institutions —In 1912 the method of capital punishment was changed from hanging to electrocution All able bodied male convicts are to be worked on county public works except in Greenville county. Covernor Blease opposed the use of convicts in a hossery mill which was reported to be a breeding place of tuberculosis, and when no action was taken by the legislature threatened to pardon all convicts thus employed. Circuit

judges are authorised to suspend sentence in certain cases not felonies and the probate court to act a a juvenile court. Among the appropriations for 1912 were \$26,000 for the South Carolina Industrial School (established in 1906) \$250,000 for pensions and \$17,000 for the Confederate Infirmaty at Columbia.

History —Coleman Livington Blease (b. 1868) who had been a member of the lower house in 1800-08 and of the state senate in 1904-08 and mayor of Newberry in 1910 took office as governor in 1911 His administration has occasioned much controversy He at once came into collision with the state supreme court over appointments of judges refusing to commission the nominees of the court but submitting an eligible list for the supreme court to choose from and, in order apparently to remove some negroes who held commissions as notaties public the nullified all the commissions, about 3 000 in number, that were held at the governor's pleasure, and immediately issued new ones to almost all these notaries excepting a few negroes. Moreover he withheld from the pardon board all papers in regard to pardons and paroles, and issued on his own account a very large number of pardons with the result that charges of corruption were freely made by his opponents. In July 1912 he was directly accused of selling pardons and of having negotiated when he was state senator, with houser dealers to block any legislation affecting the state dispensary and of joining a syndicate to control the sale of liquor to the dispensary Agents who were gathering material in support of these accusations refused to go to Columbia, alleging apprehensions of violence and meetings of the investigating committee were held in Augusta, Ga In 1911 the governor vetoed a large number of bills, and in 1912 out of 300 bills he approved only 14, 8 were passed over his veto and 278 were not returned to the legislature within the three days specified by the constitution.

I ha December 1912 the commissioner of dabour in a report on textile industries said that no children under 12 were employed and that the number of children under 16 had decreased from 8 432 in 1910 to 7 490 in 1912

The state primary; August 27, 1912, Blease was renominated for governot, in space of the opposition of Ira B Jones (b 1851), who resigned the chief justiceship of the state supreme court in order to be a candidate. Blease s opponents claimed that many more votes were cast than the total number of electors in the state, and on this ground contested the result of the primary; but the state committee held the evidence of fraud insufficient and (October 1), declared Blease the party s nominee. The same primary re-nominated Benjamin Ryan Tillman as United States senator, an office he had held since 1895. In November Blease-neceived 44 122 votes to 208 for Britton (Socialist)

The Democratic state convention, May 16, 1912 chose delegates to the national convention pledged to Woodrow Wilson, whose boyhood and youth were spent in Columbia, and he carried the state easily in the November election receiving 48,355 votes to 1,293 for Roosevelt, 536 for Taft and 164 for Debs (100 m 1908), and 7 Democrats were chosen representatives in congress,—6 being re elected. There was no Progressive ticket in the state except for presidential electors

A negro accused of rape was lynched October 10, 1911 at Honea, Path, Anderson county after being taken from a sheriff. In 1912 three negroes were lynched (March 13) at Olar for arson, two at Blacksburg (March 29) for murderous assault one at New betry (November 23) for murder, and one at Norway (December 21) for non payment of debt, was taken from 121 and shot. Governor Blease openly opposed the education of the negro and countersanced lynching by promising ma Fourth of July, speech in 1911 not to call out the troops to protect negro prisoners from mobs. At the governors' conference held in Richmond Virginia in December 1912 he repeated these sentiments and declared that he would not follow the constitution in protecting prisoners accused of crimes against womanhood. A resolution repudiating his speech was passed by 14 votes to 4. On December 24 1912, he pardoned 80 convicts working in chain gangs, of 33 whom he pardoned in November, 15 had been convicted of homicide

A street car strike in Spartanburg was accompanied by so much violence that three companies of militia were sent to the city September 24, 1912 by Governor Blease

On November 21, 1912 (by 200 to 21) the commission form of government was adopted in Florence and in the same year Sumter chose a commission with a city manager (June 11 252 to 72 in effect August 13) On April 14 1912, the French Protestant Church of Charleston the only remaining Huguenot church in the United States celebrated its 225th anniversary A memorial shaft to the women of the Confederacy was deducated in Columbia, April 11, 1912

SOUTH DAKOTA 1

Population (1910) 583,888, 45,4% more than in'1900. Density 7 6 to the sq m Of the 67 counties only 57 are organised. The greatest rate of increase for any organised county was 1,016,7% in Stanley county. The number of Indians (and Asiatics) decreased in 1900-10, from 20,39° to 19,300. The percentage of foreign born whites was 22 in 1900 but only 17 2 in 1910, and of whites of foreign parentage 38 9 in 1900 and 37 2 in 1910. In fural territory (unincorporated) there was in 1900 73.4 of the total, and in 1910 66 8%, in the semi urban territory (incorporated places each less than 2,500 in population) 16.4% in 1900 and 20 1% in 1910 and in urban territory one-tenth of the total in 1900 and 13.1% in 1910, when there were in this class 13 cities, as follows:—Sigux Falls, 14,094; Aberdeen, 10.753 (4.087 in 1900). Lead, 8.392, Water town, 1,016 (3,352 in 1900). Mitchell, 6,315, Huron, 5,791 (2.793 in 1900). Rapid Chy, 3,354 17,342 in 1900), Yankton, 3,787; Pierre, 3.656; Deadwood, 3,653; Middison, 3.137; Redfield 3.060. Brookings, 2,971

Agraculture — The acreage in farms increased from 19 byo 616 to 26 016 892 between 1900 and 1910 and the improved land in farms from 11:285 983 to 15,827,208 the average farm acreage fell from 362.4 to 355.1 and the value of farm property increased from \$297.526,"

1 See E B xxv 506 et seq

302 to \$1 166 096 980 (\$902,606 751 land \$102 474,056 buildings, \$33,786,1973 insplements. \$127 229 200 domestic animals) Of the land area \$2 9 % was in farms in 1910. The average value of farm land per acre was \$34 69 Farms were operated largely by owners (57 984 by owners 429 by managers and 19 231 by tenants) In 1905 500 farms (63,248 acres Penmington county 19 463 Butte, 14 378) were irrigated by enterprises enable of irrigating 128 481 acres The acreage included in projects was 201 625 For three fourths of the acreage streams were the source for one-fifth reservoirs. The larger crops irrigated were wild grasses (17 652 acres) and affalfa (10 005 acres). In 1912 (preliminary estimates) the principal crops were Indian corn 76 347 000 bu (2 495 000 A) wheat \$2 165 000 bu (3 675 000 A) oats \$52 390 000 bu (1 550 000 A) barley, 23 062 000 br (887 000 A), re 312 000 bu (16 000 A) potatoes 6,510 000 bu (62 000 A) hay 672 000 tons (460,000 A) and flaxseed 5 323 000 bu (619 000 A). In 1909 (U.S. Census) the value of vegetables (excluding potatoes) was \$1 033 163 small fruits \$47 263 orchard fruits \$209 339 (apples \$158 729). On January 1 1912 there were on farms 675 000 horses 13 000 mules 366 000 milch cows 894 000 other neat cattle 605 000 sheep and 1 104 000 swine.

In 1911 laws were passed permitting counties to maintain demonstration farms or to con

In 1911 laws were passed permitting counties to maintain demonstration farms or to con duct the country poor farm as a demonstration farm establishing a demonstration farm at Vivian and a dry farm experiment station in Fall River country and authorising country commissioners to issue bonds or warrants to pay for seed grain for needy farmers. During the last two years the agricultural experiment station has worked on the hybridisation of small fruits particularly raspberries plums and apricots and on breeding alfalfa and sugar beets. The Federal department of agriculture has a dry land farm in Fall River county and a field station on the Bellefourche Rechanation project (see E B xxv 507c). This

Project irrigated 33 362 acres in 1911 and in November 1912 it was 93 6 % completed

Mineral Products —In 1911 total value 88 037 372 The value of gold was \$7 429 500
ranking the state 4th with an increase of nearly 40% over the output of 1910. The output
of silver \$108 200 was nearly three quarters larger than that of 1910. The gold comes from low grade milling amalgamation cyaniding ore and the silver from refining gold mill bullion

low grade milling angaigamation cyanining ore and the silver from feating angaigamation cyanining ore and the silver from feating angaigamation cyanining ore and the silver from feating and feating products for 1909 \$17 870 000, an increase of 36 6%, since 1904. The capital invested was \$13 018 000 (71 6 more than in 1904) the number of establishments 1 020 and the number of persons engaged in manufacturing 5 226. The principal products were flour and grist mill products \$6 208 000 butter cheese and con densed milk \$2 686 000 (73 6 more than in 1904) and printing and publishing \$1 976 000 feating and products were fined from the feating for the feating feating feating for the feating f humber and timber products \$945.000 (150.7 / more than in 1904) and Aberdeen (\$1.575.000) supplied about one fourth of the total Transportation—Railway mileage January 1 1912 4 195.82 Sjour Falls (\$2 889 000)

L gislation — The regular session of the legislature was held from January 3 to March 3, 1911 It ratified (Feb 3 1911) the proposed amendment to the Federal Constitution providing for an income tax By 62 302 votes to 26 814 the people at the general election in 1912 adopted an amendment to the state constitution requiring that in taxing corporations franchises licences to do business in the state gross earn ings and net income shall be taken into account and that the power to tax corporate property shall not be surrendered by the state A primary law, which does away with state and county conventions provides for publicity pamphlets and adopts the Oregon plan for the choice of United States senators, was defeated in the legislature but was proposed by popular initiative petition and was carried (51 154 to 28 892 votes) in November 1912 Constitutional amendments and referred laws are no longer to be published in official newspapers but are to be printed by the state and distributed through the mails to all electors by the county auditors. A board of miningration was created consisting of the governor, the secretary of state and the commissioner of public and school lands it was authorised to choose a commissioner of immigration For the completion of the state capitol \$35,000 was appropriated The legislature passed an employers' hability law for common carriers by railroads in intra state Contributory negligence does not bar recovery but diminishes damages that may be asked and assumption of risk is no defence in case of death. A new railroad code was adopted which enlarges the powers of the railway commission the recommendation of any municipal authority radiways must maintain safe crossings over highways. The office of telephone inspector was abolished and the radioad commission was authorised to regulate telephone companies. Telephone and telegraph companies are to be assessed by the state board of assessment, county by county, and are to be taxed on this assessment at county rates The railroad commission is required to prepare a schedule of express rates " which shall not exceed seventy (70) pper cent of the lowest rates in force on the 1st of January 1909" Fire insurance companies which fail to pay losses within 60 days are liable to 10% added to the amount of loss

The name of the food and dairy department was changed to food and drug department All foods which are found to be adulterated and mashranded are to be advertised in official newspapers and a new law gives a wider definition of the term mishranded. Children under 18 may not frequent pool or billiard rooms. The anti-treat law of 1909 was repeated and all sajoons were required to close at 9 P M. On December 2 1912 the U.S. Supreme Court upheld the constitutionality of state laws providing penalties for the sale of goods at a lower price in one part of the state than in another to suppress competition

Cities of the first class may levy a tax for advertising their advantages. Laws in regard to commission government and especially the method of recall of officers and the method of initiative were amended. Lead adopted the commission plan in 1911 and Madison and Watertown (March 23 in effect May 1) in 1912. From the western part of Armstrong county the country of Ziebach was created.

Finance —In 1911 there were created a state board of finance consisting of the governor treasurer secretary of state, state auditor and public examiner with authority to designate and control depositories of state funds, and a banking department under the management of the public examiner who is ex officio superintendent of banks. The governor was authorised to appoint for a two year term an executive accountant to examine the accounts of all state officers departments institutions etc.
On July 1 1911 there was a balance in the treasury of \$421 156. Receipts for the en

On July 1 1911 there was a balance in the treasury of \$421 156 xecepts for the en sung fiscal year were \$3,779 652 and expenditures \$3 208,519 leaving a balance June 30 1912, of \$992,289 There is no funded debt on June 30 1912 there were outstanding \$500 000 in revenue warrants (partly offset by \$441 118 cash in general fund) \$345 348 due (general fund) on capitol building debt and \$59 631 of capitol building warrants outstanding—making a net (unfunded) indebtedness of \$463 867

Education—A new school code was submitted to the legislature in 1911 but was rejected.

The legislature required a school district to pay to parents or guardians of pupils living 21/2 miles or more from the nearest school house a certain sum for each day of actual attendance unless transportation was furnished by the school district. The amount varies from 10c for 2½ to 3 miles to 45c for 5 or 6 miles. Of the population 10 years of age and over 92 9° (5 in 1900) was illiterate

For the year 1911 12 the school population was 172 074 the enrollment in public schools 145 364 the average daily attendance 86 792 the average school year, 7,4 months revenue

\$6 079 345 and expenditures, \$4,984 327

Penal and Charitable Institutions—In 1911 the governor s power of parole was enlarged and a law was passed providing for indeterminate sentence and parole at the discretion of the court of first offenders. County commissioners in counties of 15 000 inhabitants or more may establish county hospitals

History -- In 1911-12 the state was controlled by the Republicans, with 34 (out of 45) senators and 99 (out of 104) representatives in the state legislature and all executive and administrative officers Robert Scadden Vessey (b 1858), Republican who had been a member of the state senate in 1905 and 1907, and had there introduced and helped to pass much progressive legislation (corporation, banking and railway laws publi cation of campaign expenses, etc.), was governor for the two terms, 1909-13, but was not renominated in 1912 The Republicans nominated Vessey's associate, the lieu tenant-governor, Frank M Byrne, who received 57,299 votes to 53 724 for Edwin S. Johnson (Dem.), 3,578 for Samuel Lovett (Socialist) and 3 486 for O W Butterfield Instead of two congressmen at large as under the previous apportionment South Dakota has in the 63rd Congress three representatives (Republicans) chosen by districts In the primary (June 4, 1912) Roosevelt received 38 106 votes to 19,060 for La Follette and 10,044 for Taft; and Robert Jackson Camble (b 1851, representative in Congress 1895-97 and 1899-1901, and since then US senator) was defeated as Republican nominee for United States senator by Thomas Sterling (b 1851), a lawyer of Vermillion and in 1901-11 dean of the College of Law, University of South Dakota. Sterling was chosen (January 22, 1913) by the new legislature (425 Republicans and 24 Democrats on joint ballot), over Richard Franklin Pettigrew (b. 1848), the Damogratic choice, senator from South Dakota in 1889-1901, who was first a Republican and then (1896) a follower of Bryan, and was a leader in the Senate

^{1.} As elections on April 16, 1912 the majority of towns and cities (including Slowx Falls) young on liquor licences voted for licence.

of the opposition to the annexation of the Philippines There were no Tast electors on the official hallot, but the Roosevelt electors pledged themselves to vote for Tast if it were a question between him and Woodrow Wilson Roosevelt received the 5 electoral votes of the state which he carried by 58,811 votes to 48,942 for Wilson. Delis received 4 662 votes (2 846 m 1908)

TENNESSEE 1

Population (1910) 2 184,780, an increase of 8 1% since 1900 The percentage of negroes decreased from 23.8 to 21 7, and foreign born whites from 0.9 to 0.8 Density, 52 4 to the sq m. In 1910 73 7% of the total was in rural (unincorporated) territory (in 1900 80 2%). In urban territory (incorporated places, each with a population of 2 500 or more) there was 20 2% in 1910, in 29 places (16 2% in 22 such places in 1900). In 1910 there were 11 places with 5 000 or more, as follows. Memphis, 731,105 (102 320 in 1900), Nashville 110 364 Chattanooga, 44 604 Knoxville, 36,346, Jackson, 15 7,9, Clarksville, 8 548 Johason City (town), 8 502, Bristol (town), 7,148, Columbaa, 5 754 Cleveland, 5,549, Park City (town), 5,126

Agriculture —The acreage in farms decreased from 20 342 058 to 20,041 657 between 1900 and 1910 and the improved land in farms increased from 10 245 950 to 10,050 484 the average fell from 90 6 to 81 5 and the value of farm property increased from \$341 202 - 025 to \$612 520 836 (\$371 415 783 land \$109,106 804 buildings \$21 292 171 implements \$110 706,078 domestic animals) Of the land area 75 1 % was in farms in 1910 The average value of farm land per acre was \$18 53 Farms were operated largely by owners (144 125 by owners 826 by managers and 101 061 by tenants) In 1912 (preliminary estimates) the principal crops were Inchan corn 88 298 000 bu (3 332 000 A) wheat 7 077 000 bu (674 000 A) oats 5 599 090 bu, 1258 000 A) barley 52 000 bu (2 000 A) rye 196 000 bu (17 000 A) burkwheat 54,000 bu (3 000 A) potatoes 3 344,000 bu (38 000 A) hay 1 154 000 tons (888 000 A) cotton 280 000 bales (171 lbs. per A), and tobacco 72 600 000 lbs (110 000 A) In 1909 (US Census) the value of vegetables other than potatose was \$7 015,686 flowers and plants \$344 579 nursery products \$637 703 small fruits \$923 613 (strawberries \$835 739) orchard fruits \$3,459 077 (apples \$2 172 475 peaches and nectar nies, \$1 055,379) On Jan 3 1912 there were on farms 354 000 horses 279 000 miles 385 000 milch cows 576 000 other neat cattle 762 000 sheep and 1 574,000 swine. The office of inspector of apiaries was created in 1911 by a law against keeping foul brood bees or bees with any other infectious or contagious disease. The Smoky Mountain area (59 213 acres Blount and Sevier counties) and the White Top area (33 619 acres Johason and Sullivan counties and Washington county Virgina) were approved in 1912 by the National Forest Reservation Commission for purchase under the (Federal) Weeks act (of March 1 1911) to preserve upland watersheds

Mineral Products —Total value in 1911 \$17 902 451 Coal, 6 433 156 tons (\$7,209 734) and the metals are the important minerals. Iron ore amounted to 469,728 tons (marketed the mined total is more) of which 251 083 was hematite and the remainder brown ore. More than one third of the total comes from one hematite mine near Cardiff. The value of pig iron (not included in the total above) was \$3,439 644. The output of copper was 18 965,143. Bls. (\$2 370 643), all from the district near Ducktown where in 1911 sulphuric acid was successfully manufactured from smelter fumes, after suits to abate smoke missance. Zinc was valued at \$11,4000 and gold at \$11,000 (more than thrice the output is 1910). Phosphate rock was valued at \$1 688,267 and the green sands of Hardin, McNairy and Henderson countres are being studied as sources of fertiliser potash samples from McNairy county showing 10 1 to 11 3 // Limestone and marble each were valued at 2001 \$700 000 and

showing 10 1 to 11 3 % Exmestone and marble each were valued at about \$700 000 and and gravel \$518 542 Inne \$282 703 Natural gas was found near Franklin in 1910 Manufactures —In 1904 09 the number of establishments increased from 3 175 to 4,609 and that of persons engaged in manufacturing from 69 287 to \$7 672 (60 572 wage earners to 73 840) capital from \$102 439,000 to \$167 924 000 (63 9 %) and the value of products from \$137,960 000 to \$180,217 000. In 1909 the two pre-eminent manufactures were lumber and tumber \$30,457 000 and flour and grist-mil products, \$29,070,000. Other large products were foundry and machine shop products \$9 190 000 cat.constituction and repairs by steam railway companies \$6 777 000 cottouseed oil and cake \$6 593,000 cotton goods \$5,201 000 iron and steel from blast furnaces \$4 653,000; and bosiery and kint goods \$3 585 000 (119 %) more than in 1904 when the priduct value was 312 2% greater than in 1899) Of the manufactures, 48,2 % by value came from the 5 caps which had (in 1910) more than 10,000 inhabitants; Memphus \$30,241 500 chiefly flour, lumber, cottouseed sil (65 5 % of the

state a product) and tohacco Nashville, and 550,000, Chattanooga, \$16 036 500 principally foundry and machine-shop products, Knoxville \$8 149 000 and Jackson \$2,716 000

Transportation—Railway inlease Jan, 1, 1912, 3 945 18

A law of 1911 permits rail ways to fill treates to insure public safety, to build cut-off lines and second tracks to extend main or branch luges, and to condemn real estate for such purposes The Federal govern ment plans five additional locks in its canalisation of the Cumberland below Nashville.

Legislation.—The legislature met in regular session from January 2 to July 7, 1911 with a recess from February 18 to March 27, and one April 21-24 It ratified, April 11 the proposed amendment to the Federal Constitution providing for a federal income It urged amendments to the Federal Constitution providing for the direct election of United States senators and prohibiting polygamy throughout the United States

The following proposed amendments to the state constitution were referred to the next session providing that the secretary of state is to be elected by the voters instead of appointed by the legislature, also the treasurer, with the extension of his term from two to four years, providing that the attorney general and reporter are to be chosen by popular vote instead of appointed by the judges of the state supreme court making the governor's term four years and making him ineligible for immediate re-electioninstead of not holding office for more than six years out of eight and making the term of sheriff trustee and register, four years instead of two

No verdect an a case at law is to be set aside on a technical error unless it seems to have affected the result. No decision in a case tried by a jury in a lower court may be reversed by the state superior appellate courts or dismissed upon the ments without an opportunity for oral argument by counsel in the higher court. A new trial is to be awarded on the remathilur of a trial judge in any case where the jury's verdict seems to him to be excessive or due to passion prejudice corruption, partiality or unaccountable caprice The Australian ballot law was extended to two more counties. Coffee and Tipton

A commission form of government providing for a mayor and four commissioners to be chosen from the two candidates for mayor and eight for commissioner having the highest num ber of votes at the primary election for a civil service board of three commissioners with a three year term, for strict civil service rules and for recall initiative and referendum was passed for Chattanooga (where it went into effect on May 8, after a chancery suit by officials ousted by the new charter) and a summar charter was submitted to the voters of Knoxville and was adopted by 1 241 to 197 votes on August 26 1911 LaFollette Campbell county received a commission charter from the legislature The town of St Elmo in Hamilton county was incorporated in 1911 with a commission form of government Cities and towns were authorised to establish tuberculosis hospitals

A structer pure tood law was passed amending the act of 1907 The office of state hotel mappeter was created by an act requiring fire-escapes, stand pipes extinguishers night watch men screening disinfecting etc in all hotels. The state board of examiners of nurses was created to issue certificates to registered nurses who alone may use the letters R N after their names A law was passed for the protection of the eyesight of newly born infants. The

age of consent was raised from 18 to 21

Children under 14 are not to be employed except in agricultural or domestic service dur ing school term or at any time in mills, factories workshops, laundries messenger service etc. In the same employments children under 16 may not be employed without birth certifi cates, and in dangerous employments specified in the act no child under 10 may be employed under any conditions. Children under 18 may not be employed in messenger service between To P M and 5 A.M. Many special acts for separate counties extended into new territory the law for compulsery education of children between 8 and 15. Wages were secured for married working women upon notification from them that their employers are not to pay wages to

Anyone other than the employee

Finance — There was a treasury balance from 1910 of \$317 270 receipts in 1911-12 \$8-735 068 expenditures, \$\$ 267,218 leaving a balance for 1912 of \$785 120 The bonded

debt was \$15,218,600 on December 20, 1912

debt was \$15,218,600 on December 20, 1912

Reluction—The legislature in 1911 failed to pass a new school-code because of political strike in the state. Compulsory education was extended to several counties which had not been saider the law before. The teaching of agriculture is required in all schools and it is a necessary subject for teachers' certificates. In accordance with the act of 1909, lour state normal schools have been established at Johnson City Mempins Murfreesboro and (for negroes) at Nashville. On January 17, 1921 Brace Ryburn Payne (b. 1874, graduated Trinity College, NEC. 1806 published of psychology Univasity of Vinginia. 1906–11) was chosen president of the George Pashody College for teachers in Nashville. He took office in August immediately after the George Pashody College for teachers in Nashville. He took office in August immediately debits. University, where it will be copin in 1913. On November 1 1911 the Peabody Education Fund gave to the college \$500,000 on the condition that \$1,000,000 more be raised from

other sources. The Posbody Fund Board will dissolve when this condition is met-probably other sources. Lag Fashody Fund Poard wal dissolve when this conduction is met—probably in 1913. To the Peabody College the General Education Board (May 24, 1912) gave \$256,000 conditioned on the gift of \$150 000 from other sources to endow the Seaman A Knapp School of Country Life. Seaman Asshel Knapp (1833-1911) to whom the school is a memorial was president of the Lowa State Agricultural College in 1884-86 and then he are moved to Lake Charles, Louisiana, where he developed the rice industry, introducing Japanese and other varieties. From 1903 to his death he was in charge of the important farmers co-operative demonstration work in the South.

For the year ending June 30 1912 the school population was 756,966 the total carolinams, 539 911 the average daily attendance 368 888 and the length of the average school year 127 days. The total receipts were \$6 677 263 and the expenditures \$5,537 030. Of the population 10 years of age and over 13 6% in 1910 (20.7 in 1900) was illiterate of whites 9 7% (14 I in 1900) negroes 27 3 (4I 6 in 1900). Penal and Charitable Instantions — Juvenile courts were created in 1911 in Hamilton and

knox counties and a general law was passed giving juvenile jurisdiction to county judges in to the chairmen of county courts. The appropriations for pensions for soldiers and their sudows Affox counties after a general taw was passed giving jurcence jurissistance to wash, which is the charmen of county courts. The appropriations for pensions for soldiers and their widows were increased to \$520 ooo and \$210 ooo respectively, and the annual pensions from \$60 to \$72 to \$100. The legislature appropriated \$60 ooo for the Tennessee Reformatory for Boys near Jordonia 7 m. N. of Nashville opened February 15, 1912. The state towns 14,000 acres of coal land in Morgan and Anderson counties and in September 1894, established near Petros the Brushy Mountain Branch Prison whose output of coal in November 1912 averaged 1 ooo tons a day. In January 1912 a night school was opened in the state prison.

Hastory - Benjamin W Hooper (b. 1870) was elected governor in 1910 by 133 999. votes (Republican and Fusionist) to 121 674 for US senator Robert Love Taylor, Democrat after a serious split in the Democratic party between Malcolm R. Patterson (b 1861 governor 1907-11), anti Prohibitionist leader, and the prohibitionist wing of the party he was the only Republican elected to state office in 1910 and the first Re publican governor of Tennessee since 1883 The legislature strongly Democratic, was bitterly opposed to the new governor, and delayed his inauguration until January 25 1911, by having no quorum The regular Democrats passed a bill taking from the governor the power of appointing the state board of elections, making the board non partisan and increasing its members from three to seven. Governor Hooper vetoed the bill and to prevent its being passed over his veto more than thirty members of the lower house left the state so that for much of the session there was again no quorum. This forced the regular Democrats to acquiesce in the veto and the Republicans and Independent Democrats then returned from Alabama in time to pass the general appropriation bill which carried an item for interest on the state debt and moneys for official salaries In another contest with the legislature Governor Hooper vetoed a bill graing \$500 extra pay to each member but approved an amended bill reducing the extra pay to \$200 To succeed U.S Senator James B Frazzer (b 1856 governor 1003-05) Democrat the legislature chose Luke Lea (b. 1879) also a Democrat, editor of the Vashville Tennessean who had broken with Patterson on the liquor question. In 1912 B W Hooper was renominated for governor, and was re-elected in November by a small plurality over Benton McMilhn (b 1845 governor 1899-1903), Democrat The Progressive candidate, W F Poston polled about 2% of the combined votes for Hooper and McMillin The 1913 legislature (senate 27 Democrats and 6 Re publicans house 72 Democrats and 77 Republicans) chose John K. Shields (b. 1858) justice of the state supreme court since 1902 and chief justice since 1919) as successor to Robert Love Taylor,2 United States senator since 1907, who died March 31, 1912

1 Patterson was known as a pardoning governor and was accused of using this power for political purposes He pardoned 17 convicts on January 24 the last day he was in office and among the 150 he pardoned for murder was (April 13 1910) one of his advisers. Duncat B Cooper who with his son was convicted of killing Edward W Carmack (1858-1908) former United States senator and editor of The Tennessean which had attacked Patterson and in the control of which Carmack was succeeded by Lea.

*Taylor was born in Carter county Transessee, in 1850, practised law in Nashville, was a representative in Congress in 1879-81 and governor of Tempessee in 1887-92 and 1897-99. In 1819 he vault tried to heal the breach among the Democrats and was then ansiceessful when he tried to defeat the Fusionist candidates for governor. He was editor of Bob Taylor & Magazine in 1905-06 and the Treimend-Taylor Magazine. Another prominent politician James Davis Porter (b. 1828) governor in 1875-79 died on May B, 1932

or TENAS

Newill Sanders (b 1850), Republican, a mininfacturer of agricultural implements, had been appointed ad microm by the governor, April 8, 1912.

In the pre-convention campaign for the presidency. Governor Hooper supported Roosevelt but after the convention he remained "regular." The state was carried for Woodrow Wilson by 130,333 votes to 59,444 for Talt, and 53,725 for Roosevelt and 3,492 for Debs (1870 votes in 1908). The representatives in Congress are 8 Democrats and 2 Republicans.

There were several lynchings in the state in 1971-12, including a negro for murder at Gallatin, May 23, another on the same charge at Lafayette, June 8 one accessed of assault, taken from jail and hanged at Forest City, October 16, 1911, one at Memphis for assault, February 15, 1912, three at Shelbyville February 19, for murder, and one in Robertson county, May 27 for assault. In January 1911 Judge Sanford of the Federal District Court decided that the Inter state Commerce Commission may compel interstate carriers to furnish the same accommodation for the same price to negroes as to whites

In April 1912 the state suffered from floods, and Memphis was inundated

On the Cincinnati, New Orleans & Texas Pacific Railway, in its third district between Oakdale and Chattanooga, there was a firemen's strike from March of to 25, 1911. The strike was arbitrated by Judge Martin A Knapp of the Board of Methatron the strikers were taken back and the company agreed not to employ negro firemen north of Oakdale if competent white men could be secured. The white firemen had feared that they would be displaced by negroes

to 4 588 and that of persons engaged in manufacturing from 57 892 to 84,575 (49,066 wage earners to 70 230) capital invested from \$115 665 000 to \$216 876,000 (87 5 %) and the value of products from \$150 528 000 to \$272 896 000 (81 3°). The most important manufactures in 1909 were slaughtering and meat packing products \$42 530 000 (nearly eight times as much as in 1899) flour and grist mill products \$32 485 000 (nearly thrice) the product of 7000 humber out the product of 7000 humber out the product of 7000 humber out the products. uct of 1899) lumber and timber products \$32 201 000 (97 /0 of the lumber cut being shortleaf yellow pine) cottonseed oil and cake \$29 976 000 in which Texas ranked 1st and refined petroleum in which the state ranked 4th. Other products were car construction and re petroleum in which the state ranked 4th. Other products were car construction and repairs by steam railway companies \$13,309,000 rice cleaning and polishing, \$8,142,000 (three fourths more than in 1904 the industry had hardly begun in 1899), in which I exastranked 2nd to Louisiana foundry and machine shop products \$8,068,000 mail liquors \$6,464,000 and food preparations \$5,229,000. The more important manufacturing cities were Dallas \$26,959,000 Houston \$23,016,000 (thrice what it was in 1899). San Antonio \$13,455,000 Fort Worth \$8,661,000 (including large meat packing plants just outside the city limits). Galveston \$6,308,000 mainly flour Beaumont \$4,830,600 principally rice cleaning Wasco \$4,769,000 mainly cottonseed products and Sherman \$4,676,000 Transportation—Railway mileage January 1, 1912, 15,038,22—more than that of any other state. The Federal government completed in 1911 the main Galveston channel, 26, ft deep and 800 ft wide and in 1912 had about half finished the 30 ft channel along the Galve ton wharves and the Houston ship channel in 1911 began the 30 ft channel from Galveston to Port Bolivar the 40 m incomplete link between Brazos river and Matagorda Bay

veston to Port Bolivar the 40 m incomplete link between Brazos river and Matagorda Bay in the inland water was from Galveston to Corpus Christi the Sabine Neches canal (25 ft. deep) to Beaumont a deep water harbour (20 ft.) at Harbor Island Aransas Pass, and a lock and dam on White Rock Shoals, Trinity river Improvement of the Trinity river was delayed in 1911 until a railway could be built to carry supplies for dam building. The causeway connecting Galveston with the mainland was formally opened May 25 1912

Legislation — The regular session of the legislature was held from January to to March 11 1911 and a called 'or special session from July 31 to August 2p which re districted the state into representative districts. The legislature asked Congress to submit to the states a constitutional amendment providing for the direct election of United States senators and one prohibiting polygamy

Amendments to the constitution were adopted at the general election of 1912 permitting cities of 5,000 or more to adopt or amend a charter by a majority vote, creating a board of prison commissioners and permitting the legislature to appropriate money for indigent and disabled soldiers and sailors and their wives, and to regulate the terms of trustees of state institutions

Three new countries were created Brooks (county seat Fallarmae) from parts of Hidalgo Starr and Zapata Jim Wells (county seat Alice) from part of Nucces and Wilfacy (county-

Seat. Sarita) from parts of Cameron and Hidalgo.

The 12th of October (Columbus Day) was made a legal holiday.

The office of state inspector of masonry was created. Wharf and terminal companies were put under the jurisdiction of the radroad commission. All disabilities of mastred was put under the jurisdiction of the radroad commission. women in regard to mercantife and trading pursuits were removed. A new penal code was adopted. The legislature voted \$10 000 for a monument (begun in 1912) to Gen Stephen F Austin (see E.B n 9400) in the state cometery at Austin and \$2 000 for a monument (completed in 1912) to Elizabeth Crockett wife of David Crockett (see E.B vii 4270), in

TEXAS **914**

the headeless by Acton, Hood county Children under 15 are not to work in factories using dangerous hackinery in distillence of in breweries or in any business that may be morally or physically dangerous the fine for violation as \$30 to \$200 and each day of employment constitutes a separate offence. The office of inspector of safety appliances in factories was constitutes a separate ones. The ones of inspector of safety appropriate in sactions, was created Railway brakes are to be inspected by competent persons. The office of darry and food commissioner was created by an act which forbids the adulteration of food and a new sanitary code was passed with rules for quaratime and for the report of vital statistics. A law in regard to the examination of nurses was unecoded and an act regulating the practice of medicine forbids soliciting or drumming patients or patronage. The sale or gift of spirituous liquous as forbidden in all disorderly houses. Pandering is made a follow pumish able by five years in the penntentary and it is no defence that any part of the act was done outside the state marriage is no bar to the testimony of an unjured woman

The office of public service commissioner in Houston was created in 1911 In 1912 Bishop lonly 6 opposing votes) Frankin Frankston Withs and McKinney (Nov 5) adopted the commission form of government. In Dallas in 1911 a suit was brought against the constitutionality (if the recall provision in the city charter after the recall of the board of education

but the recall was upheld by the courts

Finance — The 'called' session of 1911 was summoned largely for appropriations Although the eash balance in the treasury on July 31 1910 was \$1 360 900 the balance for the same date in 1911 was only \$32 975. The tax rate had been reduced in previous years nithough the cash balance in the treasury on July 31 1910 was \$1 360 909 the balance for the same date in 1911 was only \$32 975. The tax rate had been reduced in previous years because of the presence in the treasury of fines paid by corporations for violation of the anti-trust law and when these no longer came in there was a deficiency. The law about state is depositories was amended. In the treasury there was a balance of \$647 467 on September 1' 1911 and of \$793 417 on August 31 1912 when the state debt was \$3 997 500 largely a permanent school fund (see E B xxvi 692d). The receipts for the fiscal year were \$18 119 072 and the expenditures \$15 973 122

The election of a single-tax advocate J J Pastoriza as tax-commissioner of Houston re sulted in a full value assessment on land and in a cut in the tax-rate from \$1.70 to \$1.30

Education - The law in regard to teacher a certification was amended in 1911 Common school districts may establish high schools and if a department of agriculture is established in a high school the state duplicates the outlay therefor for any amount between \$500 and

It is not stated the state during the total of the state of the state normal school board of regents was created for the state normal school for whites, and a text book board was created by a law providing for unform text books. The most majoritant recent event in the field of higher education was the opening in the autumn of 1912 in Houston of the Rice Institute of Liberal and Technical Learning founded by the will of William Marsh Rice (d. 1900). Mr. Rice had established a foundation moorporated in 1891 and had given it an interest bearing note of \$200 000 at that time. The foundation became his residuary legatee and the estate valued at about \$10 000 000 was to be used one-half for endowment and one-half for equipment Dr Edgar Odell Lovett then professor of astronomy in Princeton University, was chosen president in 1908. On a site of 300 acres 3 miles from the centre of the city of Houston were erected in 1910–12 an administration building (50 ft x 300 ft Byzantine in style) a residence half for men (Vene tian brick and stucco) and scientific and technical laboratories with a fine campanile. The Institute sets no proper limit to its educational endeavour" and makes its 'lower limit no lower than the standard entrance requirements of the more conservative universities of the country ' Graduate and undergraduate work for both sexes will be carried on by a faculty of science and faculty of letters. There is no charge for tuition and rooms and board are furnished at cost. The Institute was dedicated and opened on the 10th of October 1912

For the school year 1910-11 the school population (7 to 17 years of age) was 968 269 the enrollment 847 604 the average daily attendance 546 481 and the length of the average school year 135 days. Receipts were \$18 072 126 and expenditures \$14 516 992 On

September I 1912 the school population was I 017 133

The rate of illiteracy decreased nearly one third in the decade 1900-10 in 1900 14 5 % of the population to years old and over was illiterate and in 1910 only 9 9 % In the negro population there was a proportional decrease in 1900 the rate was 38 2 in 1910 only 24 6

Penal and Charatable Institutions —In 1913 the board of preson commissioners (created

sentence in first offence, where the punishment is less than 5 years. Two state tuberculosis colonies were established under the supervision of an anti tuberculosis commission for which the law appropriated \$100,000. Among the appropriations were for the pension depart

1 Rice an eccentric millionaire died in New York September 23, 1900. In February 1901 his valet, Charles F. Jones, confessed that he possoned Rice under instructions of Albert T. Patrick, a lawyer who was a beneficiary of a supposed will of Rice, which experts testaked was a forgery. Patrick was tried for marder and was convicted (first degree) in March 1902 and skatenged to death us Appli 1902. A new treat was denied in June 1905 and in December of that year he was re-sentenced. In 1906 a new appeal was taken and in December sentence was obsenued to implication for life. On November 27, 1912 Patrick was pardoned by Goversor Dix of New York.

ĐTĂH

thent \$555,750 for fgII and for 1912 (of which \$50,000 cach year was for Confederate pensioners), and \$92,206 in 1911 and \$92,050 in 1912 for the Confederate Home at Austin.

History - Probabition of the sale of intoxicating liquids that recently been the central question in Texas politics, where there is virtually no partisals opposition to the Democratic party Oscar Branch Colquitt (b. 1861), railroad commissioner in 1903-11 and governor in 1917-12, was a leader of the anti Prohibitionist faction, while the popular vote (July 24, 1911) defeated the proposed amendment for state-wide prolathifout by 6 000 votes (237,393 to 231 000) In the 1912 primary Colquitt was re-nominated with a plurality of 20,000 votes over Judge W F Ramsey, but the precedent of giving each governor two terms seems to have caused this, as other nominees were mostly Prohi bitionists Probably there will not however be the necessary two-thirds of the next legislature pledged to prohibition to secure the immediate resubmission of the consti tutional amendment to the people. In January 1911 the legislature had re-elected to the U.S. Senate Charles A. Culberson (b. 1855, governor 1895-9, and since 1899 senator) At the July primary, Jake Wolters anti Prohibitionist, was defeated by Morris Shep pard (b 1875 representative in Congress since 1902, when he succeeded his father), who favoured prohibition to succeed in the US Senate Joseph Weldon Bailey (b 1863) Bailey was an able lawyer and was prominent in debate, especially on questions of con stitutional law He served in the Senate in 1001-13 and offered his resignation March 5 1911 as a protest against the votes of Democratic senators for the Arizona constitution which provided for the recall of judges, but immediately withdrew it in November 1912 he again offered his resignation (to take effect in January 1913) Governor Columbt appointed for the remainder of the term Rienzi Melville Johnston (b. 1850), editor of the Houston Post and an anti Prohibitionist, he was sworn in January 7 1913

The primary of May 4 1912 was a victory for Woodrow Wilson. He carried the state in the November elections with 221 435 votes to 26,740 for Roosevelt,1 128,013 for Taft and 25 4/° for Debs (7 570 in 1908) All the representatives in the 63d Congress (18 including 2 at large 16 in the previous decade) from the state will be Democrats There were two Progressive candidates for Congress and E C Lasater was nominated by the Progressives for governor

There were three lynchings in the state in 1911. A Mexican boy who stabbed a man for cursing him was killed by a mob at Thorndale, June 19 a man was lynched in Farmersville, August 17 for insulting a woman over a telephone and a negro, accused of rape was lynched at Marshall, October 29 In 1912 there was a double lynching at Marshall (February 13) of a negro and a negress for complicity in murder, and at Tyler (May 25) a negro who confessed to having assaulted a white girl was burned to death in the public square

A fire in the city of Houston on February 21, 1012 did damage to the extent of several million dollars The town of Washington, where the declaration of Texan independence was signed in 1836 (see E B xxvi, 693) was almost destroyed by fire on November 28, 1012 A new city plan for Dallas prepared by George E Kessler, landscape archi tect of St Louis and Kansas City was proposed in 1912

(53,53x in 1900); Ogden, 25,580 (16,513 in 1900), Provo City, 8,925, Logan, 7,522, Murray, 4:0672 Birgham, 3,685, Spanish Fork, 3,464, Park City, 3,439, Bureka, 3,416; Springville, 3,356; Lehi Csty, 2,964; Bingham (10wn), 2,881; American Fork, 2,797, Nephi, 2,750, Tooela, 2,754; and Richfield, 2,550

Agriculture — The acreage in farms decreased from 4 116 931 to 3 397,699 between 1900 and 1910 and the improved land in farms increased limit 1 032 117 to 1 368,211; the average farm acreage fell from 212.4 to 156 7, and the value of farm property increased from \$75 175, 141 to \$150 795,201 (\$99,482,164 land \$16,063 168 buildings \$4,468 178 implements \$28, 781 691 domestic animals) Of the land area 6.5 % was in farms in 1910 The average value of farm land per acre was \$29,28. Farms were operated largely by owners (19,762 by owners, 194 by managers and 1,720 by tenants). In 1950 (1950 cooks) the value of vegetables other 102,000 A.) and sugar beets 422,000 bu (9,000 A.) wheat, 6,059,000 bu (236,000 A.) oats 4,222,000 bu (91,000 A.), barley 1,125,000 bu (25,000 A.) potatoes 3,515,000 bu (19,000 A.) fag. 1,023,000 tons, (368,000 A.) rye 30 000 bu (6,000 A.) and sugar beets 442,310 tons (33,950 A.) (the latter item includes fallow. In 1909 (U. S. Census) the value of vegetables other than potatoes was \$717 776, of flowers and plants \$81 116 of nersery products \$188 455 of small fruits, \$217,327 (strawberries, \$125 854) of orchard fruits, \$640,904 (apples \$319 691, peaches and nectarines \$156,451) On January 1 1912 there were on farms 131 000 horses 2 000 mules, 83 000 milch cows 356 000 other neat cattle 1 990 000 sheep and 79 000 swine

The total acreage arrigated in 1909 was 999 410 (58 8 % more than in 1899) 957 359 were plied from streams. The total cost of arrigation enterprises to July I 1910 was \$14 028 supplied from streams The total cost of irrigation enterprises to july 1 1910 was \$1,7 and the estimated final cost of improvements begun was \$17 840,775 Of cereals \$7 3 by acreage was grown on irrigated and in 1909 92 9 / of corn 92 4 ° of oats, 88 % of alialfa 94.5 % of wild salt or prairie grasses 93 3 % of potatoes and 94 9 % of sugar beets The Strawberry Valley project (Utah and Wasatch counties, see E B xxvn 814b) of the Federal reclamation service was 69 % completed in November 1912, and the great Strawberry Tunnel supplied from streams

about 90 to completed.

In 1911 there was created a board of veterinary medical examiners. Panguitch School in Carfield county was made an experiment station in connection with the Agricultural College and in 1912 the Federal department of agriculture planned a new experiment station near Ephraim on the Manti National Forest In 1911—12 elaborate experiments were made to kill off the alfalfa weevil, a European immigrant found here only in America The state experiment station has investigated in irrigated soils the formation and movement of nitrates

experiment station has investigated in irrigated sous the formation and movement of nitrates Minoral Products — Total value, 1918 \$41 139 075 In copper 142 340 215 lbs the state ranked 4th Other metals were gold \$4 486 200 ranking the state 6th silver \$6 280 500 ranking the state 2ad 'lead 55 198 tons, and znc 7,004 tons Coal was valued at \$4 248 666 (2513,175 tons) The output of salt was 236 178 bbls (\$157 024) Hard asphalt worth \$486 114 was marketed in 1911 and in 1911—12 drilling was begun in the northern part of Great Salt Lake for soft asphalt The petroleum deposits are being developed slowly and phosphate rock has been found in the NW part of the state Sulphur was taken from San Rafael Canyon in larger quantities than in 1910 Alumite discovered near Marysville Piute county is being studied as source of potash salts and alumina county is being studied as source of potash salts and alumina

Manufactures - From 1904 to 1909 the number of establishments increased from 606 to 749 and of persons engaged in manufacturing from 9 650 to 14 133 (wage-earners from 8 052 to 11 785) capital invested from \$26,004,000 to \$52 627 000 (102.4%) and the value of products from \$38,926 000 to \$61 989 000 (59 2%) The three greatest manufacturing and structures in 1909 were copper refining and smelting lead refining and smelting and the manufacture of beet sugar. Each of these was so largely concentrated under single control that they were not reported in detail by the Federal census probably their product value was between one half and two-thirds of the total for all industries. Of the total product value

27 5% came from Sait Lake City, \$13,351,250 and Ogden \$3,713 000 Transportation.—Railway mileage January 1, 1912, 2,055 91

Legislation - The regular session of the legislature was held from January 9 to March 9 1911 It submitted several constitutional amendments for approval at the general election in 1912 one permitting a new county to be formed by statuteformerly only by two-thirds of the popular vote m the district concerned, one exempting mortgages from taxation and permitting the abatement or remittance of taxes o. the indigent page; one creating a state board of equalisation to be appointed by the governor instead of being composed of ex offices members only; one allowing any city of the second class with less than 20,000 inhabitants and any city of the third class or any town upon authorisation to incur an additional indebtedness, up to 8% of the valuation, for water, lights and severs, owned and controlled by the municipality and one to m crease the pay of members of the legislature from \$4.00 a day to \$8.00 a day. All

these were deleated by large majorities in November 1912, On March 9, 1911 the house voted against the proposed Federal income tax amendment.

A state flag was adopted showing the bee hive the Mormon symbol the word Industry and the sego bily (Colochotius intens), which was declared the state flower. The legis lature appropriated \$750,000 for the state capitol (authorised in 1911 maximum cost \$2,500,000 work begun late in 1912) and authorised the issue of \$1,000,000 in capitol building bonds. A state board of architecture was created to examine and because architects and building the bursaw of statistics was remained the bursaw of immigration labour and statistics. A undorm warehouse receipt law was passed

The legislature passed codes for county commissioners, city councils, and town trustees. A child labour law forbids the employment of children under 14 in dangerous occupations of women under 21 in places where alcoholic liquors are manufactured or dispensed of children under 21 as messengers between 9 P M and 5 A M or as messengers to objectionable places at any time in cities of the first and second class, of boys under 12 and of girls under 16 in street trades in first and second class cities, and of boys under 14 or girls under 16 for more than 54 hours a week in any employment except domestic service fruit or vegetable packing or farm work. Yo woman is to be employed in any manufacturing mechanical or mercantile establishment laundry hotel restaurant or telegraph or telephone service hospital office or transportation company more than 9 hours a day or 54 hours a week except for emergency The inspection of coal and hydro-carbon mines was provided by an act which makes rules for ventilation and safety. It was made a misdemeanour to coerce anyone to join an organ isation anyone commonly practising such coercion is declared a vagrant

A new code for the liquor traffic provides for local option (in cities and towns and in rural A new code for the liquor trainc provides for local opinion (in causes and cowins and in reach territory in counties) for the granting of licences by the city councils or town board of trustees but allows no licence except for a drug store or hotel within 300 ft, of a school or a church or outside of city limits and grants club licences only in the name of a qualified individual Wholesalers may not construct or rent premises for retail business. Saloons may not be opened between 10 PM and 6 AM It is a unsdemeanour to sell or give tobacco opium or other narcotics to anyone under 21 and for any minor to have such a drug in his possession Darries creameries slaughter houses etc are to be inspected under a law which is practically a pure food act. A new law was passed for the reporting of contagious diseases and in regard Physicians and midwives must report cases of infantile blindness to the state board of health and must treat such cases in accordance with its rules

Physicians and superintendents of hospitals are to report cases of venereal diseases but not the names of patients. Teachers must examine pupils for defective sight hearing or teeth

The penalty for pandering was set at 20 years in the state prison, for receiving money from

a fallen woman without giving a consideration 2 to 20 years and for the detention of a woman in a brothel 10 years. The commission of a part of the acts outside of the state is no defence and the testimony of an injured woman even though married is permitted.

Finance — The state tax levy for 1911 and 1912 was 412 mills for state purposes 1/2 mill for high schools 3 mills for district schools 5 mills for general county fund 4 mills for county schools and I mill for the poor fund The powers of the state board of equalisation were specified and it was permitted to revalue property wrongly assessed. A board of commissioner on revenue taxation was appointed to report to the legislature of 1913 Laws were passed for the control of fraternal insurance societies and requiring foreign banking and loan associations to furnish security before doing business in the state and a new banking law applies to all except national banks makes the secretary of state ex officio bank commissioner and requires the governor to appoint bank examiners. There was in the state treasury December 31 1911 \$1 728 602. The receipts for the following year were \$3 668 004 and the examiners. penditures \$3 954 594 leaving a balance on hand December 31 1912 of \$1 442 012. The state debt amounted to \$1,210 000

Education—In 1911 the state board of education was authorised to take over the estab-

lishment of state libraries and gymnasiums and the state library and gymnasium commission was abolished. The legislature appropriated \$10 000 for the following two years for state and in districts where the local key was not enough to employ a teacher for a term of 28 weeks. A half mill tax was laid for the high school fund and a permanent fund for the university including a branch normal school and agricultural college, was set at 28% of the annual revenue from the general tax levy exclusive of the state school and high school funds. The cornerstone of a new university birary and administration building, for which a \$300 000 bond issue was authorised in 1911 was laid on October 23, 1912. In 1910 the percentage of illiteracy in the population to years of age and over was 5 6 (8.9 in 1900). For the school year ending June 30, 1912, the school population was 114,588, the enrollment 92 129; the average daily attendance, 72,644, the length of the average school year 34 weeks the school revenue, \$4,318,746, and the expenditures \$3,864,549. Penal and Chambable Institutions—In 1911 the legislature reconstituted a board of trustees.

7 In 1911 86 cities and towns and I county voted no licence, 18 cities and towns and I county for licence

of the State Industrial School, passed new laws relating to detention homes for juveniles fin settled that critics is well as in first class), and to the juvenile court and its jurisduction (excluding crimes punishable by death or life impressment); created a rehel fand for firemen and authorised the use of conxict lebour on state roads.

History.--William Spry (b 1864), a Republican and a Mormon, was governor for the term 1909-13 and was re-elected in November 1912 by 42 552 votes to 36,076 for John F Tolton, Democrat The Democratic vote in the rural districts was strong, but the Republican majority in Salt Lake county (including the city) was large. Spry had favoured Roosevelt for the Republican normation, and after the re-normation of Taft by the national convention it was for a time supposed that the powerful influence of the Mormon Church, which has usually been exerted in behalf of the Republican party might oppose Taft because he had not intervened in Mexico, where prosperous Mormons suffered from lawlessness. But Tait's policy was defended in an editorial signed by Joseph Fielding Smith, president of the church in the Improvement Era the official of the 'quorum' of the church, and although the Progressives nominated candidates for governor (Nephi L. Morris who received 23,591 votes) and two congressmen, the state was carried by Taft, with 42,100 votes to 36 579 for Wilson 24,174 for Roosevelt and 9,023 for Debs (4,985 in 1908) The state for the first time will have two representatives in Congress,—both Republican (one re-elected) The state legislature will again be Republican senate, 16 Republicans and 2 Democrats, house 31 Republicans and 14 Democrats On January 18, 1911 George Sutherland (b. 1862 Republican represent ative in Congress in 1901-03 and United States senator since 1905) was re elected to the US Senate The term of the other senator, Reed Smoot (b 1862 Republican, senator since 1903, apostle of the Latter Day Saints) does not expire until 1915. In 1917 Socialist mayors were elected in Eureka (with a full ticket), Manti and Murray (a suburb The Socialist vote in November 1012 was surprisingly large. The of Salt Lake City) incorporated cities of the state, Murray, Logan Ogden, Proyo and Salt Lake City have been operated under commission charters since January 1912 by a law of 1911

Attacks on the Mormon church in popular magazines, charging that polygamy was still practised, were answered, April 6 1911 by a statement of President J F Smith at the annual conference that polygamy was forbidden by the rules of the church

Employees of the copper mines near Bingham went on strike in September 1912. The strikers, mostly Greeks, seized the mines and routed deputies who attempted to draw boiler fires (September 18 and 19). On October 11 the deputies killed several men in an attack on the strikers.

Bibliography.—Laws 1911 (Salt Lake City) official reports articles on copper mines and urigation in Technical World, December 1912

VERMONT 1

Population (1910) 355,956 (36% more than in 1900), 855% were native whites, 211% whites of foreign parentage, 14% foreign-born whites and 05% negroes. The average number to the sq. m. was 39 (377% in 1900). In 1910, 475% of the population was in cities and towns of 2,500 inhabitants or over (405% m 1900). The cities and villages with 5,000 inhabitants or over were. Burlington, 20,468 (in 1900) 18,640. Rufland, 13,546, Barrq, 10,734, Montpelier, 7,856, St. Johnsbury, 6,693. Brattle

boro, 6,517, St Albans, 6,881, and Bennington, 6,211

Agriculture — The acreage in farms decreased from 4,724,440 to 4,663,577 between 1900 and 1910, and the improved land in farms from 2,120,624 to 1,633,965, the average farm acreage felificant 447 to 142,630,446 to 142,630,446 to 142,630,446 to 142,630,486 buildings \$10,168,687 implements, \$22,642,766 domestic autimals). All the land area 79,7% was in farms in 1920 The average value of farm land per acre was \$12,22. Farms owen operated largely by owners (28,065 by owners 636 by managem, and 1908 by tenants). In 1912 (prehminary estimates) the principal crops were indian corn, a 802,000 by (13,000 A) wheat, 25,000 bit. (1,000 A) oats, 3,311,000 by (77,000 A) barley \$35,000 bit. (13,000 A) mys 26,000 bit. (1,000 A) acts, 3,311,000 by line (8,000 A), peratoosi; 3,000 bit. (13,000 A) businesses, 155,000 to 15, 100 Oo A) and 100 acco, 170,000 lbs. (100 A). In 1900, (U.S., Census) the acreage of vegetables other than TSee E B xxvii 1025 et seg

potatoes was \$ 548 and the value \$672,183 the value of small fruits \$92 030 (strawberries \$68 960) of orchard fruits \$801 355 (apples \$752 337), and of maple strup, \$1,086 933. On January 1 1912 there were on farms \$4 000 horses 268 000 mulch cows, 158,000 other neat cattle 117,000 sheep and 111,000 swine.

Dairying is the most important agricultural industry. In 1911 the state experiment station published an important bulletin on the manufacture of ice-cream besides bulletins on commercial fertilisers commercial feeding stuffs and the peat and muck deposits of the state. The Federal department of agriculture has a farm at Weybridge near Middlebury where Morgan horses are bred and experiments have been made with Southdown sheep.

In 1911 the governor was authorised to appoint a cattle commissioner whose duty it is to see that no infected live stock is brought into the state and to suppress disease in herds.

The legislature passed a stricter law for the prevention of forest fires made the commissioner of agriculture an inspector of apianes to inspect hives for foul brood etc. and authorised him to appoint a state or inthologist.

Mineral Products - Total value 1911 \$8 434 516 The only large items were stone

\$6 145 351 ranking the state 3rd and slate \$1 624 941 ranking the state 2nd Of the stone \$3 394 930 was the value of marble and \$2 730 719 that of grante The value of lime was \$191 035 Vermont produces more asbestos than any other state in 1911 the value was 132 o and the quantity 99 % more than in 1910

Manufactures - From 1904 to 1909 the number of establishments increased from 1 699 to 1958 the number of persons engaged in manufacturing from 37 015 to 38,580 (wage-earners from 33 106 to 33 788) capital invested from \$62 659,000 to \$73 470,000 and the value of the manufactured product from \$63 084,000 to \$68,310 000 The three largest manufactures were in 1909 marble and stone-work \$12 395 000 lumber and tumber products \$8 598 000 (9 3° less than in 1904) and butter cheese and condensed milk \$8 112 000 The textile industries woollen worsted and felt goods (\$4 497 000), hosierv and knit goods (\$1 746 000) and outton goods all reported smaller product values in 1909 than in 1904. Other manufac ooo foundry and machine shop products \$4 133 000 paper and wood pulp \$3,902 000 foundry and machine shop products \$3 755 000 furniture and refingerators \$1 618 000 Of the product value 19 5 / came from the three largest cities Burlington, \$6 800 500

Barre \$3.85, 000 including one fourth of the state's marble and stone work and Rutland \$2.670,500

Transportation — Railway mileage January I 1912 1 094 89 In 1911 app for highways were increased to \$125 000 for 1911 and \$150 000 a year thereafter In 1911 appropriations ar thereafter Railways may use electricity for motive power with the approval of the public service commission Street railways must carry public school pupils at half fare or less Many acts were passed for local bridges and highways.

Legislation —The legislature met in regular session from October 5, 1910 to January 28, 1911, and convened agun on October 3, 1912 The latter session aroused by the growth of the Latter Day Saints near Sharon (the birth place of Joseph Smith the founder), memorialised Congress December 13, 1912 for the adoption of an amendment to the Federal Constitution prohibiting polygams

In 1911 there was a re apportionment of state senators in certain counties The state librarian was required to establish a legislative reference bureau and a state bureau of information was created, in the office of the secretary of state state is required to secure statistical information in regard to the finances of munici Columbus Day (October 12) was made a legal holiday

The punishment for first degree murder was made life imprisonment unless the jury

returns a verdict with the words with capital punishment

A workmen s compensation act in effect June 28 1911 restricts the fellow servant rule and the defence of assumption of risk and prescribes damages and fixes limits to amounts recoverable for injuries, and forbids suits for damages unless they are brought within two years after the injury and notice has been given within sixty days to the employer A constitu tional amendment was proposed authorising and empowering the legislature to pass laws for compulsory compensation this was left for action by the next legislature. No child under 14 is to be employed in a railway mill factory quarry or workshop employing ten or more men no child under 12 in messenger service business office restaurant, bakery or hotel mone under 16 in certain (enumerated) naugerous
employment which requires her to stand constantly
The penalty for the white slave traffic was made a fine of \$200 to \$200 imprisonment
The state board of health was empowered

Other constitutional amendments which required ratification by the legislature in 1913 and then by popular vote are for bennial state elections and biennial sessions of the legislature. after 1915, and for taking from the legislature the power of chartering institutions not under state control all other charters to be governed by general statutes

to Traine regulations, for the prevention of infanthe bundness. No camp or sandoming for the care of tuberculous may be established in the state without the permission of the state board of health. A board of registration of hidress was established and nurses heested by this board may use the letters R.N. after their names. The sale of oleomargame was festificted by an annual tax of \$100. Liquors and tobacco may not be advertused on built boards within 200 ft. of a church chapel or school, except by permission of selectmen or foun ch. Villages may be chartered and established on petition of a majority of legal voters therein with the approval of the public service commission. Many special laws in regard to corporations were passed including charter amendments in act for the incorporation of the village of West Glover and acts to incorporate power traction trust hank and insurance.

corporations were passed including charter amendments an act for the incorporation of the village of West Glover and acts to incorporate power traction trust bank and insurance companies churches fraterinties clubs, etc. The name of Bennington Center was changed to Old Bennington and that of Frankin Pond or Silver Lake in Frankin town to Lake Carnix Among many game laws there was one granting a bounty of \$10 for each black bear killed Finance.—There was in the state treasury July I 19II, \$566 142. The receipts for the fiscal year 19II-12 were \$2 303 755 and the expenditures \$2 350 508, leaving a balance June 30, 1912 of \$519 388. In 19II \$26 000 a year was appropriated to pay interest on bonds and other debts of the state. The same session of the legislature authorised the issue of \$135 000 in 6% certificates redeemable 1932 to refund the agricultural college fund ion. In 1911 the governor appropried a commission to introduce a system of bookkeeping in the office of the state treasurer. appointed a commission to introduce a system of bookkeeping in the office of the state treasurer Enlarged powers were given to the commissioner of taxes to whom aggreeved tax payers may appeal in regard to appraisal or other action of local listers. The inheritance tax law of 1908 was revised a tax of 5% was laid on bequests except to charities for religious purposes or to certain near relatives. Only corporations under supervision of the bank commissioner may (1911) use the word "trust' in name or advertisement and the whole savings-bank and trust company law was revised

Education—In 1911 the 'state normal school at Randolph Center was discontinued and its buildings were used for an agricultural school \$10 000 a year was appropriated. The two other normal schools at Johnson (where a new dormitory was built in 1912) and Castleton, formerly state schools only in name were taken over (by lease or purchase). Courses in agriculture are to be given in them, and hormal training in certain high schools.

12 courses were provided for 1911 and 15 in 1912

The age limits of compulsory schooling were increased in 1911 by the addition of a year so that they are now 8 to 16 legal pupils' are those between 5 (7 in schools having no kindergartens) and 18 A law for medical inspection of schools on vote of annual school meetings was passed in 1911 The state superintendent is to control high school entrance examinations and he may grant 5 year certificates to normal school graduates of other states. Towns and incorporated districts may vote pensions (not more than one half average salary for last 5 years) from school funds to teachers who have served 30 years School reports are to be of uniform date and form

In 1916 the percentage of illiteracy of the population 10 years of age and over was 3.7 (5.8 in 1900) For the school year 1911-12 the school population was 78 660 total enroll ment in public schools 64 518 average daily attendance, 52 160 length of the average school year 32 weeks total revenue for schools \$1 672 896 and total expenditures \$1.915,344 After the death in 1910 of Matthew Henry Buckham (b. 1832) president of the University of Vermoirt since 1871 Guy Potter Benton (b. 1865) president of Miami University Ohio was elected his successor on May 18 1911 and he was inaugurated on October 5 1911 Phoretable and Penal Institutions.—In 1611 laws were bassed regulating transfers from the

Charitable and Penal Institutions -In 1911 laws were passed regulating transfers from the industrial school to the house of correction making two superior judges with a secretary chosen by them a commission on probation, and authorising the building of a criminal ward in the state hospital for the insane at Waterbury

\$10,000 a year for five years was voted to the Austine Institution at Brattleboro for the care and education of defective children

History —In the state election held on September 3 1912, 64,839 votes were east for governor, under the constitution 32,420 votes were necessary for a choice, but there was no popular majority Allen M Fletcher, Republican, received 26,237 votes Harlan B Howe, Democrat, 20,001, and Frazer Metzger, Progressive, 15,529 No other state officer received a majority and the election was thus thrown into the joint session, which on October 2, chose Fletcher as governor (by 163 votes to 76 for Howe and 32 for Metzger) and elected the Republican candidates for other state offices, each by a larger plurality than it cast for Fletcher Two Republicans were elected representatives in Congress at the September election Governor Fletcher took office immediately, succeeding John Abner Mead (b 1841), Republican, who became governor in 1910 after two years as lieutenant-governor, and who was mentioned as a possible successor to James S. Sherman as nominee for vace-president on the Republican ticket

David Johnson Foster (b. 1857) Republican, representative in Congress state 1961, died on March 21 1912

The state was carried for Take in November He received 23,333 votes to 22,132 for Roosevelt, 15 354 for Woodrow Wilson, 1,095 for Chaffin, and 225 (largely from Barre) for Debs who had received no votes in 1998

The 195th anniversary of the founding of St Johnsbury was celebrated, August 15-17 1912, on the Old Pine golf course, by a historical pageant, planned by William C Langdon of New York City, with special music by Brookes C Peters

Bibliography — 4cts and Resolves (Rutland 1911) official reports, especially of the commussioner of agriculture (Bellows Falls 1911) Tercentenary Celebration of the Discourry of Lake Champlain and Vermont (Montpelier 1910)

VIRGINIA 1

Population (1910) 2 of 1612 (11 2% more than in 1900) 661% being native whites, 18% whites of foreign parentage 13% foreign born whites and 326% negroes (357% in 1900). The average number to the sq. m. was 512 (461 in 1900), the state ranked 14th in density, and 76,9% of the population was rural living in towns of less than 2500 inhabitants or in other rural territory (817% in 1900). The urban population was contained in 19 cities and 13 incorporated towns. The places of 5000 or more were Richmond 127628 (in 1900 \$5050). Norfolk, 61452. Rosnoke, 34,874. Portsmouth 33,190, Lynchburg 29494, Petersburg 24127. Newport News 2020. Danville, 1900, Alexandria 15,329, Staunton, 10,604, Suffolk, 008 Charlottesville 6765. Bristof 6247, Tredericksburg 5874, Winchester, 5864. Chiton Forge 5,748. Hampton 550,

Agriculture —The acreage in farms decreased from 19,907,883 to 19,495,636 between 1900 and 1910 and the improved land in farms from 10,94,805 to 9,870,058, the average farm acreage fell from 118,6 to 105,9 and the value of farm property increased from \$323,\$15,977 to \$625,065,383 (\$394,658,912 land \$137,399,150 buildings \$18,115,883 implements \$74,891,438 domestic animals). Of the land area 75.7°, was in farms in 1910. The average value of farm land per acre was \$20.24 harms were operated largely by owners (133,664) by owners 1,625 by managers and 48,729 by tenants). In 1912 (preliminary estimates), the principal crops were Indian corn 47,50000 bu (1,980,000 Å) wheat 8,596,000 bu (741,000 Å) oats 3,885,000 bu (175,000 Å) barley 250,000 bu (10,000 Å) rye 600,000 bu (48,000 Å) buckwheat 516,000 bu (24,000 Å) potatoes 8,265,000 bu (95,000 Å), has 889,000 tons (741,000 Å) cotton 24,000 bales (266 lbs per Å) and tobacco 112,200,000 lbs (187,000 Å). In 1909 (U.S. Census) the value of vegetables (excluding potatoes) was \$8,894,600 of small fruits \$671,843 (principally strawbernes), of ornhard fruits \$671,843 (principally strawbernes), of ornhard fruits \$6,582,582,582,592,600 milch cows 4,78,000 other neat cattle 781,000 sheep and 880,000 th any country. In 1912, the keyslature authorised counts, supervisors in appropriate \$1,000 th any country.

In 1912 the kgislature authorised county supervisors to appropriate \$1,000 in any county to promote agriculture, passed a new act for the government of the united agricultural board which controls experiment stations, made an appropriation for the examination and testing of dairy cattle to control tuberculosis, supplementing the Federal department of agriculture which tests herds supplying the District of Columbia appropria ed \$5,000 for investigating chestrict blight and passed a law regulating the sale of seed cotton and forbidding at at might. In Arlington is the main experiment farm of the Federal department and at Charlottesville an entomological laboratory. The state truck experiment station, at Norfolk in 1912 published investigations of straw berry potato, and tomato culture. The Massanutten area (19.3.2 acres. Page and Rockingham counties) the Natural Bridge area (24,000 acres. Rockbridge Bedford and Botetourt counties) and the White Top area (partly in Tennessee) were approved in 1912 by the National Forest Reservation Commission for purchase for the Eastern or Appalachian National Forests established by Act of March I. 1911 (Weeks Act)

Applacman National Potests established by Act of Marcal 1911 (veeks Act)

Mineral Products.—Total value 1911 \$13 609,364. The output of coal was fig60\$ 667
tons valued at \$6 254 804 (a little more than in 1910)

Another large product was pig from 308 789 tons valued at \$3 398 ...85 (not included in the above total) 30 o less than in 1910
The value of from ore (510 871 tons) was \$1 146 188 tanking the state 5th. The metals were valued as follows zinc \$25 992 lead, \$36 000 and gold, \$3 100 About one half the pyrite in the country comes from the state and more manganese than from any other state. Jurginia ranked 1st in milistones valued at \$17 635 Mineral waters from 43 springs including 12 resorts, were valued at \$298 701

Manufactures —In 1904-09 the number of establishments increased from 3,187 to 5,585 and that of persons engaged in manufacturing from 88 898 to 120,797 (wage-carners from 80,285 to 105 676), capital invested from \$147,989 000 to \$216,392,000 and the value of products from \$148,857 000 to \$219,794 000. More than one-thou the total was from the three largest industries lumber and timber products, \$35,855,000 (much more than twee as

1 See E. B XXVIII, 117 et seq

much as in 1800); tobacco manufactures \$25,385,000 and flour and grist mill products \$17,500,000. Other important products were, car construction and repairs by steam railway companies \$9,950 000 tanned curried and finished leather, \$8,267,000 fertilisers, \$8,035,000 (much more than twice the value in 1899) largely manufactured from fish and sauking the state 4th in this industry graded roasted cleaned and shelled peannts \$7,933 000, being four-fiths of the country's product ention goods \$7,490 000 (nearly thrice as much as in 1899) boots, and shoes \$5,800,000 foundry and machine shop products, \$5,727 000 iron and steel from blast lurnaces \$5,380,000.

Nearly four-mittles of the total product value came from the cities of 10 000 or over (excluding Newport News which could not be reported separately but which had in 1904 a product value of \$9,054,000). These cities were Richmond \$47,358,000. Norfolk \$10,341 000 Lynchburg \$10,188 000 (much more than three times the product in 1899). Petersburg \$8,895,500 Roanoke \$7,261,000 Danville, \$5,890,000 Alexandria \$4,419,500 (nearly thrice the output in 1899). Portsmouth \$1,528,000 and Staunton \$1,223,000.

Transportation — Railway mileage, January 1, 1912, 4,389,12. The Federal government in 1911 secured a depth of 18 ft in the James river between Hampton Roads and Richmond and completed the projected improvements (30 ft main channel and 30 ft, anchorage at Lam

and completed the projected improvements (30 ft main channel and 30 ft, anchorage at Lam bert's Point) in Norfolk harbour In 1912 the approaches to this harbour (11 m long 35 ft deep and 400 ft wide) were about two-thirds completed and the channel to Newport News (31/4 m long 35 ft. deep and 400 ft wide) was practically finished

Legislation — The regular session of the legislature met from January to to March 15, 1912 and submitted to the people for their approval at the general election in November these constitutional amendments one (adopted 60 176 votes to 16 202) permits the legislature to draw a special charter for any city over 50 000 upon the request of the city and to draw special charters of a form not prescribed by the consti tution but these charters do not go into effect unless adopted by a majority vote of the electors of the city in question others remove the prohibition against re-election of the city commissioner of revenue (adopted, 58 496 to 20 900) and of the city treas urer (adopted, 57 884 to 20 733) Amendments to the charters of Richmond and Norfolk reduced the numbers of wards and thus the size of the councils

The state was redistricted into ten congressional districts and the legislature passed a primary election law which makes statutes in regard to regular elections hold in regard to primary elections, candidates are required to pay a fee equal to 5% of one years salary in the office that they seek, to make a statement of expense within 20 days after primary election and to limit their expenses to 15c for every vote received by the highest party at the polls at the preceding election. In no instance is the expense to be more than 40% of the salary of the office The expenses of the primary are to be paid like other election expenses

A statute permits no peremptory instruction from a judge to a jury in any case and another forbids the hearing of cases in the supreme court of appeals on imperfect records and their decision on merely technical points and requires the court to simplify procedure in regard to bills of exceptions

Cities of 60 000 and cities within five miles thereof may purchase water works systems by condemnation. Following the Maryland lawfor Baltimore the legislature provided for segrega tion districts for white and colored persons in cities and towns adopting the act. Members of one race are not to move into a district designated for the other

The department of mines and the office of inspector of nines were created under the bureau of labour and industrial statistics the act contains provisions for safety. Factories employing five or more persons and any workplace employing two or more children under 18 or two or more women must be inspected. No female and no boy under 14 may work in a coal mine. The law of 1890 limiting the working hours of females and children under 14 to 1890 limiting the working hours of females and children under 14 may work in a coal mine. to 10 a day was extended to workshops and mercantile establishments but does not apply to the latter on Saturday or to packing fruit and vegetables between July and November or in country districts or in towns of 2 000 inhabitants or less. The law of 1902 making rail ways hable for injury to employees was amended and made more severe

The 3912 laws were passed for the government of the board of medical examiners for speedier reports of vital statistics and for the beence inspection and supervision of materiaty specime reports of vital statistics and for the ficence inspection and supervision of maternity hospitals and baby farms. A standard of purity for ice cream and for condensed milk was set and laws were passed regulating the sale of order and putting a new tax on the manufacture of inquers. Maintracture and sellers of intoxicating liquids are forbidden to use the name of likeness of any Confederate officer as the name, brand or trade mark of intoxicating liquior A measure to refer state-wide prohibition to the people was defeated in the senate by 3 to 2. The legislature voted to have the body of Henry ("Light Horse Harry") Lee (see E. B. xvi, 361b) brought to Virginia from Cumberland Island. Ga. if the family consented

Finance —Many small changes were made in the tax laws notably in regard to the taxa-tion of bank stockholders of inductal lands and forests of the rolling stock of railroad corporations which is to be assessed in the counties cities and towns and districts through which the railroad operates and not at the principal offices of the corporation; of railways and canals based on gross transportation receipts and property, of domestic corporations and of incomes in excess of \$2 000 a year New statutes were passed regulating accident and insurance policies policies against mury and disease, insurance companies, trust companies guarantee and fidelity companies etc. and state banks

The balance in the treasury on September 30 1911 was \$266 315 and on October 1 1912 \$135 038 During this fiscal year receipts were \$7 052 190 and dishursements \$7 183,467

Edu atton—In 1912 the legislature amended the law of 1910 in regard to instruction in agriculture domestic arts and science and manual training in public high schools and the use of agricultural high schools for demonstration work is allowed. The law for retirement of teachers on pay was amended especially by rules for temporary retirement

In 1910 of the population 10 years of age and over 15.2% was illiterate (22.9 m 1900) of whites 8.1% (11.1 in 1900) of negroes 30 (44.6 in 1900)

For the school year 1911-12 the school population was 616,168 the enrollment 409 397 the average daily attendance 263.291 length of the average school year 63 months revenue for schools and expenditure \$5.628.208

The University of Virginia received in 1912 a gift of \$125,000 from the Phelps Stokes

Fund for a permanent fellowship to study the negro Charitable and Penal Inst tut ons —The act of 1910 for the control of infant offenders by probationary officers was amended in 1912 and the state board of charities and corrections was required to inspect and supervise agencies or persons placing children in family homes throughout the state. The secretary of the same board was authorised to investigate the condition of the weak minded (not insane or epileptic) and the possibility of surgical aid for indigent crippled. The Virginia colony for the feeble minded was established on a farm of the Virginia state epileptic colony. A new code was adopted for pensions to Confederate veterans. A county levy of one mill for the Confederate pension fund was authorised and the legislature appropriated \$3 000 for Confederate veterans suffering from cancer and there fore not in the soldiers home and \$2 500 for needy Confederate women not on the pension roll. Firemen in cities of 100 000 inhabitants or more may be pensioned. Several laws were passed for working convicts on public roads and for the manufacture by convict labour of ground lime stone and oyster shells for use on public roads

History —The state administration and the legislature in 1911-12 were as usual, Democratic The legislature had only 5 Independents or Republicans in a senate of 40 and 10 in a house of 100. The Democratic primaries, September 7, 1011 re elected for 1913 19 Thomas Staples Martin (b 1847), United States senator since 1805 and affiliated with the conservative wing of the party, and chose for the term 1011-17 (laude Augustus Swanson (b. 1862, representative in Congress, 1803-1905, governor 1900-10), who had been appointed August 1, 1910, to fill out the unexpired term (1910-11) of John Warwick Daniel (1842-1910, representative in Congress, 1885-87 senator since 1887) who died just after his re election for 1911-17. In the Novem ber 1012 elections the state was easily carried by Woodrow Wilson (a native of Staunton) who received 90 332 votes to 23 288 for Taft, 21,777 for Roosevelt, 820 for Debs who had only 255 votes in 1908, and 709 for Chafin Of the 10 representatives in the 63rd Congress, o will be Democrats and 1 a Republican (from the 9th district)—the same division as in the 62nd Congress There was no gubernatorial election the term of William Hodges Mann (b 1843) is 1910-14 (February 1) There was no election to the state legislature in 1912

In the attempt to induce West Virginia to pay her part of the debt of Virginia as it was when West Virginia was separated from that state nothing was actually ac complished The US Supreme Court (220 US 1, March 6, 1911) recommended a division of the debt, 76,3% to Virginia, 23,5% to West Virginia, based on a master s estimate of the value of real and personal property (excluding slaves) in the two parts of the state at the time of the creation of West Virginia, and on October 30 1911 the court refused to determine questions left open in March On April 20, 1911 the Virgrana debt commission asked the governor of West Virginia to arrange a conference He had already (April 18) called an extra session but had not included in his call any mention of the debt, so that the extra session could not act and nothing could be done until the regular session of January 1913 When Virginia urged haste, the legislature of West Virginia stephed (May 1911) that the attorney-general having been elected before the case came up could not represent the actual wishes of the people of the state As pady the legislature can deal with the matter in West Virginia, there has been some

question about the authority of the debt commission to act for Virginia

On March 14, 1912 Judge Thornton L. Massie, W. M. Foster, the Carroll county attorney and the sheriff of the same county were shot to death in the Hillsville court house by members of the so-called Allen class of "Mountaineers" at the moment the judge was scatenering one of their members, whom they rescued Several of the outlaws were taplified and two sentenced to death on September 11 two, for second degree murder, were sentenced to 15 years' imprisonment (August 17 and November 22)

In 1912 the home of John Marshall in Richmond was acquired by the Association

for the Preservation of Varginia Antiquities

WASHINGTON 1

T Population (1910) I 141,990, an increase of 120 4% since 1900 (a higher rate than in any other state), 76% were native whites 24 7% whites of foreign parentage 21 1% foreign-born whites and 0.5% negroes. The average number to the sq m was 171 (78 in 1900), 53% of the total lived in places of 2,500 or more (408% in 1900) cities with 5 000 or more were. Seattle 237,194 (80 671 in 1900) Spokane 104 402 (36 848 m 1900), Tacoma 83 743 (37 714 in 1900) Everett, 24,814 (7 838 m 1900), Bellingham 24 98 (11,062 in 1900) Walla Walla 19,364 (10 049 in 1900) North Yakima, 14 082 (3 154 in 1900) Aberdeen 13 660 (3 747 in 1900) Vancouver 9 300 (3,126 in 1900), Hequiam 8,171 (2,608 in 1900), Centralia, 7 311 (1,600 in 1900) Olympia, 6 996 (3 863 in 1900)

Agriculture — The acreage in farms intreased from \$499 297 to 17 712 235 between 1900 and 1910 and in the same period the improved land increased from 3 465 960 to 6 373,311 the average farm acreage fell from 2560 to 208.4 and the value of farm property increased from \$144,040 547 to \$637 543,411 (\$517,421 998 land \$54 546 459 buildings \$16 709 844 implements \$43 855,170 domestic animals) The average value of farm land per acre was \$44.18 Of the land area 27 4 % was in farms in 1910 Farms were operated largely by owners (47,505 by owners, 964 by managers and 7 726 by tenants) In 1912 (preliminary estimates) the principal crops were. Indian corn, 846 000 bu. (31 000 A) wheat 53 728 000 bu. (2285 000 A) oats 13,689,000 bu. (284 000 A), barley 7 869 000 bu. (183 000 A) potatoes 11,356 000 bu. (68 000 A) and hay 1 707 000 tons (776 000 A). In 1909 (U.S. Census) the total value of vegetables except potatoes was \$2788 540 (in 1899 \$1 040 668) of flowers and plants and nursery products \$1 044 907 that of orchard fruits, \$4,274,124 (apples \$2,925 761 plums and pruses \$600 503 cherries \$278,547) and of small fruits \$941 415 (strawberries \$529 535). On January I 1912 there were on farms. 203,000 horses 14 000 mules 205 000 milds cow 186 000 other neat cattle \$260 000 sheep and 246 000 swine. Agraculture -The acreage in fairms increased from 8 499 297 to 17 712 235 between 1900

were on farms 203,000 horses 14 000 mules 205,000 mich cows 186,000 other neat cattle 286,000 sheep and 246,000 swine

The total acreage irrigated in 1909 was 334,378 (146,8% more than in 1899) 310,426 mere supplied from streams The total cost of improvements begun \$22,322,856. Of the projects (see E B xvvii 352d) of the Federal Reclamation Service the Okanogan (Okanogan county) completed October 1910, irrigated in 1911 6,349 acres (orchard fruits hay, etc.); and the Yakuna (Yakuna, Benton and Kittuss counties) in November 1912 was 10,3% completed in its storage unit, 93% in its Sunnyside unit and wholly completed in the Tieton unit and in 1911 irrigated 79,974 acres (forage, hops fruits and vegetables)

The prowing of flower burbs is an intreasing industry. In 1911 narcissus and tulip bulbs propagated hear Bellingham flowered (in Washington, D.C.) ten days earlier than bulbs of the same wareting magnetic from Holland. The Belgral department of agriculture is making studies of Puget Sound tele as a source of iodine and of potagh for commercial fertiliser.

Magnetic Products—Total value 1911, \$15,853,556. The two largest items were coal

See E B xxvii, 353 e seg

3 572,815 tons (\$8 174 170 about one-surh less than in 1910), and olsy products (\$2 Bao + 372) Stone was valued at \$1,679,872 (grants, \$1,645,851 ranking the state sertify Bostland ceneent at \$1,496,807; lime, at \$228,933 and sand and gravel at \$3,35,400. The metal output was valued at \$1,956 out (one-eleventh more than in 1940) inclinding gold, \$840,000 (the largest output in eight wears) mostly from the Republic district in Ferry county silver, 230,300 oz. (nearly one-fifth more than in 1940) from silveous sinciting ores in Ferry county and copper and lead ores in Stevens county copper 195 503 lbs (more than durie the 1940 output) mostly from the Danville district in Ferry county lead 424 tons (more than durie the 1940 output) mostly from the Oreille county smelter report 601 tons) and 200, 12 tons from the Meta line district Pend Oreille county

Nearly five-sixths of the metals came from Ferry county, and all the tungsten marketed.

Mineral waters bottled at 5 springs were worth \$14,654.

Manufactures—In 1904-09 the number of establishments increased from 2 751 to 3,674 and that of persons engaged in manufacturing from 51,459 to 80 118 (wage-carners from 45 199 to 69 120) capital invested from \$66 953,000 to \$222 261 000 (129,2 %) and value of products from \$128 822 000 to \$222 746 000 (71 4 ?) Among the most important maint factures were lumber and timber \$89 155 000 (nearly thrice the product value in 1899), an which Washington ranked first being first in the cut of Douglas fir (five-eighths of the country's total) and of cedar (more than one half the country's cut) and in the manufacture of shingles (three-fifths of the output of the United States) flour and grist-mill products \$17 853,000 slaughtering and meat packing \$15 654 000 canning and preserving \$9 595,000 including fish especially salmon and vegetables and fruits and butter cheese and condensed milk \$7 271 000—of which \$2 979 000 was the value of condensed milk in the manufacture of which Washington ranked 3rd. The product value was nearly equally divided between the 8 cities of 10 000 inhabitants or more and the rest of the state. These cities were Seattle \$50 569 200 (more than in 1899). Spokane \$18 880 000 (five times as much as in 1899). Expert, \$7 42,000 Bellingham \$4 600,000. Aberdeen \$3 590 000. Walla Walla \$2 317 000 flour being the main product and North Yakima \$2 175 000.

Transportation—Railway mileage January I 1912 4 891 72. Statutes provide for the building of county roads and for a permanent highway fund out of the proceeds of which

Transportation—Railway mileage January I 1912 4 891 72 Statutes provide for the building of country roads and for a permanent highway fund out of the proceeds of which permanent highway is are to be built on the resolution of the country commissioners after plans have been approved by the highway commissioner. The Federal government in 1912 was dredging the Columbia river and had practically completed the south jetty and begun the north jetty at the mouth of the river. In the S.W. part of the state work at Willapa harbour was about one third done and that at Gray 8 outer harbour practically finished. At Olympia with local co operation the deepening of the channel was nearly completed.

Legislation—The 12th session of the legislature was held from January 9 to March 0 1911. It ratified January 26 the proposed 16th amendment to the Federal Constitution providing for a Federal income tax. Three important constitutional amendments were adopted at the regular state election in 1912 one (170 110 to 43 095) providing for the initiative by a 10°0 petition and for referendum by a 6% petition on any state utory legislation one (11 3-1 to 46 372) for the recall of all elective public officers except judge of a court of record and one (70 040 to 47 9.8) striking out the provision that laws shall not go into effect until 90 days after the adjournment of a session

The legislature objected to Federal interference with fisheries in the state under the treaty of 1908 with Great Britain and it urged Congress to stop undesirable immigration

A law of 1911 provides that only the names of the two candidates who receive the highest votes on the separate non partisan primary ballot (provided for by a law of 1909) for candidates for the supreme court and the suprimor court shall appear on the general election ballot and that if one candidate gets an absolute majority of all votes cast, his shall be the only name to appear on the general election ballot

The capitol commission was reorganised and provision was made for the completion by December 1 1912 of a Temple of Justice which is to be part of a group of six or more state

buildings in Olympia Columbus Day was made a legal holiday

In a code of 75 pages the state railroad commission was changed to a public service commission to supervise common carriers gas electric water telephone and telegraph companies and wharfingers and warehouse men, to fix rates and service requirements for these public utilities and to enforce the law which forbids discrimination the code requires that the rate shall not be more for a short than for a long haul makes it necessary to report accidents and sets with a good deal of detail standards of safety. A minimum train crew law was passed A law declared constitutional by the state supreme court on September 27, 1911 (in Washington vs Clausen), made insurance for injured workmen compulsory in the extra hazardous employers may elect the system of state insurance. Suits for damages are permitted if the injury result from the deliberate intention of the employer. Special contracts are forbudden. To be compensated the loss of earning power must exceed 5%. The maximum compensation of the maximum compensation of the maximum compensation.

tion for death as \$4 000 to a widow or a dependent widower \$20 a month for each dependent child, not more than three in number \$5 a month, but \$10 a month if dependent children are left without either parent. For total disability the compensation is \$20 a month (\$25 to a managed employee with \$5 extra for each dependent child under F6, the maximum being \$35. generath) these sums are discounted to 30 if the musry resulted from the removal of safe-guards by the injured person or with his consent. The administration of the act rests with an industrial mearance department created by it but appeal may be made to the courts. Employers must pay to the state a percentage (not to be deducted from the workmen spay) of the annual payroll. This varies from 0.15 % in the manufacture of cordage jewelry etc. to 0.1% in powder works. Employers who elect insurance pay 90% of the minimum compulsory rate. The act carried an appropriation of \$150.000 for the fund. Women, except in canneries are not to work more than the state of the than 8 hours a day and the same law (held constitutional by the state supreme court March 26 1912) requires employers to provide seats for women. For the investigation of the bubonic plague in Asia \$5,000 was appropriated. Two laws were passed regulating the sale of milk pages in raise 45,000 was expressed and tream. It was made a gross much measure to allow in a concert saloon a dance house pool or billiard hall a place of assignation or a place where opium or any other narcouc drug is used any person under 21 or to give or sell to a minor intoxicating liquor or tobacco and any minor having either in his possession is guilty of a misdemeanour. On September 3, 1912 the state supreme court (State as Fesien) held that the law of 1909 for the sterilisation (by order of the sentencing court) of habitual criminals rapists, etc was not unconstitutional since it did not provide for a cruel and unusual punishment

Pend Oreille county (county-seat Newport) was created in 1911 from the eastern part of Stevens county A law was passed validating provisions for recall in charters of cities of the stevens county. A saw was passed valuating provisions for recall in carters of cities of the first class. Cities between 2 500 and 20,000 may adopt the commission form of government at a special election called by a petition of 25% of the qualified electors. The following cities have adopted the commission government. Centralia November 20 1911 in effect January 8 1912; Chehalis 1911 Everett April 16 1912 (1 986 to 1 928 votes) in effect July 1 1912 Hoquiam June 5 1911 in effect August 14 1911 North Yakima July 17 1911 in effect September 18 1911 Spokane December 1910, in effect March 14 1911 Tacoma Octo ber 16 1909 in force May 1910 and Walla Walla July 10 1911 in effect September 11 1911 Olympia rejected a commission charter on December 5 1911 by 807 to 734 votes and Van couver by 958 to 447 votes A constitutional amendment defeated in November 1912 by 83,138 to 67 717 would have removed the prohibition against county officers (except treas urer) holding office for more than two terms. The city of Everett voted in November 1912 to establish the single tax system. In Seattle a charter amendment for the single tax and one for the creation of a department of charities and corrections were defeated on March 5 1912 In Tacoma in 1912 an ordinance created a social service board to investigate places of public amusement and to study moral and social conditions of such places—especially

where young people are concerned Finance -All operating property of street railways is to be taxed as personal property although only the rolling stock of other railways is thus taxed. In the same way standing timber and fishing locations are to be assessed and taxed as personal property. The legisla timber and fishing locations are to be assessed and taxed as personal property

ture of 1911 passed an elaborate insurance code of 140 pages

In the treasury there was a balance of \$1 245 841 on October 1 1910 and \$2 446 247 on September 30, 1912 The receipts for the two years were \$16 911 514 and the expenditures \$15 711 108 The state debt in 1912 was bridge bonds \$125,000 normal school bonds \$206 024 and capitol building fund warrants outstanding, \$920 000 The levy for state purposes for 1912 was 534 mulls.

Education -In 1911 a new law was passed for the certification of teachers and the county superintendent was authorised to register no certificate unless he was satisfied of the good moral character of the teacher. In March 1911 the University of Washington received a gift of \$30 000 styled the Gatzert Foundation for a bureau of child welfare lege at Walla Walla in 1912 completed an endowment fund of \$100 000 Whitman Col

For the year ending June 30 1912 the school population was 283 141 total enrollment 224 410 average daily attendance 170 041 length of the average school year 155 days. The total revenue for schools was \$13 671 349 and expenditures \$11 156 404.

In 1910 of the population 10 years of age and over only 2% was illiterate (in 1900 3 1%) only Oregon of the Pacific states and only lowa and Nebraska elsewhere in the United States,

have a lower rate of illiteracy

Penal and Charstable Institutions - In counties of 30,000 or more a judge of the superior resus was characted in summons—in counties of 30,000 or more a judge of the superior court was, authorised in 1911 to hold a juvenile court session and keep a separate juvenile record. The state board of control is to fix a price for the jute sacks manufactured in the pententiary, which are to be sold directly to farms oyster men and wool growers in the state and only at the discretion of the board upon the open market. For pensions for veterans of the Indian wars of 1855 and 1856 \$3,000 was appropriated. The Northern Hospital for the Indian wars of 1855, Stagit county was opened on April 1 1911

A system of preferential voting was adopted On November 5, 1912, amendments to the charter changing from a commussion government were defeated by 15,225 to 9,448

Hastery -- In 1911-12 the state government was controlled by a strongly progres sive type of the Republican party, all the state officers being Republicans and the legislature having 18 Republicans in a senate of 42 and 84 Republicans in a lower house of 36 On January 17, 1911 the legislature chose a Progressive, Miles Poindexter (b. 1868, state superior court, 1904-08, representative in Congress, 1909-11), United States sena tor to succeed the Conservative Republican Samuel Henry Piles (b. 1838), who had served one term The term of the other senator from Washington, Wesley Livsey Jones (b 1363, Republican, representative in Congress, 1800-1909) does not expire until rors. In the state campaign in 1912 there were three tickets in the field publicans nominated Marion E Hay (b 1865) who as heutenant-governor had become governor March 29, 1909, upon the death of Samuel G Cosgrove Progressive though the state Republican party was, the National Progressives organised, and nominated for governor Robert T Hodges This break resulted in the election by a small plu rality (97 251 to 96 629 for Hay, 77 792 for Hodges) of the Democratic candidate, Ernest I ister although his campaign lasted only three weeks. The original nominee for governor on the Democratic ticket Superior Court Judge W W Black of Everett was held ineligible (October 10 State ex rel Reynolds is Howell) by the supreme court of the state because the constitution provides that supreme and superior court judges during their terms of office are ineligible for any but judicial offices. Republicans were elected to the other state offices and the state senate will be made up of 27 Re publicans, 9 Democrats and 6 Progressives, and the house of 50 Republicans, 18 Democrats, 28 Progressives and 1 Socialist (from Mason county)

In the national campaign there were only two county primaries and these were for Roosevelt, but the credentials of the delegates from King county were rejected by the state Republican committee. The national committee (June 15, 1912) and then the convention followed the ruling of the state committee, reversed the action of the state convention which had chosen Roosevelt delegates at large, and settled all contests in favour of Taft. Although it was supposed that putting a state third party ticket in the field would hart Roosevelt and that the strict affiliation pledge of the primary would turn many votes from Roosevelt to Taft, the state was carried by Roosevelt, who received 113 698 votes to 86 840 for Woodrow Wilson 70,445 for Taft 40 134 for Debs (14 17, in 1908) and 9 810 for Chafin. Three Republicans and (at large) two Progressives were elected representatives in Congress. The former delegation was three and the state was not re districted.

The use of the recall in Seattle 1 and Tacoma was the most notable incident in municipal history during 1911 12 In Seattle Mayor Hiram C Gill was recalled (charged among other things with connivance at vice) on kebruary ii ioii by 31,010 votes for George W Dilling (who thus became mayor) to 25,705 for Gill, whose supporters had endeavoured to restrain the city by injunction from holding the recall election and had secured an order restraining the city comptroller from paying expenses of this election, but this order was over ruled. Petitions for the recall of Dilling (because he had not dismissed the city jailer for cruelty) and of three councilmen were circulated, and the petitions for the recall of the councilmen were filed but were held insufficient, as containing names numbering only 25% of the vote for the individual councilmen instead of 25% of the entire votes for all candidates for the office" On December 31, 1911 two of these petitions were filed with additional names, but the corporation counsel the city council and the courts held that they could not be refiled after an interval of ten days On March 6 1912 George Fletcher Cotterill (b 1865 civil engineer, landscape gardener, supporter of municipal ownership, assistant city engineer in 189.-1900, and Democratic candidate for mayor in 1900) was elected mayor by 32,085 votes to 31,281 for Gill In November a petition was filed for the recall of Cotterill for general mefficiency

In Tacoma Mayor A. V Fawcett secured in 1910 an "anti treat" ordinance, making *See F W Catlett (secretary to the mayor of Seattle) The Working of the Recalf in Seattle in September 1912 Annals of the American Academy of Political and Social Science

It a misdemeanour for a bartender to sell to one person liquor to be drunk on the prem This was sustained March 21, 1911 at a referendum election (and by the state supreme court), but meanwhile the city administration; attacked for permittime a vice district, contrary to state law, thad made itself unpopular by enforcing a law against prize-fights. The reform element and the sporting element both favoured the recall On April 4, a regali election was held, but A. H. Barth, Socialist, received so many votes that no candidate had a majority. At a second election, April 18 William V Seymour was elected by 11,222 votes to 10,489 for Fawcett an election was held for the recall of four commissioners another election on May 16 was necessary for a choice and then two councilmen were recalled and two retained One of those recalled was re-elected at the next general election In January 1912 Fawcett's friends attempted to recall Seymour, unsuccessfully

WEST VIRGINIA1

Population (1910) I 221,119, an increase of 27 4% since 1900 Foreign born whites constituted 23% of the total in 1900 and 47% in 19to, negroes 45% in 1900, and 53% in 1910, and whites of native parentage 88% in 1900 and 853 in 1910. In density the state ranked 15th (50 8 per sq m) The rural population decreased from 78 5% in 1900 to 70 5% in 1910 The urban increased from 13 1% to 18 7% there were 228,242 inhabitants in 25 municipalities each having more than 2 500 inhabitants (125 465 in 16 such places in 1900) There were 12 places of 5 000 or more, as follows Wheeling 41,641 Huntington 31 161 (11,923 in 1906) Charleston 22 996 Parkers burg, 17 842 Blaefield 11 188 (4 644 in 1900), Martinsburg 10 698 Fairmont 9 711 Clarksburg 9 201, Morgantown 9,150 (1895 in 1900) Moundsville 8 918, Grafton 7,563 and Elkins, 5,260 (2,016 in 1900)

Agriculture -The acreage in farms decreased from 10 654 513 to 10 026 442 between 1900 Agriculture —The acreage in farms decreased from 10 654 513 to 10 026 442 between 1900 and 1910 and the improved land in farms increased from 5 498 981 to 5 521 757 the average farm acreage fell from 114.7 to 103 7, and the value of farm property increased from \$203 907 349 to \$314 738 540 (\$207,075,759 land \$57,315 195 buildings \$7 011 513 implements \$43 336 073 domestic animals). Of the land area 65 2 ° was in farms in 1910. The average value of farm land per acre was \$20 65. Farms were operated largely by owners (75 978 by owners 872 by managers and 19 835 by tenants). In 1912 (preliminary estimates) the principal crops were. Indian corn. 24 505 000 bu (725 000 A.) wheat 3 378 000 bu (233 000 A.) oats 3 108 000 bu (111 000 A.) rye 221 000 bu (17 000 A.) buckwheat 888 000 bu. (37 000 A.) potatoes 5 264 000 bu (47 000 A.) hav 1 028 000 tons (745 000 A.), and tobac on 12,008 000 lbs. (15 800 A.) In 1900 (U.S. Census) the value of vegetables (excluding potatoes) was \$4 519,894 of small fruits \$191 002 of orchard fruits \$3,040 192 (apples, \$2 461 074 cherries \$111 043). On January I 1912 there were on farms. 182 000 horses 12 000 mules, 230,000 milch cows. 331 000 other neat cattle. 838 000 sheep and 363 000 swine.

In 1011 the legislature created the office of state commissioner of agriculture and a state department of agriculture, the commissioner was first elected in 1912 for a four year term The general appropriation act of 1911 carried an appropriation of \$5 000 a year for the inspec-tion of dairies \$7,500 a year for the prevention of San Jose scale and \$4 000 a year for the promotion of horticulture and truck gardening

promotion of horticulture and truck gardening

Mineral Products — Total value 1911 \$101 948 248

The state ranked 2nd in quantity of coal 59.831 580 tons, and 3rd in value \$33 670 515—these totals being less than in 1910. In matural gas it ranked 1st, \$28,451 907 (one fifth more than in 1910, more than seven times as much as in 1901) about one-third the total for the United States. In petroleum the state ranked 4th, with 9 795 464 bbls (\$12 767 293 less than in 1910). The value of clay products was \$133,3420 of which \$2,880,205 was the value of pottery products ranking the state 3rd. Stone was valued at \$1 106 012 lime at \$536,660 sand and gravel at \$532 388, of which \$313,758 was the value of glass sand. The value of pig 1901 was not reported separately and is not included in the total given above which however includes the value of iron ere

Manufactures — In 1904—09 the number of establishments increased from 2 109 to 2 556 and that of persons engaged in manufacturing from 48 850 (43 756 wage-earmers) to 77 463 (63,893 wage earmers) capital suvested from \$86,821,000 to \$150,923,000 (73 8%) and the See E. B taxvil 860 st see.

value of products from \$99 041,000 to \$161,050,000 (63 5 %). The largest manufactures in 1909 were lumber and timber \$28,758 000 (largely yellow poplar and hemiock) from and steel works and rolling-mails \$22,435 000 leather tanned curried and finished, \$12,451 000 glass \$7,779,000; flour and grist mill products, \$7 696 000 coke, \$7,563 000 ranking the state and an output and 3rd in value and cars built and repaired by steam railway rempanted \$6,733,000 The principal manufacturing centres were. Wheeling, \$27,077,000 Huntington \$6,511 000 Parkersburg \$5,498 500 Charleston \$3,253 000; Martinsburg, \$2,515,500 and Bluefield \$1,465,000

Transportation—Railway mileage January 1,4912 \$648 41 The Federal government is improving the Luttle Kanawha river

is improving the Little Kanawha river

Legislation — The regular session of the legislature was held from January II to February 24, and an extraordinary session May 16-30, 1911 The latter was called to pass a primary election law and to amend the corrupt practices act, especially so as to make it applicable to candidates for the United States Senate, but it passed nothing but appropriations for the expenses of the special session. The regular session submitted to the people who approved it (164 945 to 72 603 votes), at the November general election in 1912 a constitutional amendment for state wide prohibition (after July 1 1914) of the sale and manufacture of alcoholic liquors as beverages. The legislature urged the state's congressmen to vote for an amendment to the Federal Constitution providing for the direct choice of United States senators The 12th of October (Columbus Dav) was made a legal holiday The office of state commissioner of public roads was abolished and the law of 1908 for the registration of voters was amended, especially in regard to the relation of county courts to registration

The legislature appointed a commission to investigate employers liability and workmen s compensation and it submitted part one of an elaborate report late in 1911. A child labour law permits children under 16 to be employed only if an employment certificate is filed children under 14 to be employed during school hours only on permission of the state com missioner of labour or the county superintendent of schools and not to be employed at all in any factory mill workshop or manufacturing establishment

A commission charter much like the Des Moines plan was adopted for Parkersburg

March 21 1911 by 208 votes and the Charleston charter was amended

The law of 1909 creating a state fire marshal s department was amended by stricter rules for the investigation and report of fires. The sale of cocaine was forbidden except on a physician's prescription. The punishment for the white slave traffic was made imprison. ment from six months to one year and a fine of \$100 to \$500 and for serond conviction imprisonment in the penutentiary from one year to three years. It is no defence that part of the offences were committed outside the state and marriage is no bar to the testimony of an injured woman

Finance -- In 1911 the legislature required the assessment at their true value, of stock in banks trust companies etc and increased most licence taxes especially those on theatrical and similar performances accountants was created the same amount for 1912 The balance on hand in the treasury on October 1 1912 \$1 616 515 The receipts during the two fiscal years were

Fig. 870 901 and the expenditures \$10 669 723

Education—The state superintendent of schools called the work of the legislature of 1911 an educational renaissance

The qualifications for coun y superintendent of schools were increased and the salary was raised \$200 a year. A new law was passed in regard to teachers' examination and one for the formation of district high schools on the favourable vote of electors in any district and for the classification of high schools-class one for a four year course to receive state aid of \$800 class two with three years course to receive state aid of \$600 and class three with a two years course to receive \$400 a year—the only limitation being that not more than \$40 000 is to be spent in this way in any one year Medical inspection in public schools was made mandatory in independent school districts other districts were permitted to appoint medical inspectors. The legislature established new county high schools in Clay county and in Nicholas county

On the 1st of October 1911 Thomas Edward Hodges (b. 1858) succeeded Daniel Board man Purinton as president of West Virginia University in which from 1896 to 1909 he had

been head of the department of physics

For the school year 1911-12 the school population was 382 938 the enrollment is public schools 284 281 the average daily attendance 194,620; and the length of the average school year 6 8 months. The total revenue was about \$5,000 000 and the expenditures \$4,958,000. The percentage of illiteracy in 1910 of the whole population 10 years of age and over was \$3 (214 in 1900) among the whites the percentage was 76 (103 in 1900) among the negroes 20 3 (32 3 in 1900)

Penal and Charable Institutions —The legislature of 1911 established a state tuberculosis same riturn and appropriated \$15,000 for its inamenance and \$10,000 for its equipment it is to be at Terra the Peston county. The West Virginia coloured orphans home near Hierargton was made a state matricism taking over the buildings of the normal industrial school for coloured orphans. The West Virginia children is home at Elkims was opened at 1911. A law has been passed providing that police matrons must be appointed in cities of 5,000 or more

History — The legislature in 1911 was Democratic (senate 15 Democrats and 15 Republicans, house, 63 Democrats and 23 Republicans) but all state officers were Republicans. William Ellsworth Glasscock (b 1862), Republican elected governor in 1908 for the term 1909—13, immediately after the death of Stephen Benton Elkins, appointed his son Davis Elkins ad interior to the United States Senate. The Democratic caucus of the legislature chose, January 18, Clarence Wayland Watson (b 1864) for this unexpired term (1911–13), and William Edwin Chilton (b 1858, secretary of state 1893—97) to succeed Nathan Bay Scott (b 1842, Republican, senator 1899—1911), but the Republican members of the state senate left the state to block organisation of the legislature, so that Watson and Chilton were not chosen until the end of the month.

Governor Glasscock was one of the seven governors who called Roosevelt to lead the Republican party, and Roosevelt was successful in the primaries, and the delegates at large were instructed for him. But there was no local split in the Republican party Progressives nominated the Republican candidate for governor Dr H D Hatheld, and the six candidates for Congress four of whom were elected in the 62nd Congress there were 4 Democrats and 1 Republican from the state Hatfield was elected gover nor, receiving 127 042 votes to 110 173 for Thompson (Democrat) and 15 248 for Hilton (Socialist) The state legislature is Republican (senate tie house 53 Republicans and 33 Democrats) and early in 1013 chose Judge Nathan Goff (b 1843) to succeed C W Watson as United States senator Woodrow Wilson carned the state, receiving about 113,046 votes to 56 667 for Taft 78 819 for Roosevelt and 15,336 for Debs, whose vote in 1908 was 3 679. In the state campaign interest was centred largely on the amendment for state-wide prohibition which was carried on election day bells in most Protestant churches were rung all day long to remind citizens to vote, and the women of the state worked hard for the amendment The state Federation of Labor opposed it as destroying a great industry

There was a long continued strike among the coal miners of the Kanawha region in 1912. At Peyton a deputy was shot, troops being ordered out on July 23 and martial law proclaimed on September 30. Governor Glasscock's offer to arbitrate was refused by the strikers September 26. Along Cabin Creek deputy sheriffs evicted striking miners, beginning October 8, and although the governor issued a proclamation October 14 restoring to civil authority parts of Fayette, Raleigh and Kanawha counties increased disorder made it necessary for him to declare martial law again (November 16) in the Cabin Creek and Paint Creek regions of the Kanawha coal field. Late in the year suit was brought for \$750,000 damages against the United Mine Workers for interference with business and for injuries to property

A negro was lynched at Bluefields, September 5, 1012, for assault on a woman

Agriculture -In 1910 59 6% of the state s area was in farms 11 907 606 out of 21 060 066 acres were improved (59 / more than in 1900) The average number of acres in each farm was 119 the average value per farm \$7 978 The total value of farm property increased in 1900–10 from \$811 712 000 to \$1 413 119 000 (land, \$911 938 000 buildings, \$289,694,000 1900—10 from \$811,712 000 to \$1413 119 000 (land, \$911 938 000 buildings, \$289,694,000 implements and machinery \$52,957 000 and domestic animals \$158 529 000). Of the farms 152 473 were operated by owners and managers and 24 654 by tenants. In 1912 (preliminary estimates) the crops were hay 3 600 000 tons (2 250 000 A.) oats 84 746 000 bu (2 272 000 A.) Indian corn 58 262 000 bu. (1 632 000 A.) barley 24 843 000 bu (845 000 A.) potatoes 34 920 000 bu (291 000 A.) rye 6 240,000 bu (341 000 A.) wheat 3 564 000 bu (188 000 A.) tobact o 54 438 000 lbs (42 200 A.) buckwheat 280 000 bu (17 000 A.) sugar beets 256 124 tons (23 241 A.) and flaxseed 125 000 bu (10 000 A.) In 1909 (U.S. Census) the value of vegetables other than potatoes was \$4 593 865, flowers etc. \$592 839 nursery products \$301 027 small fruits \$765 437 (strawberries \$434 971 cranberries \$127,212 raspberries \$114 578) orchard fruits, \$2 087 202 (apples, \$1 896 681) grapes \$25 537 and nuts \$18 196 On January 1 1912 there were on farms 652 000 horses 1 504 000 milch cows 1 146 000 other neat cattle \$47 000 sheep 2 051 000 swine. In 1911 a state conservation commission was created and the agricultural college was authorised to establish three demonstration stations. was authorised to establish three demonstration stations

Mineral Products — Total value 1911 \$12 451,436 including 559 763 tons of iron ere valued at \$1 386 616 but not including 245 152 tons of pig iron (\$3 803 049). The output of zinc was one-seventh larger than in 1910 being 31 800 tons, valued at \$3 626 226 and that of lead at \$357 030. Stone was valued at \$2 375 102 (grainte \$1 382 309 himestone \$848 363) sand and gravel at \$731 692 hime at \$961 558 and clay products at \$1 158 139 almost entirely brick and tile. Mineral waters mostly table water bottled at 31 springs including 4 resorts were valued at \$955 988. Minor items were metallic paint asbestos graphite etc. Manufactures—In 1005 988.

Manufactures —In 1904-09 the number of establishments increased from 8 558 to 9 721 and that of persons engaged in manufacturing from 173 572 to 213 426 (wage-earners from 151 391 to 182 583) capital invested from \$412 647 000 to \$605 657 000 (46 8) and the value of products from \$411 140 000 to \$590 306 000 (43 6 ?) The state ranked 8th in value of manufactures. In 1909 the principal manufactures were lumber and timber value of manufactures. In 1909 the principal manufactures were lumber and timber \$57 969 000 'foundry and machine shop products \$54 124 000 butter cheese and condensed milk \$53 843 000 leather \$44 668 000 malt liquors, \$22 126 000 ranking the state 4th in this industry flour and grist mill products, \$31 667 000 slaughtering and meat packing \$27.217 000 paper and wood pulp \$25 962 000 furniture \$18,656 000 cars construction and repairs by steam railways, \$14,332 000 boots and shoes \$13 602 000 automobiles, \$11 440 000 (more than six times as much as in 1904) agricultural implements, \$11,411,000, and iron and steel from steel works and rolling mills, \$10 733,000

The larger manufacturing cities were Milwaukee \$208 324 000 10th manufacturing city in the United States 3rd is malt liquors (\$19 643,000) and 1st in leather (\$27 484,000) Racine \$24 673 000 principally agricultural implements automobiles and carriages and wagons Kenosha \$23 182 000 mainly leather furniture and automobiles Oshkosh \$14.

739 250, chiefly lumber and tumber and matches La Crosse \$14 103,000, largely from flour mills and breweries and Sheboygan \$11 299 000 mainly furniture and leather

Transportation — Railway mileage January I 1912 7 859 15 (20157 m more than a year before the largest increase in any state — due to the building of 130 m of cut off 'by the Chicago & Northwestern) The Federal government in July 1911 with the local authorities began the improvement of Oconto harbour

Legislation — The legislature met in regular session from February 17 to July 1011 and in special session on April 30, 1912 It ratified (May 26, 1911) the proposed 16th

See E B xxviii 740 et seq

amendment to the Federal Constitution providing for a Federal income tax, and asked Congress to call a constitutional convention to submit an amendment providing for smedifiment by mutistive, and one providing for the mitiative, referendum and the recall; also to give Alaska a recognised Territorial government. In November 1912 the people approved amendments to the state constitution making so years instead of 20 the limit for paying off municipal indebtedness if the indebtedness is for land bought by cities or counties having a population of 150,000 or more (46,360 votes to 34,975), and giving the state, or any city, power to acquire land for public purposes and sell land thus acquired, if it is not needed with restrictions for its future use (48,424 to 33,031 votes) A measure giving the suffrage to women and taking it away from unnaturalised aliens (who have merely declared their intention to become citizens) after December 1, 1912 was defeated by 227 024 votes to 135,45, probably because of the opposition of the conservative Scandinavian and German elements Under an amendment ratified in 1010 the state was redistricted into congressional and legislative districts in 1011

A law of 1911 provides for second choice nominations 1. No candidate for a judicial or or the principles represented by the candidate to be used in the nomination of a party or the principles represented by the candidate to be used in the nomination or election of a candidate for such an office. The method of rotation of names on ballots was specified. There is to be an alphabetical arrangement in the most populous district in ballots for the second district in population the first name alphabetically is to be moved to the last place on the last place of the last place of the second district management in the most populous district in page design the scale in the first name alphabetically is to be moved to the last place on the first name alphabetically is to be moved to the last place on the property of the scale in th the list and this process is to be repeated for the ballots for each district going down the scale of population. A law provides for an official ballot for the election of candidates for national conventions and another provides that ballots for presidential elections are to be printed on light blue paper, for referendum votes on pink paper and for state mumicipal and county offices on white paper—the arrangement being by party columns with circles so that a straight ticket may be voted—and that sample ballots be printed on paper different in colour from any official ballots Each county may vote to adopt or discontinue the coupon ballot. The law of 1907 for the direct choice of delegates to national party conventions was supplemented by a provision for a presidential preference primary

A new corrupt practices act was passed in 1911 and amended in 1912 Disbursements of candidates are strictly limited to certain classes of expenditures and also in amount—e g
\$7 500 for a candidate for the United States Senate and \$150 for state assembly men. The sectetary of state is to send to all voters publicity pamphlets in which candidates for different offices may secure space at specified rates. A state board of public affairs (whose members serve without salary) was created in 1911 it is authorised to supervise and inspect public bodies to carry on investigations to make estimates and recommendations for public ex penditures and if necessary to employ experts. In 1911-12 the board investigated the state school system especially in rural districts the auditing of accounts of public institu tions the methods and amounts of state appropriations—especially the advisability of "continuing appropriations—immigration municipal markets the marketing of agricul tural products and the efficiency of state departments. In 1912 it published a report on agricultural co-operation. A new code for public printing was adopted in 1911.

First class cities were authorised to have art commissions and boards of police and fire commissioners and to employ a city forester. A new code was passed for the government of cities of the second, third and fourth classes under the commission plan. The term of the of cities of the second, third and fourth classes under the commission plan The term of the mayor is six years and no one holding a licence for the sale of intoxicating liquors is eligible The act provides for initiative, referendum and recall of officers. Other acts provide that any municipal officer whether under the commission form of government or not may be re moved by recall after six months in office and give the people the right of initiative and referendum on acts of municipal councils and boards of country supervisors. By a resolution of the common council or by a petition of 10% of the voters of the city an election may be called for an amendment to a city charter and the law provides also for a charter convention composed of fifteen delegates elected at large which may draw up a charter subject to the ratification of the people. This home rule act was held unconstitutional May 14 1912 by the state supreme court. Cities of the first class are authorised to build public lavatories and to regulate and prohibit emission of dense smoke in city hmits or one mile therefrom

planned the remodelling of the capital city

This law resembles the law in Tasmania in that it gives a greater value to first than to second choice if no candidate receives a majority of the first choice votes the candidate who has the least number of first choice votes is to be dropped and the second choice votes are then to be added to the first choice for all other candidates this process being repeated until some one tandidate has a majority of votes

"I but Noten a Boston tandscape architect in Modeson' a Model City (Boston 1911)

Wherever there is urban postal free delivery express companies units deliver free any intra state shipments by express. Railway corporations are liable for damages by fire from locomotive engines and engines operated in forests and bush laints must have spark ari resters. The railway commission may order any railway to adopt block signals. It is unlawful for a physician to prescribe inforcating fiquor onless the sincessary for the health of a patient or to prescribe more than is necessary under penalty of a fine of \$10 to \$100 to \$100 to six months imprisonment and for a second offence within one year the revocation of the doctor's became a Liquor must not be sold or given away at public attribus, public drinking of intoxicating fiquors on railway trains is forbidden and no indoxicated person is to be allowed on a railway coach. In liquorsale prosecutions the possession of a Federal licence is prima facie evidence of guilt. Stricter laws were passed for the sanitation of bake shops against the colouring and adulteration of canned goods and for the protection of \$500 to \$100 to shops against the colouring and adulteration of canned goods and for the protection of food products displayed for sale dry goods groceries clothing and hardware stores are not to be opened on Sunday. The manufacture and sale of certain fireworks and of fire crackers more than three inches long and one half inch in chameter were forbidden. Pandering was made punishable by imprisonment for from 2 to 20 years the act permits the testimony of an injured woman even though she be married and makes it no defence that a part of the acts

forbidden by the law were committed outside the state

A law in effect on September 1 1911 (held constitutional by the state supreme court on November 14 1911) provides for compensation for accidents to workmen but is not compul sory except for the state and municipalities at applies to all industries but not to casual em The employer's choice of compensation must be made in writing The employee's presumed after the employer has elected compensation. The defence of assumed ployees The employer schoice of confipensation must be made in writing. The employee is choice is presumed after the employer has elected compensation. The defence of assumed risk and of fellow service (if there are four or more employees) is abrogated. Surts for damages are not permitted if the employer chooses compensation. There is no reduction in hability because of special contract. Disability must last more than one week to be compensated? For the death of an employee the compensation is \$100 if no dependents are left otherwise four years earnings—not less than \$1 500 nor more than \$3 000—and this is the limit for compensation for total disabilities 65 of the average earnings if a nurse is required but 100% after 90 days for partial disability the compensation is 65 of the wage decrease. Medical and surgical and gare to be and for if they last on days or less. Disputes are to be Medical and surgical and are to be paid for if they last 90 days or less. Disputes are to be settled by an industrial commission which is empowered besides to establish free employment agencies and to enforce other labour laws. Employers are required to install and main tain safety devices and the exercise of ordinary care is not a sufficient compliance with the law The law for the safe guarding of machinery was made explicit A law was passed against false representation in the employment of labour especially as to the existence of strikes or labour disputes. The industrial commission is to investigate contracts of employ ment Contracts for public work must stipulate an eight hour day except in "extraordinary emergency which is limited to protection of life or property. Illiterates under 14 are not to be employed children between 14 and 16 if employed where there is an evening or continuation school must attend five hours a week during six months of each year and their employers must allow a reduction in hours if school and working hours coincide The age limit for selling newspapers was raised from 10 to 12 for boys and from 16 to 18 for girls for other street trades from 12 to 14 for hos and from 16 to 18 for girls. No boy under 16 may work at a street trade without a permit issued by the state factory inspector showing school attendance Boys under 14 may not sell newspapers after 7 30 PM in summer or 6 30 PM in winter—formerly 10 PM all the year Employment in bakeries, restaurants and messen ger service was added to trades at which children under 16 should not be employed required. ger service was added to trades at which children under 16 should not be employed required, suffered or permitted to work —the words in quotation being additional to the previous law—without a written permit. To the list of dangerous occupations in which children under 18 may not be employed were added mining and quarrying. Children under 16 may not work more than 8 hours a day or 48 hours a week (formerly 10 hours a day and 55 a week), nor may they do night work after 6 P.M.—formerly 9 P.M. Women may not work in manu factories mechanical or mercantile establishments laundries or restaurants confectionery stores taleshors or telegraph officer with a receiver or respectation. stores, telephone or telegraph offices with express or transportation companies more than 10 hours day or 55 a week in the day time nor more than 8 a day or 48 a week between 8 P.M and 6 A.M. Wight work for one day in a week makes the whole night work under the w All physicians must report to the state board of health cases of occupational diseases—including lead poisoning and calsson disease but not mentioning anthrax, as do similar laws in other states.

Finance - The joint commission of the legislature on finance was authorised to employ trained experts in accounting and in making public financial statements. An important income tax law was passed in 1911 and was declared constitutional by the state supreme court on January 9, 1912. It allows for certain deductions from the gross income such as losses sustained and not insured taxes on the source of income, interest on bonds exempted from taxation and salaries and pensions from the United States. Corporations are taxed on their incomes by a scale according to the percentage that the income bears to the assessed

If it lasts more than four weeks the compensation must include the first week.

valuation. If the ancome is less than 1,% of the assessed value, the ancome tax is 14% and if the ancome is 12% of the assessed value the tax is 6 /5. The income tax on individuals is 1.5% on the first \$1 000 of income, and an additional 14% on every extra thousand up to the fifth thousand for which the tax is to be 2°, and an additional 12% on each extra thousand up to \$12,000 so that the tax is \$12,000 or more is 5%. Exempt from the tax are \$800 in come for an individual \$1,200 for husband and wife and \$200 additional for each child under

18 or each dependent person
On June 30 1910 the balance on hand in the general fund was \$1 559 988 on June 30

1912 \$3 161,512 The receipts for the two years were \$27 868,781 and the disbursements \$26,267 256 The state debt, on June 30 1912, was \$2 251 000

Education,—In 1911 a state board of industrial education was created composed of six members, three being employers and three skilled employees. The state is to appropriate not more than \$10,000 to any industrial school and is to give this grant to not more than 30 schools. The board is to have charge of this fund and is to act as a trustee of the Stout Institute in Menomonic (opened 1908). No state and is to be given to any school for vocational teaching unless teachers in these subjects receive at least \$60 a month. School boards may lavy \$\frac{1}{16}\$ of a mill as a tax for trade schools. The law for teachers pensions in cities of the first class was slightly amended so that if teachers do not elect to come under the act at the beginning of their service they may do so later on by paying what they would have paid with compound interest and a law for retirement of teachers elsewhere than in first class cities created an insurance and settlement fund to be managed by a board of five. The fund is to be created by assessments for 25 years, 1% a year (not more than \$15) for the first 10 years and 2% a year (not more than \$30) for the next 15 years and all who become teachers after September I 1911 agree thereby to the assessment. Other teachers may elect to come under the provisions of the act before September I 1912. From the 7 militax for educational purposes the state treasurer is to set aside too for every person of school age for the retirement fund. Any teacher leaving the service may have half of the amount paid in Teachers retired are to receive per annum \$12 50 for each year of service but in no case more than \$450

On the petition of one-half of the voters of the school district a school house may be used

for meetings of non-partisan non-sectaman and non-exclusive associations

The tax for the university was \{\frac{1}{2}} of a mill and for the normal schools \{\frac{1}{2}} of a mill A high school in connection with the University was opened in the autumn of 1912 In October 1912 the General Education Board gave \{\frac{1}{2}} 40 000 to Lawrence College, Appleton.

For the year ending June 30 1912 the school population was 775,472 the total enroll ment 435,611 and the average length of school year 170 days. The total revenue for

schools was \$13.041 600 and the expenditures \$12.475 349
In 1910 of the population 10 years and over 3.2% was illiterate (4.7 in 1900)
Charitable and Penal Institutions —County boards of supervisors with the consent of the state board of control may maintain tuberculosis hospitals and in county asylums for the usane a hospital or pavilion may be built for the tuberculous insane A uniform system of accounting is to be introduced in asylums for the chronic insane On the grounds of the state prison there is to be erected a hospital for the criminal insane. The law provides for a probation officer is any county having 250 000 inhabitants or more. In 1911 \$400 000 in two annual instalments was appropriated for the revolving fund of the binder twine plant at the state prison at Waupun. The new plant went into operation in November 1912 with an equipment sufficient to employ 100 convicts and produce 15 000 lbs of binder twine a day

History -In 1911-12 the state government was Republican of the progressive type The senate contained 27 Republicans in a membership of 33 and the assembly 50 in a membership of 100, there were 2 Social Democrats in the senate and 12 in the assembly The legislature re-elected (January 24, 1911) to the United States Senate Robert Marion La Follette (b 1855) a progressive Republican who had been a repre sentative in Congress in 1885-91 and as governor in 1901-6 had worked for direct election of senators, state control of railway rates and taxation of railway property He was a candidate in 1912 for the Republican nomination for the presidency and sharply enticized the policies of both Roosevelt and Taft His physical breakdown on February 3 induced many of his followers to support Roosevelt, but he re entered the campaign on March 13 and six days later carried the state wide primary in North Datota (qv) In the Wisconsin primaries (April) he defeated Tait by 133 354 to 47.514. Roosevelt 628 Twenty-three delogates from the state were instructed for him, and in the national convention he received 41 votes. In the campaign he spoke against Roosevelt in New Jersey and elsewhere The other senator from Wisconsin is Isaac Stephenson (b. 1829) a wealthy lumberman who represented the state in

*Governor McGovern was the Progressive candidate for temporary chairman of the Republican convention and received 502 water to 558 for Sevator Ethu Root of New York

Congress in 1883-89 and was chosen in 1907 for the unexpired term of John Coil Spoomer. (b. 1843 Republican senator, 1885-91 and 1897-1907), who resigned Stephenson was re-elected in 1900 for the term ending 1915, but it was charged that his election was secured by corruption. La Follette a followers were hostile to Stephenson, although the latter had been a patron of La Follette in his early career, and the state legislature of 1911 urged the investigation of the charges against him. The United States Senate ordered an investigation on August 12, 1911, and on February 10, 1912 its special committee exonerated him although it found that he had spent \$100,000 for his election. The Senate adopted this report by a vote of 40 to 34 March 27, 1912

In the state campaign there was no separate Progressive ticket, but the Progressives supported Francis Edward McGovern (b 1866), governor in 1911-13, renominated at the Republican primaries (September 3) and re-elected His Democratic opponent was Judge. John C Karel, chosen in the primaries (48,238 to 36,975) over Adolph J. Schmitz, who had Bryan's backing and favoured the state income fax law which Karel disapproved Karel received 167,316 votes, McGovern, 179,360 The next legislature will be Republican by a small margin in each house. There will be one Socialist in the senate (elected in 1970) and 6 Socialists in the lower house, elected in 1972 row Wilson carried the state, receiving 164 228 votes to 130 695 for Taft, 62 460 for Roosevelt, 33,481 for Debs (who had 28 170 in 1908) and 8,526 for Chafin. The com paratively small vote for Roosevelt was due in part to La Follette's attitude toward him and in part to the conservatism of the Scandinavian voters of the state Socialist vote though absolutely large was comparatively small, and Victor L Berger (b 1860) representative in 1911-13 from the 5th district (and the first Socialist to sit in the Federal House of Representatives) was not re elected. There was a complete re districting of the state although the Congressional apportionment was unchanged, apparently in an effort to confine the Socialist strength to one district, and Republicans and Democrats united in a non partisan nomination against the Socialists in two districts in Milwaukee county where although the McGovern Republicans made a third nomination three non-partisan state senators and 13 non-partisan assemblymen (out of 19) and the two non partisan nominees for Congress were elected of the state chose 3 Democrats and 6 Republicans as representatives in Congress Socialists in Milwaukee had suffered a defeat in April 1911, partly losing control of the city and this loss was increased in November

The commission form of government was adopted in Janesville-(January 23, 1912 and in Menomonic (January 29) and went into effect in each city on April 16, 1912 Portage Rice Lake (February 6 451 to 165, in effect April 23) and Superior (January 23 1,591 to 1 390, in effect April 23) also adopted the commission government in 1912

annuals. Aftibe land area 12.7% was in farme in 1910. The average value of farm land per age was \$10.41 Farms were operated largely by owners (9.779 by owners 311 by managers and say by tenants) In 1912 (prelimitary estimates) the principal crops were Indian ciris 358 000 bu (16 000 A.) wheat 2.181 000 bu (76 000 A.) oats 8.569 000 bu (203 000 A.) arrive 374,000 bu (11,000 A.) rye, 5%,000 bu (3 000 A.) posatoes 1,340 000 bu (11,000 A.) and hay 859,000 tons (452,000 A.) In 1909 (US Census) the value of vegeta bles other than potatoes was \$332,120, of flowers and plants \$12 280 of nursery products \$4 680 of small fruits \$13,984, of orthard fruits \$39.774 (apples \$37.580) On January 1 1912 there were on farms 759 000 horses, 2 000 miles, 35 000 milch nows, 568 000 other next cattle 4,969 000 sheep land 43,0000 swime

The total acreage urigated in 1900 was 1.133,302 487 L% more than in 1800) of this total

neat cattle 4,969 000 sheep and 43,000 swine

The total acreage urigated in 1909 was 1 133,302 487 1% more than in 1899) of this total
113 774 were supplied from streams. The total cost of irrigation enterprises to July 1 1970
was, \$17 700 980 and the estimated final cost of improvements begun was \$20 425 890 1 Of
cereals 59 % by acreage was grown on irrigated land in 1909 and of cats 61 5 / of wheat,
62.7 % of barley 58 2 %, of alfalfa, 95.3 %, of wild, salt or puirie grasses, 78 %, and of sugar
beets, 93 1 % The Shoshone irrigation project (Park county see E. B xxviii, 875a) of the
Federal Reclamation Service was 50 9 completed in November 1912 and in 1911 irrigated
14 580 acres mostly in alfalfa and cereals
In 1911 the legislature greated a board of factor computations which

In 1911 the legislature created a board of farm commissioners which is to appoint a director of experiments in dry farming The legislature appropriated \$15 000 for the Wyoming State I air \$2,000 for horticultural experiments at the farm near Lander and \$8 000 for

ming State I air \$2,000 for hortsultural experiments at the farm near Lander and \$8,000 for agricultural experiments on the farm at Cheyenne.

Mineral Products.—Total value 1911 \$11 486 982 The great item was coal 6 744 864 tons (\$10 508 863 one-tenth less than in 1910) The production of natural gas from Bighora county mostly and of petroleum (Uinta, Bighorn Fremont, Natrona and Johnson counties) was greater than in 1910 but was not reported definitely The marketing of soft asphalt from Lander began in 1912 The metal output was unimportant gold \$21 300 (six times as much as in 1910) principally from Fremont county silver 700 oz Copper concentrates containing platinum and palladium were shipped in 1911 from the New Rambler mine 32 m W of Larame. Phosphate sock has been found in the S W part of the state and the postash bearing mcks of the Leucite Hills, estimated to contain 107 000,000 tons of potash potash bearing rocks of the Leucite Hills, estimated to contain 197 000,000 tons of potash

potash bearing rocks of the Leucite Hills, estimated to contain 197 000,000 tons of potash are a possible source of potash salts for fertiliser.

Manufactures—The factory products for 1909 were valued at \$6,249,000,77.4° more than in 1904. The capital invested was \$6,195,000 (129,8% more than in 1904) and the number of persons engaged in manufacturing 3,393 (36,9% more than in 1904). The principal manufactures were: cass and general shop construction and repairs by steam railway companies \$2,337,000 lumber and timber products \$751,249 and flour and grist mill products \$746,000. Cheyenne had factory products valued at \$1,577,023.

Transportation—Railway mileage January 1 1912 1 704,00. The most important recent construction is that of the Chicago Burlington & Quancy from Billings Montana to the S.E. to you the Colorado Southern at Our Junction this is now completed for about

the SE to join the Colorado Southern at Orna Junction this is now completed for about zoo m., to Therappolis.

Degratation — The legislature met from January 10 to February 18 1911 It sub mitted to the voters for their approval at the general election in 1912 a constitutional amendment providing for the initiative and referendum both in regard to statutory provisions and constitutional amendments This received 20,579 votes to 3,446 against but 21,149 were necessary to adopt The legislature asked Congress for 2,000,000 acres of public fands to be used for the creation of a state public road fund for pen sions for soldiers in the Indian wars of 1865 and 1883 for the withdrawal of 'monopolistic" concessions in Yellowstone Rark, for assistance in the maintenance of big game in the state (for which \$5,000 was appropriated by the legislature) and for the removal from national forests, and other reservations of land which would be considered of benefit to settlers.

A direct primary law was passed, which included in its provisions nominations for United States senators. Party ballots are to be on different coloured paper. Republican on white, Democratic on blue and third party on green. An elaborate corrupt practices and inhibited nominations and election expenses each to 20% of one year s salary in the office sought. This lumit does not include travelling expenses and no matter what the salary in the office sought the expense is not to be limited to an amount less than \$200 for every campaign Services for hire and contributions by corporations are forbidden. Candidates must make statements of existings twenty days after election, permany or general, and a complete chairman after the general election. The secretary of state is required to prepare a printery pamphlet and a candidate may have space therein by paying a specified sum Besides this the accretany of space is required to purpose a pamphlet for general election in which political parties may buy space at the rate of \$50 a page. A new hallot law was passed

which provides for party columns but includes no party circle and therefore provides no way for voting a straight ticket. There is a blank space left below the name of each candidate in for voting a straight ticket which the voter may insert the name of the candidate for whom he wishes to vote. A new general election law also was passed

general election law also was passed

The legislature passed a pure food and drug law and created the office of state chemist
Unfair competition and discrimination in prices within the state were probabiled.

The legislature created the following countries. Plattis from the NW part of Laranne county Washakee from the SE part of Big Horn country, Hot Springs from the SW part of Big Hora Goshen from the NE part of Laranne Campbell from the W part of Crook and Weston Niobrara from the E part of Converse and Lincoln from the N part of Vinta'

An act was passed providing for commission government an first class cities in special effectives above 10 000 and in cities and towns of 7 000 inhabitants or more. The quescharter cities above 10 000 and in cities and towns of 7 000 inhabitants or more. In equestion of adoption is to be submitted to the people on the petition of 15% of the quakined electors. If it is defeated it is not to be re-submitted for two years and then only on petition signed by at least 25, a of the qualified electors. There are to be a mayor and two commissioners to be chosen for a two year term and to be nominated by primary. The mayor has no veto power. The commissioners are authorised to act as police judges. The city government must make monthly statements of expenditures and receipts. The act provides for the control of the contro charter cities above 10 000 and in cities and towns of 7 000 inhabitants or more. the recall of municipal officers and for the initiative and referendum. To the close of 19 only Sheridan had adopted this form (election August 1 1911 in effect January 1 1912) To the close of 1912

only Sheridan had adopted this form (election August I 1911 in effect panuary 1 1912)

Finance — In 1911 a new act was passed for the government of the state board of equalisation Mortgages were exempted from taxation Banks are to be taxed on all property moneys credits and assets but not on capital stock. A state board of accountancy was created to examine and certify public accountants. On September 30 1910 the balance in the treasury was \$800 393 and on September 30 1912 \$1 185 048 and the state debt \$117 000 Receipts for the two years were \$2 247 971 expenditures \$1,863,317

Education — Poll taxes for the educational fund are to go to the county in which they are collected \$150 from the general fund is to be distributed for each teacher in a district and

the remainder of the fund goes to the districts pro rata according to a law passed in 1911. In 1910 3 3% of the population 10 years and over was illiterate (4% in 1990). For the school year the school population was 35,786 the number enrolled in public

schools 26 502, the school funds received \$1 243 643 and the expenditures, \$1 003,207

Penal and Charitable Institutions —In 1911 a state commission on prison labour consist ing of the state board of charities and reform and the warden of the penitentiary was created this to supervise the employment of all prisoners in behalf of the state. A system of seven public highways was established and their construction was placed under the supervision of this commission, which was authorised to use convict labour. County commissioners and city authorities are required to co operate in the expense of these highways. The legislature established the Wyoming Industrial Institute and Reformatory for which a site at Worland was chosen by popular vote at the general election in 1912

History -In 1911-12 the state officers were Democrats except the superintendent of public instruction The governor for 1911-15, Joseph Maull Carey (b 1845) was Democratic Territorial delegate in Congress 1885-90, where he introduced the Wyoming statehood bill Unites States senator in 1890-95 and author (1894) of the Carey reclamation law (see E.B xiii 640 xx 244) The state legislature in 1911 was Republican (19 in senate and 29 in house to 8 Democrats and 27 Democrats, respectively) and it re elected Clarence Don Clark (b. 1861. Republican, representative in Congress 1889-93) to the U S Senate in which he had served since 1895.

The other United States senator was Francis Emroy Warren (b 1844), Territorial governor 1885-86 ad 1889-90, first governor of the state, 1890, and United States senator since 1890 His term ends in 1913, and the campaign in 1912 centred on his re election, his Democratic rival being John B Kendrick. The new state legislature has a small Republican majority (about 3 on joint ballot) and on January 28, 1913, it re elected Warren He controls the Republican "machine in the state, which was The state Republican convention instructed delegates for Taft, and in the election he ran second (14 560 votes) to Wilson (15 3rd votes) Roosevelt re ceived 9,232 votes, Debs 2,760 (1715 in 1908), and Chafin 434. A Republican congressman was elected by a plurality of 4,410 over the Democratic candidate

On October 2, 1912 a negro convict in the state penitentiary at Rawlins who had assaulted a woman 89 years old was hanged by some of his fellow convicts On October 12 :20 connects escaped from the penitentiary but all except 3 were recaptured

On July 26 1012 died William Alford Richards (b 1849), state surveyor-general in 1889-93, governor in 1895-99 and commissioner of taxation after 1909.

1 9

ALASKA L

""Fopulation —In 1910, 64 356 (1 2% more than in 1900) 36 347 whites, 28 00d matives Density of white population, about 1 to 16 sq m. In the decade 1900-10 there was a decrease of Indians and Chinese and an increase of whites There were no in corporated places in 1900 so that comparison for places of the same name in 1900 and 1010 as given in the 13th Census Bulletin on Alaska is misleading the former being for districts, the latter for smaller, incorporated areas 2. The incorporated places in 1910 were Chena, pop 138 (native village, 47), Cordova, 1,152 (district, 1 779, 173 in 1900), Douglas, 1,722 (825 in 1900), Eagle, 178 (district, 543 383 in 1900), Fair banks 3,541, Harries 443 (89 in 1900), Iditared, incorporated in 1911, the capital Juneau, 1,644 (district, 5,854, 3,664 in 1906) Ketchikan, 1,613 (459 in 1900), Nome, 2,600 (12,488 in 1900), Petersburg, 585, Skagway, 8,2 (3,117 in 1900), Treadwell 1,222 (522 in 1900), Valdez, 810 (315 in 1900) and Wrangell, 743 (district 1 067, 868 in Seward, incorporated in 1912, had 534 inhabitants in 1910. There are five (0001 forts Fort Wm H Seward, 255, near Skagway, Fort Davos, 180 near Nome, Fort Liscum, 162 near Valdez, Fort Yukon, 321, at the junction of the Yukon and Porcupine rivers and Fort Egbert, 198, near Eagle The total population of the Aleutian Islands (see E B 1 543) was 1,083

Agriculture - The experiment station in 1911 and 1912 was experimenting with hybrid strawberries crossing cultivated varieties with the wild native berries with spring grains especially beardless barley and oats to mature in 90 days or less with Siberian alialias to secure a nitrogenous fertiliser and at Kodiak with milch cows suitable for Alaska. The Faribanks station is conducted as a model farm. Besides the headquarters station at Sitka there is a station at Rampart. James Wilson U.S. secretary of agriculture prophesies that Alaska will soon supply American farmers with superior cereal seeds. The Tanana Valley is par excellence the agricultural region of Alaska and except for a slight disadvantage. in climate seems to compare favourably with farming land in Norway Sweden Finland and the Russian provinces of Archangel Vologda and Olonets In 1910 there were 222 farms with 42 544 acres (2 660 improved) value of farm property \$1 468 402 The largest

crop (1909) was vegetables \$186 134 hay and forage were valued at \$94 933
Fauna - National Bird Reservations were created on Forrester Island and on Hazy Islands by executive orders of January 11 1912 Four others (Bering Sea Tuxedni St Lazaria and Yukon Delta) were set aside in 1909 when a moose reservation was created on Fire Island in Cook Inlet There are also two fishery reservations (Yes Bay and Afognak Island) and a fur-seal reservation on the Pribilof Islands (see E B xxii 313) where seals have been elaborately studied. In 1911 the value of Alaska furs was \$786 376 (\$432 913 being seal). In June 1911 there were 33 629 reindeer in the Territory three-fifths were owned by natives one-minth by the government one seventh by missions and the remainder

by Lapps In October 1911 reindeer meat was first shipped from Nome to Seattle

Manufactures and Pisherres —The number of manufacturing establishments increased Manufactures and Pisheres —The number of manufacturing establishments increased 1904-09 from 82 to 152, the wage-earners from 1938 to 3099 capital invested from \$10685 000 to \$13,060,000 and the value of products from \$8 245,000 to \$11340,000 More than four fifths of the value of all manufactured products in 1909 was the value (\$9 190 000) of camed and preserved fish. In this industry the Territory leads the United States II n 1890 it produced 174% by value of the total for the country, in 1904 29 3°9 and in 1902 26 5%. In 1911 there were 64 salmon cameries and in 1912 87 Most of the new factories were in south-western Alaska. The increase was due to high prices and large profits in 1911. In 1911 the pack of canned salmon was 2820,066 cases (out of 6122,483 for the Pacific coast including 948,965 from British Columbia) and the value of the salmon fisheries was \$14,593,237 and of all fishery products (excluding furs) \$16,377,463. Curing and salting salmon are becoming more important industries. Hallut cod and herring fisheries along the Alaska coast are carried on mostly by Puget Sound and San Francisco. fisheries along the Alaska coast are carried on mostly by Puget Sound and San Francisco fleets and there is no local manufacturing. Some whale fishers have local shore stations

Bee the zamarks on maccuracies of the census by James Wickersham Territorial delegate
in Hearings before the Committee on Territories March 29 1912,

This was the population of the Cape Nome district, a subdivision of the Second Judicial

District, including persons on vessels in port; census having been taken during the rush

Including many labourers in transit

to the gold fields, the same area in 1910 had 12,351 inhabitants, not counting those in port Setka, not incorporated, had in 1910 a population of 539 and in the native village 500 as compared with a total population of 1 366 in 1900. The population of the district of St. Michael partly in the Second and partly in the Fourth Judicial District was 2 255 in 1910.

Mining —The production of gold in 1911 was \$16.853,256 (in 1910, \$16,126,740), of which about one quarter was from success ones \$86.569 from copper ores (only \$26,484 in 1910) and the remainder from placets. In the Innoko-Iditariod region placer production was thrice as great as in 1910 and in the Hot Springs placers more than twice as great but in general placer annuag apart from dredging (in the Nome region) is declaiming rapidly. In the Fairbanks region, quartz mining is displacing placer. The production of silver was 460.231 oz almost thrice as much as in 1910 more than two-thirds was from copper ores. The copper production in 1911 was 22.314.889 lbs five times as much as in 1910—2 striking increase attributable to the first appearance of the Copper River district on the completion of a railway thither. Since 1911 there have been further copper developments in the Chitina and Prince William Sound regions. Small quantities of coal, silver and lead were taken out. The production and importation of coal is decreasing, because oil is rapidly supplanting it as fuel and because Congress does not permit the development of coal lands. The Katalla oil field is being developed. Marble and gypsulm ship ments were little changed. Sixt three tons of the were produced mostly from placers and this was practically the entire output of the United States. In May 1912 announcement was made that a ledge of the region of the long and 12 ft. wide had been discovered in the lower Tanna Valley. This may prove a great factor in the wealth of Alaska. In general the development of mining in the Territory awaits a supply of fuel and better transportation facilities. (See Frank L. Hess. Tim. in Mineral Resources of Alaska pp. 89-92.1912.)

Transportation — At the beginning of 1912 there were nine railroads in Alaska, with a total constructed mileage of 465 (371 in 1910). The Alaska Northern Railway is projected from Seward on the S coast to near Fairbanks on the Tannan river a length of 450 m of which 71 were in operation. The projecte

Transportation — At the beginning of 1912 there were nine railroads in Alaska, with a total constructed mileage of 465 (371 in 1910) The Alaska Northern Railway is projected from Seward on the S coast to near Fairbanks on the Tanana river a length of 450 m of which 71 were in operation. The projected line of the Copper River & Northwestern Railway through the Copper River Valley from Cordova on Prince William Sound to Copper field and the Bering River coal district was completed to Kennecott 197 m. in April 1911 Further building will probably be delayed until the coal fields are opened. On Seward Peninsula there are two lines the Council City and Solomon River from Penelope creek to Candle a distance of 100 m of which 35 were in operation and the Seward Peninsula Railway from Nome to Lane's Landing a completed road of 96 m including the 6 mile McDonald branch. In the interior, the Tanana Valley Railroad from Chena to Chatinka 45 miles in length was completed in 1907. In addition to these the White Pass and Yukon Route from Skagnay runs for a short distance through Alaskan territory. A railway from an open Pacific port to the Yukon basin is greatly needed for development of smaller mining projects. The Civil Government Act of 1912 authorised the President to appoint a rail road commission of four members which studied the transportation problem and especially routes from seaboard to the coal fields and was to report early in 1913. It has been suggested that the Federal government should purchase the Alaska Northern railway and extend it to the Matanuska coal fields. The Alaska road commission is constantly at work on wagon roads and trails. A winter trail from Seward on the Gulf of Alaska has reached the placer mines on the Iditarod river and is aiding the development of Alaska by shortening the winter route to Nome by nearly 300 m. The work of the Engineer Corps of the United States Army on the St Michael Canal has been abandoned. Steamer service on the Copper river above Chitina and on the Sustina has been ass

kokwim to the mouth of the Takotna (600 m)

Commerce—The trade between Alaska and the continental United States increases steadily Shipments of domestic merchandise to Alaska were valued at \$18,809 270 in the fiscal year ending June 1912 and much more than half of this was the value of manufactured goods ready for consumption (\$10 261 770) The shipments from Alaska to the United States in the same period were valued at \$21 597 712 of which \$14 300,240 was the value of fish—canned salmon being valued at \$13 210 073,—and \$5 040 386 the value of copper. Of the total \$10,019 835 was the value of goods shipped to Seattle \$5 150 767 of shipments to Tacoma and \$4 614 211 of shipments to San Francisco—Exclusive of this merchandise there was shipped from Alaska to the United States \$20 732 597 in gold and silver of which \$17 490 821 was gold and silver of domestic origin.

Government and History.—On April 29, 1912, the Federal Supreme Court held that Alaska is an organised Territory of the United States within the meaning of the Interstate Commerce Act

The Interstate Commerce Commission had not granted the request of the Humboldt Steamship Company that the White Pass & Yukon railway be required to post rates

The ground for the refusal was lack of jurisdiction. The Supreme Court of the District of Columbia denied a writ of mandamus, on the ground.

¹ Built by the Alaska Synchcate—the Morgan Griggenheim trust, '—after it gave up its construction work at Controller Bay and at Katalka Bay Some bridge spans are set on concrete bases on glacial ice For engineering problems, see an article by D A. Willey in Scientific American Supplement July 13 1912.

ALASKA 040

of the cominismon's discretion in regard to jurisdiction, but the District of Columbia Court of America held that a writ would be and the Supreme Court affirmed this view

Congress passed a new civil government bill for the Territory, approved August 24, rgi 2. which creates a Territorial legislature. This is to consist of a senate of 8, 2 elected for four years from each of the four judicial divisions, and a lower house of 16 representa tives, 4 from each judicial division, elected for two years Legislators receive \$15 for each day's attendance and 15 cents a mule for mileage. The governor may veto bills within three days if the legislature continues in session, otherwise, a bill becomes a law without the governor's approval. His veto may be overridden by a two thirds vote of each house. The first biennial legislative election (for the session opening March 3 1913) was held on Nevember 5, 1912, after 1914 the Congressional delegate will be chosen at the same election Sessions are limited to 60 days, special sessions, called by the governor, to 15 days.

In September the Cunningham claims including 5 250 acres of coal lands were cancelled by Secretary of the Interior Fisher They had been disallowed on June 26, 1911 In 1910, 12,800 acres of public land on Controller Bay had been withdrawn from the Chugach Forest Reserve for disposition under the land laws An application for 320 acres filed immediately afterwards was supposed to be made by an agent of the Alaska ("Morgan-Guggenheim) Syndicate, and the charge was made that President Taft on the recommendation of his brother C P Taft had issued a secret order which gave to this syndicate the only harbour near the coal fields of the Bering River district Mr Gifford Pinchot attacked the President and Secretary Ballinger (Fisher s predecessor), who said that the lands had been opened to entry upon a recommendation from the Forestry Bureau when Mr Pinchot was its head President Tait sent a message to Congress dealing with the matter on July 26 1911, and it seems certain that the claim (for railway rights on Controller Bay) in question, of Richard S Ryan within the limits of the forest reserve was in no way connected with the Alaska Syndicate, which had another and better claum on the bay not in the reserve The Controller Bay terminal commands the Bering River coal field (15 m distant) which is probably smaller but certainly more accessible than the Matanuska field, but the Bay is a poor harbour, readily filling with ice and swept by high winds

The Alaska question is a complex one which may well be compared in some respects with that in the Philippines The late Prof R S Tarr, in an article on 'The Alaskan Problem " (North American Review January 1912), called Alaska the victim of stupid land laws, awakened public conscience, the clamor of the unreasoning mob, and politics." The Congressional policy of limiting land grants (as in the Philippines) prevents grants of sufficient size to warrant the investment of enough capital for adequate development and the political and social opposition of syndicates and trusts make a change in this policy nearly impossible. Some leasing system for coal lands may offer a solution but the lease is unlikely to tempt the investment of large sums of capital The construction of railways is another unsolved problem. Government ownership is urged by two authorities so diverse as Secretary Fisher and Mr Pinchot -who differ radically as to routes. Professor Tarr suggested that the wonderful scenery of Alaska might become a valuable asset of railways.

In August 1912 James Wickersham (b 1857), Progressive Republican, was re elected delegate to Congress by a large plurality. The governor since October 1909 (term ends 1913) has been Walter Eli Clark (b 1869), who had been a miner at Nome

On June 6, 1912, Katman volcano burst into one of the most violent eruptions of

medern times (See G C Martin in Nat Geog Mag, Feb 1913)

Bulletin 520 of the U S Geological Survey It contains a chapter by Brooks pp 44-88, on Railway Request, from the Pacific Seaboard to Fastbanks. The annual report of the governor and course by Bletins have been cruticised by the Territorial delegate, James Wangsaham in the Hauring selected to above and in his speech in Congressional Record, April 24, 1912 For description see E Higgingon Alaska, the Great Country (1912)

HAWAII 1

Population (1910) 191 909, 24 6% more than in 1900. In 1800-1909 the increase had been 71 1% The population of the several islands in 1900 was. Onhu, 82 9996 Hawan (ssland and county) 55,382 Kanas, 23 744, and Ninhau, 208 (comprising Katasi county), Kahoolawe 2 Lanai 131, Main, 28,623 and Molokaf, 1, for (constituting the county of Maui-except that part of the island of Molokai is the leper settlement, Kalaupapa district, Kalawao county with a population of 785), and Midway, 35 (comprised in Honolulu county) The population of Honolulu district (or city) was 52 183 By races the population was as follows Hawanans 26 041, a decrease of 3,746 in the decade; part Hawapians 12,506 an increase of 6 6 8, Spanish 1,090 and Porto Ricans 4,890 (these two are newcomers), other Caucasians 14 867, an increase of 4,290, Chinese 21,674, a decrease of 4,088 Japanese 70,674, an increase of 18,559, Korean, 4 533 The total non-Oriental population has increased both absolutely and relatively The percentage of native born increased from 41 t to 51 i Special efforts are being made to stimulate the immigration of families of farmers from Spain Portugal Russia (Manchuria and Siberia) and the Philippines and between 1906 and 1912 12,306 of the first three races were brought to Hawan at an expense of \$803 110 In 1010-12 7,073 Filipinos were introduced by the Hawanan Sugar Planters Association

Agriculture —The 1912 sugar crop was 595,258 tons. The pineapple industry is increasing rapidly and it now ranks second to sugar. About 800 000 cases a year are packed. The pince of the pineapple is bottled, and the pack amounts to about 80,000 cases a year. The The office of the inheappie is bottled and the pack animality to about so, on cases a year interest coffee crop of 1912 was smaller than that of 1911 only 2 127,610 lbs being exported (3 712 886 in 1911) but a light crop regularly succeeds a heavy one. The average price in 1912 was 16 15 cents in 1911 12 85. The question of cofton culture is receiving careful consideration, a good quality of cotton can be produced in paying quantities in some localities under certain conditions. In 1911—12 the boll weevil threatened the cotton. In 1912 a forest of native trees belonging to the Euphorbia eae and beheved not to exist elsewhere was discovered in the island of Hawaii by the Territorial botanist and investigations are being made to deter mine whether this tree can be added to those now cultivated for rubber. In the fiscal year 1912 I 384 848 lbs of hides were exported to the United States. The growing of Bermuda omions is a new industry and in 1912 tobacco was successfully cultivated (and a cigar factory established) in the Kona district. The experiment station has worked on Caravonica and Sea Island cottons Japanese rice and pineapples it has demonstration farms in Hawaii and kaui and a sub station in Maui at Nahiku in the rubber district.

The most recent complete statistics are for 1910. The number of farms was then 4.320.

The most recent complete statistics are for 1910. The number of farms was then 4,320 (90% more than in 1900) but the total farm area was only 2 590 600 acres (a little less than in 1900) and the improved acreage 305 053 (only 3 6° more than in 1900). The average farm acreage was 599 7 (47 8% less than in 1900) and the average improved acreage 70 6 (45 5% less). Farm property increased in value during the decade from \$74 084 988 to \$96 363 .29 land \$78 132 945 (38 3 more than in 1900) buildings \$4 798 756 (35 3% more) implements and machinery \$9 024 328 (21 4 / less)—principally because sugar machinery was not reported in 1910 as in 1900 as agricultural implements—and domestic animals \$4 407 200 (71 5° more). The average value of farm property was \$22 306 (31 6% less) and the average value of land per acre \$30 16 (39 4% more). The increase in number of farms was largely in smaller farms especially those under 20 acres. The proportion of farms under 50 acres increased from less than five sixths to more than seven eighths of the total in farms was largely in smaller farms especially those under 20 acres. The proportion of farms under 50 acres increased from less than five sixths to more than seven eighths of the total in the decade. The number of white farmers increased 479% and that of coloured farmers more than doubled. In 1910 more than half the total were Japanese (2 138 4 times as many as in 1910), the Chinese numbered 876 (18% increase). Hawaiian farmers 468 (488 in 1900), whites 753 (509 in 1900). In 1900, 55.2%, and in 1910 67% of all farmers were qualitable, in the decade the percentage of owners decreased from 30 I to 19.3. These changes were due to the substitution of tenancy agreements for contract labour on sugar plantations. In 1910 the value of domestic animals on farms was \$4.292.945 (neat-tattle \$2.279.026 horses \$786.207 mules \$0.08.641 asses and burros, \$19.726 swine, \$736.116 sheep \$137.

In 1970 the value of domestic animals on tarms was \$4 292 945 (neat eattle \$2 279 926 horses \$786 207 mules \$918,644 assess and burros, \$19 726 swine, \$736 116 sheep \$136,746 goats, \$3 967, Chinese buffalo \$12 683) of domestic animals not on farms \$1 995 474, of poultry, \$65 310 Darry products were small and inaccurately reported. The wool out put of 1909 was \$56 293](4.7% more than in 1899). All crops integos were valued at \$28 538, 264. The larger items were sugar came \$26 305 747 (acreage 186 230 in 1899 65 687); rice, \$1 968 293 fruits and nuts \$462 902 (pineapples \$337 162 bananas \$103 490) potatoes and other vegetables \$350 974 coffee \$213 985, Indian corn \$53 337.

Commerce —For the fiscal year ending June 30 1912 the value of imports was \$30 246,349 and of exports \$55 449 343. Exports to foreign countries are very variable; the advance from 1 500 R. R. will be at an

1 See E B xnii 83 et seg

HAWAIK

1910 to 1911 was about 100% and the 1913 total was less than half that of 1911. The chief foreign trade is with Japan. Sugar is the great staple of commerce, I 172 510,060 lbs of rewringer valued at \$48 143 530 and 32 954 550 lbs of refined sugar valued at \$1 817 970 were exported to the United States. Next in importance is the export trade in fruits and suits. Merchandise from the United States was supped mostly from San Francisco, about two-thirds of the total most of the remainder being from Puget Sound and from New York. Other Industries.—New industries in the Territory are the manufacture of bricks from lavarick 66 brooms from broom-corn and of stock food from algaroba pods. The scientific production of sugar has been accompanied by the manufacture of excellent sugar mill machiners which is finding favour in the Orient. It reproducts the exported annually to the

ery which is finding favour in the Orient, a considerable quantity is exported annually to the Philippine Islands. In 1909 there were 500 manufacturing establishments (222 in 1899) giving employment to 5 904 wage-earners (3 655 in 1899) with a capital of \$23 875 000 (\$10 746 000 in 1899) and a product valued at \$47,404 000 (twice that of 1899). Three fearths of the total value was that of 46 segar manufactories. The other larger industries were, cleaning and petishing rice \$2 239,000 canning and preserving pineapples \$1,591 000—with great increases since 1909 and slaughtering and meat packing \$864 000—Less than one fourth of the total product value was that of factories in Honolulu (\$10 705 000)

Transportation -In 1912 an American company, the Oceanic resumed running two steamers from San Francisco to Australia calling once a month at Honolulu The Balfour Line a British Company, started a service in 1910-11 between Europe and Pacific Ceast ports by way of Honolulu The Union Oil Co. operating 9 tank steamers and barges, has engaged in the transportation of crude oil from Port San Lius to Hawaii a traffic also car ried on (from Monterey) by the vessels of the Associated Oil Co. The Oahu Railway & ried on (from Monterey) by the vessels of the Associated Oil Co. The Cahu Railway & Land Co. has extended its unleage to 112% m and on Hawaii Island the Hilo Railroad Co. is building from Hilo northward through one of the most thickly populated parts of the Territory a line which will probably be completed in 1913. A street railway in Hilo has been chartered. Wagon roads are constantly being improved and extended. The Federal government is improving Honolulu Pearl Hilo and (on Maui) Rahului harbours in December 1911 the 35 ft. channel at Pearl Harbour was completed work on a dry dock (large enough for any ship that can pass the Panama locks) and on the naval station there was under way, and the 'California' the first large war vessel used the harbour. In the fiscal year 1913 it is estimated that the projected defenses will be 90% completed. Interisland traffic is carried on almost entirely by the vessels of the Interisland Steam Navigation Co. which ply regularly among the ports of the Territory improved to meet the demands of increasing traffic. The service is constantly being

Legislation - Recent acts of the legislature have had to do chiefly with the schools public health, local government, taxation public works, and immigration tory and the counties now rest each upon ats own independent financial basis with an clastic system of taxation and with the revenues of each varying according to its needs Adequate appropriations have been made for water and sewer works, wharfs and harbour improvements roads, and public buildings, which had been somewhat neglected for several years. The bureau of immegration has been elevated to a department of unmargration, labour, and statistics, with greatly enlarged powers A law of 1911 makes interference with workmen under contract a ground for damages and enticing of workmen a misdemeanour New and important laws have been enacted on the sub ject of general sanitation, tuberculosis, pure food, and other hygienic matters new forest reserves were created in 1911-12 aggregating 85 ob2 acres, and several new forest reserves were to be set aside in 1913. In 1911 and 1912 the governor urged the creation of a national park to include Kilauea (60 sq m) and Maiina Loa (28 sq m) The Hawanan Islands Reservation for birds, created February 3, 1909, at the western end of the archipelago was studied in 1911 by an expedition from Iowa State University (see Year Book U S Department of Agriculture, 1911, pp 155-164)

France—In the fiscal year ending June 30 1912, the Territory's bonded debt was in creased by the issue of \$1 500,000 in 20-30 year 4 % bonds for public improvements and was cut by the payment of \$50 000 of the 1903 4% fire-claims bonds so that the outstanding bonded, debt was then \$5,454,000—that is 3.03% of the assessed valuation. The legal maximum is 2% of the assessed valuation Territorial bonds are now acceptable at par (but not above market value) instead of 90%, as security for United States deposits in nation al banks. The sasking fund at the beginning of the year was \$70.086 Expenditures were \$4,224,795 and receipts \$3,904 503 and the current cash balance at the end of the year \$600,550—with outstanding warrants for about one-tenth of this sum.

A new tax system was begins in the last fiscal year instead of a 1% tax on real and personal property, divided equally between the Territory and the counties the general property tax varies with estimated needs the counties get for current expenses not more than 1% % and Finance In the fiscal year ending June 30 1912, the Territory s bonded debt was in

for improvements and current expenses not more than \$\frac{2}{3}\$ on local property with enough added to cover charges on county bonds, expense of collecting tax etc. An income tax of 2\frac{3}{3}\$ on incomes above \$1,500 a 2\frac{3}{3}\$, inheritance tax on bequests above \$5,000 and a 2\frac{3}{3}\$ insurance tax on gross premiums less expenses go to general Territorial funds, and a special except tax of 2\frac{3}{3}\$ on anomes above \$4,000 to an immigration and conservation fund.

Commercial banking deposits increased nearly 25% and savings deposits nearly 10%

in the year

Education — The compulsory school age has been changed from 15 to 17 years as the ximum the minimum remaining at 6. Summer schools are no longer supported by private maximum the minimum remaining at 6 Summer schools are no longer supported by private contributions but have been provided for by legislation. For public schools there is now a varying tax. In 1912 the enrollment in all schools was 29,000 (one seventh more than in 1911) and in public schools 23 752 (nearly one sixth increase)

The Territory spent \$582,535 and the counties \$47 800 on public schools—\$26 53 per pupil

There were 156 public and 51 private schools 31 09% of the pupils were Japanese 17 82° Portugese 14 22 % Hawaii and and 13 63° a part Hawaiians 10 94% Chinese In 1911 the College of Agriculture and Machanic Articles and the contraction of the subject to the college of Agriculture and Mechanic Arts occupied its permanent quarters in the suburbs of Honolulu where it has 83 68 acres including a dairy poultry and swine experiment station and an astronomical observators. A building at Honolulu for the Library of Hawaii to which Andrew Carnegie

gave \$100 000 was completed in 1912

Charines -A decided improvement has been made in the morale of the leper colonies, where lepers are now regarded as patients rather than as outcasts. This policy has greatly increased the number of voluntary surrenders. The number of lepers was 7.28 (622 at Molokai) In 1911 the station of the United States Public Health and Marine Hospital Service on Molokai was abandoned and the patients removed to the receiving hospital at During the year the bacilius of leprosy was cultivated artificially which was the first confirmation of the work of Clegg and the first great advance in the study of the disease since the discovery of the bacillus in 1868. Various animals were inoculated and several Various animals were inoculated and several varieties of monkeys developed the disease. Apparently it is the first time that general leprosy has been developed in an animal other than man and this will have an important bear ing on research work in the future. Serum inoculations have so far been negative for non leprous girls of leprous parents in addition to that for boys has been established at Honolulu. There are now 28 boys and 41 girls in these in titutions. Improvi ments have been made at the Molokai settlement. It now possesses churches, baseball grounds moving picture theatres race tracks stores etc. In 1912 a new site was chosen for the Territorial prison near Honolulu to displace the building near the harbour constructed in 1857 and a new insane asylum was being built. At Hilo and Honolulu there were extensive campaigns against rats and mosquitoes as disease carriers

History - The sugar planters are the 'interests" in the Territory and in 1912 the Republican delegate to Congress (since 1903), Prince J Kuhio Kalamanaole (b. 1871), accused Governor Walter Francis Frear (b 1863, governor since 1907) of being a re actionary and of favouring the ' sugar trust Secretary of the Interior Fisher in vestigated these charges during a visit to Hawaii in the autumn of 1912 and declared that they were unfounded In the November election Kalanianaole was re elected by

7 023 votes to 5 770 for Lincoln L McCandless (Dem)

The Roman Catholic and Protestant Episcopul bishops have called attention to the growth of Mormonism in the islands. It is alleged that the missionaries did not at first announce themselves as Latter Day Saints, but that after they had secured a large following, especially among the natives, some Asiatics and some southern Euro peans, they preached polygamy, limiting the number of wives a believer might have

only to his ability to support them

Bibliography—The various publications of the Bernice Pauahi Bishop Museum of Polynesian Ethnology and Natural History are extremely valuable the earliest was issued in 1901 and the newest titles are The Volcanoes of Kulouea and Mauna Lou (1909) The Making of Bark Cloth (1911) and New Hawarian Plants (1912) See also L A Hallock Hawari under King Kalakaua (New York 1912)

THE PANAMA CANAL AND CANAL ZONE 1

Work on the Panama Canal is rapidly approaching completion. Although the official opening has been set for January 1, 1915, and the Panama Pacific Exposition 2

¹ See E B xix, 666 et seq

The exposition grounds are between the Presidio and Fort Mason on Golden Cate Chan nel The Panatus-Patric Exposition Co., trapitalised at \$5,000,000, is governed by a board of 50 directors, assisted by state and city commissions. An architectural commission has authority in major questions of plans for buildings and Jules Guérin as "director of color"

in San Francisco is to be held in 1915 it seems certain that vessels may use the canal in the latter part of 1913. Some excavation will be done by dredges after the waters By estimates made late in 1912 in the Atlantic division, the concrete work at the N end of the locks should be finished June 30 and the Gatun spillway on August 1, in the Pacific division the Miraflores spillway on June 30 and in the Central division the Culebra cut about July 1-but this depends partly on slides such as occurred during the last year and delayed progress somewhat

On October 1 1912 the remaining excavation was estimated at 31,803 126 cu 3 ds of which about one half had been added to the estimate during 1911-12 Of this additional amount, which is nearly 8% of the grand total of 12 2, 000 cu yds 1 nearly 12 000 000 cu yds was in the Pacific division, including 8 794 000 cu yds for dry docks coaling station and terminal at Balboa, only 4 615 000 cu yds was in the Central division, because of slides and for changes in the Obispo diversion and 205 000 cu yds in the Atlantic division largely for silting in the finished channel excavation for the fiscal year (July 1 1911 to June 30 1912) was 30 302 61 cu yds nearly 2 000 000 cu vds less than in the preceding year and less than in 1010 or 1000

Apart from slides the Central division and particularly the Culebra cut therein is the most difficult part of the canal On November 1 it was estimated that the cut was 9, 1906 completed The seriousness of slides in this part of the work has at times been exaggerated The slides are largely due to abrupt transitions from one geological formation to another They have occurred usually in dry seasons. Although there is sometimes no danger where the slope is 1 on 5 or less there have been slides when the inclination was 1 on 7 or more The commission s geologist says that where there are strong lavas walls may safely be nearly perpendicular but that there will have to be a slope of 1 on 5 for soft rocks and 1 on 10 in much sheered soft clay and that there will be no more danger than in a naturally formed valley when the surface is protected by vegetation-which covers the sides of the cut very rapidly A slide on the W bank at Culebra covered 63 acres in 1912 and one on the E side about 50 7 acres. During the last ascal year (ending June 30 1012), three steam shovels were terracing either side of the cut Slides at Culebra do not mean an increase of cost over the original estimate because the cost of excavation and of spoil disposal has been decreased the former from 11 5 to 8 88c per cu yd and the latter from 18 54 to 15 22c per cu vd although the distance over which waste must be carried has been made nearly one half greater

On October 19 1912 9, % of all concrete for locks was in place the remainder being 206 672 cu yds in a total of 4 35 563 more than 92% of the concrete for the double three step locks at Gatun (Atlantic side), the remainder being 1496,0 cu yds in a total of 2 050 000 more than 91 % of the spillway for the Gatun dam (to discharge 13,000 cu ft a second thus caring for the Chagres' floods) the remainder being 18 185 cu yds out of 225 000 about 0,3% of the Gatun Dam (115 ft high covering 400 acres and impounding 164 sq m of water) which held without leakage 57 ft (maxi mum height estimated 87 ft) of the waters of Gatun Lake at the end of the rainy season and nearer the Pacific entrance more than 99% of the double one step Pedro Miguel lock the remainder being only 7 048 cu yds out of 889 8 7 and more than 90% of the double two step lock at Miraflores, the remainder being 139 914 cu yds out of 1 412 736

The installation of lock machinery began at Gatun in September 1911 and at Pedro Miguel in January 1912 A bull wheel for turning lock gates is one of the valuable inventions 3 that have grown out of actual work on the canal All locks are in pairs

\$7 500 000 subscribed by citizens of San Francisco and vicinity and \$5 000 000 in bonds from the state and the city each

Of this total only 29 908 000 cu yds is usable excavation by the French

² The channel between Gatun locks and the Atlantic was completed on February 24 1912

through the Mindhi Hills, except a dike separating the cut from the French canal
Others are a machine for shifting railway tracks used in carrying away spoil, and method
of emptying steam shovel buckets by steam instead of by hand

so that they may be used simultaneously by ships in opposite directions and, as there has been delay in installing machinery work has been pushed in each case on one of the pair so that one flight may be ready for use at the earliest possible moment

Specifications for a hydro electric station near the Gatun spillway were issued on September 9 1911 calling for three ooo-kilowatt units. Electric towing engines are to run on tracks on side walls of the locks and no ships are to go through locks under their own power. The maximum amount of water diverted for hydro electric development will be about 7% of the minimum water supply being the excess not required for lockages, evaporation and seepage. To supply the electric current to operate the lock machinery there are to be 16 transformer rooms at Gatun, 8 at Pedro Miguel and 12 at Miraflores all transforming from 2 200 volts to 2 0.

Terminals were actually planned before they were authorised so that the delay in starting work on them was reduced to the minimum. On either side there are to be docks 1 000 ft long and 00 ft wide (200 on the Atlantic side) piers covered with fire proof steel sheds fuel oil storage (80 000 bbls capacity) and coaling plants (00,000 tons capicity on Atlantic side and 100 000 on the Pacific side) and dry docks the one now at Cristobal (300 ft long 50 ft wide and 13 ft deep) to be retained on the Atlantic side and two to be built on the Pacific side—one 1 000 ft long 110 ft wide and 35 ft deep and the other (auxiliary) 350 ft long 71 ft wide and 13½ ft deep. At Balboa on the Pacific side a great naval depot is planned and to make land and build break waters here much of the spoil from the Culebra cut has been used.

To make it possible for pilots to keep the course up to turning points concrete range—light houses have been built and trocas cut through brush and timber so that these can be sighted—The candle power of these range lights varies from—500 to 15 000 (at ocean entrances)—They will be equipped with electricity where they are readily accessible—Compressed acetylene dissolved in acetone will be used for the more maccessible—beacons and towers and for floating buoys

Canal fortifications were authorised by act of March 4 1011 with an appropriation of \$2 000 000 for gun and mortar batteries. Forts at either end of the canal are to be fitted each with four 14 in rifles six 6 in guns and twelve 12 in mortars and 12 companies of coast artillery, 1 battery of field artillery, 4 regiments of infantry and 1 squadron of cavalry are to be stationed here

There are other items in the administration of the Canal Zone as interesting as the engineering features Under William Crawford Gorgas (b. 1854) of the U.S. Army who was made colonel by special act of Congress for his work in Havana on vellow fever (see E B xxviii 911d) and who became (March 4 1007) a member of the Isthmian Canal Commission as sanitary officer the part of the Zone actually occupied has been cleared of yellow fever and of malaria and made one of the healthiest places in the world In notable contrast with the French service which attempted no sewage disposal or water supply and was curative instead of preventive actually spreading yellow fever and malaria by having hospitals with unscreened windows and patients cots set in water jars (to prevent the approach of ants) were the methods of the American army doctors who not merely benefitted by the lessons learned in Havana as to malaria and yellow fever infection from the Anopheles and Stegomvia mosquitoes, but took other preventive measures installing a pine borne water supply and a modern sewage system A division of municipal engineering (abolished in August 1908) spent nearly \$6,000,000 on such improvements, about \$3,500,000 for work in the Zone proper and \$2,250,000 for sewers and pavements in Panama and Colon A strict quarantine was enforced and a station built on Culebra Island in Panama Bay at the Pacific entrance main hospitals at Colon and Ancon about 25 minor hospitals or dispensaries elsewhere and a sanitorium for convalescents on Taboga Island in the Pacific 10 m off the coast

notably dredges built in Scotland

¹ Lock gates are protected besides by double chains from damage by ramming ² See The French at Panama in *Scribner s* January 1913 Some machinery brought over by the French and discarded has been recovered and used by the American engineers—

After yellow fever had been stamped out-there has been no case originating in the Canal Zone since December 1005—there was a campaign against malaria in 1006, and the sick rate was cut from 6 83 % to 1 54 % in 1911 Plague typhoid and dysentery have been vigilantly combatted by the US Army doctors The care of the general health and comfort of the employees has been minute There has been a large corps of dentists Y M C A s have been organised and women s clubs—the latter by an expert employed by the government so that married women might be willing to stay in the Zone 1. In the last fiscal year the average daily sick was 22 91 per 1 000 employees (23 01 in 1909-10 24 77 for 1910-11) and the death rate 10 16 (11 34 in preceding year) 9 21 (10 01 in preceding year) for whites 5 9 (5 35 preceding year) for whites from the United States 104 (1181 in 1910-11) for blacks. In 1911 nearly 1 000 labourers were brought from Barbadoes, and the West Indian negro is everywhere in evidence. On June 30 1912 the total number of employees was 34 957 (including 5 100 Americans)—the maximum being 40 159 in November 1912

Up to June 30 1912 appropriations for the canal were \$203 561 469 and by the act of August 24 1912 \$28 980 000 was appropriated for the expenses of the year 1912-15. The estimate for the year 1913-14 is \$30 174,432. Of the cost as now estimated (\$375 701 000), about $69^{\circ\prime}$, (\$-50 653 23.) was charged to the work up to June 30 1912 and of this amount more than one eighth (\$34 183 183) in the last fiscal year Although one of the reasons why a lock canal was recommended was that it would cost \$100 000 000 less than a sea level canal the actual cost of the lock canal will be much more than the cost of a sea level canal (\$_50 000 000) as estimated in January 1906 (see EB xx 670b). But the slides at the Culebra Cut are considered by many authorities to show conclusively that a sca-level canal would not have been feasible 2

An act of August _4 1012 provides for the opening maintenance protection operation sanitation and government of the canal and the Zone A governor with a 4 year term and a salary of \$10 000 a year is to be appointed by the president with the consent of the Senate It was President Taft's intention to appoint as governor Col George Washington Goethals a chief engineer of the canal since February 1007 As the appointment was for 4 years opposition was threatened in the Senate where the Democratis wished such appointments to be made by the new (Democratic) administration—although Col Goethals was suggested for the portfolio of war in President Woodrow Wilson's cabinet President Taft did not appoint a governor

The same act authorised the President to frame a system of workmen's compensation for the Zone and a scheme has been drafted but not put into effect as Congress made no appropriation therefor—The act ordered the dismissal of the Isthmian Canal Commission upon the completion of the Canal

Besides the act exempted from tolls all coastwise vessels but forbade American railways to own ships operating in the Canal (after July 1 1914 unless the time was extended by the Interstate Commerce Commission—to which jurisdiction is given—in the case of lines giving beneficial service) prohibited the use of the Canal by ships owned by illegal combinations, and admitted to American registry foreign built ships owned

See Mary G. Humphreys. The Family and the Panama Canal. Scribner's Sept. 1912. In the opinion of the chief engineer no slides in 1911–12 were sufficiently serious to have interfered with navigation had they occurred while the canal was in use.

* Goethals was born in Brooklyn N Y on June 29 1858 studied at the College of the City of New York in 1873-76 and graduated at the U S Military Academy in 1880 and entered the engineering corps being tracher of engineering at the Military Academy until 1888. He was lieutenant colonel of volunteers and chief of engineers in the Spanish American War and at the close of 1898 returned to the regulars. He graduated at the War College in 1905 and was promoted to colonel (of engineers) on December 3 1909. For some time he was in charge of engineering construction on the Muscle Shoals Canal on the Tennessee river (see E B xxvi 625d). In the Canal Zone he showed himself not merely an able engineer but a leader of men and an administrator and final judge in the petty and annoying quarrels of a strangely mixed population. Most of the more serious problems of canal construction were met in his administration, although the system of removing spoil was devised by his predecessor a civilian John F Stevens chief engineer in 1905-07. Goethals received the honorary degree of Doctor of Science from Columbia University in June 1912.

by Americans and engaged only in foreign trade. For the exemption of coast wise vessels in its international bearings see under Part I section i

On November 14, 1912 the President promulgated a schedule of tolls (1) \$1 20 1 per net vessel ton each 100 cu it of actual earning capacity on merchant vessels with passengers or cargo (2) 40% less on merchant vessels in ballast, (3) 50 cents per displacement ton on naval vessels, but (4) the same rate as (1), for transports colliers hospital ships and supply ships. These tolls were based on the estimates of Emory Richard Johnson (b 1864 professor of transportation and commerce University of Pennsylvama since 1896 and a member of the Canal Commission since 1899) and they are what the estimated traffic might be expected to bear rather than intended to make the canal a financial success to the government

PHILIPPINE ISLANDS 2

Population —No general census has been taken since 1903 when the total was 7 635 4-6 (see EB xxi 395d). In 1910 the population of Manila was 234 409 (in 1903 219 9 8) including 211 8-9 Filipinos, 14 093 Chinese 4 174 Americans 364 Spaniards and 644 other Europeans

4 griculture —In December 1911 an Act was passed creating a sugar testing laboratory in Manila to be under the supervision of a sugar chemist who establishes standard samples of classe of sugar. An irrigation code was passed in February 1912, when an irrigation council was created. The chief of the bureau of insular affairs recommended in 1912 legislation to increase from 16 to 50 hectares, the maximum land that may be sold to individuals or that may be taken as a homestead. In 1911 and 1912 a shortage in nee and in 1912 a plague of locusts, especially in the southern islands caused great distress, and legislative remedies were attempted.

Communications and Commerce —Railway construction is being pushed rapidly forward and in July 1912 I 0349 km were completed. The Manila Railroad Co. in the island of Luzon in 1912 had 7047 km in operation on its northern and southern lines and 602 km, under construction or projected and the Philippine Railway Co finished its line on the island of Panny from Holo to Capis (110 km) in 1910 and its Cebu line (96 km) in 1911 in 1912 its total track was 251 km. Great advance has been made in the improvement of extring road, and there are now about a thousand miles of first class highways throughout all the provinces. The Philippine Commission made special appropriation for the repair of roads bridges and traits dairinged by the severe typhoous of 1911. In 1912 the North German Lloyd Co. established a monthly service between Manila and European ports. Zamboanga harbour Mindanao is to be improved at a cost of \$400,000. An act of Congress of March 4, 1911 appropriated more than \$1,500,000 for batteries and defences especially at Manila and Subig bays. The Philippine legislature in 1912 voted tunds to be available if a similar appropriation were made by Congress for wirele's telegraph installation in parts of the islands inhabited by Moros and other non Christian tribes.

For the fiscal year 1912 both imports and exports were greater than ever before gain in exports during the year was 25 from \$39,7,8 629 to \$50,319,836, and imports in creased in value from \$49,853,722 to \$54,549,980 principally in rice to meet famine conditions resulting from a severe drought. Of exports about 40°, went to the United States and about the same amount to France the United Kingdom and Spain. The increase was principally due to larger exports of copra sugar and cigars. Philippine copra is now an important factor in the world's supply. In 1912 it was for the first time more valuable than hemp being worth \$16,514,749 (hemp \$16,283,510) and about \$9,600,000 worth of this was sent to France mostly Marseilles. About one fourth as much went to the United States. The export of hemp has decreased since 1910. Sugar increased in value to \$10,400,575, about six sevenths going to the United States. Unmanufactured tobacco exported was valued at \$1,874,691 and manufactured at \$2,720,501 (about 50°, more than in 1911). Minor exports are hats which go to France and the United States maguey fibre and mother of pearl shells. Of the total imports about three eighths was from the United States second

¹ The rate in effect January 1 1913 for the Suez Canal

¹ See E B xx1 392 et seq

were the French East Indies (\$9 575 741) There was an increase in imported foodstuffs and in iron and steel but a marked decrease in cotton textiles. Larger imports of raw cotton and yarn show that the textile industry is developing

Government —A summer capital has been established at Baguio, capital of Benguet province in the mountains 120 m N of Manila There the governor general and other officials reside from the 1st of March until the 1st of July A new city is building The mayor and city council are appointees of the governor general with the consent of the Philippine Commission By the act of Congress of February 15, 1911 the term of delegates to the Philippine assembly was made four years and in accordance with this act the first Tuesday of June was chosen as election day

In December 1910 a parcels post system was established between the Philippines and

Hong Kong and in October 1912 an inter island parcels post system
In January 1911 capital punishment was abolished. The regular session and a special was a second regular session in November December and January 1912 and a special session in February 1912. The legislature limited the power of the Governor General to deport and expel foreigners by requiring previous investigation with a hearing at which the suspect must be represented by counsel and witnesses. An Act of January 20 1912 mikes liable to fine of 200 pesos imprisonment for 6 months or both any one receiving an advance for per sonal service under contract and failing to perform the service. Provincial boards were authorised to pay regular wages to unclassified employees disabled for 90 days or less. Dur ing the rice famine the Governor General was authorised to arrange for the sale of foodstuffs at reasonable prices through provincial and municipal governments and for this purpose to but 15 000 tons of rice. The legislature appropriated 12 000 pesos for the purchase of food plant seeds for distribution. It voted 5 000 pesos to purchase and preserve the birthplace of José Rizal in Calamba. La Laguna and 25 000 pesos to provide the public schools with copies of a biography of Rizal. It passed an elaborate which once receipt law and revised a perfect of the province o part of the corporation law providing for fees for filing articles of corporation For the in vention of a durable fireproof waterproof roofing material a substitute for nipa a prize of 15 000 pesos was offered a technical board is to deal with it

15 000 pesos was offered a technical board is to deal with it Finance—During the fiscal year ending June 30 1912 the revenues were 120,54 016 pesos and the disbursements 124 257 387 pesos and the balance at the end of the year as 28 414 214 pesos at the beginning of the year 31 035 586 In May 1912 Covernor W. Cam eron Forbes announced that the income was sufficient to meet all expenditures including public improvements and in July President Taft informed Congress hat the islands had not been a charge against the United States Treasury and that on all items there was a balance at their favour expect for increased appropriatives for true and the propriative for such states. in their favour except for increased expenditures for army and navy. A system of rural credits was introduced in 1911 the government making loans at 6 on agricultural property and guaranteeing 4 / to a French syndicate s agricultural bank with a capital of \$10 000 000 In December 1911 the application of several banking laws was extended to Moro and other non Christian territory by the Commission During the fiscal year 1912 deposits in postal savings banks increased from 2 099 474 person to 2 388 986 On December 8 1911 the legislature authorised the release from the gold standard fund of 1 698 514 person which was thus available for public works. The chief of the bureau of insular affairs in his report for 1912 recommends legislation to increase the limit of the bonded debt for improvements and to permit the investment or deposit on proper security of 60 0 of the silver certificate reserve The Territorial bonded debt in 1912 including \$4,000,000 municipal bonds of Manila and \$125,000 of Cebu) was \$16,125,000. The last legislature failed to pass an appropriation

measure in such circumstances current appropriations are extended Charitable and Penal Institutions — The total number of prisoners on the islands in 1912 was 6 910 of which one half were in the Bilibid prison and at the Iwahig Penal Colony The reservation latter has been a remarkable success as an example of advanced penology latter has been a remarkable success as an example of advanced pentodgy. The reservation is 468 710 673 sq metres in extent of which 448 hectares are under cultivation growing up land nee. A saw mill and brick kiln are in full operation. The Culton leper colony in 1912 had 2 615 inmates largely from Cebu. The sanitary work of the government has been excellent. For the fiscal year 1912 the death rate of government employees wa only 5 65 per thousand (8 46 for Americans 4 44 for Filipinos). Deaths from beri beri stopped where ever and whenever unpolished rice was used and it is proposed to use undermilled rice in government institutions In spite of constant war on rats the bubonic plague reappeared in Manila in 1912. In the Manila district where the annual deaths from small pox were formerly 6 000 no death from this cause was reported in 1911 and there were few cases in 1912 A sewage system and a good water supply were installed in 1911 but there was a serious shortage in 1912 Experiments have been made at Manila in sterilising drinking water with ultra violet rays The improvement of health conditions elsewhere is scarcely

¹ The courts have enjoined the bureau of health from compelling private owners to con nect with the sewer system

less marked A hospital with 30 beds has been opened at Bontoc, a temporary hospital is in operation at Butuan and there has been some success in attempts to vaccinate the wild tribes. Provincial health funds were created and municipalities were authorised to consolidate to form sanitary divisions. In 1912 a committee was appointed to study the causes of the high infant mortality. The legislature of 1912 voted 50 000 pesos to the Philippine Islands. Anti Tuberculosis Society and 12 000 pesos to La Gota de Leche (The Drop of Milk a babies charity) for the protection of infants. In 1912 there were 44 pupils in a school for the deaf and blind in Manila.

Education -The total enrollment for the school year 1911-12 was 529 655 (about 13% less than in the preceding year) and the average attendance was 329 073 (nearly 8% less than in the preceding year but the ratio of attendance to enrollment was higher). The decrease in enrollment is due to financial reasons the large expenditur's for permanent school build ings the heavy expense of industrial training on which so much stress is being laid and the increase in salaries almost 10 during the year to insular Filipino teachers 38 high 285 intermediate and 3 of primary schools with 664 American and 7 696 Filipino Considerable stress is now laid on industrial instruction especially hat making teacher weaving carpentry embroidery lace making and agriculture and in 191, the administration urged the passage of a law for industrial education of adults. Athletic sports are also receiv ing more attention. In 191. the legislature passed an act for the establishment of a school of Household Industries for women in the city of Manila and appropriated for it 100 000 pcsus The Univer ity of the Philippines was organised in it definite form during 1910-11 and the following colleges are now in operation Liberal Arts Medicine and Surgery Agri culture Vetermary Science Law Engineering and Fine Arts The annual appropriation for the University for 1913 was 575 000 pcsos In August 1912 the total registration in the various departments was 1 400 Of the high school graduates in 1911 57, entered the university an unusually high ratio The first president of the University Murray Bartlett took office on June 1 1911 and was inaugurated December 20 1911 By an Act of January 12 1912 20 government fellowships for foreign study were established 5 are to be filled from the teaching staff of the University of the Philippines An Act of February 6 1912 created 70 scholarships (at least one for each province or sub province) in the government forest school at Los Banos. La I aruna and one of January 27, 1912 voted 7,000 pesos to maintain 20 government scholarships in the College of Victernary Science of the University of the Philippines The provinces and sub provinces were authorised to grant allowances to students in the University or in other government schools. Private schools are being standardised by the department of education. Many changes are being made in the equipment of Catholic institutions of learning the Jesuit Ateneo the Dominican University of S Tomas and the Lico are planning new building in the suburbs of Manila in 1912 work was begun on new building for Santa Scolastica c nvent at Singalona and a new plant was completed for the Catholic college at Jaro (Hoilo) English is rapidly becoming the language of the people being increasingly used even in non government schools and on January I 1913 it became the official language of the courts. The total appropriation for schools in 1913 it became the official language of the courts 1912 was 3 610 000 pesos and the expenditure 3 603 685 (2 612 091 for salaries)

History - The Secretary of War after five weeks in the islands reported to the President on November 23 1910 that the people were unprepared for self government and that the better it not larger class did not desire it. These were the President's views which he repeated in an address in Junuary 1911 before the Society of the Carabao -army and navy officers who have seen service in the Philippines -and those of the Chief of the Bureau of Insular Affairs in his annual report for 1912 In the House of Representatives (Democratic) a bill was introduced March 20, 1912 (by William A Jones, Virginia) providing for the qualified independence of the islands on July 4 1913 and their complete independence in 1021 and the Democratic party which came into power in 1913, is pledged by its platform to an immediate declaration of the nation's purpose to recognise the independence of the Philippine Islands as soon as a stable government can be established The natives and the Americans who are in favour of independence accuse the government and especially commissioner Dean Worcester of exaggerating the number and the lack of civilisation of the non Christian tribes and of using this as an argument against the ability of the Filipinos to govern themselves They say besides that land grant limits are so small as to discourage the investment of capital that the limits on free exportation to the United States of sugar and tobacco-dictated by the American sugar and tobacco trusts-threaten these industries in the islands and that the freedom from export duty on hemp being only on hemp coming directly to the United States and consumed there, is actually a tax on the Filipino hemp growers ¹ The Belgian sisters teach lace making in their schools in Manila Tagudin and Bontoc

in the interest of the American "Harvester Trust" which has agents in the Philippines and which by the nature of the case is practically the only exporter in a position to secure a refund of export taxes by proving American consumption Early members of the Commission pointed out the injustice of giving these duties to manufacturers of hemp products in the United States' In 1911 nine resolutions (one by McCall of Massachusetts, the others by Democrats) and in 1912 one (by W A Jones, author of the Independence measure), were introduced in the U.S. House of Representatives tor neutralisation of the islands An act of Congress of March 23 1012 gives local citizenship to all who were Spanish subjects in 1899 and to their children and allows the Philippine legislature to provide for others becoming citizens A protest of the Philippine Assembly against the sale of friars lands to corporations brought up this matter in Congress, where the Committee on Insular Affairs evonerated the Philippine government In 1911 the Commission prohibited slavery peonage and the sale of human beings in certain non Christian territory, and an effort was made to secure the passage of a similar act by the legislature applying to all the islands

In Mindanao there was sharp fighting in the autumn and winter of 1011 and about 40 Moros were killed in December In Jolo about 600 Moros were hemmed in and forced to surrender during the same winter. In the Basilan islands an American ensign was killed and several sailors were wounded in September. Otay an outlaw chief of Samar was killed by the constabulary in October. In 1012 there was a cla h with ladrones on January 14 near Siet Lake. Jolo in which 20 Moros were killed, and at the very end of the year and early in 1013 there was more fighting with Moros.

Taal volcano in southwestern Luzon was in explosive eruption January 27 to Febru ary 8 1911. This outbreak probably the most severe which has occurred in the island in historic times was at its height on January 30 when an area of 230 sq km (nearly twice that devasted by Mt. Pelee) was laid waste. The mud coated area was 1 940 sq km and the loss of life was estimated at 1 300. Earthquakes of a mild type accompanied the eruption. This was the first great outbreak of Taal since 1754. In February 1012 the legislature appropriated money for a seismological tation near Bombon Lake to study the volcano and give warnings of eruptions, and for a launch to be used for rescue work. In July 1011 rain fell for nearly a fortinght and in Luzon about \$1 500 000 worth of property was damaged. On October 16, 191. a typhoon did damage estimated at \$25,000 000 and caused the loss of a thousand lives.

The Philippine Commission in 1912 was composed of W Cameron Forbes governor general Newton W Gilbert (public instruction acting governor in 1912) Dean C Worcester (interior), Charles B Elliott (commerce and police) Gregorio Araneta (finance and justice) Frank A Branagan, Rafael Palma Jose R de Luzuriaga and Juan Sumulong

PORTO RICO 1

Population (1910) 1 118 012, about one sixth more than in 1899 The principal towns or municipal districts? in 1900 were San Juan (48 716) Ponce (city 35 027) Yauco (31 504), Caguas (27 160), Humacao (26 6,8) San German (22 143), Aguadilla (21 419) Fajardo (21,135) Cavev (17 711) Guayama (17 379), Mayaguez (16,591) Aibonito (10,805), and Arecibo (city 9 612, district 42,429)

See E B xxn 124 et seq

^{*}Except where otherwise noted the population is for municipal districts

Industries and Commerce - For the fiscal year 1912 the total exports were valued at \$49 705 413 (an increase of \$9 787 046 over the previous year) in 1901 the value way \$8 58, 967 Import in 1912 amounted to \$42 926 475 (an increase of \$4 157 476 in the year) and in 1901 at \$8 918 136. The total trade was one sixth greater in 1912 than in 1911. Of the 1912 trade 87 o was with continental United States which established free trade with the island in 1901. In 1912 the island ranked 12th as a purchaser of American goods. Sugar heads or 63 of the total export sales

The quantity was the largest ever shipped from the island being five times as much as in 1901

Tobacco valued at about \$7 500 000 holds second place on the export list and coffee is third with 40 146 365 lbs (\$6 754 913) more than thrice the amount exported in 1901

More coffee is now being, sent to the United States where it was long exercisedly unknown.

The 1012 from was the largest ever give on the bland. First ever amount exported in 1901 More conee is now being sent to the United States where it was long practically unknown. The 1912 crop was the largest ever grown on the island. Fruit exported in 1901 amounted to \$109 801 and in 1912 to \$2 377 /6. the principal increase being in the shipment of oranges pincapple and grapefruit. The coco nut industry is extensive and profitable and the shipments were valued at \$308 883.

The chief imports in 1912 were cotton goods valued at \$5 13. 69.5 manufactures of iron and steel \$4 977 146 the largest item being sugar mill machinery rice \$3 866 986 bread tuffs \$2 39. 863 preserved meat and dairy products \$3 564 1.7 leather manufactures \$1 266 132 About three quarters of the trade goes through San Juan

The trend of agriculture in the island is toward more intensive methods Machinery is

being substituted for hand labour to a considerable extent planters are studying the econo mics of fertilisation tile drainage is employed in wet lands and an irrigation scheme which will insure the delivery of 4 acre feet of water per annum for 35 000 acres of dry lands in the south was three fourths completed in 1912. The Sugar Producers Association has established an experiment station (opened in 1911) at Rio Piedras near San Juan which is supported by a tonnage tax on the industry. Here experiments with fertilisers lime different distances of planting and the study of most residence are represent.

forced by a toniage tax on the industry. Here experiments with retinates hime different distances of planting and the study of insect posts are carried on. There is a government agricultural station at Mayaguez. The first annual Insular Fair was hold at San Juan in 1911. In 1909 the first cen us of manufactures was taken. There were 939 manufactures employing 15 582 wage carners with a capital of \$10,000 and a product value of \$36 750. 000 of which \$10,000 on was added by manufacture. More than half the total value \$20,000 was that of sugar and molasses. Dependent on this industry is the distillation of liquors \$1117,000. Other manufactures were tobacco \$6,000 000 coffee cleaning and polishing \$2,000 000 (only \$2,89,000 added by manufacture). The four largecities of the island had manufactured products as follows. San Juan \$3,213,000. Ponce \$2,000,000. Mayaguez.

had manufactured products as follows San Juan \$3,243,000 Ponce \$2,400,000 Mayaguez \$2,256,000 and Cagua \$1.4,000 The manufacture of ci, are is rapidly increasing the output in 1912 was 281,000,000 being 14 times as great as in 1901

Transportation and Public Works—The principal steamship lines are New York and Porto Rico S S Co (of the American Gulf and West Indies Steamship lines) with a new passenger steamer Brazos on the service since November 1912 in addition to three other passenger boats (and four treighters) one each week from New York stopping at San Juan and (except the Brazos) at Ponce and Mavaguez and three boats making weekly trips from New Orleans and one from Galveston and Port Arthur and the Red D line with weekly sail ings from New York to San Juan and Mavaguez (4 steamers) The A H Bull Steamship Company has eight freighters making fortinghtly sailings between New York and the 1 land On the island there has been no new railway construction in the lat two years and automobile roads are being built and improved and there are motor bus lines on the

military road between San Juan and Ponce. From Ponce there is a good road to Guayama

In the fiscal year ending June 30 1912 67 km of macadami ed roads were completed
making 1 069 km now maintained
in course of construction in 1912
The Federal government dredged the San Juan harbour during the year and the Porto Rican legislature created a San Juan harbour commission for

the permanent improvement of the city's water front

Legislation - The 1911 legislature was in session from January 9 to March 9 1911 It gave the Executive Council the powers of a public service commission. In 1912 the regular session began January 8 but as all business was not completed within the 60day limit a special ses ion was called and the final adjournment was March 14 was passed providing that one out of the five members elected biennially from each of the seven districts shall be returned from the minority party No party may name more than four candidates and the minority candidate of each party who receives the largest number of votes is elected. Delegates must be residents or tax payers in Laws were passed promoting the secrecy the district from which they are chosen of the ballot and requiring a new registration of electors. Another important act took all matters of sanitation out of the hands of the municipalities and put them under the control of the Territory through a non partisan samitation service - even street

cleaning being done by the Territorial government. A bureau of labour was established. Other acts control the operation of public service corporations affect the protection and promotion of industry and commerce and facilitate the administration of justice. Two new municipal governments were established. Hormigueros, from a part of Maya guez, and Guaynabo, from 4 wards in Rio Piedras and 6 wards in Bayamon.

Education —The school enrollment in 1912 was 160 657 (10% more than in 1911 and 6 times as much as in the first year of American administration). The total number of school buildings was 1 168. The night schools made the most noteworth, progress and the attend ance in 1911 was 75% greater than in 1910 the enrollment being 15 1,8. Of the pupils 40 were adults. Instruction in agriculture manual training cooking plain sewing and other practical subjects as well as hygiene physical culture and military training has been added to the courses of many schools. Pupils in graded schools learn both English the medium of instruction since 1906 and Spanish. There are good high schools in San Juan. Ponce and Mayaguez. The University of Porto Rico at Rio Piedras had 1 019 students and the depart ment of liberal arts was established in 1910—11 making three departments now in operation. The Insular Library at San Juan created 1903 contains over 15 000 volumes.

Finance — The treasury receipts increased one tenth during the fiscal year 1911-12 and amounted in all to \$7 816 161 and in spite of increased expenditures the available cash balance increased from \$1 214 000 at the beginning of the year to \$1 794 555 at the close (June 30 1912) The tax on alcohol had been raised _ cents per litre on July 1 1911 The assessed property value based on a careful revision was \$178 2-5 000 — more than twice as much as in 1905 The total net bonded indebtedness in 1912 was \$4 139 760 Bonds for municipal

improvements are to be issued

Charitable and Penal Institutions — These consist of the insane asylum with 334 patients in 1911 the asylum for the blind with an average of 75 inmates for the year the leper colony on Cabras Island with 25 patients the girls charity school with 152 inmates and the boys charity school with 250 inmates. In the penal institutions 8 032 prisoners were confined during the year. There are about 50 dispensaries and field ho pitals in which since 1904 a campaign has been carried on against the hookworm plague (Uncinariasis) which was introduced with slavery from Africa in the 16th century. Nearly one third of the population has been treated. Cures are estimated at 40 / The improvement in the general health of the native workman is marked and this will be furthered by change of diet. In June 1912 the bubonic plague appeared coming apparently from Trinidad. A careful quarantine was instituted arms surgeons were hurried to the island (June 27) and only sporadic cases were reported after July. In 1911–12 Major Robert E. Noble U.S.A. in charge of mosquito externination in the Canal Zone was in Porto Ricco superintending similar worl there and San Juan and its suburbs were largely freed from mosquitoes.

History —There is a fast growing sentiment in favour of an elective senate in place of the executive council appointed by the President of the United States and consisting of five Porto Ricans and of six Americans each of the latter being head of an administrative department—so that administrative and legislative functions are here combined Admission to American citizenship with full self government is the demand of a large political party and on January 17, 1012 the house of delegates voted against American citizenship except with full self government. The passage (March 15, 1912) by the Fed eral House of Representatives of a bill for the admission to the United States of sugar from any source duty free (which did not become a law) aroused much uneasiness in the island. In February 1011 the five native members of the council protested against the removal of restrictions upon land holdings by corporations, suspecting a move to strengthen the sugar trust? The Unionists in November 1911 defeated the Republicans electing all members of the house of delegates

In April 1911 there was a cigar makers strike near San Juan, and the men out refused to make any terms until the liberation from custody of a score of anarchists who were arrested for complicity in the assassination of a foreman

The governor since November 7, 1009 has been George Radchffe Colton (b. 1865) who served in 1899-1905 in the Philippine Customs was then in charge of the Dominican Customs receivership and in 1907-09 was insular collector of customs in the Philippines. The executive council includes M. Drew Carrel secretary Allan H. Richardson treasurer J. W. Bonner, auditor Wolcott H. Pitkin Jr., attorney general Edward M. Nainter, commissioner of education, John A. Wilson, commissioner of interior, and five native members, Jose C. Barbosa Luis Sanchez Morales, Martin Travieso, Jr., Rafael del Valle and Juan Vias Ochoteco

SECTION III FOREIGN COUNTRIES

Note -For convenience, the following accounts are given in the alphabetical order of the headings Dependencies are dealt with under their sovereign country For Greece, Bulgaria Servia and Rumania, see under 'Greece and the Balkan States' For Hungary see Austria-Hungary" For the various Latin Republics of South and Central America (Argentina Brazil, Chile etc together with Mexico, etc and Cuba, etc.) see that general heading

ABYSSINIA 1

The outstanding feature in the history of Abyssima in 1909-12—the only remaining independent native state in the whole of Africa for Liberia it independent can hardly be regarded as a native state-is that despite the incapacity of the Emperor Menelek (E B xviii 128) owing to an incurable malady to take any part in state affairs the country has not tallen into a condition of anarchy. Toward the end of 1910 the Empress Taitu who had controlled the council of regency was deposed as the result of a palace revolution and all the chiefs of Shoa the hereditary dominion of Menelek took oaths of indelity to Lij Yasu the grandson of the negus Ras Tessama the regent died in April 1911 when Lij Yasu then about 16 years old took control of the administration The authority of the central government continued with a few exceptions to be en forced in the most distant provinces Friendly relations have been maintained with all the neighbouring powers and during 1011 the boundary separating Abyssinian and Italian Somaliland was delimited from Dolo to the Webi Shebeli

Lack of casy means of communication hindered the development of trade and the commercial resources of Abyssina are as yet scarcely tapped. The continuation of the Jibut railway (E. B. 195a) from Dire Dawa to 3di. Vabba (the capital) made slow progress but the line reached the Hawash river in 1912. Jibuti remained the chief avenue of trade with Massawa next in importance while Gambela, the new trade centre for Western Abys. sinia has in a short period berome a thriving town. Gambela is a port on the river Baro one of the chief headstreams of the Sobat and lies 60 m. E. of the Sudan Abyssinian frontier. It is an enclave leased to the Sudan government in 1907. From June to November, when the Sobat is in flood a monthly steamer service is maintained between Gambela and Khar the Sobat is in flood a monthly steamer service is maintained between Cambela and Khar tum 880 m distant. The trade figures for Cambela were ££ 43 000 in 1910 ££ 65 000 in 1911 and ££ 75 000 in 1912 mainly representing the export of coffee (for consumption in the Sudan and of betsway in transit to Europe. With the rise of Gambela, the town of Gore 65 m £ of Cambela became the chief market of Western Abyssinia controlling the rich provinces of Jimma Wallega and Kaffa. In 1912 a branch of the Bank of Abyssinia was opened at Gore. The total trade estimated in 1905 at £1 000 000 had increased by 1910 to over £2 000 000. About 50 of this 1 via Jibuti. Hides and skins coff e rubber and way are the chief exports cotton goods the principal imports.

CANA)

AUSTRIA HUNGARY²

I ECONOMIC PROGRESS

The total population of the Monarchy in 1910 was 51 352 429 Its component parts Austria Hungary and Bosnia Herzegovina (annexed in 1908) are separately dealt with below but it is necessary to deal first with the progress of finance and defence and trade which represent the common affairs of the Monarchy under the political Austerck of 1867 and the commercial agreement last renewed in 1007

The Whole Monarchy

Finance - The finances of the Monarchy were complicated by the cost of the annexation of Bosnia and Herzegovina during 1908-10. The net expenditure during these three years amounted to £76,670 779 (£22 240,730 in 1908, £26,318,505 in 1909

¹See E B 1 82 et seq See E B in 2 et seg £28,111,544 in 1910) of which over 30 per cent represented extraordinary military and naval expenditure. Large sums were required to cover the cost of the annexation and the budget of 1911 provided for a further increase of expenditure on armaments. The estimates of expenditure for 1911 and 1912 were (1911) £22,533,000, (1912) £24,000 000. As in 1911 the net revenue from the customs amounted to £7 153 000 £15,380 000 had to be raised by the proportional contributions which, according to the agreement of 1907, were 63 6 per cent for Austria and 34 6 per cent for Hungary. The principal items of expenditure were. 4rmy (1911) £16 510 000 (1912) £17,100 000 Navy (1911) £5,136, 000 (1912) £6 220 000 Foreign Ministry (1911 and 1912) £660 000

Debt —At the end of 1910 the common debt amounted to £216 661 843 The annual charge amounted to £8 755,788 of which Hungary contributed £2 525 805

Army — The new army bill, which met with strenuous opposition both in the Austrian and the Hungarian parliament, became law in July 1912 By its provisions the annual contingent for the common army was increased from 103 100 to 159 500 men of which Austria would provide of 313 and Hungary 68 187 men. The term of active service was reduced from 3 to 2 years except for cavalry and horse artillery so that of the yearly recruits 134 500 would be enrolled for two years 10 000 for three years and 6000 who would serve in the navy for four years. The peace strength of the common army therefore was raised from 293 000 men (in 1911) to 350,000 and the war strength from 900 000 to 1 500 000 men The yearly contingents for the Austrian Landwehr and for the Hungarian Honved were also increased and the latter thoroughly reorgan In 1911 the Austrian Landwehr numbered 43 178 men and 4877 officers and staff and the Hungarian Honved 28 443 men and 4327 officers and staff These changes were calculated to raise the number of recruits for the whole army from 135 750 to 212 500 men or an annual increase of ,6 930 The duration of this act is for 12 years and the additional cost of the army during that period was calculated at £35 625,000 non recurring expenditure to introduce these changes amounted to £3 125 000, of which Austria would contribute £2 000 000 and Hungary £1 125 000 and the permanent expenditure was raised by \$3 100 000 yearly Serajevo the capital of Bosnia was to be strongly fortified In October 1912 the Minister of War asked for an extraordinary

Naty—In 1911 a new shipbuilding programme was adopted which included the building of 4. Dreadnoughts 'of about 20 000 tons displacement each (to be ready at the end of 1914) 3 cruisers of about 3500 tons 6 torpedo destroyers of about 800 tons, 12 torpedo boats and 6 submarines. The cost was estimated at £13 016 666 to be spread in instalments over the six years 1911-16. The instalment spent in 1911 was £2,201 667 and that in 1912 was £2,800,000

credit of fro 000 000 for war material and the rearmament of the artillery

At the end of 1912 the effective navy consisted of 1 "Dreadnought' 12 battleships, of which the three newest have a displacement of 14 268 tons each 3 armoured cruisers, 6 cruisers 7 torpedo gunboats 12 destrovers, 69 torpedo boats and 7 submarines. In the autumn of 1912 the Admiralty obtained an additional credit in order to replace the three oldest battleships laid down in 1893 by three "Dreadnoughts' (to be ready for use in 1915) and for the immediate building of three fast destroyers. This was an addition to the programme adopted in 1911, and the naval estimates for 1913 showed a further increase. The active personnel amounted to 17 500 men, and it was intended to bring up the non commissioned rank to a total of 20,000 within a year. A new fortified naval base is being prepared at Selenico on the Dalmatian coast.

Trade—The outstanding feature of the foreign trade has been the growing excess of imports over exports. This so-called 'unfavourable balance of trade 'which began in 1907 had grown steadily until in 1911 it amounted to over £32 000 000. Austro Hun garian economists have come to consider this state of affairs as a normal condition of the existing economic development of the country, which is going through the transition from a mainly agricultural to an industrial state. Elsewhere the excess of imports is mainly due to the large importation of foodstuffs and raw materials while the export of manufactured goods grows faster than the imports of similar character from abroad

In Austria Hungary however, the imports of manufactured goods grow faster than the exports and this is considered an unhealthy sign in its industrial development. Causes considered as contributing to this state of affairs are the increase of population the desire for better food, and the increasing number of people who abandon agricultural work so that the exports of agricultural produce have decreased enormously huge excess of imports in 1911 was partly due to a larger importation of raw cotton but also to an increased importation of agricultural produce. Another cause in the opinion of many economists has been the policy inaugurated by the tariff of 1006 which greatly This had not the anticipated effect of stimulating increased the duties on foodstuffs the agricultural productivity of the country so as to enable it to feed its own population, but its effect is felt in the extremely high price of foodstuffs This has increased the cost of production and handicapped the manufacturers in competing in foreign markets, while neighbouring agricultural countries have retaliated against the heavy duties on their products by imposing high duties on imports from Austria Hungary

The imports were valued in 1910 at £118 800 000 and in 1911 at £152 900 000 exports (1910) \$100 700 000 (1911) \$100 200 00 showing excess of imports (1910) \$18 100 000 (1911) \$32 700 000 They are classified in Table \$4

Table 4 Imports and Exports 1910 1911 classified

The value of the trade with principal countries (exclusive of bullion and specie) in 1911

The value of the trade with principal countries (exclusive of bullion and specie) in 1911 was as follows: Imports from Germany \$\frac{1}{2}\$ \$617 000 U 5 A \$\frac{1}{2}\$.070 000 United King dom \$\frac{1}{2}\$ \$56 000 India \$\frac{1}{2}\$ \$915 000 Ru sia \$\frac{1}{2}\$ \$880 000 Exports to Germany \$\frac{1}{2}\$ \$400 000 000 Italy \$\frac{1}{2}\$ \$200 000 United Kingdom \$\frac{1}{2}\$ \$911 000 Turkey \$\frac{1}{2}\$ \$230 000 Rumania \$\frac{1}{2}\$ \$165 000 The values of chief imports in 1911 were raw cotton \$\frac{1}{2}\$ \$130 000 wool \$\frac{1}{2}\$ \$128 000 woollen goods \$\frac{1}{2}\$ \$458 000 coal and coke \$\frac{1}{2}\$ \$27 000 occeals and flour \$\frac{1}{2}\$ \$259 000 seeds and potatoes \$\frac{1}{2}\$ \$57 000 machinery \$\frac{1}{2}\$ \$230 000 motals \$\frac{1}{2}\$ \$118 000 Exports provisions \$\frac{1}{2}\$ \$217 000 susar \$\frac{1}{2}\$ \$680 000 esas \$\frac{1}{2}\$ \$468 000 wood \$\frac{1}{2}\$ \$444 000 brown coal \$\frac{1}{2}\$ \$232 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$945 000 wooden wares \$\frac{1}{2}\$ \$188 000 \$\frac{1}{2}\$ \$400 000 frown coal \$\frac{1}{2}\$ \$180 000 cotton goods \$\frac{1}{2}\$ \$400 000 frown coal \$\frac{1}{2}\$ \$200 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$395 000 wooden wares \$\frac{1}{2}\$ \$318 000 \$\frac{1}{2}\$ \$400 000 frown coal \$\frac{1}{2}\$ \$300 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$395 000 wooden wares \$\frac{1}{2}\$ \$300 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$395 000 wooden wares \$\frac{1}{2}\$ \$300 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$395 000 wooden wares \$\frac{1}{2}\$ \$300 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$300 000 wooden wares \$\frac{1}{2}\$ \$300 000 cotton goods \$\frac{1}{2}\$ \$400 000 garments millinery etc \$\frac{1}{2}\$ \$300 000 wooden wares \$\frac{1}{2}\$ \$300

redemption of bank notes in gold. It does not compel the bank to redeem its notes in gold but throws on the governors the responsibility of deciding the moment when specie pay ment may be made obligatory without danger to the manical and commercial stability of the Monarchy and defines the procedure by which the legislative sanction for the enforce ment of specie payments is eventually to be obtained. It increases from £16 666 000 to f_{-5} 000 000 the non funded bank note circulation which the bank is entitled to issue without mourring the puntive 5 per cent tax and like the old charter it authorizes the bank to reckon among its metallic reserve £2 500 000 of foreign gold bills and other gold credits The funded bank note circulation remains fixed at two and a half times the amount of the total metallic reserve. The most important proviso of the new charter is the obligation imposed upon the bank to maintain the gold bill policy by which it has hitherto succeeded in regulating the rates of foreign exchanges in such a manner that despite the existence of an optional gold standard the Austro Hungarian currency has been kept on a par with that of gold standard countries Failure would entail immediate loss of the charter

Austria 1

Population — According to the preliminary results of the census taken on December 31 1910 Austria had a population of 28 567 898 inhabitants, showing an increase of 2 417 190 or 0 2 per cent over that of 1900 Every province shared in the increase the populations in 1910 being respectively as follows Lower Austria 3 530,698 Upper Austria, 852 667 Salzburg 214 997, Styria 1,441 604 Carinthia, 394,735 Carmola 525,083 Coastland 894 457, Tirol and Vorarlberg 1 092,292, Bohemia, 6,774 309 See E B 11 972

Moravia, 2,620 914 Silesia 756 590 Galicia, 8,022,126 Bukowina, 801 364, and Bal The principal feature revealed by the new census is again the steady decrease of the rural population and the massing of the inhabitants in great towns 14.130 201 or 40 5 per cent of the total population were living in places with less than 2000 inhabitants, while in 1900 the proportion of the rural population was 53 6 per cent

The number of emigrants between 1901-10 was 1,114 547 during the decade there

was a net loss of 660 575 persons

The census figures gave the population of the principal towns as follows Vienna 2 031 498 Trieste 229,475, Prague, 224 721, Lemberg 206 374 Graz, 151 668 Cracow, 150 318 Brunn, 125 008, Czernowitz 86 870, Pilsen, 81 165 Zizkow 72 195, Pola 70, 145 Linz 67 850 Przemysł 54 060 Innsbruck 53 104 Smichow 51 815 Salzburg 36 210 Wiener Neustadt, 32,869 Reichenberg 36 372

Birth rate (1910), 33 4 per thousand, death rate 21 2, marriage rate, 6

Education -At the end of 1909 there were 22 241 public elementary schools with 99 658 teachers and 4 314 323 pupils and 1 208 private elementary schools with 5712 teachers and 139 915 pupils. The number of children of school age was 4 744 521 and of these 234 912 remained without any instruction. In 8343 schools the language of instruction was German in 5917 Czech in 3001 Polish in 2504 Rutheman in 836 Slovakish in 530 Servian

in 647 Italian in 171 Rumanian in 3 Hungarian in 432 schools more than one
In 1911-12 there were 316 gymnasia with 105 002 pupils and 149 realschulen with
49 005 pupils

The number of students at the universities in the winter term 1911-12 was

with a loop Lemberg 5177 Prague 4414 in the Czech univer it v and 1965 in the German one Cracow 3404 Graz 2129 Innsbruck 1327 and Czernowitz 1229

Finance—The expenses of Austria have been increasing rapidly during the last few years and the budgets have been closing with large deficits. The proposals of the innance min isters for increasing revenue have not received the approval of parliament of that the

only course left open was borrowing with a consequent large increa e of the public debt. This increase has amounted during the last ten years to over \$80,000,000.

In 1911 the estimated revenue and expenditure were £117,43-8-4 and £11-474,864 respectively in 1912 they were £121,541,364 and £121,528,552 in 1913,£1,0,730,000 on both sides. At the end of 1910 the special debt of Austria was £287,981,904 and the charge

for interest and redemption amounted to £11 154 410

Agriculture—The harvest of 1911 was below the average on account of the abnormal drought Of the cultivated area 25 608 700 acres were arable land 20 345 000 acres were pastures and meadows and 17 100 000 acres were forests. The area under the chief crops and their yield in 1911 were as follows -

	Area (in 1 000 of acres)	\ \ \teld \ (in i ooo \ of cwts)		Area (in 1 000 of acres)	Yield (in 1 000 of cwts)
W heat	3 030	32 045	Maize	754	6 070
Rve	5 042	52 880	Sugar Beet (1910)	640	141 -30
Barley	2 732	32 400	Potatoes (1910)	3 105	267 3-8
Oats	3 686	45 300	Vinevards (1910)	558	56 034 (1000 gals)

The produce of silk-cocoons amounted to 4 609 871 lbs In 1910 there were 10 159 808

cattle 6 431 966 pigs and 2 428 586 sheep

Minerals -In 1910 the total value of the mining products exclusive of salt and petroleum was £13 145 000 and that of the furnace products was £5 956 000 The amounts of the principal minerals and metals produced were coal 13 573 000 tons (14 631 000 tons in 1911) lignite 24 722 000 tons (24 863 000 tons in 1911) iron ore 2 586 000 tons pig iron 1 482 000 tons graphite 32 600 tons lead 15 200 tons zinc 12 200 tons copper 1440 tons mercury 592 tons gold 391 lbs (401 lbs in 1911) silver 109 322 lbs salt 341 000 tons In Galicia 1 737 000 tons of petroleum were extracted valued at £1 850 000

The Austrian government has bought the radium producing pitchblende mines at Joachimsthal at a cost of about £94 000 and has thereby obtained what is practically a world's monopoly of radium. The annual production of one from these mines is estimated at 22 000 fbs. which should contain about 46 grains of radium.

Industries—During recent years the sugar industry has greatly developed. The number of sugar refineries was 196 in 1911 and 206 in 1912. The production of sugar amounted

to I 232 000 tons in 1909-10 and to I 522 000 tons in 1910-11 of which a little over 300 000 tons were produced in Hungary The area under sugar beet is also increasing yearly being I 000 000 acres in 1910-11 and I 100 000 acres (426 000 acres being in Hungary) In 1910 64 new industrial companies with a capital of £5 910 000 and in 1911 58 companies with a

HUNGARY

capital of £5 320 000 were established In 1910 and 1911 14 new foundries and engineering works and 14 new textile and clothing establishments were opened. The building trade works and 14 new testing activity. In 1909 there were 1999 breweries producing 434 170 000 gallons of beer and 51 566 distilleries producing 34 106 000 gallons of alcohol Communications —At the end of 1910 Austria had 20 486 m of railways of which 7939

m were state railways 544 in companies lines worked by the state and 3287 m companies line worked by the companies. The revenue from the state railways was £26 000 000.

The length of the navigable rivers and canals was 4055 m of which 825 m were navigable for steamers. A bill was passed by the Austrian Parhament in 1912 for extending and improving the waterways and canals on which £15 000 000 would be spent during the next
15 years The principal works to be executed are in Galicia Bohemia and Lower Austria In Galicia the completion of the Vistula canal by building a canal from Cracow to Oswiecim was undertaken and also the building of portions of navigable connection between the Oder and the Dniester Work on the Cracow Oswiecim canal began during 1912. The works in Bohemia comprise the canalisation and regulation of the middle Elbe from Melnik to Jaromer the completion of the Moldau canal in the district and town of Prague and the continuation of the Moldau canal from Prague to Stechowitz. In Lower Austria the

Vienna Danube canal is to be enlarged and a winter harhour to be built at Vienna

Shipping and Nangation — At the end of 1911 the mercantile marine of Austria included 1794 vessels of 409 864 tons and a crew of 9776 mtn. Of the total 338 vessels of 390 333 tons were steamers and 1456 of 19 531 tons sailing vessels. A number of 160 steamers of 368 916 tons were engaged in the oversea trade. At Trieste in 1911 1. 998 vessels of 4 271 073 tons entered of these 86 vessels of 283 176 tons were British

Hungary 1

Population —According to the census taken on December 31 1910 Hungary had a population of 20 886 487 an increase of 1 631 928 or 8 3 per cent over 1900. In 1910 there were 742 899 births 490 680 deaths and 179 53, marriages Emigration is decreasing (1909) 113 515 (1910) 96 3 4 (1911) 54 173 Allowing for the number who returned the net loss was (1009) 96 330 (1910) /1 602 (1911) 23 800

The census figures for the principal towns were Budapest 880 3,1 Szeged 118 328, Szabadka, 94 610 Debreczen 92 7 9, Pressburg 78 2-3 Zagrab 79 038 Temesvar 7 555 Kecskemet 60 934 Arad 03 160, Hodmezo Vasarhely 0 ,445 Nagyvarad, 64 160, Kolozsvar 60 808 Pecs 40 8 Uppest 55 197 Miskolcz 51 459 Fiume 49 806 Kassa 44 211, Bekesesaba 42 500 Gvor 44 300, and Brasso, 41 050

Lducation—In 1910 there were 2792 infants schools with 243 104 infants and 18 068 elementary schools with 35 554 teachers and 2 172 897 pupils. Of the 16 455 elementary schools in Hungary Proper Hungarian was the language of instruction in 12 804 schools Rumanian in 2331. German in 443. Slovaki h in 429. Servian in 271. Rutheman in 69 and other languages in 18 schools. There were 187 93 minasia with 63 338 pupils and 43 real-schulen with 14 424 pupils. The number of students at the universities in the winter term 1910-11 was Budapest 7548. Kolozsvar 2359 and Zigráb 1287. A bill for the establishment of universities at Pressburg and Debreczen was voted by parliament in 1911. Finance—The estimates for 1911-1912 were Revenue (1911) £69 687 797. (1912) £77. 180 000. Expenditure (1911) £69 685.7-0. (1912) £77. 300 000. These figures show an enormous increase both in revenue and expenditure over those of ten years before

enormous increase both in revenue and expenditure over those of ten years before

The chief branches of estimated expenditure in 1912 were — National Debt £11 903 000 Ministry of Commerce £19 530 000 Public Worship and Instruction £4 0,5 000 Ministry of War £2 638 000 Contribution of Common Affairs £3 751 000 Debt — At the end of 1909 the public debt amounted to £211 474 000 In 1910 a new

In 1910 a new

loan of £-0 833 000 was raised
Agriculture—The harvest of 1911 was spoilt by the abnormally dry season The fruit crop was poor and bee keeping most unsuccessful

The area under the chief crops and their yield in 1911 were —

	Area (in 1 000 of acres)	Yield (in 1 000 of cwts)		Area (in 1000 of acres)	(in I C
XX/L 4		702.550	Marze	7.106	8181

	(in 1 000 of acres)	fin 1 000 of cwts)		(in 1 000 of acres)	Yield (in 1 000 of cwts.)
Wheat	8 914	32 924	Maize	7 196	81 818
Rye	2 970		Potatoes	1 744	100 100
Barley	2 922		Vineyards (1900)	870	54 716 (1000 gals)
Oats	2 931		Sugar beet (1910)	294	58 440

¹ See E B xm 984 et sea

In 1911 about 24 000 acres of fresh land were cultivated as vineyards 2 770 000 gallons of the famous Tokay wine were produced that year In 1910 95 620 cwts of honey were produced the produce of silk-cocoons amounted to 2 700 000 lbs

Considerable sums were provided in the budget for irrigation drainage of marshes for estry and cattle breeding. Great efforts have been made to improve the dwellings of agricultural labourers and in 1911 alone 3600 cottages were built with state assistance.

In 1911 there were in Hungary 6 183 424 cattle 2 000 611 horses 17 830 asses 935 mules 6 415 179 pigs 7 696 880 sheep and 484 171 goats

Mining—The total value of all mining and furnace products in 1910 was £6 364 000 The quantity of the leading minerals and metals produced was lignite 7 617 000 tons coal 1 282 000 tons iron ore 1 876 000 tons pig iron 494 000 tons gold, 6 690 lbs silver 27 603 lbs and salt 232 000 tons

Manufactures —Hungary is primarily an agricultural country but its manufacturing industries show a steady development Pursuing its programme of encouraging manufac tures the government during 1911 assisted factories to the amount of £1 875 000 in the shape of loans grants of machinery exemption from taxation etc and the question of developing the water power of the country for industrial purposes has been under official consideration. Hungary has suffered less than other countries from industrial unrest. A salient feature during the last few years has been an enormous development in the building trade. Thus in Budapest done six hundred new houses were finished in 1911.

Foreign trade — The special trade of Hungary during 1910-1911 was

	Import	s from	Exports to		
	1910	1911	1910	1911	
All countries Austria only	£74 014 000 56 15 000	£83 605 000 61 465 000	£68 938 000 51 253 000	£72 769 000 55 540 000	

In 1910 the value of the export to Hungary showed the following percentages Austria 75 31 Germany 8 38 India 2 15 United Kingdom 1 74

Communications—At the end of 1911 there were 13 022 m of railway open for traffic

There were 7070 m of state roads and great attention has been paid to their improvement. The government has given up the zone tariff on railways and has raised the price of fares for passengers by one third. When the zone tariff was introduced in 1889 the number of passengers increased enormously from 5 500 000 in 1888 to 16 000 000 in 1890 35 000 000 in 1900 and 67 000 000 in 1910 but nearly the whole of this increase went to the main lines. In consequence these lines became congested while the secondary lines which were expected to profit by the tariff remained as unprofitable as before

The harbour and docks at Fiume have been enlarged and improved. The building of two large shipbuilding docks has been begun and the government has bought land for the erection of a shipbuilding yard. Improvements in the harbour of Budipest were in 1912 to be undertaken shortly and it was also proposed to enlarge the famous Kettenbrucke

and to construct another bridge over the Danube
Shipping and Navigation—In 1910 the merchant fleet numbered 30° vessels of 111 226 tons 114 vessels of 109 831 tons being steamers In 1910 35 1-0 vessels of 4 552 114 tons entered at all ports while Fiume alone was entered by 17 880 of , 031 361 tons

Bosnia Herzegovina 1

Constitution —The constitution promised to Bosnia Herzegovina at the time of the annexation was proclaimed on February 22 1010 It extends to them the main provis ions of the Austrian Constitution as regards civil rights and grants the provinces a local Diet (see History below) to deal with all local matters The bills passed by the Diet must receive the assent of the Austrian and Hungarian governments before they can receive the sanction of the Crown and all matters relating to the common affairs of the Monarchy are excluded from its legislative competence

The provincial government has four departments for internal affairs finance justice and public works while the chief executive is vested in the Austro Hungarian Finance

Minister who is also the governor of the provinces

Population -On December 31 1910 Bosnia Herzegovina had a census population of 1 898 044 an increase of 329 95 or 21 04 per cent over 1895 In 1910 there were 77 167 births and 51 834 deaths The population of the principal towns was Serajevo, 51, 872, Mostar, 16 385 Banjaluka, 14,793, Tuzla 11,333 and Bjelina, 10,069

1 See E B iv 279 et seq

Agriculture - Nearly 88 per cent of the whole population is engaged in agriculture The area under the chief crops and their yield in 1911 were -

	Area (in 1 000 acr s)	Yield (in 1 000 cwts)		Area (in 1 000 acres)	Yield (in 1 000 cwts)
Wheat	194	1 428	Oats	230	1 568
Rye	30	192	Maize	515	4 274
Barley	182	1 -92	Potatoes	50	1 270

Cattle breeding and sheep farming are important. In 1910 there were 2 499 422 sheep

Cattle breeding and sneep larming are important.

1 393 008 goats 1 308 930 cattle 52, 2,0 pigs and 221 9,1 horse.

Trade—The special trade of the provinces (with Austria Hungary and foreign countries).

II POLITICAL HISTORY, 1909-1912

The Austro Hungarian Monarchy - The energetic and aggressive policy of Baron Accepthal in annexing Bosnia and Herzegovina (Oct. 13, 1908) was certainly expensive but it was successful and its very success won public opinion both in the The annexa Dual Monarchy itself and without To soothe Turkey's susceptibilities tion of Bosnia a sum of over two millions sterling was paid to her (Feb 26 1909) but when Herzegovina Servia and Montenegro also put forward claims for compensation at seemed for a time that war was inevitable seeing that Baron Aerenthal would recognise no good ground for the claims It only demonstrated the strength of the Triple Alliance that Russia on the recommendation of Germany withdrew her support from Servia and when Servia abated her claim (March 30 1900) it was no difficult task to settle matters with Montenegro (April 6 1000) The step pregnant with so much for Austria Hungary which Baron Aerenthal took in October of 1908 was an accomplished fact by the beginning of April of 1000 and the conferment upon him of the title of Count by the Emperor on the 18th of August 1909 was a fitting reward for his work

To maintain the status quo in the Balkans was the aim of Austria Hungary through out the years 1910 and 1911 to maintain the stitus quo was the policy bequeathed by

Count Aerenthal's successor

Count Aerenthal on his death in 1912 to his successor Count Berchtold 1 The new Foreign Minister addressed the Delegations for the first time in April 191 but not until September 24 1912 did he make a striking pro nouncement It was to the effect that as affurs in Macedonia and Albania

were becoming troubled Austria Hungary had proposed to the Powers an exchange The object in view was to encourage Turkey in the of ideas on the Balkan situation reforms it was then inaugurating to restore order in its European possessions

police

Count Berch It was all to be done by means of the unanimous cohesion of the Powers told s Belkan on the basis of maintaining peace and of the st tus quo in the Balkans

In short it was intended to promote an agreement between all the Powers in order to find a via media between the sovereign rights of Turkey and the legitimate interests of the Balkan peoples All the Governments signified their approval of the sugge tion But it came too late. By the middle of October hostilities between the allied Balkan States and Turkev had already commenced The results on Austro Hungarian toreign policy are deal with elsewhere. It remains to trace the course of domestic politics in Austria and Hungary from 1909

Austria -- Whereas in 1909 the prestige of Austria Hungary as a Power in Europe was enhanced by the policy of Count Aerenthal its internal condition was greatly

troubled by reason of the continued racial strife and opposition. In The lan Austria the main point at issue continued to be as it had long been the guage ques tion la Bolanguage question. On February 3, 1000 two laws were introduced into hemia the Reichsrat regulating the language question in Bohemia and intending

¹ Count I copold Berchtold born March 18 1863 Secretary of Embassy in Paris 1895 Councillor of Embassy in London 1899 at St Petersburg 1903 Ambassador at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy in London 1899 at St Petersburg 1903 Councillor of Embassy 1905 at St Petersburg 1905 at St Peters burg 1906 Foreign Minister of the Dual Monarchy February 19 1912

to improve the administration — It was proposed to divide Bohemia into numerous districts according to language—there were to be 139 Czech, 95 Germans and 5 mixed areas of thas kind — The Bills were debated on February 5th and the Czech deputies condemned the scheme in unmeasured terms and raised a storm in the House by their wild and unruly conduct — You are a disgrace to Austria—flew across the floor from the German benches—and the sentiment only added fuel to the flame — So impossible did the position become that the House was closed

Baron von Bienerth (b. 1863) the Premier, sought to win some measure of support from all parties by reconstructing his Cabinet so as to include representatives from every party Baron von Hardt became Minister of the Interior Baron tion of the von Bilinski went to the Treasury Dr von Hochenburger obtained the Bienerth portfolio for Justice Count Sturgkh became Minister of Education Herr Cabinet. Wreba of Railways Dr Weiskirchner, of Commerce Marshal von Georgi, of Defence Herr Ritt of Public Works, and Herr Braf of Agriculture But the Czechs were obdurate and asked as the price of their support the re-opening of the Bohemian Diet which had been closed because of German obstruction. To this demand the Germans were deaf and hence the Czechs in the Ruichsrat had recourse to the same policy to which the Germans in the Bohemian Diet had resorted Nevertheless the Government maintained itself against a vote of censure on its Bonian land policy, which was moved by Dr Shushtershitch, one of the Slav deputies and defeated

The Ministry continued in office for a little over eight months (Feb 11th to Oct 31, 1909) It broke up over the language question on which the pure German Crown Lands—Upper and Lower Austria Salzburg and Vorarlburg—took Czech obup a firm stand A law passed the Diets of these provinces making German struction in the Reichs the only language of the schools and of the administration The Imperial rat. Cabinet recommended the Bill for the sanction of the Crown despite the opposition of the two Czech ministers, who being defeated in the Cabinet, forthwith resigned (Nov 2d) The victory of the German element in Austria stirred up anew the hate of the Czechs, whose national feelings had been strengthened by the Congress at Warsaw held earlier in the year (Aug 1909) They accordingly decided on a policy of thoroughgoing obstruction in the Imperial Diet and members of the party made speeches of 12 and 13 hours duration (Dec 15-19 1909) In consequence of this policy the House sat for 86 consecutive hours virtually doing nothing To make such a course impossible in the future new rules of procedure were adopted (Dec. 19, 1909)

The language question had occupied so much parliamentary time that little was left for the consideration of the Budget—But the Budget this year demanded more attention than usual—For the first time since 1888 there was a deficit the amount being over six millions sterling—The acquisition of Bosnia and Herzegovina was responsible for this to some extent also the cost of the administration, which was steadily increasing—owing largely to national jealouses. In many cases one school would suffice where there were actually two and sometimes even more but since it became necessary to give each nationality its own schools the difficulty could not well be avoided. New revenues were therefore necessary, and on the 3d of December 1909 a provisional budget for six months was agreed to, which

As in the House itself so in the country racial antagonism was particularly marked during 1909 and it must be admitted that the Bienerth ministry showed more energy in repressing outbursts than many of its predecessors. Especially trouble some were the student riots at Prague during the first three months of the year. Not till the police charged the crowd with bayonets (March 28th) was there a cessation of hostilities. The student differences were only one aspect of the racial feuds which expressed themselves in other ways as well. For instance in January, there was an attack on Czech postal officials at Eger at Cracow the Czech popula tion resolved on a boycott of German commercial houses on January 29th Baron Stern berg a prominent Czech leader, roused German feeling by declaring that Bohemia was

inhabited by Czechs and robbers Though for a time there was a cessation of hostili ties race opposition smouldered That it had not abated is proved by the fact that the conference of Austrian Catholics fixed for the first week in September in Vienna had to be postponed because it was feared that national ill feeling would break it up

The Czechs were not the only discontented element in Austria There were also difficulties with the Italian subjects of the Empire who had long been clamouring for an

Italian University at Trieste But the Slav nationalities had also put for The Italian ward a similar request and while the Government were willing to meet the University Italian demand they were by no means disposed to listen to the Slavs Onestion Hence they were in somewhat of a difficulty However a Bill was intro duced in the Reichsrat (Jan 20 1909) for the establishment of an independent Italian Faculty of law to be attached to the Vienna University But this did not con tent the Italians chiefly because they considered the capital unsuitable, and more than that because in the proposed scheme lectures in German were optional So the scheme was shelved for the moment and the Italian agitation continued Several alternative proposals were put forward by the Government but none of them found acceptance and on May 14th 1910 two hundred Italian students demonstrated in front of the Parliament buildings in favour of a full university at Trieste No sooner did the Italians recommence their campaign than the other nationalities again put forward sımılar demands The Czechs who already had a university of their own at Prague clamoured for a second one at Brunn the Ruthenians also demanded a seat of learning though they were not agreed as to the locality the Slavonians pressed for a University at Laibach and the Rumanians asked that the University of Czernowitz should become The Government could not possibly satisfy all the a Rumanian academic centre demands partly for lack of funds and partly because it was not politic to accentuate national differences still more As it was student riots were numerous enough on July I 1910 a serious conflict between Poles and Ruthenians occurred at Lemberg

The Agram trial was another illustration of the determined policy of the Government to maintain order with a firm hand The dissatisfaction of the Slav elements in the

The Agram Trial.

Empire expressed itself in sympathy with the Servians and it was alleged that an extensive Slav movement was on foot to wrest Croatia Slavonia and Bosnia from Austria Hungary in order to join them to Servia with the view of forming a Greater Servia Fifty three persons mostly traders and teachers were accused of high treason the trial lasted from March 3 to October 5 1909 and thirty one of the accused were found guilty and sentenced to penal servitude evidence was somewhat flimsy and an appeal was lodged against the decision which ended (Nov 2 1910) in the quashing of the sentences

The Servian conspiracy had naturally An echo of this case was the Friedjung trial been commented upon in the press and among others Dr Henry Friedjung a publicist

Friedlung

of some note had written an article on the subject in the Neue Freie Presse of March 25 1909 in which he accused the leaders of the Serbo Croatian Party (Dr Tuskan and Messrs Vinkowitsch and Supilo) of having received subsidies from the Servian Government The three persons named brought

an action for libel against Dr Friedjung (September o 22 1909) in the course of which it was proved that the documents on which Friedjung had based his accusations had been forged. He thereupon withdrew his charge and the case was dropped

The racial conflicts were as bitter as ever in the year 1910 Nevertheless the smooth drift of foreign affairs left the Government free to become master in its own house

Emperor's eighueth birthday

Moreover the personality of the Emperor did much to give it support in directly the celebration of his eightieth birthday (Aug 18 1910) only heightened the patriotic feelings of large masses of people. Hence the work of the Government was facilitated somewhat and it made fair progress It strengthened the army and navy it made commercial treaties with the Balkan

States and it promulgated a constitution for Bosnia Herzegovina For defence no less a sum than twelve millions was voted, besides about £900,000 annually in addition and

for social insurance some three to four millions sterling The Reichsrat therefore passed bills for extensive loans and on June 24th the Budget for 1910 was agreed to

In both Austria and Hungary the ministries appeared to be stronger than the Opposi tion parties even though their majorities were very small. The smallness of the majorities however rendered their position so uncertain that when a question arose on which the parties were not united the situation might Question become impossible. As a matter of fact it did in Austria, the stone of stumbling was the Canal policy of the Government As early as 1901 the Korber minis try had overcome obstruction by holding out the promise of an extensive programme of public works more especially the construction of numerous canals in which Czechs and Germans were alike interested But the cost of the scheme had proved too high and though the necessary bills had actually passed the work was never carried out. Part of the plan had been the canalisation of Galician waterways and the Poles now pressed The resolution of Moraszewski was carried by -5/ for their realisation (Nov 24 1010) votes to 128 and for thirteen days longer the Cabinet held out hoping that the matter would not be insisted on The Poles however were determined to make Pesimantian the most of their victory and on December 1 th the Bienerth ministry of the Blenerth The Emperor requested it to carry on the work of government Ministry until a successor should be appointed. In the meantime the House agreed to a provisional budget for three months (Dec 16th) and also extended the Charter of the Austro Hungarian Bank until February 1911

The reason for the Government's defeat on the Canal issue was the impossibility of uniting the Germans and Czechs both of whom would in normal circumstances have voted for the Government on this question. But they were as far as ever from any agreement on the language question. An attempt on the part of opposition the Premer to unite them by a personal appeal to the leaders of the opposing in Bohemia clubs proved fruitless. Keen as the opposition was in Vienna it was keener still in Prague where as a result of the obstructionist policy of the Germans the Bohemian Diet had to be adjourned after sitting four days (Feb 8 1910) becau e it could do no business. From February 8th to September 30th the Diet was not in ses sion and as a result since the local budget could not be got through the House the Executive had to decide on a policy of economy which included deleting items of expen diture for humanitarian and educational purposes No less a sum than three quarter of a million sterling was thus eliminated and one consequence was that 280 lunatics had to be released from the State asylums Nevertheless the language struggle continued On September 20 1910 a conference took place at Cracow between Germans and Czechs with a view to some settlement the Germans intimating their readiness to meet the other side half wav Thereupon the Diet was summoned for September 30th October 20th the conference was renewed and a temporary agreement was arrived at According to this all self governing communities should choose their official language as they wished In Prague however all notices should be issued in both languages but It seemed as the seal of the city and the names of the streets were to remain Czech though some settlement was in view But on November 17 1010 the Germans declared their inability to accept the compromise and once more the Diet had to be closed (Dec 14th) without any provision having been made for the financial needs of the year The result was that Bohemia had to face a deficit of over two millions sterling

The struggle in Bohemia was embittered by an agitation to throw off the authority of the Catholic Church (Los von Rom Bewegung) On the 20th of April a mass meeting was held in Johannesberg which resolved on a policy of leaving the Church and fixed May 15th as the day appointed for the purpose On May 6th and fixed May 15th as the day appointed for the purpose On May 6th there was a demonstration in front of the Parliament Buildings by several hundred divorced men and women, who demanded that the Civil Code should be so amended as to allow of divorced persons remarrying and threatened to leave the Church otherwise. From the 9th to the 13th of September the Congress of Austrian Catholics met at Innsbruck and on the 11th a counter demonstration of over

a thousand persons was held demanding the separation of the State from the Church and freedom of the schools from clerical influence

The racial conflict in Bohemia found its counterpart in Galicia and Moravia, where hatred of the German element increased in strength, more especially after the 500th celebration (July 15th) of the Battle of Fannenberg 1 which recalled ancient hatred and showed itself in persecution In one community, Themenau in Lower Austria, the elected corporation was removed (July 28th) because of its anti German excesses and was replaced by a Government commissary

The promulgation of a constitution for Bosnia Herzegovina was in striking contrast The two provinces had been annexed in 1908 and the constitution to this last fact was proclaimed on February 2 1910 The Diet chosen by universal suffrage is competent to deal with provincial finances taxes railways police of Bosnia Herzegovina. public works civil and criminal law, always subject to Austrian or Hungari an veto There are three divisions of the electorate and in all three the number of representatives in the Diet is fixed according to the number of inhabitants professing each religion the Jews have one seat the Roman Catholics sixteen the

Mussulmans twenty four and the Orthodox thirty one The Government appoints also twenty members including the spiritual heads of the four religious communities The President and Vice Presidents of the Assembly are appointed by the Emperor every session each religion being represented and holding the presidency in turn. On June 14th the new Diet was opened by the Emperor in person the occasion being marked by an attempt on the life of the Governor General Vareschamn, and one of the first acts of the Diet was to pass a unanimous resolution declaring the constitution too narrow and not in accordance with the wishes of the people

But the Austrian Cabinet crisis of December 1910 required immediate attention and little regard was likely to be had to the demands of the new Diet though it did

The New Cabinet in Austria receive a good deal of sympathy On January 9 1911 the Cabinet was reconstructed Baron Bienerth remained and portfolios were given to members of the German Czech and Polish parties But the Slav element was trong in the Cabinet the Germans therefore disliked it and already This passed smoothly enough but further

on its first appearance opposition was threatened. Its immediate work was to renew the charter of the Austro Hungarian Bank effective work was impossible owing to the opposition of the Czechs and the Social Democrats The Ministry accordingly appealed to the country and in

The General Election of June 1911

June the General Election brought about a somewhat different rearrange ment of parties in the House The German Nationalists obtained 100 seats the Christian Socialists (Germans) 73 the Social Democrats (Ger

man Club) 49 the United Bohemian Club 84 the Social Democrats (Bohemian (lub) 25 the Poles to the Social Democrats (Polish Club) of the Ukraine Union 8 the Croatio-Slavonian Coalition 27 the Dalmatian Club 7 the Unio latina 21 and Inde The re ult was that the Social Democrats became the most influential Moreover Baron Bienerth having been defeated at the polls was succeeded party

Dr Stürgkh Premier

by Baron Gautsch² as Premier He did not hold office long the task of attempting to unite Germans and Czechs was utterly hopeless and on October 31 1011 Baron Gautsch was succeeded by Dr Sturgkh 3 The

change of personnel did not denote any change in policy Parliamentary business showed the same characteristics this year as it did in previous years—obstruction and no progress and when the end of the year approached no budget had been passed

It was not very different in 1912 when the great bone of contention was the Army

¹ Battle of Tannenberg on July 15 1510 where a Polish Lithuanian army defeated 80 000 German Knights under the leadership of Ulrich von Jungingen

2 Paul Gautsch von Frankenthurn born February 26 1851 in the Ministry of Education 1885-1893 and 1895-9, made a peer 1890 Premier and Minister of the Interior 1897-98 Premier 1904-06

3 Karl Sturgkh born October 30 1859 entered Ministry of Education 1880 Minister of Education 1909

Bill, which nearly upset the Sturgkh administration The catastrophe was averted only by the personal appeal of the Emperor The difficulties of the situation were accentuated by the serious misfortune that befell Count Sturgkh who was threatened with blindness (May 15, 1912) and it was therefore necessary to appoint an acting Premier in Baron von Reinhold, the Minister of the Interior After much negotiation, the Army Bill was passed and the crisis averted The outbreak of the war in the Balkans in October 1912 turned attention to matters of foreign policy and the internal strife of factions flagged in consequence

Economically the year 1911 was one of fair prosperity chiefly because of the two successive good harvests (1910-11) The total volume of trade was large though

Social and Economic Progress. manufacturers and traders complained that the margin of profits was inade quate owing to the continued high prices of food and the remarkable rise in rents in most of the large towns. In consequence of these burdens on the working classes the Socialists organised a demonstration in the summer

The crowd became so threatening that it was necessary to order a cavalry charge. When the House met the incident was discussed and during the sitting a man in the gallery fired at Dr. Hochenburger the Minister of Justice.

Commerce was favourably affected by the various commercial treaties passed in 1000 and 1010. The treaty with Survia came into force on January 24, 1011 and put an end to the long tariff war. Austria stood to gain chiefly by the importation of slaugh tered cattle from Servia. These would be supplemented by the exportation of cattle from Bulgaria by the treaty which came into force on April 22, 1012. With Montenegro likewise a commercial treaty was ratified on March 4, 1012.

As regards social legislation the only enactment of importance was the law (June, 1910) forbidding night work for women according to the terms of the international agreement of Berne. It came into force on August 1, 1911 (in the case of the raw sugar industry it will take effect in 1914)

Hungary —In Hungary the prolonged political crisis of 1000 came to an end on January 17-18 1010 with the succession by Count Khuen Hedervary¹ to the Premier

The Khuen Hedervary Cabinet. ship His Cabinet was one of moderate views yet when the House met (Jan 24 1910) it passed a vote of lack of confidence in the new ministry by an overwhelming majority. The Premier replied by adjourning the House for eight weeks. The time was utilized by the establishment of the

'National Party of Work' under the leadership of Count Tisza - It appealed to the nation for support pointing out that it was impossible to realize the demands of the Independent and Kossuth parties seeing that the Crown would never agree

The National Party of Work.

to the Hungarian word of command and that an independent Hungarian Bank had not sufficient credit. It was necessary to form a party which should bring about harmony between the Crown and the people and make onstructive policy. On March 21st the House was recalled to be dissolved.

possible a constructive policy On March 21st the House was recalled to be dissolved and the violent conduct of the members of the Kossuth and Justh parties followed by street noting by the Social Democrats disgusted moderate men still more

On March .2d the House was dissolved and when in June the new elections were held the Government received a large majority—246 seats out of a total of 413 whereas the Independent Party in its two sections received only 85 Consequently

the Independent Party in its two sections received only 85 Consequently the Hungarian Parliament was able after a long interval to get legislative work done. The House was opened on June 25 1910 and the speech from the Throne referred to "the most urgent and immediate task of regulating the suffrage question anew." The Government promised to introduce a bill 'on the basis of univer

sal suffrage which while being in full consonance with the unity of the national character of the Hungarian State will vet be in accord with the demands of the development of democracy. Other measures that were passed included a bill sanctioning foreign loans and the Census Bill

¹ Count Caroly Khuen Belast Hedervary born June 23 1849 entered Parliament 1875 Ban of Croatia 188,-1903 Premier 1903 and again in 1910

The Independent Party however still maintained their old programme and resorted to obstructionist methods in order to make themselves heard. In November 1911 things

Obstruction in Parlia ment. came to such a pass that it was resolved to adopt new rules of procedure to make obstruction impossible. The Opposition was unyielding and the House witnessed disgraceful scenes the upshot of which was that the Cabinet came to an arrangement with the Kossuthists with regard to the

Army Bill But the basis of this agreement the Crown was unable to recognise where upon Count Khuen Hedervary tendered his resignation (March 6, 1912). At the request of the Crown however the Premier agreed to go on acting as First Minister especially as the Emperor threatened to abdicate if he would not (March 31 1012). It was intended that he should try to smooth over the difficulties of the situation. But difficult as the state of affairs was it was intensited by the policy of the Government in Croatia. In December 1911 the General Elections for the Diet had been held, and the

Absolutism in Croatia. Government were defeated obtaining only 21 seats whereas the Serbo Croatian coalition obtained 24 and the Allied Croatian Right ^7 Hence the Diet was dissolved at the end of January 1912 without meeting Preparations for a new election were at once commenced but the Govern

ment fearing a recurrence of the results stopped the electioneering and suspended Croatian autonomy. A new Bin W Cuvaj was appointed its Royal Commissioner (April 3 101) and virtually a despotism was established. A movement of protest at once grew up. By the middle of April 101-11 was beginning to take practical measures such as the proclamation of a boycott of all goods coming from Hungary.

The Khuen Hedervary Cabinet was unable to maintain itself and on April 17 191 it resigned. Three days later the Fmperor King entrusted Dr de Lukacs. Mini ter of

Resignation of Khuen Hedervary Finance with the formation of a new Cabinet. The mini ters of the late cabinet joined the new ministry and Dr. Lukics attempted to find means of coming to some understanding with the Kossuth Party with a view to intro

ducing the Army Reform measure (April 21 101) The negotiations failed and the only method of overcoming obstruction in the House seemed to be by an abusive interpretation of the standing orders. Count Tis a who favoured such a course was elected President of the Chamber (May 1012) and before

In the lakes Ministry

long he carried through his policy with great success. On June 4 101 he secured the adoption of the Army Bill and—after 56 Opposition deputies had been removed by the police and the rest had left the Chamber—of a bill to increase the annual contingent of Honved recruits. His action was approved by the Monarch (June 1 1912) but the Opposition were by no means cowed. When Parhament met after the recess (Sept 1 1012) the same factics were resorted to by the dissified party and similarly met by the President. For two days the Chamber piesented a scene of disorder and on Sept 18th the majority of the Deputies adjourned sine due.

Despite these proceedings the Hungarian Minister of Finance was able to declare (Sept 25, 1012) that the fiscal year ended with a surplus of over \frac{1}{2} millions sturling

That was accountable by the fact that the year was on the whole a prosper ous one for Hungary One way in which the improved conditions showed themselves was an enormous development in the building trade. In Buda Pest alone no less than ooo new houses were completed many of them very large ones But prices of the necessaries of hie particularly of meat continued to rule very high in the towns and in all probability the high price of food contributed to the presperity of farmers. That agriculture was a profitable business was evidenced by the immen e

(M EPSTEIN)

BELGIUM 1

Population - The total population of Belgium according to the census returns of Dicember 31 1910 was 7 423 /84 an increase of 10 01 per cent since the census of 1900 Of these 822 005 spoke Flemish and 2574 805 French 100 997 spoke both Flemish and French and there was besides a very small minority who spoke German. The population of the four chief cities with their agglomerations (Salenbe) were -Bru els 7 0 34, Antwerp 308 255 I 1ege -4 357 Ghent 10 4-8

Political History — The Constitutional provisions which came into force at the death of King I copold II (see E B xvi 461) on December 1, 1900 were a good illustration of the theory that in Belgium all the powers in the State are delegated (Art 25) Until the oath has been administered to the new king before the Chambers, the prerogatives of the head of the State under the constitution are vested in the Cabinet Council (conseil des Ministres) by whom they are exercised in the name of the nation (Art 79) They are empowered to make decisions and give assent to laws. Belgium virtually ceases to be a monarchy during the interregnum which lasts at most for ten days

On December 14 1909 Leopold II was still able to affix his signature to the act which put recruiting for the army on a new footing a reform on which he was deeply set date marks the end of the sys em of drawing lots and paying substitutes. Military service is now required of one son out of every family though some especially ecclesiastics are still exempt. The period varies from fifteen months to two years. The average peace effective of the army consisted in 1912 of about 44 595 men with a yearly levy of 17 481 men the total effective strength in 1911 was given as 182 770 officers and men Proposals were being mooted however for putting every able bodied Belgian through a term of military service which would greatly increase the fighting strength of the country 2

See E B ut 668 et seq

When the Belgian legislature met in November 1912 and the Premier M de Broqueville When the Beigian legislature met in vovember 1912 and the Freiher in the Doquevine made his ministerial declaration of policy he made a pointed reference to the probable need of strengthening the army which formed the theme of an important article on December 3rd in the London Times from the pen of its military correspondent. Recent events said M de Broqueville had compelled the Government to inquire whether the state of their military organisation was such that it could meet the necessities of the day. In allusion to the guarantee of Belgian interest and neutrality by Great Britain by the Treaty of 1839 he pointed out that the grouping of the Great Powers had resulted in alliances and ententer which might in case of war remove from the guarantee the value which the neutrality of

There has been little change in Belgian policy with the new reign though in character King Albert is altogether unlike his predecessor. The new King's civil list as provided by the Constitution (Art 77) was fixed for the entire reign at the same amount as that of Leopold II—f132,000 per annum

The Government has remained in the hands of the Catholic party. Up to the end of 1912 not a single Socialist burgomaster had been appointed by the king but in most large cities a Liberal fills that office

By elections during 1910 had to some extent pulled down the Catholic majority in parliament but at the general elections of 1912 they were returned in still greater force a result all the more striking as a sign of public opinion considering that Proportional Representation is supposed to act as a check on sudden revulsions of this kind June 1/th the Cabinet of M Schollaert who had been Premier since 1008 was obliged to resign over an Education bill Political feeling went against the proposed plan for dividing State grants between official and voluntary schools (ecoles libres) according to the number of pupils The educational test system (bon scolaire) is a novel form of the subsidized voluntaryism (la liberte subsidiee) in high fayour with the Catholic party and already put in practise by them in social legislation. Liberals and Socialists together made a stand against it and at the same time started a campaign against plural voting demanding that Art 47 of the Constitution be revised and Manhood Suffrage pure and simple substituted. Under the system of proportional representation in Belgium it should be noted supplementary votes are allotted as follows one extra vote to heads of families of the age of thirty five and to voters possessed either of a property qualification or an income above a certain amount while two extra votes are given for official status or the higher educational diplomas but no individual may have more than three votes

There were 1 721 755 qualified electors on the roll of voters for the Chamber in 1912 and 1 460 36 comprised the electorate for the Senate (for which the age qualification of voters has been raised from twenty five to thirty) but thanks to the plural system the total number of votes for the Chamber was 2,763 513 and 2475 6,0 for the Senate. In the new purliament there are 101 Catholics 45 Liberals 38 Socialists and Christian Democrats while in the Senate there are 54 Catholics 31 Liberals and 8 Socialist Radicals but to those must be added the number of senators returned by the Provincial Councils—16 Catholics 7 Liberals and 4 Socialists. There was no sign of any reap pearance of the educational test in the programme of the new government under the leadership of Baron Ch. de Broqueville who succeeded M. Schollaert. Their policy seemed to be to improve the professional schools to increase the attendances and to prolong school days by raising the age for child labour to 14 or 15

Education is of course not compulsory by law in Belgium. The last census returns gave the number of illiterates over the age of eight as 1 040 400 or rather more than 10 per cent. The number of children in primary schools on December 31 1011 was 1 457 033, in normal schools 5 373. The attendance at the universities during the academic year 1010-11 was—Liege 2 790, Louvain 2 630 Brussels 1 318. Ghent 1 107

Social Legislation —Some further social legislation has been passed always in the guarantor could alone as ure—and in these circumstances it would be necessary to prevent the occupation of Bolgian territory by any belligerent by forces which were exclusively belgian. The Times correspondent undoubtedly reflecting the view of the British War Office welcomed this de laration as pointing at length to a realisation by Belgium that her weakness might prove a danger both to herself and to others. He took the opportunity to repudate on behalf of Great Britain the existence of designs attributed to her in some Catholic quarters in Belgium for seizing Antwerp and invading the country if war with Germany should occur. England would not consider that Belgium had done her dutivere she to remain indiffer int to the passage of a foreign continental army across the Ardennes but her hope was that Belgium would take her own steps to make such a proceeding too dangerous. This article was approvingly commented on in the Belgian press. On December 5th M. de Broqueville announced that he would prepare a new army scheme instituting general service with one year volunteering and assuring the complete defence of the fortified positions of the country by a first line army of 150 000 men instead of 19 000 as now. The Government hoped to apply the new reform to the contingent of 19 3—(Ed.)

spirit of prudent half measures, which is the Belgian way of meeting difficulties. The working day in mines has been reduced by law to mine hours, or at most to ten hours if absolute necessity for it is recognized by royal warrant. The Government is also empowered to reduce the normal hours of work in unhealthy trades (Law of December 31 1909) wide discretion being left to the executive.

A new law regulating mines in general was the outcome of the discovery of coal seams in La Campine—a district lying in the provinces of Antwerp and Limburg. The fact is important both commercially and politically for it will bring a great industry so far confined to the Walloon country (the basins of Liege and Hainaut) into Flanders itself. The old Napoleonic law of 1810 was recast on June 5, 1911, State intervention was carned further and no women may now be employed underground. The same regulation was applied to working at night, which women are now prohibited from doing in factories (Law of Aug. 10, 1911). Of coal 23,016,560 tons (metric) were mined in 1910 and of from (the production of which was greatly decreased), 12,960 tons. In 1911—12 an important new coal field was being opened up in the Campine.

A law passed June 5 1911 (and amended May 5 1912) dealt with old age pensions for miners. Wage earners at the age of sixty whether natives of Belgium or foreigners can claim 10d per day from a fund raised partly by the workers themselves partly by contributions from employers and the State

The arbitration boards called Conseils des prud'hommes for settling disputes between employers and men have been reorganized under a law passed May 15 1912. As these are elective bodies political considerations are apt to intrude in their composition and on that account proportional representation and compulsory voting have been introduced for them along with a bolder innovation women having votes and being themselves eligible. The Tribunaux de Commerce (commercial courts for settling trade disputes) are also elected by those whose interests are involved there are 14 of them in the country. Judges in Belgium are appointed by the Government whose choice is apt to fall on men of its own political colour but the Presentation system (Art. 90 of the Constitution) to some extent restricts the selection for the councillors of the three Courts of Appeal are nominated from double lists of candidates presented by the Provincial Councils and by the Courts themselves while Councillors of the Court. The Court of Cassation deals only with points of law in cases brought before it questions of fact being referred to other courts (Art. 95 of the Constitution)

Among recent legislation mention may be made of the Law of Nationality (June 8 1909) modifying certain provisions of the Civil Code which is still the Code Napoleon revised only in certain respects. Birth on Belgian soil confers the rights of citizenship under given conditions even upon the children of aliens. This return to the just soil is a new infringement of the long dominant principle of affiliation. A law for the protection of children (May 16 1912) defines limits at which the patria potestas ceases and establishes—children's judges. Minors brought before the courts can be handed over to institutions ad how and kept under surveillance and discipline instead of being subjected to ordinary punishments.

Languages —The language question looms large from time to time in the history of Belgium. The first half century of national independence was marked by a French reaction after the 'Flamandisation' policy pursued under the Netherlands government (1815 to 1830). A counter reaction not yet spent tends to magnify the political importance of the Flemish element. Flemish is put on a so-called equality with French in the secondary schools by the Law of May 12, 1910 which inclines to treat French as a foreign tongue in Flemish speaking districts and vice versa. In practice, the importance of this law is discounted, for firstly, in the city of Brussels and its suburbs the choice of the principal language is left to the parents, and secondly the law naturally is not enforced in the voluntary schools (ecoles libres) which flourish so largely in Belgium. In these French predominates as before. There has been some talk of Flamandising' Ghent University either wholly or in part, but so far nothing has been done.

Commerce - The commercial prosperity of Belgium was brilliantly illustrated by the Universal Exhibition held at Brussels in 1910. The following are the most recent trade returns for special commerce (exclusive that is of goods received for transit across The imports in 1911 reached £169 105 110 and exports, £135 101,,00 Trade with Great Britain for the same period showed imports £20 492,016 and exports £18,145 553 With the United States the import trade amounted to £9 166 409, and The transit trade was valued at nearly £92 000,000 the export to £4 644 740 total tonnage of ships arriving at Antwerp in the same year (1911) amounted to 12,625,165 Nevertheless the exchequer is not in a very flourishing condition. Belgians pay little it is true in the way of direct taxation and even the indirect taxation is not excessive With the growth of State expenditure, however, the adverse balance increases It is a long while now since any effort has been made to face the financial position, though this has come to be an imperative duty as may be seen from the increase in the public debt which has grown from £56 413 863 in 1880 to £152 238 539 at the end of 1910 a rise of £95 824 6-6 or 169 86 per cent The national three per cents have fallen to 79 and it was considered expedient to issue treasury bonds at 4 per cent (and even higher) to the amount of £1.,444,8 o in 1912 alone

For the budget (budget de voies et moyens) of 1913 the revenue was estimated at £30 040 626, and the expenditure at £20 086 246 There was also a supplementary budget (budget extraordinaire), amounting to another £570 540 It may be noticed in this connexion that the government is nearly always behind hand with the budget it is seldom voted till the spring or even the summer Hence for most ministries Parlia ment is driven (as in France) to voting provisional twelfths' a practice which always restricts its power over the purse

Colonial Administration—As regards the management of the Belgian Congo (see below) the annual sum of £132 000 put at King Albert's disposal by the clause inserted in the Treaty of Cession October 18 1908 is applied as agreed upon to purely colonial purposes. The Minister for the Colonials renders an account to the Chambers annually Some alterations were made in the Colonial Law of October 18 1908 on March 29 1911 and again on March 5 and May 13 1912 but it remains substantially the same. No powers may be delegated to any chartered company or private committee. Speaking generally the trend of Belgian colonial policy is towards free trade (liberte commerciale) towards abolishing forced labour and taking moral and physical care of the natives Different parts of the Domaine which used to be under a special monopoly (exploitations en regie) have one by one been thrown open to free competition. The Colonial Council has proved equal to its task in the examination of supplementary legislation for the Belgian Congo within the cognizance of the King (Los coloniale, Arts. 7 and 24)

Obstuary —Marie Countess of Flanders (b 1845) mother of the king of the Belgians died November & 1912 she was the daughter of Prince Charles of Hohenzollern Sigmaringen and married the 3rd son of Leopold I in 1867. The death of Auguste Beernaert (born at Ostend on July 26 1829) on October 6 1912 removed a leading figure in Belgium. Originally a lawyer he entered politics and in 1873 first became a minister being subsequently premier for ten years (1884-94) he was head of a Catholic cabinet at the time of the Revision of the Constitution (1892-93). He was a moderate and cautious statesman. He had taken a prominent part of late in the pacifist movement presiding over the second Peace conference at the Hague in 1907, and being awarded the Nobel Place Prize (with M d Estour nelles de Constant) in 1909. Among others the death may also be noted of the well known geologist Edouard François Dupont (b 1841 see E B xix 278a) on March 31 1911. See generally H Pirenne Histoire de Belgique (4 vols 1902 onwards). Annuare statistique de la Belgique et du Congo belge pour 1911 (Brussels 1912). The Belgian Congo 1

Since the transfer of the Congo Free State to Belgium sincere efforts have been made by the Belgian government to effect reforms, under the direction of M Renkin,

1 See E B vi 942 et seq

minister for the Colonies and with the active encouragement of King Albert By royal decree of March 22 1910 the right to collect and to dispose of in trade, the natural products of the soil was restored to the natures. This decree became operative in the whole of Belgian Congo in July 1912, parts of the colony having been opened to trade in July 1910 and July 1911 respectively. An endeavour was also made to restore the authority of tribal chiefs a tax in money was substituted for the tax in rubber and the demands of the reformers were met on nearly every point save that of land tenure. Up to the end of 1912 the right of the natives to ownership of tribal lands had not been conceded. The government, moreover while granting absolute freedom of trade itself remained a trading concern and entered into keen competition with its rivals. In the later half of 1912 the British and American consuls general were sent on an extended tour in the Upper Congo to report how the reforms decreed in Brussels were working in practice. Until satisfied that the reforms were in actual operation the British and American governments withheld their recognition of the annexation of the Congo State by Belgium. By the end of 1912 all the other Powers had recognized the transfer

During 1910-12 the NE frontiers of the colony adjoining Uganda and German East Africa were delimited and the delimitation of the Congo Rhodesian frontier was in progress in 1912. By the Franco German agreement of November 1911 which at one point brought the German frontier down to the Congo River the right of France to pre emption should Belgium desire to part with the Congo was so far modified that it was agreed that in case of territorial changes in the Congo basin France and Germany would discuss the situation with the other signatories of the Berlin Act of 1885

The native population was estimated in 1912 at no more than 8 000 000 the white population was between 5 000 and 6 000 of whom nearly 2 000 were got criment officials and 5,00 missionaries (350 Roman Catholics 220 Protestants). The only district in which there is any European agricultural population is Katanga where the climate resembles that of

Northern Rhodesia

The cost of administration as was expected under the new régime exceeds the revenue In 1910 the revenue was £1 340 000 the expenditure £1 612 000 In 1911 the revenue was £1 620 000 and the expenditure £2 360 000 For 1912 the estimates were — revenue £1 815 000 expenditure £2 661 000 The public debt (1912) was £10 475 000 The chief products are rubber (still plentiful in the Aruwimi Forest on the Angola border and in some other regions) ivory palm oil and palm nuts copal cocoa gold and copper. The gold come mainly from the Kilo mines the copper from Katanga. In March 1911 the British firm of Lever Bros. was granted a concession of 20 000 000 acres in the lower Congo to establish a palm oil industry and soap manufactory. The same firm also obtained a concession in the British gold coast colony.) Gum copal during 1911–12 became an important export the Congo copal is of excellent quality. On ivory, in which the State largely trades there are heavy duties. In 1910 the value of exports was £6 488 000 that of the imports (chiefly textiles food stuffs and machinery). £4 757 000. The bulk of the trade is with Antwerp The tonnage of shipping clearing Boma in 1910 was 517 000 33 per cent being Belgian and 25 per cent British. France and Germany came next.

On May 25 1912 M Fuchs vice governor at Boma was appointed governor general of the colony in succession to Lieut General Baron Wahis. The Comite special du Kalanga had been abolished in March 1910 and the administration of the province assumed by the State. It was placed under a vice governor, M. Wangermee with headquarters at Elizabethville a town founded in 1910 (to serve the copper and tin mines of the district) in a clearing in virgin forest at the then terminus of the railway from Rhodesia. In July 1911 the extension N.W. of this railway to Kambove (110 m) was begun. Its completion was expected in March 1913. From Karibove another section of about 200 miles will bring the railway to the navigable waters of the Lualuba (upper Congo) thus completing a rail and river steamer service between Cape Town and Beira and the mouth of the Congo.

The founding of Ehsabethville (named after the Queen of the Belgians) marked a boom in the development of katanga. Its white population on January I 1912 was I 132 of whom 519 were Belgians and 228 British. It covered an area of 560 acres and possessed 20 miles of streets. Within a radius of over 100 m of the town there were no native inhabitants and the government in 1911 formulated a scheme for the emigration of Belgian agriculturists thither. The white population of Katanga was in March 1912 between 1800 and 2 000 as

CHINA 971

against 750 in January 1911 The chief copper deposits of Katanga—one of the richest copper regions in the world— are in the hands of the Union Minière which started regular smelting at the Star of the Congo mine in August 1911 The company's total output of copper up to May 1912 (when smelting ceased for some months) was 1 995 tons

copper up to May 1912 (when smelting ceased for some months) was 1995 tons.

One of the chief difficulties of the administration is to secure a personnel of the best type meantime many of the old agents of the Congo State have been retained. One of these officials in the Tanganyika region was in April 1912 sentenced to ten years imprisonent for summarily executing eleven native prisoners including four women and a child Other percant officials have also been imprisoned but in general atrocities are at an end A second court of appeal has been established at Elisabethville.

CHINA 1

In constitutional theory Republican China under the political reorganisation of 1911–12 retained the territorial heritage of the Chinese Empire intact. In spite of cross currents in Mongolia where separatist tendencies had manifested themselves before the establishment of the Republic and in spite of difficulties with Tibet, the claim embodied in the new Chinese flag that Chinese suzerainty is acknowledged by Chinese Manchus Mongolians Tibetans and Mahommedans held good. But amid so great an upheaval affecting the economic no less than the political and social affairs of the country any account of contemporary China is subject to the consideration that it is passing through what is essentially a transitional stage.

Population —In 1910 the Minchengpu (Ministry of the Interior) organised a census of the population of the Empire—With the exception of a few districts the enumeration was everywhere restricted to households and in the case of one province. Szechuan the census only covered half the total number of prefectures—By multiplying the house holds by 5 the approximate total of the population has been arrived at and the official version of the 1910 census is as follows—

Province	Population	Province	Population	Province	Population
Anhui	15 705 920	Hupeh	24 66 665	Kweichow	8 85~ 665
Chekiang	19 441 700	Kan u	4 533 195	Shansı	9 950 175
Chihli	20 8-1 145	Kiang i	17 199 305	Shantung	26 989 360
Fukien	11 884 275	Kiangsu	26 918 055	Shensi	80,7 0
Honan	2, 507 850	Kwang 1	5 8~_ 7-0	Szechuan	16 392 105
Hunan	21 110 8-0	Kwangtung	25 208 900	1 unnan	7 740 070

To the total for the Eighteen Provinces (98.86 °O) was added the population of the Metropolitan City and Prefectures (4.154.830) and of Manchuria Mongolia Banner min &c (9.40.9,5) giving an aggregate of 31.4.00.5. This census within the limitations noted probably represents the nearest computation of the actual population of China. To round it off we may add 6.500.000 the Chinese estimate—probably too high—of the population of Tibet and 6.607.803 for the remainder of the population of Szechuan making the grand total for all Chinese territory 3.25.527.830

The number of foreigners resident in China is given in the returns for 1911 of the Maritime Customs as 13.5 the details being as follows American 3.470 Austrian 38.5 Belgian 291 Brazilian 2 British 10.56 Danish 295 Dutch 19 French 1.925 German 150 Hungarian 26 Italian 4.4 Japanese 78 306 Norwegian 246 Portuguesc 3 4 Russian 51.21 Spanish 238 Swedish 150 others 93

Ag sculture—The only statistics available are those that relate to the movement of a ricultural products through the Customs. The export abroad of cereals is not permitted and such movement as there is through the Customs represents only a small proportion of the total production. The tribute rice sent to Peking from Anhui Cheklang Kiangsu and Shantung amounted to 120 000 tons annually. Kaoliang is the staple food in Manchura the estimated production of wheat is however 10 000 000 bushels. Apart from silk the chief products of China in order of export value are (the figures given being for 1911)—beans including beancake bean oil beancard. £7 261 276 tea. £5 161 300 cotton £-

CHINA 972

909 194 sesamum seed £1 580 465 straw braid £1 385 863 vegetable oils (other than bean oil) £1 067 152 or with bean oil £1 854 465

Before the outbreak of the Revolution considerable progress had been made with the suppression of opium growing By September 1911 it had been established that Manchuria Shansi and Szechuan were rid of the poppy plant and in virtue of the agreement between Great Britain and China signed in Peking on May 8 1911 the importation of Indian opium into these provinces was prohibited. The Revolution checked and in many districts put an end to the crusade against opium but with the gradual re establishment of authority throughout the country the veto on the poppy was restored. Under the Imperial Government cotton was largely taking the place of the poppy particularly in the porth of China ment cotton was largely taking the place of the poppy particularly in the north of China where official assistance was given in experimenting with American seeds and in other ways The export of raw cotton from Tientsin rose from 149 102 cwt in 1910 to 461 239 cwt in

1911 at Tsingtau it rose from 588 cwt in 1909 to 18 514 cwt in 1910 and 47 822 cwt in 1911 China in 1910 contributed 31 per cent to the world's trade in silk. Of the quantity exported silk and silk products 68 per cent came from the northern half of the country including the Yangtze Valley and Chekiang and 32 per cent from the south

Straw braid is manufactured mainly from a wheat with long straw grown on the plain bordering the Yellow river in Western Shantung and Southern Chilli. The export which bordering the Yellow river in Western Shantung and Southern China The Export White reached 18 484 000 lb in 1909 declined to 18 027 466 lb in 1910 and 16 101 067 lb in 1911 Industries and Manufactures—The number of factories in China is still limited enough The new enter

prises are both foreign and Chinese but the Revolution has not modified so far the general antagonism to foreign capital Among the chief industries in order of the number of fac antagonism to foreign capital. Among the coner industries in order of the number of factories etc. devoted to each may be mentioned.—Distilleries and breweries (53) cotton spinning and weaving mills (41) flour mills (40) oil mills (31) electric light works (31) dock shipbuilding and engineering works (24) soap and candle factories (19) mining companies (18) silk filatures (17) tobacco factories (16) arsenals (15) cement and brick works (15) waterworks (14).

The property conserved of the foreign content of the number of factories (19) are foreign to the foreign content of the foreign content of the number of factories (19).

The 18 mining concerns include foreign concessions and Chinese mines worked with foreign machinery. The annual output of thirteen coal mines worked by foreign machinery is approximately 5 000 000 tons with capacity for considerably more From mines worked by native methods the annual output is probably another 5 000 000 tons. The Ministry of Commerce and Industry publishes a list of mining permits issued by the Ministry and Market with the Ministry and the Minis of Commerce and Industry publishes a list of mining permits issued by the Ministr as follows—Coal 163 (including 29 in Mongolia all bearing date May 11 1911) antimonv 60 gold 18 sulphur 12 zinc 12 lead 11 copper 6 iron 5. The output of the Tayeh Iron Mines 70 miles below Hankow was in 1910 303 000 tons of magnetic ore. The export of tin from the Kochiu Mints near Mengtze Yunnan has risen from 84 114 cwt in 1909 to 122 958 cwt in 1910 and 133 792 cwt in 1911. With the help of additional machiners the antimony refining works at Changsha raised their export from 6 983 tons in 1909 to 9 239 tons in 1910 and 9 312 tons in 1911 regulus crude and ore. The export of orpiment through the Customs at Tengyueh (Yunnan) was in 1909 8 764 cwt. in 1910 10 710 cwt. ın 1911 6 540 cwt

Commerce—Tables are given dealing with the foreign trade of China in 1910 and 1911. The average exchange value of the Hailwan tael for both years is reckoned at 2s 87 d. (Consular reports use this value for 1911 although the Maritime Customs subsequently

fixed the average exchange at 2s 81d

The Maritime Customs —The revenue of the Maritime Customs was £4 789 234 in 1910 and £4 871 085 in 1911 the highest amount ever reached On September 21 1911 Sir Robert Hart Inspector General of the Chinese Imperial

On September 21 1911 Sir Robert Hart Inspector General of the Chinese Imperial Maritime Customs since November 1863 died in England He had left Peking in Mav 1908 and the post of Acting Inspector General was held for two years by Sir Robert Bredon Deputy Inspector General Mr F A Aglen was made Acting Inspector General in April 1910 and received the substantive appointment on October 25 1911 Finance—The first attempt to prepare a statement of estimated revenue and expenditure was made by the Imperial Government for submission to the National Assembly in the session of 1910—11 A Budget for 1912 (China Year Book 1913) was prepared by the Ministry of Finance in the autumn of 1911 but appears to have undergone revision before being taken as a basis for provisional estimates by the Republican Ministry of Finance
The two Budgets (exchange being reckoned at 7 5 kuping tacis to the £1) are shown in Table VII

National Debt —China out tanding debt at the end of 1912 amounted to £198 189 802 with a total charge for 1913 of £8 1/3 836. The chief items in this debt were as follows —

CHINA 976

War Loans (1894-98) £37 817 752 (total charge 1913 for interest and principal £3 179 273)

Boxer Indemnity £115 946 107 (£2 984 895) Indemnity Adjustment Loan (1905)

£1 000 000 (£57 250) Railway Loans £ £33 501 607 (£1 851 727) General Loans £
£9 923 336 (£100 691) In addition there were outstanding a number of provincial and
private loans the total amount of which was not published They exceed £3 500 000

Owing to the Revolution no Boxer Indemnity payments were made by China after
November 1 1911 and the Powers agreed to the postponement of payments until January

1 1913 The arrears and interest on deferred payments were estimated to amount on that date to £3 329 000 Towards this sum there would be available from the Maritime and Native Customs a surplus revenue of £1 132 000 The Inspector General of Customs however issued a statement in which he placed the total sum required during 1913 to meet all payments for Boxer Indemnity and foreign loans secured on the Customs Revenue at all payments for Boxer indemnity and foreign to an secured on the customs kevenue at 15 993 ood. Towards this amount he estimated that the Customs would provide 15 490 ood while the Seven Likin Collectorates specified in the 1898 Anglo German Loan Agreement would add 1637 500. In order to be on the safe side the Inspector Ceneral suggested that 400 000 taels (155 000 approximately) should be allotted monthly to form a reserve fund for the services of the loans indicated. This arrangement would leave the greater part of

for the services of the loans indicated. This arrangement would leave the greater part of the Salt Revenue (estimated at over £6 000 000) free for other foreign loans. Loan Negotiations—The loan negotiations of the Chinese Government during 1912 attracted considerable attention. During 1911 the Quadruple Syndicate comprising British French German and American banks had arranged the Currency Loan of £10 000 000 and the Hukuang Railway Loan of £6 000 000. The outbreak of the Revolution prevented more than an instalment of the former being handed over for development purpo es in Manchuria. Immediately after the abdication of the Manchu dynasty the Chinese Government being in financial straits approached the Quadruple Syndicate with a view to 6 b taining a loan for reorganisation purposes the sum of £60 000 000 being mentioned in this connection. Several advances were made by the Hong Kong and Shanghai Bank on behalf of the Syndicate but no decision was arrived at in regard to a comprehensive loan. On of the Syndicate but no decision was arrived at in regard to a comprehensive loan March 15 1912 the Chinese Government signed an agreement for a loan from a syndicate representing the Banque Sino-Belge and the Eastern Bank secured on the Peking Kalgan Railway. This loan was regarded by the Quadruple Syndicate as a breach of faith on the part of the Chinese Government in view of certain undertakings given by the latter and in May the loan was cancelled except in respect of advances already made. In June Russian and the Four Nations Group, which now became a Severiole Syndi and Japanese banks joined the Four Nations Group which now became a Sextuple Syndicate Negotiations for the large loan were resumed but no agreement was reached owing to China's reluctance to admit the form of supervision over the expenditure of the loan stipulated for by the banks. The Syndicate also required a monopoly of future loans to China up to £60 000 000 during the next five years. As neither side would give way and the financial embarrassment of the Chinese Government was becoming more acute the latter financial embarrassment of the Chinese Government was becoming more acute the latter decided to apply elsewhere. On August 30 a loan agreement for £10 000 000 was ratified with Messrs C Birch Crisp & Co of I ondon of which half or £5 000 000 was shortly after wards issued. The loan was made a first charge on the surplus revenues of the Salt C abelle. The British Government however refused to give its sanction and further negotiations were suspended efforts being made to restrict China s dealings to the Sextuple Syndicate. Communications—Including the Russian (1081 m) and Japanese (7.3 m) systems in Macchines as were oven to traffic in China 60. 8 miles of railway while 3 000 m.

Manchuria in 1912 there were open to traffic in China 6 0.8 miles of railway while 2 000 m more were nominally or actually under construction. Recent extensions include the Yunnan Railway (Laokai on the Tongking frontier to Yunnanfu) opened in April 1910 Canton Kowloon Railway (112 m) the British section (Kowloon to Sumchun) being opened in October 1910 the Chinese section in October 1911 Tientsin Pulow Railway the northern or in October 1910 the Chinese section in October 1911 Hentsin Pulson Kailway the northernor German section being opened in February 1912 with the exception of the Yellow River bridge which was not completed until November the British section in June 1912 the Kinn Changchun Railway opened October 1912 The Canton Hankow Railway has made but little progress of the first section from Canton 73 m were completed by 1911 and trains ran on the 30 m between Changsha and Chuchou The Szechuan Hupeh line and the Hangchow Ningpo line have made practically no progress in Chinese hands

Posts—On May 28 1911 the Chinese Post Office which had hitherto been under the control of the Linearctor General of Ciustoms was transferred to the Ministry of Posts and

control of the Inspector General of Customs was transferred to the Ministry of Posts and ¹ The Boxer Indemnity amounted to £67 500 000 divided into 5 Series the rate of interest is 4 per cent and payment is spread over 39 years. The above amount represents the total charges outstanding (interest and principal combined) it does not include the arrears of payment which had accumulated since September 30 1911.

¹ Railway Loans are charged on the lines with or without a Government guarantee.

CHINA

Communications The Postal Secretary M Piry became Postmaster General and the pre vious organisation was retained A substantial reduction in telegraph rates throughout the Empire was introduced on June 1 1912

Government and Administration - Pending the meeting of a National Convention and the adoption of a permanent Constitution China remained in 1912 under the Provisional Constitution adopted by the Nanking Council Yuan Shih kai as Pro visional President undertook on entering office to retire or seek re election at the expira tion of the term of provisional government, which was fixed at ten months Nanking Constitution defined the powers of the Provisional President and stipulated that he had to be elected by a two thirds majority of the National Council at a session at which three quarters of the members were present, but did not concern itself with the term of other or method of election of future Presidents of the Republic The Premier was nominated by the President but his appointment and that of the other members of the Cabinet were subject to the approval of the National Assembly he had direct con trol of the Bureau for Tibetan and Mongolian affairs Various laws were promulgated during the provisional regime defining the functions and powers of the Cabinet the Ministries and other departments of State But the entire system of central and provincial administration was in a transition stage and the Administration reforms announced by proclamation had not had time to be put into force

In November 1912 the following composed the Provisional Government 1 Press dent Yuan Shih kai Vice President Li Yuan hung Premier Chao Ping chun Minister of Toreign Affairs Liang Ju hao Interior Chao Ping chun Finance Chou Hsueh hsi War Tuan Chi jui Navy Lu Kuan hijung Justue Hisu Shih ying Education, Fan Yuan cien Agriculture and Forestry Chen Chen hsien Commerce and Industry Liu Kuei yi Communications Chu Chi chien On November 12 however a crisis oc curred over the question of negotiating with Russia concerning Mongolia and Liang Ju hao resigned Lu Cheng hisang the late Prime Minister took his place

In the Provinces Governors (under the name of Tutuh) officiated as before the Revolution variously assisted by a Finance Commissioner a Law Commissioner a Civil and a Military Commissioner Commissioners for Education and Foreign Affairs In Tibet there was a Government Agent The affairs of Mongolia and Tibet were nominally under a Bureau controlled by the Cabinet or Premier

Parliament —During the period of provisional government in 191 the functions of the National Assembly were performed by a National Council composed of five members from each province elected by the Provincial Assemblies. The chairman was Wu Ching lien and Vice Chairman Tang Hua lung

Parliament under the Republic was to consist of a Senate (Tsan Yi Yuan) and a House of Representatives (Chung Y: Yuan) The date of the first elections was fixed for December 10, 191 Primary elections and January 10 191, Secondary elections

The Senate comprising 274 members was to be elected as follow 220 by the Provin cial A semblies (10 Scnators to each Province) 27 by the Electoral College of Mongolia 10 by the Flectoral College of Tibet 3 by the Electoral College of Chinghai (Chinese Turkestan)

S by the Central Educational Society and 6 by the Electoral College of Chinese abroad.

The House of Representatives was to consist of 596 members elected by constituencies on the basis of one representative for each 800 000 of the population with a minimum of 10 representatives for a Province together with 27 representatives for Mongolia 10 for Tibet and 3 for Chinese Turkestan

The number of representatives allotted to each province for the first election was as follows
Hunan 27 Hupeh 26 Kansu 14 Kiangsi 35 Kiangsu 40 Kuangsi 19 Kuangtung 30 Kuel
chow 13 Shansi 28 Shantung 33 Shensi 21 Sinkiang 10 Szechuan 35 Yunnan 22 Shengking
16 Kirin 10 Heilungkiang 10 Candidates for election as Senators must be thirty years of 16 Krin 10 Heilungkrang 10 Candidates for election as Senators must be thirty years of age and upwards for election as members of the House of Representatives 25 years and upwards The qualifications of an elector for the Lower House are (1) A male citizen over 21 years of age (2) Two years residence (3) Lither payment of direct tax of \$2 per annum

The Foreign Office has changed its name from Waiwupu to Waichiaopu the Ministry of the Interior from Munchengpu to Nerwupu that of Education from Hsuehpu to Chiaoyupu that of Justice from Fapu to Shihfapu that of Finance from Tuchihpu to Tsaichengpu that of Communications from Yuchuanpu to Chiaotungpu while the Ministry of Agriculture

Commerce and Industry has been divided into two Ministries

CHINA 978

possession of immovable property of the value of \$500 graduation from an elementary of

higher school or education equivalent to the latter

Army -A revised programme of army reorganisation promulgated in 1907 provided for the formation of 36 divisions of the Luchun or National Army by 1912 On August 31 1911 the actual strength of the Chinese mulitary forces (officers and men) was returned (Chine Lear Book 1912) as follows - National Army 12 divisions (complete or almost complete 140 899 4 divisions (incomplete) 25 101 17 mixed brigades 74 815 total 240 815 Provincial Troops 276 981 grand total 517 796

During the revolution the Republicans enlisted a large number of irregular troops and it

was estimated that there were 800 000 men under arms in China when peace was restored On August 31 1912 the strength of the army including the Luchun and Provincial Troop

was given (China Year Book 1913) at 428 485 officer, and men

A fresh scheme of army reorganisation was still in preparation Meanwhile service wa voluntary soldiers remaining three years with the colours then passing into the First Reserve for three years and being finally drafted into the Second Reserve

*Navy**—The Chinese Navy in 1912 consisted of two squadrons the Cruising Squadron

of five cruisers one destroyer one gunboat and eight torpedo boats and the Yangtze Squad ron of twelve gunboats for river purposes A third squadron the Training Squadron to consist of two cruisers then under construction and ten gunboats was in process of forma

tion and a scheme of naval reorganisation was occupying attention

Public Justice -- New civil criminal and commercial codes have been compiled with Japanese assistance but had not yet been promulgated in 1912. In the meantime the old Japanese assistance but had not yet been promulgated in 1912. In the meantime the old laws except in so far as they were specially abrogated remained in force. The new judicial system provides for officials with purely judicial powers with four kinds of courts. (1) the High Court of Justice (To Li Yuan) at Piking which is the Supreme Court of Appeal. (2) a Provincial High Court (Kao Teng Shen Pan Ting) in each provincial capital. (3) Metropoli tan Courts in each principal town (Fu). (4) Courts of First Instance in small towns. It is by jury was inaugurated at Shanghai during the period of the revolution but the system will not be adopted for the present. In 1912 the Minister of Justice was Hsu Shih ying the Vice Minister Wang Shou-chen, and the Chief Justice Chang Tsung hisiang.

Education—During the revolution the system of education introduced by the Imperial Concernment under the reform scheme of 1005 was in abevance, as all the universities and

Government under the reform scheme of 1905 was in abevance as all the universities and colleges and most of the schools were closed. A National Educational Conference wa convened by the Ministry of Education in July 1912 and submitted a variety of recommen dations as the basis of the future educational system in China

History 1910-12 - The revolution and the establishment of a republican form of government dominates entirely the history of 1911 and 1912 and the events immediate ly preceding the revolution may first be dealt with In accordance with the nine years programme of constitutional reform laid down in 1908 the Provincial Assemblies met in October 1909 The most noticeable result of their inauguration was the impetus given to the demand for an earlier grant of representative government. At the close of the first session more than fifty delegates from various assemblies met in Shanghai and resolved to petition the Throne to grant a parliament within two years Their request proffered in Peking in January 1910 was rejected and until the autumn of that year the Government continued to oppose all recommendations for expediting constitutional On October 2 1910 the National Assembly met in Peking and within a week had approached the question of the earlier opening of Parliament. This time the Covernment gave way An edict dated November 4 provided that the date fixed for the establishment of Parliament should be changed from 1916 to 1913. In spite of various appeals and memorials the Throne would not make any further concession on this point. It championed the Grand Council against the attacks of the National Assembly but finally agreed to order the Commission of Constitutional Reform to frame a constitution for a Cabinet responsible to the representatives of the people

The Assembly adjourned on January 11 1911 to meet again in October The early months of the year however found the Chinese empire distracted by diplomatic and financial troubles On the borders of Yunnan a British force had occupied Pienma which both the British and the Chinese Government claimed as being within their respective territories and the presence of foreign troops in the district under dispute was at once magnified into a menace to the integrity of the empire In Mongolia Russia was seeking to establish consulates at various towns, while the Chinese mind can never for long be free from anxiety in regard to the fate of Manchuria Although the dread of foreign aggression led to the formation of patriotic associations, including the Citizen

CHINA 979

Army the country at large was still more agitated over the Government's action in resorting to large foreign loans. Two loans were at this period the subject of negotiation—one of £10 000,000 for currency purposes and a railway loan, subsequently known as the Hukwang Railway (Four Nations) Loan of £6 000 000. Public feeling was opposed to any loan that had not received the assent of the National Assembly and the demand arose for a special session of that body. Delegates from the provincial assembles arrived in Peking to press their demand but their request was refused and the Currency Loan was signed on April 15 1911. A month later the Railway Loan agreement was signed. By way of placating public opinion the Throne announced the appointment of a Cabinet in the place of the Grand Council. The new body comprised eleven Manchus and four Chinese under the presidency of Prince Ching who was regarded on all sides as the arch enemy of reform and its constitution did not go far towards satisfying popular demands.

From the date of the edict sanctioning the Four Nations Loan for the construction of the Canton Hankow and Hankow Szechuan Railways the agitation against the Government steadily gathered force Szechuan was chiefly concerned in the loan In spite of the fact that the great western trunk line had long been pledged to foreign capital the province had resolved to build the railway itself. Money had been raised by various devices and construction had been begun. While the line was making little progress in Chinese hands it was known that the money raised had been finding its way into channels in no way connected with railway construction or the legitimate invest ment of railway funds The people of Szechuan were easily persuaded that they would never see their money again if the line were handed over to foreign construction and riots broke out in Chengtu the capital in July Throughout August the conditions in Szechuan remained critical and by September the province was in open rebellion Chao Erh feng Warden of the Tibetan Marches and one of China's most capable officials had been appointed Vicerov in August by the end of September order seemed in a fair way to being re established A few days later however further noting oc curred in fresh centres and once more the rebellion gained the upper hand affairs of the province were in this critical condition a bomb exploded on October o in the Russian concession at Hankow From that moment the Szechuan question be came merged in the more formidable problem of the revolution

The bomb explosion in a house in Hankow was immediately followed by an attempt of the inmates to burn down the premises but in this they were folled. Documents revealing the existence of a revolutionary plot were seized and a number of arrests were made. Jui Cheng Viceroy of Hupeh and Hunan appreciating the gravity of the discovery gave orders for the execution the net day of four men who were regarded as ringleaders and he reported to Peking that he had prevented a revolution. He reckoned however without the revolutionaries. A meeting the same day amonous of the troops in Wuchang gave them their opportunity. Making common cause with the soldiers they compelled General Li Yuan bung to put himself at the head of the movement and the revolution began.

The ground in the Yangtze valley had been prepared to some extent during the year Repeated rumours of an intended rising indicated that revolutionary agents were at work but little attention was paid to the reports mainly because the notorious lack of cohesion among the various provinces seemed to foredoom to failure any anti-govern ment movement. The temper of the people however had for years been growing more and more hostile to the dynasty. Floods and famine had been of annual occurrence along the Yangtze, and the doctrine that the Manchus were in league with foreigners to partition or destroy the country had been sedulously preached. The revolutionaries had no elaborate organisation prepared they had been working to stir up as much feel ing as possible among the people and had even imported arms and amminition for a few centres. When the revolution came, the control of the movement did not extend be yond Wuchang. Emissaries hurried about the country urging the people to revolt but each locality was left to take care of itself and to carry out its revolution in its own way

980 - CHINA

The Wuchang mutineers bombarded the city on October 11 when the capture of the Government mint containing £300,000, supplied the movement with the snews of war Viceroy Jui Cheng escaped across the river. A Reformed Government was appointed with General Li Yuan hung as President and General Huang Hsing in command of the military forces. Moving across the Yangtze the revolutionaries captured Hanyang with its Government arsenal and were now provided with munitions as well as with money. By this time the Peking Government had to some extent realised the seriousness of the situation. The Regent in his alarm turned to the man whom he had banished from the councils of the Empire three years previously and it was announced that by edict of October 14 Yuan Shih kai had been recalled to take up the posts of Viceroy of Hupeh and Hunan and Generalissimo of the Imperial forces.

Yuan Shib kar, on whom now all eyes were turned was born in Honan province in At the age of twenty three he went with a Chinese detachment to Korea and three years later (1885) became Imperial Resident at the Korean Court a Yaan Shih kal post which he retained until the outbreak of the Chino Japanese War in 1894 In 1897 Yuan became Judicial Commissioner of Chihli and the following year found him in command of an Army Corps His assistance was sought by the Emperor Kuang Hsu for his reform project but Yuan Shih kai sided with the Empress Dowager and helped to carry through the coup d etat of that year the favour of the Empress Dowager, he became Junior Vice President of the Board of Works in June 1809 and in December of that year Acting Governor of Shantung When the Boxer Rebellion broke out he was Governor of that province and afforded protection to foreigners On the death of Li Hung chang he became Viceroy of Chihli (December 1901) with the honorary title of Junior Guardian of the Heir Apparent and it was during his tenure of office at Tientsin that he laid the foundation of China's mod He was summoned to Peking in 1907 and was a Grand Councillor and a prominent member of the Government at the time of the death of the Empress Dowager and the Emperor Kuang Hsu Immediately after Prince Chun assumed the Regency however Yuan Shih kai was dismissed from office and ordered to return to his native place (January 2, 1909) and he remained in disgrace until now

A fortnight later Yuan Shih kai took the field but virtually in the capacity of a military dictator. In the meantime Imperial troops under General Yin Chang had been in conflict with the revolutionaries in the neighbourhood of Hankow. They had entered the native city but had fallen back when their communications were threatened Advancing again they entered Hankow on October 29, and after three days fighting they fired the greater part of the city and the revolutionary forces fell back on Hanyang Indeterminate fighting was continued for the next four weeks, until on November 27 Hanyang fell and the position of the revolutionaries in Wuchang became untenable

Throughout this period the standard of rebellion had been raised successfully in other parts of China until fourteen provinces had thrown in their lot with the revolutionaries. Thus, while the chief military operations were going in favour of the Imperialists the country as a whole was recording its decision with no uncertain voice against the Manchu Government. Nanking held out for the Imperialists until December 2 but on that day Yuan Shih kai, recognising the necessity of parleying, acceded to the request of the Wuchang administration for a three days armistice.

Nothing illustrates better the spontaneous nature of the revolution than the fact that in Shanghai where the cause was not embraced until November 3 a military govern ment "had been created which arrogated to itself the conduct of the whole movement. It was here that the republican idea took definite shape and when the time arrived for negotiations with the Imperialists the Shanghai administration refused to recognise Li Yuan hung's right to conduct the proceedings at Wuchang or Hankow. It insisted that the peace conference should meet at Shanghai.

After the appointment of Yuan Shih kai the Court in Peking progressed quickly along the path of humiliation The National Assembly which had met on October 22, proceeded to assert itself and demanded the right to draw up the Constitution

CHINA 981

the appointment of a responsible Cabinet from which members of the Imperial family were to be excluded and an immediate amnesty for all political offenders. The Court hesitated but when these demands were endorsed by the garrison at Lanchow which refused to entrain for the front until they were granted. Prince Chun capitulated Regulations that were to form the basis of China's Constitution were at once drawn up by the Assembly and in due course the Regent took oath to observe them. Yuan Shih kai was elected Prime Minister on November 8 and returned from Hankow on November 13. The Regent abdicated on December 6 and affairs of State were for mally placed in the hands of the Premier and his Cabinet the Empress Dowager being associated with the Emperor in matters requiring the Imperial seal or presence

Even while conducting military operations against the revolutionaries. Yuan Shih kai had endeavoured to arrive at an understanding with them and he readily agreed to an armistice in order that the two parties might discuss the situation. Yuan Shih kai and the North stood for a constitutional monarchy the revolutionary leaders had made up their runds that the Manchu dynasty must be replaced by a republic. Negotiations were opened in Shanghai on December 18 and ten days later the Court had consented to submit the question of the establishment of a republic to a National Convention It could not, however agree that the convention should be wholly republican in char acter and the negotiations were continued throughout January the prospects of the Manchu dynasty retaining the throne becoming more remote as the days passed

On December 25 Dr Sun Yat sen, the leader of the anti dynastic movement arrived at Shanghai Born in Kuangtung province in 1867 Sun Yat sen (Sun Wen)

was the son of a mission convert and had studied medicine at the Alice Sun Yat sen Memorial Hospital at Hong Kong from 1887 to 1892 taking his degree of Licentiate of Medicine and Surgery in the latter year After a brief prac tice at Macao he settled in Canton where he at once espoused the revolutionary cause The failure of a conspiracy in 1805 caused him to flee to Macao and from that moment until December 1911 he was an exile from China In 1896 Dr Sun Yat sen was in London and on October 11th he was seized and taken to the Chinese Legation where he was confined in order that he might be conveyed back to China He was liberated at the instance of the British Government Dr Sun now devoted himself to the work of spreading his revolutionary propaganda. In Japan he founded a society known as the Tung Meng Hui, which has since played a prominent part in republican politics in His agents visited China from time to time and he became the acknowledged head of the Young China party When the revolution broke out at Wuchang in 1911 Dr Sun Yat sen was in England but he returned at once to China the Nanking Council (composed of delegates from fourteen provinces) elected him President of the Chinese Republic ' and he took the oath of office on January 1 1912, ' ithe first day of the first year of the Republic

On February 12 the Manchu dynasty came to an end The first of the Abdication Edicts of February 12 announced that the Empress Dowager together with the Em peror handed over the sovereignty to be the possession of the whole people and declared that the constitution should thenceforth be Republican Yuan Shih kai was nominated with full powers 'to organise a provisional Republican Government In the second Edict the future status of the Imperial House as agreed upon with the Republicans The Emperor was to retain his title and to receive from the Republic the was set forth respect due to a foreign sovereign. He would be paid an annuity of Tls 4 000 000 (£533 000) until the establishment of a new currency, when the sum would be \$4 000 000 and would reside at first in the Imperial Palace and afterwards at the Eho Park retain ing the same bodyguard He would continue to perform the religious ceremonies at the Imperial Ancestral Temples and Mausolea, and the Republic undertook to com plete the Mausoleum of the late Emperor and to charge itself with the services and expense of the removal of the late Emperor's remains to the Mausoleum The Imperial Clansmen retain their titles and enjoy equal rights with all other citizens

On February 14, Dr Sun Yat sen resigned his position, and on his recommenda

CHINA 982

tion, Yuan Shih kai was elected by the Nanking Council Provisional President of the General Li Yuan hung became Vice President and Republic of China The New Republic. a provisional constitution was adopted by the Council on March to the day on which Yuan Shih kar took the oath of office in Peking The duties of forming a Ministry devolved upon Tang Shao-yi a former protegé of Yuan Shih kai s and his delegate at the Shanghai negotiations Dr Sun Yat sen remained in Nanking to assist the Government until April r when he resigned his official connection with state affairs and started on a tour of the provinces The following day the National Council decided to transfer the Government to Peking A new Council (Lonsisting of five members from each province elected by the Provincial Assembly and five members each from Inner and Outer Mongolia and Tibet and one member from Kokonor) was formally opened on April 29 and continued to define the Republican policy

In June Tang Shao yi who had not been fortunate in his loan negotiations resigned the Premiership and was succeeded by Lu Ching histang the Foreign Minister Cabinet crisis was shortly afterwards brought about by the attitude of the Tungmenghui party which mainly represents Cantonese opinion Its members contended that the Cabinet should be formed from one of the three parties or from none and they insisted that the Ministers belonging to the Tungmenghui should resign their portfolios in the existing Coalition Cabinet The President won the day and the Tungmenghui sought to retrieve its position by amalgamating with another party. In September Lu Cheng hsiang was forced by ill health to resign the premiership and was succeeded by Chao Ping chen He became however, Minister for Foreign Affairs in November, on the

resignation of Liang Ju hao

For several months the peace of the country was disturbed by numerous mutinies and outbreaks while a serious plot against the Republican Government was discovered at Wuchang early in August In connection with the latter two prominent revolutiona ries Chang Chen wu and Feng Wei were arrested one evening in Peking summarily tried during the night and shot at daybreak The Government's action was severely criticised by the National Assembly but the President was able to convince a majority of the members without making public his information that he had acted in the in terests of the Republic Subsequently the visits to Peking of Dr Sun Yat sen General Huang Hsing the most prominent revolutionary leader after Li Yuan hung and Chen Chi mei at one time Military Governor of Shanghai served to strengthen the adminis tration by removing the feeling of mutual distrust with which the North and the South were inclined to regard one another

Tibet—The return on December 25 1909 of the Dalai Lama to I has a which he had left on the approach of the Younghusband expedition of 1904, coincided with a determined attempt on the part of China to strengthen her position in Tibet A Chinese force was on its way to Lhasa and entered the town on February 12 1910 The Dalai Lama fled to India and was deposed by the Chinese Government but Lamaism has never recognised the step Chinese sovereign rights were from that time exercised with considerable rigour in Tibet When the revolution broke out in 1911 the small Chinese garrison in Lhasa mutined in sympathy but its excesses stirred the Tibetans to action and the troops found themselves besieged. A state of war was maintained until August, when after the return of the Dalai besieged A state of war was maintained until August when after the return of the Dalai Lama to Lhasa peace was concluded on condition that the Chinese troops left Tibet tid India a small number only remaining as the Chinese Amban's bodyguard. In the mean time the semi independent chiefs had put an end to Chinese authority in Eastern Tibet. In July 1912 the Peking Government despatched an expedition from Chengtu the capital of Szechuan to reconquer Tibet. On August 17 however after the force had regained possession of Batang the British Government presented a Memorandum to China defining the attitude of Creat Britain towards the Tibetan question. This communication required China to refrain from despatching a military expedition into Tibet as the re establishment of Chinese authority would constitute a violation of the Anglo-Chinese Treaty of 1906 Chinese suzerainty in regard to Tibet was recognised but Creat Britain could not consent to the assertion of Chinese sovereignty over a State enjoying independent treaty relations with her. Although so definite reply was given to the Memorandum it was understood that the Chinese Government intended to fall in with British wishes and towards the end of September the expedition to Tibet was ordered to retire. September the expedition to Tibet was ordered to retire

Mongolia —In pursuance of a forward policy in Mongolia the Manchu Government during the latter days of its existence had strengthened its administrative hold on the country,

had stationed Chinese troops in Outer Mongolia and was carrying out a systematic plan of Chinese colonisation. These measures were resented by the Mongolians and led to overtures for Russian protection or mediation in July 1911. The misguided zeal of a new Chinese Amban still further embittered the native population and the revolution provided the Kutukhtu Lama—the third highest pontiff in the Buddhist hierarchy and the spiritual ruler of the Mongolians—with an opportunity of proclaiming the independence of Outer Mongolia Russian troops kept the peace between the Mongolians and Chinese and in October 1912 the St. Petersburg Government accorded recognition to the new State to the extent of sending a special envoy to Urga. A Russo Mongolian Agreement according to a semi-official communique issued in St. Petersburg was concluded on November 3. Russia undertook to assist Mongolia (or the Kutukhtu Lama) to maintain the autonomous regime established and to admit neither the presence of Chinese troops in Mongolian territory nor colonisation by Chinese. The Mongolian sovereign and Government guaranteed to Russian subjects and Russian commerce the full enjoyment of their rights and privileges and agreed that no other foreign subjects in Mongolia should be granted fuller rights than those accorded to Russian subjects. The Kutukhtu Lama however appears not to have carried the whole of Mongolian opinion with him. A certain number of the Khans and princes both of East and West Mongolia claimed incorporation for their country on equal terms in the Chinese Republic the rulers being allowed to retain their territorial and administrative power and their hereditary titles. Mongol activity was manifested in the late autumn of 1912 on the Manchurian frontier and conflicts arost with Chinese troops. Whether this activity was merely brigand age or represented a fresh separatist movement in the West still remained to be proved.

Economic Progress—In 1911 the census population of Denmark with an area of 14 8 9 sq m was 275,0,6 as against 2449540 in 1901 and 2588,919 in 1906. The annual average increase since 1906 has been 127°. The capital Copenhagen has 559 502 inhabitants more than all the other Danish towns put together. The population of Iceland with area of 40,437 sq m was 85 089 in 1911 against 78,489 in 1901.

In Greenland with an inhabited area of 45000 sq m the population numbered 1,,517 in 1911 393 Europeans as against 11893 and including 2,2 in 1901. The three West Indian Islands of St. Thomas, St. Croix and St. Jan with a total area of 138 sq m had a population of 27,104 in 1911 against 30 5 7 in 1901 and the Faeroes with an area of 511 sq m, advanced from 15 230 inhabitants to 18,005

The area cultivated in Denmark is close on five million acres (4 850 000 in 1908) the value of the harvest of 1910 being £30 555 000 and in 1911 £37 338 900. The stock of domestic animals amounted in 1909 to 535 000 horses 2 254 000 heads of cattle and 1 466 800 pigs besides 11 800 000 fowls. The value of agricultural exports in 1910 was £24 294,000 and of agricultural imports £10 878 000 for non-agricultural articles imports were valued at £20 788 000 and exports at £2 372 000 the corresponding figures for 1911 being £26 574 500 £12 130 900 £22 497 700 and £3 239 300

The sugar beet industry shows rapid growth the production in 1910 being about 100 500

The sugar beet industry shows rapid growth the production in 1910 being about 100 500 tons and in 1911 116 150 tons and several new sugar factories have been planned or have actually started working during the last few years. The small holding movement continues

¹ See E B viii 23 et seq

to progress with some 700 new holdings annually or some 6 000 in all since the small holding act was passed in 1899. A new law was passed in 1909 further developing this movement

Two important laws relating to agricultural export have been passed within recent years viz the law of May 27 1908 dealing with the control of meat exported from Denmark and a similar one of April 12 1911 dealing with the control of butter. They were based on section 62 of the British Trade Mark Act 1905, which enabled the Danish farmers to register a common trade mark as against all other trade marks in these articles. Thus all exported meat or bacon receives a public trade mark and a Government stamp showing it to have been passed for export at the control station either as first or second class produce agricultural goods for export can therefore receive a trade mark from people who do not trade themselves but only investigate the quality of the articles. No butter is allowed to be exported that contains over 16% of water or other preservatives than salt. Notable strides have latterly been made in Denmark as regards fostering the growth of

home industries and increasing the output of articles suitable for export eg newly patented machinery motor engines etc. A strong movement has commenced for the purpose of

making Denmark an industrial country as well as an agricultural one.

The total revenue for the financial year 1910-11 was £7 894 589 and the expenditure £7 731 208. For 1911-12 the corresponding figures were £9 483 333 and £9 638 889, the deficit being much smaller than the original estimate of £1 189 365. The estimated revenue for the financial year 1912-13 was £5 705 688 and the expenditure £6 351 150 while the estimated figures for 1913-14 are £6 475 076 and £6 510 247

The national debt on March 31 1911 amounted to £18 658 889 and in 1912 to £19 554

The state assets amounted to £39 441 289 in 1911 and £40 003 470 in 1912

Political History - The Ministry of Jens Christian Christensen (b. 1856) having been forced by public opinion to resign in October 1908 (see E B viii 39) owing to the scandal caused by the arrest of the Minister of Justice A Alberti (b 1851) on a self confessed charge of theft and forgery, a new Cabinet was formed by Niels Neergaard Hopes had widely been expressed for the formation of a national non party administration during this period of financial and political stress—but the Left Reform party majority in the Folketing asserted itself and the new members of the Cabinet were drawn from the Moderate Left—the extreme right section of the Government bloc—some of the members of the retiring Ministry also being included A new Minis try of Trade and Commerce was instituted on this occasion

Besides having to deal with the Alberti defalcations, extending over nearly twenty five years and running close up to a million pounds sterling and with the affairs of the defrauded Zealand Peasants Savings Bank, the Butter Export Association and other concerns and transactions of Alberti's the new Cabinet found a number of important questions awaiting its immediate decision The whole position of the national finances had to be taken in hand and relations with Iceland stemed as far from a mutually satis factory solution as ever, the proposals of the joint Danish Icelandic Commission of 1907-8 had been rejected at the elections to the Alting in Reykjavik in the summer of 1908 and the leader of the separatist movement, Bjarni Jonsson (b. 1846), had succeeded H Haffstein (b 1861) as Minister for Iceland Then the findings of the Parliamentary Defence Commission, largely differing from the advice given by the military experts had to form the subject of a bill dealing with the National Defences and with the much vexed problem of the Copenhagen Land Defences

In presenting his first budget for 1909-10 in October 1908 M. Neergaard who com bined the portfolio of Defence and Finances with that of Prime Minister showed the deficit of the financial year of 1907-8 to be £403 700 as against an estimated deficit of \$222 000 on the current budget of 1908-9 One cause of the deficit was shown to be the Tariff passed in the spring The duties on a number of articles of general consumption petrol coal salt rice etc articles for the use of the shipping and agricultural industries and for home industries generally had been abolished or greatly reduced without the state obtaining the necessary compensation in other directions The increase of salaries, the various new railways schemes passed in the previous Rigsdag session the increased cost of recent social reforms all combined in making the balancing of the national finances difficult New sources of income had to be found and a system of economy introduced in the various Government departments

In February 1900 the Neergaard Cabinet had at last completed its investigation of

the urgent problem of national defence and of the findings of the Defence Commission and a Defence bill was introduced in the Folketing on the 12th of that month the day following the national celebrations commemorating the 250th anniversary of the un successful Swedish attack on the Copenhagen fortifications The Premier followed on the whole the advice of the military experts both as to the upkeep and the extension of the defence works of Copenhagen on sea and land The old political war cry of the Left no land defences around Copenhagen was thus surrendered the Premier himself admitting that he viewed the defence question in a totally different light since forming his Cabinet in the previous autumn A split in the Government bloc was the inevitable result this showing itself when the final vote took place on the second reading of the The Premier gathered round him his own little group of nine Moderates 14 Conservatives and 14 of the 57 members of the Left Reform party The Left Re form leader the ex Premier J C Christensen found 35 members to support his opposi tion proposal for limiting the fortifications to the sea approaches to Copenhagen, while seven of the Left 10 Radicals and 24 Socialists were firm opponents of both these pro The issue was now referred to the electors a general election to the Folketing taking place on May 25 The result showed an increase of the Conservative and Radical parties both capturing seats from the Christensen party some 27 members followed the latter as against the 47 supporters of the Neergaard scheme with the 24 Socialists and 10 Radicals An attempt to compromise on the defence bills proved unavailing as M Christensen remained obdurate and the latter had the best of an intricate political situation owing to the indirect help given him by the Radicals and Socialists

Having concluded a national loan of £2 40 000 with a French syndicate the Neer gaard Cabinet was obliged to resign at the end of July the Premiership falling to a former leader of the Lett parts Count Holstein Ledreborg (1839-1912) In spite of public protests and addresses to the king M Christensen was appointed Minister of Defence and M Neergaard and Count Ahlefeldt Laurvig (b 1860) agreed to serve in the new Cabinet retaining their portfolios of Finance and Foreign Affairs respectively M Christensen was finally able to get the defence bills through the Rigsdag during the ensuing special summer session, being aided by the various sections of the Left party and by some of the Conservatives, the latter fearing to postpone the solution of this national The existing land fortifications of Copenhagen were left intact question any longer but without the necessary supplementary works strongly insisted on by the military experts the Rigsdag being left to decide in 1922 whether these land forts should be dis mantled or not The chief points in the Defence acts were some new Naval forts out side Copenhagen coast defence works at various parts of the coast of Zealand and an increase of the strength of the Danish Navy chiefly as regards destroyers and submarines £890,000 was voted for Naval and Coast Defence works £350 000 for the increase of the Navy and £500 440 for various Army purposes besides an increase in the annual Army budget amounting to £130,000

On October 18 M Christensen resigned the Ministry of Defence and a few days later a vote of censure having been carried by a Conservative Radical Socialist combination the Holstein Ministry gave way to the first Radical Government formed in Denmark that of M Carl Theodor Zahle (b 1866) He could only rely on the 44 members of the united Radical and Socialist parties out of the total membership of 114 in the Folketing so M Zahle announced his intention of postponing the introduction of the Radical programme and any question of altering or annulling the Defence Acts, until the voice of the electors had been heard. On one vital point he was able to secure a majority, viz the proposal to prosecute before the Special Parliamentary Court the

Rigsret," the two ex Ministers M Christensen and M Sigurd Berg (b 1868), the latter a former Home Secretary for neglect of their Ministerial duties in regard to Al berti. M Christensen was charged with having furnished Alberti with a loan of £82 500 (13 million kroner) out of the Exchequer a few months previous to his arrest at a time when the then Minister of Justice was the object of ever increasing attacks in the Press and in the Rigsdag. M Berg was accused of grave neglect of duty owing to his refusal

to order a public investigation of the affairs of the savings bank connected with Alberti the supreme control of the savings banks being vested with the Ministry of Interior

During 1910 politics were stagnant. The next elections to the Folketing took place on May 20, 1911. While the united Radicals and Socialists maintained their figures the Conservatives lost eight seats to the Left Reform party once more reunited under the leadership of M Christensen, who thus controlled 56 out of the 114 members of the Chamber

The State trial of M Christensen and M Berg was concluded on June 17, when M Christensen was acquitted though admonished and M Berg sentenced to a fine In December, when the criminal trial of Alberti himself came on after two years of judicial investigation of his affairs he was condemned to eight years penal servitude

Soon after the opening of the special session of the Rigsdag M Zahle made way (July 4) as Premier to M Klaus Bernsten (b 1844) the leader of the moderate section of the Left Several of the new ministers including M Neergaard and Count Ahlefeldt, who both returned to their former posts belonged to this political group

On July 19 a bill sanctioning a temporary loan of £2 000 000 was introduced in the Folketing and during 1911 the chief political debates were concerned with financial matters. Another temporary loan of £3 111 000 was sanctioned by the Rigsdag two millions of which was in renewal of the previous temporary loan. M. Neergaard introduced that year a scheme of new taxation, comprising extra stamp duties increased railway fares a special tax on amusements increased taxation of beer and spirits and an increase of income tax on a graduated system. A question long before the Rigsdag was also settled by the establishment of local church councils.

On February 14 191 a debate took place on the foreign policy of Denmark the Foreign Minister once more advocating the necessity of Denmark following a policy of absolute neutrality. As was stated by Count Ahlefeldt Denmark was neither directly nor indirectly bound by verbal or written agreements still less by treaties or alliances tending to infringe this principle. The military and naval works agreed to by the Rigs dag in 1910 were now taken in hand and a number of Volunteer Corps armed with the quick firing recoil infle were formed in various parts of the country during 1912

The death of King Frederik VIII (1843–1912) took place with tragic suddenness on May 14 in Hamburg where the King was staying on his way back to Denmark after having spent some time as convalescent at the Riviera after a serious illness earlier in the year. The Crown Prince Christian Carl Frederik Albert Alexander Vilhelm (b September 26, 1870) who married Princess Alexandrine Auguste Duchess of Mecklen burg Schwerin (b December 24, 1879) on April 26, 1898, was proclaimed as Christian X the following day in Copenhagen. The new king at once established his popularity by a speech from the balcony of the Palace of Amalienberg in which he promised to guard the happiness independence and liberty of Denmark. The burial of King Frederik took place on May 24 at Roskilde cathedral the chief mourners including the Kings of Sweden. Norway and Greece. The ceremony was unique in the meeting of three Scandinavian kings after a lapse of nearly 550 years.

A loan of £4 000 000 was agreed to by the Rigsdag in June, 2½ millions being subscribed in Great Britain

The speech from the throne at the opening of the Rigsdag in October announced a Reform bill amending the revised constitution of 1866 on the lines of a return to the principles of the original Grandlov of 1849. The measure was introduced on October 23 and passed the Lower House on Dec 13 by 95 votes to 12. By it women were given the vote and the right to sit in the Folketing, the minimum age for votes was reduced from 30 to 25, the possible number of members of the Folketing was raised from 114 to 132 the duration of the Folketing was extended from 3 years to 4 (that of the Landsting remaining at 8 years) election by privilege and royal nomination to the Landsting was abolished of the 66 members of the Landsting 54 were to be elected by electors chosen by town and parish councils from among their members in proportion to the number of the inhabitants in their town or rural district,

and the other 12 to be selected by the 54 in case of disagreement between the two Chambers they were to sit and vote together The reform was chiefly directed against the Landsting or Upper House and was hailed with approval by the Radicals and Socialists of the Folketing Moreover the once impregnable Conservative majority in the Landsting had dwindled to only one or two votes owing to the steadily declining number of Conservative 'Life Peers' Since 1901 every vacancy among the twelve members nominated by the Crown had been filled by a supporter of the Left

Danish Dependencies—As regards the Danish dependencies abroad there is little to record between 1909 and 1912. A Danish Syndicate was formed in 1912 to carry out extensive harbour works for the purpose of making St. Thomas into a big trading depot and coaling station. The Danish Parliament granted the Syndicate a 99 years concession and a company was then formed in Copenhagen for raising the capital required about £1 000 000 in Denmark only as the scheme was planned as a national undertaking. Only a fourth part of this sum was however subscribed for and the concession was returned to the State

only a minor extension of the St Thomas harbour being now contemplated

In Iceland a change of ministry occurred in 1911 M Bjarni Jonsson being defeated in
the Alting and succeeded by the proposer of the hostile motion M Kristjan Jonsson (b 1852) a member of another section of the Home Rule party During its 1911 session the Alting adopted a system of adult franchise lished at Reykjavik on July 30 A separate university for Iceland was estab

During 1912 politics in Iceland once more turned in the direction of reopening negotia tions as to a settlement of the constitutional difficulties with Denmark, the Minister of 1908

Hanne Haffstein being again returned to power

In Greenland the establishment of communal councils at the various Eskimo settle
ments was followed in 1912 by a long contemplated reform the complete separation of the management of Greenland trade from the administration of this Danish possession

Capt Ejnar Mikkelsen returned to Copenhagen in Augu t having in spite of great hardships and privations during two years reached the object of his expedition to the north eastern coast of Greenland in finding traces of the lost members of the Myhus Erichsen

expedition (1906-8) and completing the work of this lost explorer

Obstuary — During 1908 the art world of Denmark lost two of its leading names LORENZ FROLICH (b. 1820) and FRANTS HENNINGSEN (b. 1850). In 1909 the death of PRINCESS VALDEMAR of Denmark (Princess Marie of Orleans b. 1865) caused national sorrow as the mscription on the memorial since erected to this popular Princess says with truth—She spoke our Tongue and found our Hearts—P. S. KROYER (b. 1851)—the artist—EMIL CHR HANSEN (b. 1842)—whose researches concerning the yeast bacillus revolutionised the brewing industry and the eminent scientist—Professor July Thomsen (b. 1826)—Principal of the Polytechnic College also died in 1909

College also died in 1909

The obstuary list for 1910 included the jurist Prof. Henning Matzen (b. 1840) member of the Hague Tribunal the artists Johan Frederik Nikolaj Vermerken (b. 1823) and Johan Julius Exner (b. 1825) and the financier Isak Gluckstadt (b. 1839) head of the Danske Landmandsbank. In 1911 died the Bishop of Zealand Peder Madden (b. 1843) and the actor Emil Poulsen (b. 1842) who created so many of Ibsen's characters. In February 1912 G. H. Armauer Hansen, the bacteriologist died (see E. B. xx. 784b) (W. R. Prior.)

EGYPT 1

History - The year 1910 proved a critical period in the political development of The murder of the Prime minister Boutros Pasha in February was followed The trial of the Premier's by violent manifestations of Anglophobia Unrest of assassin a young man named Wardani gave occasion for many Nationalist 1910 11 demonstrations Wardam was sentenced to death (May 13th) and executed (June 28th) after an appeal for a new trial had been dismissed The rejection by the general assembly of the scheme to extend the concession of the Suez Canal company—the existing concession does not expire till 1068—was another exhibition of Anglophobia the scheme being rejected not on its merits but to discredit the British This state of matters followed steps taken by Sir Eldon Gorst the British Agent, to associate the Egyptians more directly with the conduct of their own The experiment, which was on the lines of Lord Cromer's policy was attributed by the Egyptians by the European colonies in Egypt and by a section of public opinion in Britain to weakness—in Sir Eldon Gorst's words "to an attempt to pacify the Nationalist agitation by ill timed concessions and to an intentional diminution of

1 See E B IX 21 et seq

British authority" (Egypt No r (1911) p 3) The general acceptance of this idea led to the comparative failure of the experiment (the provincial councils proved a distinct success) An official declaration made in the House of Commons in June 1911 on behalf of the British government that there could be no hope of further progress in Egypt until the agitation against the British occupation ceased had its effect, and for a time the Nationalist agitation died down

After the murder of Boutros Pasha the cabinet was rearranged Mohammed Said Pasha minister of the Interior became Prime Minister while retaining his former The only new minister was Yusuf Saba Pasha, who became minister of Sir Joseph Saba K C M G —as he was known in European circles —a Syrian and a Roman Catholic had been twenty years at the head of the Egyptian Post office and had earned a well deserved reputation as a capable and zealous administrator The co-operation of the ministry with the British authorities helped to undo the harm caused by the excesses of the Nationalists Boutros was a Copt and the endeavour of the Nationalists to present his murderer as a patriot and defender of Islam produced strained relations between the Copts and the Moslems Owing to the precautions of the government no serious collision occurred between the two factions and later the Copts turned their grievances against the government A Coptic Congress was held at Assuit in Upper Egypt, where the Copt is prosperous but not popular in March 1911 and a list of grievances was drawn up, but Sir Eldon Gorst had little difficulty in showing that their complaints of unfair treatment by the government were ill founded

Soon after penning his annual report for 1910 which constitutes the best apologia for his period of control the health of Sir Eldon Gorst failed He returned to England

Lord Kitchener becomes British Agent. in April 1911 on July 6th he resigned his office, and on the 12th of the same month he died Four days later (July 16th) Lord Kitchener was appointed British Agent a selection popular both in Great Britain and with the ma jority of Egyptians Kitchener who had been made a knight of St Patrick on July 16th had maintained unimpaired his interest in Egypt and the Sudan

and had early in 1911 visited both countries as well as Uganda and British East Africa He reached Alexandria on September 28 1911 Writing six months later he drew atten tion to the divisions into political parties and factions of the formerly homogeneous body of Egyptian Moslems a division which ' does nothing to elevate or develop the intelligent character of an oriental race (Egypt No 1 (1917) p 2) In March 1912 a few weeks previous to this condemnation of Nationalist activity Mohammed Bey Farid had delivered an inflammatory address at the annual congress of the party of which he was president He then went to Switzerland but was (April 30 1912) sentenced in his absence, to a year's imprisonment for seditious speaking. He had previously been convicted of a similar offence in January 1911 In July 1912 a plot to murder Lord Kitchener the Khedive and the premier was discovered by the Cairo police and on August 13 1912, three young men for their share in the plot were sentenced to fifteen vears imprisonment The investigations made disclosed the existence of a secret society directed against the government in which many influential Egyptians were involved This society was shown to be in relation with the Young Turk Committee of Union and Progress and in September Sheikh Abdul Aziz Shawish one of the Egyptian Nationalist leaders who also conducted a newspaper in Turkey, was arrested in Constantinople charged with being implicated in the conspiracy against the Khedive and Lord Kitch Shawish was brought to Cairo but the evidence against him being inconclusive he was released (Oct 18 1912) On Nov 16th a man named Mukhtar was sentenced at Alexandria to ten years imprisonment for publishing seditious circulars

These plots and conspiracies were confined to a numerically small party and the people in general were httle concerned. Lord Kitchener, by the firmness of his administration created a feeling of confidence which the Nationalist plots did not much disturb. Greater excitement was caused by the outbreak of war in Tripoh (Oct 1911) Geographical proximity, the close relationship between the people of Benghazi and the

¹ See E B xv 838

Egyptian Arabs, the bonds of a common religion and the ties of trade, evoked a deep and widespread sympathy in Egypt for the Arabs of Tripoli. But, notwithstanding the mischievous efforts of some of the native papers the Egyptians maintained a praise worthy self restraint. Egypt was declared neutral, and that neutrality was strictly maintained. The war led to definite steps being taken to settle the western maritime frontier of Egypt. Italy had proclaimed a blockade of the Cyrenaican coast which extended to 27° E. that is over 100 m. east of Sollum the western limit claimed by Egypt. The British government protesting, the Italian claim was waived (Nov. 1911). In December a small Egyptian force occupied the fort of Sollum, the handful of Turks in the fort withdrawing. The British Foreign Office in an official communication (December 1904) is stated that as long ago as November 1904 both the Turkish and Italian governments had been notified that the line of the Egyptian western frontier ran up to and included Sollum. Turkey, however, had not admitted the Egyptian claim.

Lord Kitchener diligently sought to improve the lot of the peasantry who form three fourths of the population and own one tourth of the land He sedulously en

couraged improved conditions of agriculture and educational progress By Economic repeated tours in the rural districts he made himself personally acquainted Progress with the needs of the people He developed the Agricultural Department established by Sir E Gorst in 1910 extended the Savings Bank system to villages made usury (1 e lending money at more than 9 p c interest) an oftence punishable by fine and imprisonment and exempted small holdings (up to five Feddans)¹ from distraint for To save costly law suits local benches of magistrates (styled cantonal tribunals) were instituted to decide summarily trivial cases. In this way Lord Kitchener earned Friend of the Fellahin' The regard was mutual the fellah ' wrote Lord Kitchener in April 1912, remains the same as he has always been one of the best and most hard working types of humanity" He now set himself to teach the fellahin that too much of a good thing might be detrimental As a result of the immense irriga tion works carried out since the British occupation reclamation of land was pushed northward in the Delta into low lying areas where there was no natural drainage while a middle zone had become salted and waterlogged Thus arose the necessity for drain age works on a large scale Undrained damp soil coupled with indiscriminate destruc tion of bird life and the loss of a quarter of a million of cattle in seven years through disease had led to an enormous increase in cotton pests. The cotton crops of 1908 and 1909 had been poor There was a record crop in 1910 which realised £E 35 840 000 or f.5 700 000 above the previous best. In 1911 however the crop was again poor This instability combined with the harmful system of mixing different varieties of cot ton caused serious anxiety During 1911 and 1912 special investigations were under taken to put the industry on a sounder basis. In November 1912 a cotton congress was held in Cairo, representatives of master cotton spinners of every European country and of Japan being present
The causes militating against Egyptian cotton were fully Lord Kitchener called attention to the new species of cotton being grown in government experimental farms and Mr Dudgeon director general of the Agricul tural department outlined a scheme whereby in five years sufficient seed for producing species approved by spinners could be obtained to supply the whole of Egypt

The experiment initiated by Sir Eldon Gorst in 1910 of handing over local education to the provincial councils was continued funds being provided by a percentage on the land taxes while the government granted £E 100 000² for the building and equipment of schools. The councils took up educational work with enthusiasm

Several ministerial changes took place in 1912 On April 1st Saad Pasha Zagloud the minister of Justice and one of the few men of pure Fgyptian origin who had attained cabinet rank, resigned, on the 15th of the same month Sir Joseph Saba also resigned tusef Wahba, a Copt, and councillor to the mixed court of appeal at Alexandria, was made minister of Foreign Affairs, Hussein Pasha Ruchdi being transferred from the Foreign Office to the finance ministry

¹ A feddan equals 1 03 acres

Finance—By 1911 the finances of Egypt had fully recovered from the effects of the economic crisis of 1907 (see E B ix, 119) The revenue in 1911 was £E 16 793 000 exceeding that of 1910 by £F 827 000 and that of 1907 (the highest figure previously recorded) by £E 425 000. The expenditure in 1911 was £E 14 872 000. The principal sources of revenue were direct taxation £E 5528 000 customs £E 2 169 000 railways £E 3 729 000 tobacco £E 1669 000. Though 1911 was a year of financial prosperity it was marked in the autumn by a series of failures in the banking and business community, but these were due to antecedent causes—that of the so-called Bank of Egypt in London in the words of Sir Paul Harvey financial adviser being due to an unsound system of business and finance initiated many years ago. The other failures were ranked as a deferred result of the speculative movement which came to an end with the crisis of 1907. Notwithstanding heavy expenditure on public works the government bassed through the lean years of 1008, 1000. expenditure on public works the government passed through the lean years of 1908 1909 and 1910 without having to raise a loan the reserve fund on January I 1912 being £E 5 847 000 The total debt in the hands of the public at the same date was £89 117 000 involving an annual charge of £E 3 359 000

For 1912 the budget figures were -- receipts £E 15 900 000 expenditure £F 15 400 000

For 1913 the estimates were —receipts £E 16 130 000 expenditure £E 15 630 000

During 1912 the Domains loan was extinguished and the profit on the working of the domains (£E 60 000) became available for general purposes A sum of £E 250 000 was

domains (£E 60 000) became available for general purposes. A sum of £E 250 000 was set apart in the budget of 1913 for sanitary and other improvements at Cairo where the new bridge across the 'lile at Bulak was completed in 1912 after four years work.

Trade and Shapping.—The total trade of Egypt in 1911 amounted to £E 58 826 000 (imports £E 27 227 000 exports £E 28 599 000) an increase over 1910 of £E 3 300 000 of this total 95 per cent passed through Alexandra. The figures for 1911 include bullion imports £E 5986 000 and exports £E 2 599 000. The United kingdom sent 33 5 per cent of the imports and took 45 per cent of the exports. Next in order came France Turkey Austria Germany and Italy. Owing to the damage by cotton worm deterioration of seed and in lower Egypt to cool weather during the summer the quality of the 1911-12 crop was rather poor and represented a value of only £E 29 000 000 though in quantity it was little inferior to the record crop of 1910-11. Prices were lower in consequence of the abundant inferior to the record crop of 1910-11 Prices were lower in consequence of the abundant American crop The chief exports in 1911 were cotton and textiles £E 23 078 000 cereals vegetables &c £E 4 064 000 cigarettes £E 200 000 livestock skins and sugar At Jemsa on the Red Sea petroleum in paving quantities has been discovered and during

1912 the export of crude oil began Phosphate is being worked near Kosseir At Alexandria in 1911 the tonnage of ships entering the port was 4 095 000 39 per cent being British Austri Hungary came next with 10 per cent During 1911 4969 vessels net tonnage 18 324 000 passed through the Suez Canal compared with 4533 vessels of 16 581 000 tons in 1910 The percentage of British vessels was 62 as regards numbers and 64 as regards tonnage German vessels figured at 13 per cent and 15 per cent respectively. Dutch at 57 per cent and 53 per cent and French at 47 per cent and 45 per cent. During the year 17 000 pil grims passed through Suez for Mecca.

Irrigation—The task of raising the height of the Assuan dam (see E B viv 850) was completed in 1912. The basin conversion works were completed in 1911 and the whole area brought under perennial irrigation. The regulator at the head of the Menufia Canal built about 1850—having suddenly collapsed in De ember 1909 a new regulator was built by Messrs Aird & Co by July 1910 before the arrival of the Nile flood—a record in Egypt for rapid construction. The budget for 1913 set apart £E 480 000 for drainage works the for rapid construction. The budget for 1913 set apart £E 480 000 for drainage works the total estimated cost of the scheme being £1 192 000.

Obstuary—The deaths may be noted of ARABI PASHA (see E B 11 283) the former

Nationalist Leader on September 18 1911 at the age of 72 and of RIAZ PASHA (see E B xxiii 281) ex Prime Minister on June 18 1911 at his age of 75 (F R CANA)

Anglo Egyptian Sudan

The history of the Anglo Egyptian Sudan in 1910-12 has been one of marked prog ress in administration and an equally marked increase in the prosperity of the people this prosperity being so equally divided that in April 1912 Lord Kitchener declared that there is now hardly a poor man in the Sudan" Sir Reginald Wingate the Sirdar estimated the population in 1012 at well over 3 000,000, compared with the esti mate of 1,853,000 in 1905

In June 1910 the Lado enclave (see E B xvi 60) was taken over from the Belgian government and added to the province of Mongalla Minor disturbances necessitated small expeditions during 1910-12 in Kordofan and m Mongalla where the Anuak and Nuers who had obtained large quantities of modern firearms from Abyssinia were fighting among themselves Up to the end of 1012 government authority had not been

¹ See E B xxv1 10 et seq

fully established in the upper Sobat region—In Sennar in 1910 sparks of the old fanatical spirit caused two outbreaks promptly suppressed—These incidents were precipitated by the appearance of Halley's Comet which the Sudanese connected with the comet that heralded the advent of the Mahdi (Egypt No 1 (1911) p 75)

The occupation of Wadai by France (see E B xxviii 2 5) drew attention to the question of the boundary between that Sultanate and Darfur ruled by Sultan Ali Dinar as tributary to the Sudan government Negotiations were in 1912 entered into with France for the fixing of the frontier, Sir Rudolf von Slatin (the Inspector General) being the representative of the Lgyptian and British governments. The completion of the railway from Khartum to El Obeid (the capital of Kordofan) in 1911 not only gave an impetus to trade but put the Sudan government in a position to control Darfur and the western frontier generally. An event of considerable importance to the Sudan was the visit paid to it by the King and Queen of England in January 1912 on their return from India. Port Sudan was inspected and at Sinkat the king held a review at which representatives of almost every tribe—Arab and negro—were present

Chief attention was concentrated by the administration on the economic, specially the agricultural development of the country. The experiment of growing cotton on the Gezira plain begun in 1911 proved entirely successful while in the Tokar region near Suakin the cotton output more than doubled during 1907-11. It has been conclusively proved that sugar cane can be grown along the Nile north of Khartum. The demonstration that the surplus waters of the Nile not needed for Egypt can be utilized in the Sudan to render land agriculturally valuable caused attention to be paid to the system of land tenure. In the Sudan by Moslem law the land is. Kharaji is it belongs to the original owners and their descendants, and the government is entitled to prevent it alicination. This power is being used to protect the Sudanese from European speculators in land. A cadastral survey showed that in the northern provinces nearly all the land is in private ownership. In the south tribal tenure prevails.

Port Sudan (on the Red Sea) being advantageously placed both for the European and Eastern markets external trade has made rapid stride. The value of exports (merchandise only) rose from £E 977 600 in 1910 to £E 1.577 000 in 1911 an increase of 40 per cent Imports (ex lusive of speec) rose from £E 1.345 000 in 1910 to £E 1.696 000 in 1917 of the British share was 46.5 per cent. Cotton goods and food stuffs (cheffy sugar and salt) are the chief imports. The principal exports are cattle and sheep gum and cotton (end and lint) other considerable exports being durra dom nuts and dates. The ability of the Sudanese to take advantage of the increased facilities for trade offered is marked as the railway return among other things show. In the live years 1907–11 the profits on the railways rose from £E 85 000 to £E 128 000. The live stock traffic to a from 96 000 animal in 1910 to 17. 000 in 1911. While goods traffic is mainly via the kild Sea passenger traffic still g its via Egypt. In 1912 a regular mail service between London and Khartum occupying only nine days was instituted.

The financial situation is sound as shown by the fact that for 1913 the Sudan government renounced the contribution from the Egyptian treasury which wa £E 188 000 in 1911 and £E 163 000 in 1912. In its stead the government took the Custom duck levied in Laypt on goods for the Sudan estimated at £E 85 000. The accounts for 1911 showed a surplus of £E 145 000 receipts being £E 1664 000 and expenditure £E 1519 000. For 1912 the receipts and expenditure were both budgeted for at £E 1710 000.

The Reports by the British Agent on Egypt and the Sudan published yearly as a par liamentary paper give the most trustworthy information concerning those countries. See also the Consular reports on Alexandria I ort Said &c E A Wallis Budge Cook's Hand book for Egypt and the Egyptian Sudan 3rd Ed (London 1911) J Alexander The Truth About Egypt (London 1911) useful information concerning the Nationalist parties (F R Cana)

FRANCE²

Population —The census returns of 1912 give the total population as 39,601 509, showing an increase of 349,264 over the census of 1906 (39 25-245) The average density is about 190 per sq m Fifteen towns contain over 100,000 inhabitants, and 134

2 See E B x 775 et seq

¹ Irrigation schemes costing some £5 000 000 were in 1912 under consideration.

exceed 20 000 The population of Paris is 2 888 110 as against 2 714,068 in 1901 The movement of population in 1909-11 was as follows

	Marriages	Births	Deaths	Excess of Births	Excess of Deaths
1909	307 900	769 000	756 000	13 000	
1910	309 200	774 300	703 000	71 000	
1911	307 700	742 100	776 900		34 800

The death rate per thousand in 1910 was 17 98 The stationary of relatively declin ing population provides a social problem which receives more and more attention from French statesmen and psychologists One remedy proposed is a bounty on every third child born in a family, another is that only fathers of three children shall be eligible for public employments In July 1912 the Minister of Finance was empowered to form a commission to inquire into the whole problem from a national social and fiscal point Fathers of families are preferentially treated already under the Old Age Pen sion Law (Loi des retraites ouvrieres et pavsannes see below)

Alcoholic excess is still a mischievous social factor to which the legislature pays insufficient attention In February 1912 the Chamber of Deputies adjourned a measure adopted by the Senate, restricting the number of shops for the sale of alcoholic liquors The consumption of alcohol is increasing The total amount of pure alcohol submitted to the payment of duties in 1909 according to the official returns was 29 524 132 gallons in 1910 30 778 748 gallons and in 1911 34 628,396 gallons

Commerce - The following are the latest figures for imports and exports showing the total trade —Imports (1909) £249 800,000 (1010) £286 880 000 (1911) 3 6 400 000 Exports (1909) £2.28 640,000 (1910) £249 280 000 (1911) £246 883 000 Total (1909) £478 440,000 (1910) £536 160,000, (1911) £573 283 000

Economic conditions remain about normal the price of provisions showing however a marked upward tendency In 1909 thanks to satisfactory harvests the country recovered from the crisis of 1907. In 1910 the harvests were not so good agriculture suffered from the serious floods, the wheat crop was short and the vintage poor. The country had to fall back largely on foreign supplies during the winter of 1910-11 and prices rose perceptibly The drought of July-August 1911 did much damage to the crops there were serious complaints of the high price of food and some disturbances ensued in the north and west. These circumstances were no doubt only contributory causes of an economic state of things the real origin of which lay still deeper in the rise of wages for agricultural labour and in the shortening of hours. In response to public complaints the Caillaux Cabinet could devise nothing better than a scheme authorising municipal bakeries and butchers' shops An indignant protest from small tradespeople followed and the measure was withdrawn by the Poincare Cabinet

dear food crisis was soon followed further by an acute phase of the housing problem in great cities especially at Paris, where the rents of small apartments have reached alarming proportions owing to the influx of new arrivals. A Tenants Association Federation des locataires) made noisy demonstrations, and the government took measures Wages have risen perceptibly on an average 20 per to allay excitement (see below) The Savings Bank Deposits amounted to cent to 25 per cent between 1806 and 1911 £225,920,000 on the 31st of December 1910

In the mining industry important developments have been in progress owing to the opening of new fields notably in the Meurthe and Moselle basin (Longwy Nancy Briey) estimated to contain about 2 300 000 000 tons the yield in 1909 having reached 10 670 000 estimated to contain about 2 300 000 000 tons the yield in 1909 naving reached to 670 000 tons the Normandy basin worked since 1893, and yielding about 520 000 tons in 1910 and the Anjou basin where prospecting has been done. France which formerly imported her mineral ore 18 now becoming an exporter. Production has increased as follows—

(1877) 2 426 000 tons (1900) 5 448 000 tons (1909) 11 890 000 tons.

The use of crossed cheques was introdued by a law passed December 22 1911.

By another law passed January 5 1912 the organisation was authorized in each maritime port of a Conseil d'Administration du port a board of control empowered (though not compelled) to take over the administration of the port on a broad autonomous basis.

pelled) to take over the administration of the port on a broad autonomous basis

The Land Bank System (Credit agricole) is developing rapidly -

	Number of Local Branches	Total Loans advanced	Sums advanced by the State	
1901	21	£ 206 000	£ 128 000	
1905	66	1 766 000	779 000	
1910	96	4 528 000	2 017 000	

Mutuality also is making great progress the societies having 4 500 000 members in 1911 as against 1 200 000 in 1898, the annual takings amounted to £3 880 000

Social Legislation — The most important achievement of recent years has been the enactment of the Law of Old Age Pensions (Los sur les refraites ouvrières et paysannes) April 4 1010 Many difficulties have arisen over its application and in spite of attempted amendments weak spots still remain. After discussions in the Senate from November 1909 till March 1910 the draft Bill was laboriously knocked into shape and the Chamber was so anxious to pass it that very little attention was paid to details and the law was carried with no more than a formal debate (March 26-31) vided for two categories of insured persons compulsory and optional. Men and women employed in trades manufactures the liberal professions or agriculture, and indoor and outdoor servants aged not less than 65 years, and in the receipt of not more than f120 per annum were brought under the provisions of compulsory insurance insured person was to pay at regular intervals a sum amounting annually to 7s 1d for men 4s od for women and 3s 6d for minors under the age of eighteen The employer was to pay a like sum and both payments to be recorded by affixing adhesive stamps to a card in the keeping of the worker and renewable annually The payments were to be made each pay day the employer deducting the workman's quota from his An insured person might claim his pension at the age of 65 The State increased the total of the pension by an annual grant of £ 7s 6d it the insured person had made thirty annual payments—twenty eight payments to count as thirty if the person insured had performed two years of military service. If the insured person had made less than thirty payments but more than fifteen the State made a grant equivalent to as many times is 2d as he had made payments For less than fifteen annual pay The law also provided a scheme of voluntary insurance ments the State made no grant for farmers metayers market gardeners artisans and persons in business on their own account or with a single workman or with help from their families, for non-wage earning members of the families of insured persons for earners of incomes between £120 and £200 per annum and for wives and widows (other than wage-earners) of insured persons belonging to the compulsory category

The law was put into force on July 3 1911 In spite of the efforts of the Government and administration it met with scanty success. The working classes regarded it with much indifference By December scarcely a third of the persons coming under the compulsory division had complied with the regulations and only one tenth of those qualified for voluntary insurance Two criticisms were made by those affected In the first place by compelling the worker to keep up his payments till the age of 65 if he was to receive the whole benefit of the state grants, the law left him little hope of drawing his pension, and was organising "annuities for the dead' In the second place the State grants were madequate To meet these objections the law was amended by articles 54 to 62 of the Finance Law of February 27 1912 coming into operation August 1 1013 By the new regulations the age at which the pension becomes due is lowered to 60 the insured person can defer the receipt of his pension till the age of 6; the State grant is increased to £3 198. 2d with an added bonus of 10 per cent for the insured person of either sex who shall have reared at least three children to the age of For women, the birth of each child is to count as a year's insurance While endeavouring to attract the working-classes by new benefits, the Government tried to secure the application of the law by making the employer hable to carry out its provisions even without the consent of the worker To this end, the administration, interpreting Article 23 of the Law in its own fashion, held that the employer was bound, with or

without the worker's consent, to deduct the amount of insurance payable by the work man from his wages and to pay it over together with his own contribution to the clerk (greffier) of the justice de la paix Employers stood out against this contention, and won a case on appeal in the Court of Cassation, December II 1911

Among other legal enactments may be mentioned the Law of April 30, 1909 forbidding the employment of women and children in certain trades the Law of July 20, 1909 prohibiting the use of veruse (white lead paint) the Law of November 27, 1909 which secures women from dismissal from employment on account of child birth the Law of March 25, 1910 suppressing the truck system (economa's) and prohibiting employers from selling food or merchandise to their men the Law of December 28, 1910 which codified the texts of various labour enactments the Law of August 5, 1911 regulating the financial operations of authorized trade unions and the Law of March 30, 1912 regulating hours in mines

Many strikes have arisen out of disputes about the conditions of work. Besides the great railway strike (see below) much the most serious of them all mention may be made of the strike on the Southern Railways (Chemin de Fer du Sud) a local aftur in May-June 1910, and the strike of inscrits maritimes in April and May 1910 which at one time seriously interrupted trade and communications between the mother country and Algeria and Corsica. This latter trouble broke out afresh in June 1912 spreading from Marseilles to Havre and Dunkerque at Marseilles the strike lasted for seventy six days. There was a taxi cab drivers strike at Paris from February to April 191

State Purchase of the Western Railway (Chemin de Fer de l'Ouest) - By virtue of an agreement dated October 28 1900 the Government bought up the Western Railway and took over the management thus greatly extending the scope of state rails is admin The agreement was ratified by Parliament (Law of Dec 21 1909) It was not long however before the management of the Ouest Etat was subjected to sharp criticism. An interpellation in the Chamber (Dec. 1910) called atten tion to the irregularity and insecurity of the service. The Courville accident (March 1911) unhappily showed the complaints to be well founded The disorganization of the Western suburban service by which large numbers of people travel to and from Paris daily called forth vigorous protests and even led to something like riots. As time went on the 'Ouest Ftat succeeded in getting the train services into better working order but from a financial point of view considerable scope for criticism remains. In 1911 the deficit on the line had risen to £ 960 000 the net receipts fell to £1 180 000 (under the company they used to vary from $\frac{1}{2}$ 2 600 000 and $\frac{1}{2}$ 3 200 000) while the proportion of working expenses rose to 87 per cent (about 55 per cent in the companies) The esti mated deficit for 1912 was {3 280 000 Advocates for the purchase are of course able to say that the company handed over the line in poor condition but their opponents re tort that the largest part of the increase in expenditure is due to the higher salirius paid and to an ill considered increase in the staff (5 280 additions were made in 1911) A statute regulating promotions and prohibiting political recommendations was issued to the State Railways agents in September 1912

Justice—Children's Courts (Tribunaux pour enfants) were established by the I aw of July 25 1012 which asserted that no penal responsibility rests upon children under the age of thirteen. They are removed from the jurisdiction of the ordinary courts and made amenable to the civil tribunal sitting in chambre du conseil. Publicity is restricted and considerable latitude is allowed in the methods to be adopted. Minors between the ages of 13 and 18 are left under the jurisdiction of the ordinary courts but will be dealt with in future by special magistrates, cases being heard privately, the public admitted under restrictions and no reporting allowed

Education —Higher education, stimulated by the universities, which are now constituted as corporate self governing bodies, is in a flourishing condition. Secondary education under the system of 1902 by which students are permitted to choose their own course of study, into which the classical languages and literature may enter partially or not at all gives results which are a good deal discussed. The charges of neglecting the study of French and of squandering the pipils attention over too many subjects are brought against the system. Primary education is passing through a critical period.

A systematic struggle begun by some Roman Catholic parents against secular teachers and secular class books has provoked a counter movement in defence of secular teaching ('defense de l'École larque'') On the other hand some teachers holding advanced views have come into conflict with the authorities (see below) Complaints are still heard that school attendances are far from what they ought to be and that the compulsory education principle is too often infringed

Local Government — The results of the Paris municipal elections for May 5-12, 1912, were United Socialists (Socialists unifies) 15 Independent Socialists of Radical Socialists 14 Republicans (Left) Liberals and Progressives 27 Conservatives 10 The Paris municipal budget for 1912 reached \$117.007.000 A law passed July 31 1912, authorized a loan of \$8.000.000 for building cheap dwellings The municipal debt amounted to \$100.000 660 on Dec. 31 1908 on Dec. 31 1909 it was \$98.977.000

In 1910 the total number of communes in France was 36 232 Their ordinary receipts (Paris being excluded) rose in the same year to £ 4 1 0 000 and their expenditure to £ 804 000 while the municipal debt in 1909 was £67,610 000

4rmv—The fighting strength on the pay roll (effectifs budgetaires) in 1912 was 78 741 officers and 555 900 men the estimate for 1913 was 28 93 officers and 563 500 men. Modifications have been made in the higher command consequent on the discussion in Parliament which brought about the fail of the Monis ministry (see below). The post of vice president of the Conseil superieur de la Guerre was abolished and a Chief of the General Staff was appointed instead. The Armv Council (Conseil superieur de la défense nationale) was reconstructed by the decree of July 26 1911. Both measures aimed at improving the organization of the higher command in peace or war. They have been followed by other changes, younger officers are admitted to the higher grades and promotion accelerated in the lower. With these ends in view the Law of April 11 1011 constituted a special reserve " of officers. These officers return to civil life while continuing to draw pay but twice a vear they must take part in military exercises to keep in training in case of war. The officers pay was increased in 1910.

Discipline has been put to severe tests of late years by the anti-militarist opinions advanced in certain political and labour quarters animated by a rather crude humani Under the influence of such theories the power of punishing offend tarian philosophy ers was withdrawn from non commissioned officers and subalterns and put in the hands of captains and majors (Decree of May 2, 1910) The measure was rescinded two years later (April 24, 101.) The legislature acted even more heedlessly when it was enacted that men previously convicted should be drafted into the army Public opinion quite rightly became alarmed at the amount of crime among young soldiers and it became only too evident that offenders so far from being influenced for good by military service were corrupting others. This class of recruits was abolished April 11, 1910, and men who had undergone conviction were separated as before into the special corps called bataillons d 4 frique But at the same time the law suppressed the disciplinary companies made up of the worst elements and stationed in Algeria 'special sections' were distributed instead in different parts of France This proved an unlucky innovation and in 191 the Government had to look for some new plan of organization

The weakness of the effective forces of France as compared with those of Germany has been a matter of much concern. It has been suggested that their numbers might be augmented by calling up coloured troops whose courage and loyalty have been tried in the colomes the idea being that such troops as these should be garrisoned in Algeria so releasing the present Algerian army corps for European service. In 1910 the Cham ber voted the necessary credits for the transfer of a Senegalese battahon, and the experiment appears to have been a success.

Aviation for military purposes has made remarkable headway. In 1910 the attention of the Senate was called to the inadequacy of the French aviation service compared with the fleet of dirigibles organized by Germany. The attention however, more recently paid to the development of aeroplanes has completely reversed the situation, public opinion giving encouragement in the shape of a national subscription (March 1912)

Navy —White-the scheme for a new naval programme had not been definitely voted, some progress was made in building. Two armoured cruisers (cutrassés) of 23 000 tons were launched in September 1911, and by a special law passed in April of that year two more units of the same type were put in hand at the dockyards. The completion of six battleships of the "Danton" type in August 1911 enabled a new division of forces to be made—three squadrons of six armoured ships (cutrasses) each. The Naval programme proposed to the Chamber in 1910 provided, on its completion in 1920 for 28 armoured ships (cutrassés), 10 look out ships (claureurs) 52 sea going torpedo boats (torpilleurs de haute mer) and 10 vessels for foreign stations. It was voted by Parlia ment February March 1912. In September 1912 the Government concentrated all the naval forces in the Mediterranean. Public opinion regarded this as a proof of a common policy arrangement made with Great Britain.

Anxiety as to the quality of the powder supplied for the navy has been caused by the bursting of a gun on the Gloire and by the blowing up of the Liberté in Toulon har bour (September 1911) Two submarines have been lost with their crews the Pluviosc near Calais (May 1910) and the Vendemiare off Cherbourg (June 1912)

Political History

The first Briand Cabinet which came into office on July 23, 1000 lasted till Novem ber 2 1910 The Ministry of M Clemenceau¹ which preceded it went out on a personal question on July 20 1909 in the course of a navy debate which was other M Briand's The Premier having dragged in a reference to M wise unimportant First Delcasse and his foreign policy drew down a sharp retort upon himself Cabinet. followed by an adverse division The vote was directed against M Clem enceau himself rather than against the policy of the ministry He advised the President of the Republic to send for one of his colleagues M Briand 2 who found no difficulty in forming a cabinet taking the Ministry of the Interior himself and allotting Justice to M Barthou Public Works to M Millerand 3 Labour to M Viviani Finance to M Cochery 4 War to General Brun (b 1840) and the Navy to Admiral Boue de Lapey The Ministerial declaration read in the Chamber on July 27th clearly outlined the Government's intention of carrying out the social reforms of the previous cabinets — Old Age Pensions income tax, customs tariff and civil service reform (statut des fonction naires)—a programme sure to satisfy the Left while the Prime Minister's declarations of his faith in Liberalism reassured the Moderates The session came to an end almost immediately M Briand in his Perigueux speech made on October 10th before the reassembling of Parliament dwelt further on his leanings towards a broad and tolerant He described the narrow policy resulting from the actual political methods in a phrase which was quickly taken up, as "httle pools of stagnant water His new di rection of policy made Socialists and Socialist Radicals uneasy but the Prime Minister was able to calm their apprehensions The deputies went hard at work as soon as they reassembled (Oct 1909) This session was the last before the general elections and they felt they must have some practical result to show their constituents Elec toral Reform was the first question that came up (Oct 21st-Nov 8th) **Flectoral** It had been brought before the country for some time past by a very Reform

It had been brought before the country for some time past by a very active group (led by M Charles Benoist, M F Buisson² and M Jaures²) belonging to different parties in the Chamber who all laid great stress on proportional representation (La "R P") Public opinion had been roused by a vigour ous lecturing campaign. The new Cabinet was not in favour of the reform but gave way to the wish of the Chamber to discuss the proposals drafted by the Universal Suffrage Commission. They were taken as a basis for general discussion and after a debate on the details the Assembly adopted a resolution in favour of establishing proportional representation (Nov. 8th). The reform seemed likely to triumph, when the Pre-

```

mier intervened and made the vote one of confidence in the Ministry, with the result that the Chamber rejected the proposal

Parliament next voted (Dec 21 1909) the purchase of the Western Railway (see above) and then settled down to revise the customs tariff (Law of March 29 1910)

The new taxes strengthened the protective system of 1892, duties were raised all round and differences increased between the general tariff on all imports and the minimum tariff on goods imported from countries which have concluded commercial treaties with France or can claim the benefit of "most favoured nation" treatment. These differences, amounting to twenty or twenty five per cent. Were increased to fifty per cent. The arguments in favour of higher duties were that foreign countries were adopting similar measures and that fiscal and social legislation were laying new burdens upon home industries.

The budget of 1910 was only promulgated on April 8th. The revenue estimate was £167 423 000 to meet an expenditure of £167 411,000. The revenue was made up by an increase in succession and legacy duties by taxes on automobiles and advertisements and finally by issuing bonds (obligations) at short date for £6 $_{3}$ %0 000 parhament preferring to have recourse to this questionable method rather than increase the duties on wines and spirits on the eve of the general elections as the Finance Minister had proposed to do

The General Elections of 1910 found the state of the country as follows -Since the religious enactments (Law of Associations July 1 1901, Law of Separation of Church and State December 9, 1905) were passed the Radical Socialist Situation at Elections party who were masters of the political situation had started on a series of social reforms which were resulting in heavy additions to the financial bur dens of the country and in encouraging the masses to make further demands. While the proposed income tax the increase of existing taxation and the constant business difficulties set the capitalist classes reflecting the masses of wage earners and small clerks aware that the Government was yielding under pressure were putting their claims still higher and often lost all sense of proportion. The result had been troubles in the South (May-June 1907) the riots provoked by the Confederation génerale du Travail at Draveil Vigneux (July 1908) and the postmen's strike (March 1909) In presence of these facts the union of the Lett was broken. Socialists and Radical Socialists (extreme Left) went to the most audacious lengths in urging the popular demands while the Radicals called a halt and tried to construct a party of order The head of the Covernment M Briand tried to find a formula which would give effect to this new development He had pointed it out in his Perigueux speech was more definite in addressing his constituents at St Chamond on April 13th when he spoke of tolerance and liberalism and showed that the worst enemies of society were To combat the latter he proposed to issue party spirit (sectarisme) and anarchism regulations to all officials which by defining their powers should make them more atten tive to their duties and to convert workmen's syndicates into corporate bodies so as to confer upon them the right of acquiring and administering property and thus put an end to their present appearance of being more or less revolutionary clubs were fought on this issue the Radical Socialists made common cause with

were fought on this issue the Radical Socialists made common cause with the Socialists, while the Radicals on the other hand dissociated themselves altogether from collectivist candidates. The election returns of April gave the following figures the corresponding numbers in the previous Chamber being shown in brackets—Reactionaries (80) 71, Nationalists (16) 17 Progressives (60) 60 Republicans of the Left (82) 93, Radicals and Radical Socialists (269) 252, Independent Socialists (20) 30 United Socialists (Socialists unifies) (55) 74

It is impossible where 235 new deputies were concerned to compare these figures with strict accuracy. But the following points may be noticed. The Socialists made headway at the expense of their Radical allies fiscal reform seemed to find little favour in a country which only returned 15° adherents of M. Caillaux while Proportional Representation (la 'RP') on the other hand, found

many supporters,—candidates who gave it prominence polling 5 500 000 votes as against 2 500 000 votes given to supporters of an absolute majority "system

The New Chamber met on June 1 1910 M Briand put the Government programme before the house at some length Returning to the broad views expressed at St Chamond and Perigueux he outlined a vast project of administrative reform involving a new method of popular representation. This was his response to the opinion on Propor tional Representation expressed by the country Plenty of interpellations ensued from Socialists and Radical Socialists, the latter with M Jean Cruppil as their mouthpiece not hiding their misgivings. Soon afterwards the session came to an end

A serious railway strike troubled the end of the vacation in October servants (cheminots) had been asking for improved conditions of work for some time past and the concessions made by the companies were regarded as insuf The Great A committee was appointed to arrange for a general strike on Octo Railway It broke out prematurely on the Nord on the 11th, but in spite Strike. of the leaders efforts the strike never became general Train services were dislocated on the Nord, the Ouest and the Midi The Eastern railways the Paris Lyon Mediterranee and the Orleans lines kept their trains running almost as usual Reports came from all sides of sabotage (the act of preventing the carrying out of work of any sort by damaging tools plant or material) The Government promptly took energetic militarization" orders being issued to all railway servants troops being sent to guard the lines and proceedings taken against members of the Strike Committee 'Militarization' consisted in calling out all railway servants hable for military service for a period of twenty-one days' instruction, but leaving them nevertheless to carry on their ordinary work Refusal on their part would make them liable to be brought before a court martial The strike agents were on the other hand dismissed on the lines where the train services were being maintained The strike broke down completely, and by the 18th all the train services were working as usual but excitement at the time was intense and left deep traces Business was hampered for a long while by the dislocated traffic and sabotage was continued with a rare pertinacity. When parliament reassem bled on October 23rd the Ministry was taken sharply to task by the Left groups In the course of a string of interpellations between October 25th and 30th there was a visible widening of the rift existing already between the Extreme Left Socialists and Radical Socialists (led by MM Jaures and Cruppi) who decided to swim with the anarchist tide and the more moderate section which was disposed to form a party of order' It was the latter section that kept the Ministry in office

The result was a reconstruction of the Cabinet and the coming in of a second Briand Ministry which lasted from November 3 1910 to February 27 1911 In spite of the support received in the Chamber M Briand decided that his policy now Second turned too obviously on matters remote from those in question when he Briand accepted office in the previous year so he resigned (Nov 2d) and the Ministry President M Fallieres 2 called upon him to form another Cabinet (Nov The new administration showed a marked tendency towards the group of M Briand's two Socialist colleagues MM Millerand and Viviani resigned, and the Prime Minister surrounded himself with new men. The programme which he laid before Parliament (Nov 8th) was dominated by a policy of social defence -trade unions to be restricted to their industrial function assurances of security to be given for the maintenance of public services Henceforth it was more obvious than ever that there was a gulf fixed between the Government and its former Sollt with supporters on the Extreme Left It was shown directly over the question Extreme of reinstating railway servants (cheminots) dismissed for taking part in the Left strike The Extreme Left asked the Ministry to compel the companies to take back the men, and the Ministry refused to put pressure on the companies The position of the Cabinet grew difficult, however, and its majority melted away attack on social questions proving fruitless, the Extreme Left had recourse to its old ¹B 1855 fo merly minister of Commerce ²B 1841 see E B x 154

tactics and brandished the bogey of clericalism On February 24th MM Malvy and Paul Meunier made an interpellation on the way in which the Law of Congregations was being carried out and reduced the Ministerial majority to resigns M Briand considering that he could not carry on the Government in such precarious conditions resigned on the 27th and he was succeeded by the Monis¹ Ministry (March 2-June 23, 1911)

In the crisis which tollowed M Briand's resignation the President of the Republic thought to meet the case by summoning the leaders of the Radical Socialist minority which had come into collision with the previous Cabinet M Monis did Monis it is true try to obtain the co operation of a few moderates such as M Ministry Raymond Poincare² and M Ribot ³ but he met with refusals and ended by surrounding himself with his own party He took the Ministry of the Interior him self gave Finance to M Joseph Caillaux 4 Foreign Affairs to M Cruppi, War to M Berteaux⁵ and the Navy to M Delcasse ⁶ As far as men were concerned it was a com The political programme on the other hand was scarcely altered at plete change all (measures to prevent the recurrence of railway strikes income tax, and electoral reform) It was the spirit that was different. This was soon seen when the second debate on the re instatement of railway servants began in April The Prime Minister and the Minister of Public Works (M. Dumont), under pressure from the Socialist groups announced that they meant to break down the resistance of the railway companies liw was to be passed establishing a disciplinary council which should decide which of The bill was the men should be taken back and revise the dismissals after the strike in its preliminary stages when the Ministry fell At the same time the Government gave vigourous support to a bill making the Railway Servant Pensions Law of 1909 retroactive in its scope That also came to nothing

The very democratic policy of the Government did not save them difficulties They had not long been in power when the Delimitation law brought on serious disturb

Trouble in the Cham pagne districts

ances in Champagne The object of the Delimitation decree of December 7 1900 had been to restrict the application of the word champagne' to wines grown in a certain area namely the department of the Marne and some adjacent communes in the departments of the Aisne and Haute

Trouble had already occurred (Nov 1010 and Jan 1011) in various locali Marne ties in this region where the peasant wine growers attributed the stagnation in the wine trade to fraudulent methods of sale and M Briand had a law voted (Feb 10 1911) to provide more precisely for that question Agitation began again in March at other This time it was the wine growers of the Aube who wanting to sell their wines points to the champagne wine factors as they had hitherto done demanded that their area should be included within the champagne zone. As the Government hesitated and took refuge behind the jurisdiction of the Council of State the Aube wine growers outside the limits indulged in deplorable demonstrations those of the Marne hearing that the Delimitation Law was to be repealed rose in their turn and on April 11th-12th there was pillage and incendiarism at Ay and Epernay Quiet was only restored after a promise that all attempt at delimitation should be given up

On May 21st while watching the start of aeroplanes for the Paris Madrid race, both the Premier and the Minister of War were struck down by one of the machines

Fatal accident to H Bericaux

M Berteaux was killed on the spot M Monis was grievously injured but he continued in office and gave the War portfolio to General Goiran The Cabinet found great difficulty in administering the Old Age Pensions

Law and their troubles were increased by anxiety over the situation in Morocco, and the necessity of sending an expedition to Fez in April-May (see under

Antoine Emmanuel Ernest Monis b 1846 minister of Justice 1899-1902 senator

²B 1860 see *E B* xxi 892 ⁸B 1842 see *E B* xxiii 285 ⁶B 1863 mini ter of Finance 1899–1902 and 1906

B 1852

⁶ B 1852 see E B vii 953

Morocco) Their scheme of electoral reform was still in progress, when the fall of the Ministry was brought about by a casual incident. A question asked in the Senate (June 21st) and an interpellation later on in the Chamber (June 23rd) about the organization of the command in time of war, drew from General Goiran a declaration that the supreme decision in such a case rested with the Government. The prospect of seeing the destinies of the country given into the hands of a body whose competence was doubtful, to say the least displeased Parliament, and the Chamber having passed to the Order of the Day without giving the vote of confidence demanded by the Government the Ministry resigned.

In the discussion which resulted in the fall of M Monis, Parliament had had in mind a question really of persons rather than politics. Little personal enthusiasm was felt there for the head of the Government who had often lacked firmness in or out of the Chamber but though he disappeared there was no particular desire to change his policy M Fallieres thought to meet this view by call ing M Caillaux one of M Monis' most brilliant colleagues to the head of affairs and he formed his ministry on June 27th He took the Interior himself leaving Finance to M Klotz and transferred M Cruppi to Justice in order to give Foreign Affairs to M de Selves? M Delcassé kept the Navy and M Messimy's went to the War Office M Caillaux gave promise of being a Government which governs? He firmly rejected the repeated demand for the reinstatement of the railway servants mamfested his in tention of putting down sabolage and took measures against anti militarism

The budget of 1911 was not voted till July 12th after the introduction of seven 'provisional twelfths' (These are credits voted month by month so that public service can be carried on without interruption though the Budget has not been voted as it ought to be, regularly, before the 1st of January For many years past the slackness of Parliament over the preliminary stages of finance bills has made them nearly always necessary) The expenditure was estimated at £175 458 000 and the revenue at £175 467 000, an increase in the customs yield making it unnecessary to introduce any new taxes of importance

The real tendencies of the Cabinet soon began to show themselves on the lines of strict party politics. A circular from M. Messimy (Dec. 11, 1911) made officers promotions in the army dependent upon reports furnished about them by the prefects. After all this only gave a formal sanction to a practice already long standing. The Minister of Public Works to satisfy the Socialists granted mining concessions only to those who would accept special conditions thus nullifying the clauses of the organic law of 1810 on the subject. He appointed a commission to consider a Bill aiming at making the posts of railway directors and head officials into government appointments. When the Court of Appeal gave judgment on the interpretation of Article 23 of the Old Age Pensions Law the Labour Minister was up in arms against its decision, which was at variance with the line taken by the Government, and declared that new legislation would soon put an end to it. But before very long the whole attention of the Ministry was absorbed by foreign affairs

Morocco crisis.

The appearance of a German gunboat at Agadir raised the Morocco question in an acute form, which rapidly developed into an international crisis, and the summer was spent in negotiations with Germany (see Part I Sect 1 International Affairs) Public opinion watched the attitude of the Government with anxiety ill-pleased with the desultoriness of negotiations in which it seemed that the conduct of national diplomacy was too often abandoned to mere business men. Such proposed concessions as were made public appeared to be considerable, while the general attitude of the Government seemed incoherent and feeble. It was the nation itself, by an open outburst of discontent with the proceedings in September, that put more firmness into its leaders, and the conclusion of the agreement of November 4, 1911, while it cleared

Louis Lucien Klotz b 1868 president of Inland Revenue Commission

² Justin Germain Casimir de Selves b 1848 senator ³ Adolphe Messimy b 1869 rapporteur of budgets for navy (1903) army (1906-7) and colonies (1908)

up the situation did not restore to the Cabinet the prestige which it had lost The agreement itself was subjected to very sharp criticism in both Chambers when it came before them for ratification (Dec 14th-20th in the Chamber, Dec 15t to Feb 18th in the Senate) Before the debate was over the Ministry went out and over that very question. On January oth in consequence of Ministry an incident in the Senate during the preliminary stages of the discussion of the treaty M de Selves sent in his resignation M Caillaux vamily tried to replace him by M Delcassé and since other attempted combinations came to nothing he took the only course open and resigned on January 10 1912

M Caillaux s departure was the occasion of a new political grouping The country was evidently tired of ministerial rearrangements with nothing behind them suggested

Poincare National Cabinet.

by a narrow partisan spirit or by personal considerations. The govern ment by the more radical part of the Left had failed to re-establish security at home or abroad The need of new leadership was felt and a ministry was wanted which would combine more breadth of mind and more brilliancy

than its predecessors On January 13th M Poincare constructed a Cabinet composed for the most part of men of the first rank He himself took Foreign Affairs the department which in the existing condition of Europe was specially important he gave Finance to M Klotz Labour to M Leon Bourgeois War to M Millerand the Navy to M Del casse and Justice to M. Briand. So three ex-premiers were included in the Government People called it the great ministry and the 'national ministry"

The Senatorial Elections in January further showed the trend of opinion was a slight falling off in the numbers of Radical Socialist Senators and Socialists and advanced candidates were obliged to tone down their programmes Senate hundred seats were distributed as follows Radicals and Radical Socialists Plections 40 Republicans (Left) o Socialists 3 Progressives 23 Reactionaries 5

It was obvious that the new Cabinet was formed primarily with a view to foreign the ratification of the agreement with Germany passed on February 10th affairs

Pirm foreign and do-

the carrying out of the agreement the negotiations with Spain over Morocco and with England over Tangier There still remained delicate questions mestic policy at issue with Italy (the seizure of the Manouba and the Carthage

in January) and the development of the Italo Turkish war needed watching These various matters had their echoes in Parliament notably in M. Poincare's speech in the Chamber on January 2-nd about incidents arising out of Italy's descent on Africa and the interpellation on secret treaties and foreign policy at the beginning of March In home affairs M Poincaré clearly showed that he meant to govern firmly and restore social discipline M Millerand withdrew his predecessor's circular about political reports on officers of the army (Feb 1912) and (on April 24th) restored to non commissioned officers and subalterns (heutenants and sub heutenants) the powers of punishing offenders taken from them by regulations issued on May 29, 1910. After the anarchist attempts in the Rue du Havre (Feb 27th) and at Chantilly (March 25th), he obtained supplementary credits for the police and provided them with more modern methods of detecting and pursuing criminals The principal offenders were discovered besieged and killed by armed force at Choisy le Roi on April 28th and at Nogent sur Marne on May 14th

The Budget of 1912 was voted on February 27th, the revenue amounting to £180 160,000 and the expenditure to £180 120 000 The revenue was made up without recourse to new taxes or loans by means of a new institution, the provi Budget of sional account ' (Compte provisionnel) This special fund was endowed with 1912 13 resources drawn from an agreement made with the Eastern Railway Com pany, in which they were empowered to pay off their debt by anticipation it was aug mented further by the surplus declared at the close of the financial year 1911 and would be drawn upon in future by the requirements of 1913 and 1914. The budget for 1913 was introduced without delay, the expenditure was estimated at £186,585,000 (£668,000 ¹ B 1851 see E B _{1V} 330

more than in 1912) and the revenue at £180 164 000. To cover the probable deficit of £6,421,000 the Ministry proposed to resort to the provisional account. During the latter part of 1912 a new income tax scheme, a milder version of the project put forward by M Caillaux in 1907, and voted by the Chamber in 1909, passed through its pre liminary stages before a commission of the Senate. The more moderate tendencies of the majority in Parliament and especially the breaking up of the old Left bloc were shown in May when a new President of the Chamber was elected on the death of M Brisson M Paul Deschanel, the moderate Left candidate, was elected on a second ballot, out of a number of oddly assorted competitors entered against him by the Radical groups

In the Chamber the principal work of the session was the Bill for electoral reform. The discussion went on for a long while (from Feb 12th to July 10th) and was enlivened

Blectoral Reform Bill. by various incidents The previous ministries had only turned very slowly towards this reform M Briand had been avowedly hostile and it had taken a very decided expression of opinion at the general elections to incline him, and his successors after him, to look favourably on proportional on The Government groups cast no friendly eye on a reform so highly a parhamentary minority. It would probably upset the existing distribu

extolled by a parliamentary minority. It would probably upset the existing distribu tion of seats Many of their most eminent members among them were strong supporters of the absolute majority system which returns deputies for each arrondissement circonscription These were nicknamed the arrondissementiers ' M Combes 2 old tashioned Radicalism incarnate made a violent speech against proportional representation at a Radical and Socialist Radical banquet on June oth But the verdict of the general elections was too much present in people's minds not to tell upon votes given in the Chamber In vain the arrondissementiers fulminated against dangers to which the Republic was exposed by the introduction of schemes supported by deputies representing a minority It was generally thought that there was no danger except for the speakers themselves who might lose their seats The measure passed the Chamber on July 10th It provides an election system of scrutin de liste by departments with representation for minorities. The counting of the polls is entrusted to a general revising committee sitting at the headquarters of the department. This committee apportions the seats among the lists of candidates according to the number of votes obtained for each list. The measure had hardly been passed by the Chamber, before M Clemenceau launched a violent manifesto (July 12th) against the so called reform calling it an attack on universal suffrage and a prop aganda committee was started At Tours in October the Radical Socialist congres condemned the RP" bill after they themselves had voted for it. The struggle was now carried to the Senate On March 15th the Chamber had passed a law providing for the secrecy of the ballot and genumeness of the votes

In June and for some time after trade was much upset by a new strike of the inscrits mantimes at the ports, which in August became more or less confined to Marseilles On July 12th Parliament rose. In August M. Poincare went to Russia to confer with the Tsar and his Ministers on the alliance between the two countries, and the new aspects of the Eastern question.

Throughout the summer the Government showed a more and more decided tendency to take the side of order by starting proceedings against anti militarist teachers in the schools. The opportunity came up when the Feachers Unions Federa tion Congress (Congrès de la Féderation des Syndicats d'Instituteurs) held in August at Chambery gave its support to the cause of the Soldiers Halfpenny' This society (the Sou du Soldat), under pretext of giving pecuniary aid to young men in barracks, carries on anti militarist propaganda under the auspices of the General Federation of Labour (Conféderation générale du travail) On August 22nd the Government gave the Teachers Unions notice that they must dissolve before September 10th Such unions (syndicates) had so far been allowed on sufferance, until a law should be passed defining the limits within which officials might

² B 1835 see E B vi 751

¹ B 1856 see *E B* viii 91

combine to form associations Most of them gave in but a few refractory teachers came before the courts (Oct 191-)

The Confederation generale du tra ail or CGT as it is often called after encour aging and sometimes directly citing to not softened its tone when it was discovered that many minds were alienated by its violence and that new recruits were not coming in It resolved by a manifesto of August 1912 to break both with the Socialist party in Parhament and with anti-militarism or Herveism (so called after the name of its founder). The Havre Congress (Sept. 1912) proclaimed the autonomy and independence of syndicalism and emphasized the revolt against the politicians. Syndicalism was now divided into two camps the Reformistes who beheved in State intervention and the Revolutionnaires who wanted to abolish the authority of the State. Anti-militarism as such had decidedly fallen off

At the end of the year political interest centred in the forthcoming election of a new President of the Republic and it was announced that M I omcare the Premier would be a candidate. He was eventually elected just after the New Year, M Briand becoming Prime Minister

Obituary

1010—During this year the following death occurred in addition to the e noted in the E B while it was passing through the press—The Duc d'Alençon (b 1844) son of the Duc de Nemours (E B xix 371b) he left a daughter Louise who matried Prince Alphonso of Bavatia and a son Emmanuel Duc de Vendome matried to Princess Henrietta of Bel gium Léon Aucoc (b 1828) a well known jurist and member of the Institute Henri Barboux (b 1834) a distinguished advocate and member of the Academy L A Bolr Gault-Ducoldran (b 1840) the composer and historian of mu ic author of the opera Thamara and professor at the Conservatoire The Duc de Chartres (b 1840) son of Ferdinand Duc d'Orleans (E B xx 283) he had fought in the war between Austria and Italy the American Civil War and the Franco Prussian War and had published Souwenirs de Lovage (1869) and Lettres et recits de Campagne (1889–90) he left a son the Duc de Guise captain in the Danish army Emile Cheenson (b 1836) a well known engineer and social economist member of the Institute Edduard Colonne (b 18,8) the orchestral conductor Leopold Delisle (b 1824) the famous sculptor (E B xi 96) Henri Harris & (b 1830) a learned student of early American exploration author of Christophe Colomb (1884) and other works Father M J H Olliver (b 1835) a Dominican preacher who for twenty years held the most important positions in Paris Jules Renard (b 1863) the historian author of Vapoleon et Alexandre I l Avenement de Bonaparte etc.

(b 1844 d Sept 21) the geologist (E B x) 1 519) some further details may be added concerning others of historical interest who died in 1911—Auguste Angellier (b 1848 d Mar 1) the poet professor of literature at Lifle was the author of a critical Life of Robert Burns and of several volumes of verse 4 lamie perdue le Chemin des saisons Dans la lumiere antique etc. Henri Malrice Berteaue (b 1852) War Minister in the Cabhent of M Monis who was killed on May 21st by the fall of an aeroplane had become Republican deputy for Versailles in 1893 and was leader of the Radical Socialist group he had been War Minister under M Combes in 1904 and under M Rouver in 1905. Edouard Bornet (b 1828 d Dec 17) was an eminent botanist who devoted himself to scientific research working at first on fungi and later on lichens and all ae (E B 1 5900 xvi 578d and xvi 899c). He was elected a member of the Academie des Sciences in 1886 and received the gold medal of the Linnean Society in 1891. General Jean Julias Brun (b 1849 d Feb 23) was War Minister in 1909—11 he introduced various important reforms in the army notably in the pay of the officers and the development of inhitary education. Baron Charlette De La Contrile (b 1832 d Oct 9) was a grandson of the Vendéean general who became famous in the rising of 1793 and was finally shot in 1796 he commanded the Papal Zouaves at Rome (1860–70) and took a brilliant part in the Franco German War at the battle of Patay (Dec 2 1870) at the head of a volunteer regiment recruited from them. Oddon Marc Lannedougue (b 1840 d Dec 21) was President

of the Paus Academy of Medicine and one of the most eminent French surgeons. He was a friend of Gambetta whom he attended in his last hours. He had been a senator since 1906. The Duc de la Tramofille (b. 1838) was a distinguished historian and member of the Academie des Inscriptions. Léon Lepèbure (b. 1838) was a politician and member of the Academie des Inscriptions. Léon Lepèbure (b. 1838) was a politician and member of the Institute a deputy to the Corps Législatif in 1869, and member of the National Assembly (1871) from 1876 onwards he devoted himself to philanthropic work. Maurice Maindron (b. 1857) was a distinguished entomologist and man of letters he published Le Tourior de Lauplassans (crowned by the Academy in 1805). Saint Cendre (1808). Latore de Science (1906) etc. Ernest Mercadier (b. 1836). July 27) was a well known physicist and author of numerous discoveries and improvements in electrical science. Jean Charles Rodolphe Rudiu (b. 1835), the astronomer was a member of the Bureau of Longitudes and of the Academie des Sciences and a frequent contributor of scientific articles to the Review des deux Mondes. He also published a logarithmical table for astronomical work (E. B. XIX 333). LOUIS XAVIER DE RICARD (b. 1843), the poet assisted Catulle Mendes to found the Purnasse Contemporam (E. B. XI 146d). He was specially associated with the revival of langue doc literature. LOUIS OSCAR ROTY (b. 1846). May 23) was a prom ment sculptor and member of the Académie des Beaux Arts. He took the Prix de Rome in 1875 for a medal and founded a new school of medal designing in Paris (E. B. XIII 2b and XIX 9079b). Edmond Saglio (b. 1828 d. Dec. 7) archaeologist and member of the Institute is chiefly remembered for his collaboration with Daremberg in the great Dictionnaire des Antiquites greeques et romains. PAUL Topinard (b. 1830) the anthropologist (E. B. XII 824a) was the first professor at the Paris School of Anthropology founded in 1876 and was the author of various works including L. Anthropology (1876).

Ine author of various works including L Anthropologic (1876)

1912—During this year the following persons died whose biographies (as living in 1910) are given in the E B—Henri Brisson (b 1835 d April 14) the statesman (E B in 574c) Jean Baptiste Edolard Detaille (b 1848 d Dec 24) the painter (E B vin 110d) Leon Dierx (b 1838 d June 11) the poet (E B vin 210d) Alfred Foulle (b 1838) d July 16) the philosopher (E B x 737c) Jean Henri George Laguerre (b 1858) the lawver and politician (E B xvi 79b) General Hippolyte Langlois (h 1839 d Feb 12) the great artillery tactician and member of the Academy (E B xvi 187a) H J B Anatole Leroy Bealleu (b 1842 d June 16) the publicist (E B xvi 485b) Jlles Massenet (b 1842 d Aug 13) the composer (E B xvi 866c) his last opera Panurge was completed just before his death Gabriel Monod (E B xvii, 730b) Jules Henri Poincarf (b 1854 d July 17) the astronomer and mathematician (E B xvii, 892a) Henri Poincarf (b 1854 d July 17) the astronomer and mathematician (E B xvii, 892a) Henri Poincarf (b 1854 d July 17) the astronomer and mathematician (E B xvii 892a) Henri Poincarf (b 1854 d July 17) the astronomer and mathematician (E B xvii 892a) Henri Poincarf (b 1854 d July 17) the astronomical mechanics in 1870 he took his degree of Docteur es Sciences and thereupon gave up practical work as a mining engineer to take up a lectureship at Caen—He was transferred in 1881 to the University of Paris where he lectured on physical mechanics mathematical physics and astronomical mechanics. In 1889 he won the prize open to the whole world offered by the King of Swiden for a mathematical treatise—By 1887 when he was elected a member of the Academie Française he had written 1300—These include Science et Hypothèse La valleur de la Science Science et Methode etc. (ee E B xxv 786c xxvi 947d xix 85pc)

Some further details may be added concerning others of historical interest who died in 1912—Maurica Bonvolsin (b 1849 d March) was the caricaturist who used the pseu

Some further details may be added concerning others of historical interest who died in 1912—MAURICE BONVOISIN (b 1849 d March) was the caricaturist who used the pseu donym of Mars Besides working principally for the Journal Amusani in Paris he was a frequent contributor to Enghsh illustrated papers and magazines Jules Cazor (b 1821 d Nov 27) minister of justice 1879–82 president of Court of Cassation 1883–84 and life senator Ceorges Coulon (b 1838 d Feb 20) vice president of the Council of State was a noted lawyer and administrator Admiral Jules Marie Armant de Cuverville (b 1834) had been maritime prefect at Cherbourg (1893) commander of the Mediterranean Squadron (1896) chief of the General Naval Staff (1898) and a senator since 1901 LOLID DELAUNAY BELIEVILLE (b 1843 d Feb 10) was a famous engineer. Educated at St Barbe and the École Polytechnique he entered the Naval Engineering school in 1864 and in 1867 left to join the Belleville works at St Demis near Paris. He became a partner and finally head of the firm which produced the well known Belleville boilers (E B iv 145a) and also the automobile called by his name. From 1890 to 1893 he was president of the Paris Chamber of Commerce. Jean Di fuls (b 1829 d Nov 29) a pioneer of French trade and exploration in Indo China. His expedition up the Red River in the early seventie (E B xxvii 6a) led eventually to the French acquisition of Tongking. Judith [Jules Bernat] (b 1827 d Oct 27) the actress made her first appearance in Paris at the Folies Dramatiques in 1842. In 1846 she joined the Theatre Français and was a contemporary and fival of Mme. Rachel. She left the Comédie Française in 1664. François Raoul Larche (b 1860 d June 4) the sculptor won the second Prix de Rome in 1886 and in 1900 the medaille d honneur in the Salon for sculpture. One of his best known works. Les Violettes. (1899) was placed in the Luxembourg (E B xxiv 509a). Amongst his other works are Jesus devant les docteurs (1890) La Prairie et le Russeau (1891). Le Mirow (1892)

1005

14 pôire (1903) Le Priniemps (1907) etc. Paul Émile (François) Lecoq de Boisbaldran (b. 1838 d. May 31) the chemist made his mark in 1875 as the discoverir of gallium Among his decorations was the Davy medal of the Roval Society. Julies Joseph Lefeby Re (b. 1836 d. Feb. 24) the portrait painter had been a professor at the École des Beaux Arts and was a member of the Institute (E. B. xx. 503a). Charles Loyson (better known as Pere Hyacinthe) the famous preacher (b. 1827 d. Feb. 9) was educated for the priesthood and entered the Carmelite order. His eloquence drew all Paris to his Advent sermons in Notre Dame between 1865 and 1869 but his orthodoxy fell under suspicion and in 1870 he associated himself with Dollinger's protest against the dogma of papal infallibility (E. B. xiv. 512b and xx. 67d). Being excommunicated he broke finally with the Church of Rome and removed first to Geneva and then to London. He married an English lady. Emily Jane Merriman and settled in Paris in 1877, where he founded a Gallican Church on Prot estant lines. Frédéric Passy (b. 1822 d. June 12) was a well known economist and pacifist. He was a nephew of the economist Hippolyte Passy. I mance Minister to Louis Philippe and to Louis Napoleon's Republican Government. Under his uncle's influence Frederic devoted himself to economic studies and to that end gave up the appointment as Auditor of the Conseil de Droit which he had held 1846-49. In 1860 he began to teach political economy both in Paris and in the provinces. His first work on the subject. Melanges e onomiques appeared in 1857. True to his Republican principles he refused to be reconciled to the Second Empire and remained therefore ineligible for any Government post. He was an ardent free trader and an admirer of Cobden. In 1867 he founded the Lique International de la Paix afterwards known as the Societe Français pour l'Arbitrange entre Nations and for the rest of his lift he devoted himself to the promotion of international peace. From 1881 to 1899 he was Deputy for the Seine D

French Colonies

The census returns for 1906 give the total population of the French colonies as 46 125 510 The trade returns for 1910 amounted to £48 981 000 the total imports being £ 2 300 000 and the exports £26 586 000 The colonial debt is £24 000 000

The whole organization of the Colonial Office was changed by the decree of May 20 1911 which swept away the old, practically independent divisions called *Directions*, and substituted for them nine departments (Services)—1 Indo China Indian Ocean 3 Western and Equatorial Africa 4 America and Oceania 5 Audit Department 6 Staff 7 Penal Settlements 8 Military Department 0 Colonial Administration 4 10th department, Secretary's Office and General Control, keeps them all in touch

Algeria In 1906 the population was 5 231 000. The trade returns of 1910 reached a total of £40 040 000 of which £20 320 000 were imports and £19 720 000 exports. The budget of 1911 provided for a revenue of £5 782 000.

Trade has been interrupted three times by strikes of the inscrits maritimes. Two

Trade has been interrupted three times by strikes of the instrict, maritimes. Two took place in the spring of the years 1909-10 respectively and one in the summer of 1912. A delicate political problem arose out of the Ouenza question. For some ten years past the colony in general, and the Constantine region in particular have been clamouring to begin working the Ouenza iron mines which are expected to yield considerable profits. But for a long while past the Chamber of Deputies has kept on putting off the consideration of the railway scheme on which the working of the mines depends. There was a lively debate upon it on January 21st and again on March 23 and 26 1910 then the matter was shelved again. The house was afraid of foreign interference in the affairs of the company applying for the concession. Loud complaints were made in Algeria of the delays in getting the matter settled and of the ways in which colonial expansion was being hampered by a paternal government at home. At representative meetings resolutions were passed in favour of administrative and financial autonomy for Algeria. The natives on the other hand complain that they are put under an official despotism. The better educated among them want guarantees and the evercise of certain political rights. Others making up their minds to exile betook themselves to Syria. The velcome they received there was not very encouraging and the authorities succeeded in stopping emigration. Discontent was further increased when the decree of February 3 1912 came into force making natives hable, to a very slight

¹ See E B 1 642 et seg

Recruiting produced some disturbances at first but extent however to military service

in October 1912 was going on without hindrance

The railway system is in course of active development. The Est Algerian and Bone Guelma lines were successively bought up and eight new lines (in all 542 additional miles) are in process of construction. A commission has been appointed to consider a bill authorizing the construction of a Trans-Sahara Railway to come out not at Timbuctoo as in previous projects of the kind but on Lake Chad so as to open up communication with the Belgian

Congo and British South Africa

Tunisia. In 1910 the total population was 1 923 000 of whom 42 000 are Frenchmen 1 700 000 Moslems 50 000 Jews 108 000 Italians, and 12 000 Maltese The imports amounted to £4 219 000 and the exports to £4 816 000 Since the acute agricultural crisis of 1908-09 business has taken a more satisfactory turn. Trade was brisk in 1912 the Italian Government buying large quantities of stores and beasts of burden for the troops occupying Tripoli Here as in Algeria the native question is uppermost in people's minds Complaints are made by the Tunisians of the heavy Medjba tax. In former times this used to be almost £1 per head but in 1910 it had fallen to fifteen shillings The Jews at present amenable to native tribunals want to be brought under the jurisdiction of the French courts of law A good deal of land has passed into the hands of European colonists. In 1909 2 400 Frenchmen owned about 700 000 hectares. With property changing hands on so large With property changing hands on so large a scale there was bound to be friction between colonists and natives and bad feeling on both sides was shown even at the Conférence consultative so much so indeed that by a decree of the Beyhk (April 30 1910) the Conference was split into two different sections which in future will sit separately their financial powers have been curtailed and all resolutions passed must be submitted to a newly constituted Conseil superieur

Serious rioting broke out at Tunis in November 1911 caused partly by Moslem excitement over the Italo Turkish war partly by a rumour that an Arab cemeter, in the city was to be taken over for other purposes A mob of natives fell upon the Italian residents and a state of siege was proclaimed by a decree of November 13 1911 The ringleaders were found guilty and seven of them condemned to death (June 30 1912)

The Regency of Tunisia was empowered by a law passed on March ... 8 1912 to raise a loan of £3 620 000 for the completion of the railway

Western Africa 2—Population 11 350 000 Trade in 1910 imports £6 1.3 000 (an increase of £1 380 000 over 1909) exports £5 007 000 (or £614 000 more than in 1909)

Railway construction is in active progress
The line from Thics to Kayes is nearly finished The Guinea line has been brought as far as its provisional terminus at Kouroussa (it is to go to Kankan later on) while the Ivory Coast line has been made as far as Baorhi (about 193 miles) All these lines are only branches to be linked up bye and bye Still they are paving satisfactory dividends and doing a great deal for economic development

The turbulence of certain Ivory Coast tribes made it necessary to disarm them in 1999 The pacification of Mauretania was completed by Colonel Gouraud in September 1909 Some alterations were made in the conditions of native labour contracts by a law passed on To safeguard the rights of the natives the contractor was compelled to pay July 15 1912 over the sums due to them to the administration so that in the event of the native worker's decease the money should be paid over to his family. A system of native justice was organized by a decree passed on August 16 providing Native Courts (Tribunau ethniques) where cases among natives can be brought before judges of their own race.

Equatorial Africa —Population about 8 000 000 (before the recent treaty with Germany)

Imports in 1910 £527 000 (an excess of £82 000 over the year 1909) and exports £985 000 (or £287 000 more than in 1909)

In June 1909 after occupying Abeshr the chief town of the Wadai Captain Fiegenschuh fell into an ambush laid by the Sultan of Dar Menalat and perished with all his escort (January 1910) In November Colonel Moll was killed in a successful engagement against the Massalits and Colonel Largeau had to go out to re establish authority in Wadai June 5th he took the step of deposing Sultan Acyl who was intriguing against France and governed the country with the aid of seven native dignitaries. Large areas of territory were ceded to Germany by the treaty of November 1911 extending as far east a Cameroon and touching the Congo and Ubangi at two points. The demarcation of the new frontier was begun in December 1912

Madagascar Population 2 700 000 Imports in 1910 £1 383 000 (a decrease of £27 000 on the returns for 1909) exports £1 915 000 (an increase of £472 000)

The Islands of Anjuan Moheli and Grand Comoro were proclaimed French colonies and brought under the government of Madagascar by a law passed on August 3 1912

Public works are in active progress and the very flourishing financial condition enable these to be carried out with very little borrowing. A very high degree of economic development has been the result. With the new roads the old system of porterage has been swept away leaving many more hands available for field work. The railways have now opened

¹ See E B xxv11 393 et seq See E B xi 99 et seq See E B xvii 270 et seq ² See E B xi 205 (and alfied articles)

up communication between the coast and the high tableland of the interior where the population is massed and a periect economic revolution has been made by the facilities offered for the export of heavy products such as rice and manioc. In 1908 the railway from Atana narivo to the coast brought down only 4 700 tons of merchandise in 1911 it carried 34 000 The internal traffic amounting in value to £800 000 at the outset of the French annexation

had grown to \$3,732,000 in 1911

Indo-China — Population (1906) 16 300 000 Trade returns for 1911 imports £9,760 000 (an increase of £213,000 on 1910) exports £10,000 000 (a decrease of £1,621,000)

The condition of the natives is a pressing question High handed official methods the brutality of certain colonials have largely alienated the people Unmiscakably hostile feeling has been shown over and over again. Administrative reform has been hastened on by the discussion of statements made by M. Violette (deputy for Eure et Loir) whose speeches though not always couched in measured language have at least succeeded in goad ing the government into taking action. Excessive centralization and conflicts between local and central authorities have been remedied by decrees passed on October 20 1911 The supervi for and control of the civil services is left as before to the Governor General All staff appointments are made by him (except one who is nominated by the central govern ment) and all communication to the staff are made through him but each local Governor or Resident Superieur has all the general services of his district under his own direction with authority over the whole local staffs Certain financial reforms were likewise made

With authority over the whole local stails. Certain mancial reforms were likewise made. We sarraut succeeded M. Klobukowski as Governor General on May 9, 1911. The rice harvest of 1911 was not very good but industrial enterprise is flourishing at Tonking. The last section of the Yun nan railway was opened on April 1, 1910. The Antilles.—Population (1906). Guadaloupe, and its dependencies. 182, 238. Mar tinique, 3, 18, 024. Trade returns in 1910. Guadaloupe and its dependencies. Imports, 1670. ooo (an increase of £104 000 over the imports of 1909) and exports £962 000 (being an increase of £498 000 over the preceding year) Martinique imports £782 000 (an increase of £136 000 over those of 1909) exports £1 103 000 (or £219 000 more than in 1909)

Political strife inflamed by hostility between the white and coloured populations is

unfortunately giving trouble in the islands especially in Guadaloupe Economic development is hampered by the customs tariff The protectionist tariff passed in France in 1892 b ing applied in the colomes keeps foreign goods out of the local market and imporerishes the budget for the benefit of French manufacturers. At a colomal congress (Congres des anciennes colonies) held at Paris in October 1909 it was shown that reform was needed in a system which had been thrust upon the colonies without consulting them

New Caledonia -Population (1906) 13 000 Trade return in 1910 exports £507 000 (or an increase of £130 000 on the previous vear) exports £389 000 (an increase also of £80 000 over 1909) The colony has just weathered a serious economic crisis turther aggravated by the administrative system Excessive centralization is a burden to the inhabitants who in 1909 took the initiative in starting local self government Things have gone better since then and various industries have been started—copper and nickel mines blast furnaces electricity and perfumery

The increase per cent in the population in 1005-10 was, 1, being greatest in the Prussian provinces of Brandenburg Westphalia, and the Rhine province 1585, 1405 1 See E B xi 805 et seq on the Empire generally and special articles on the various divisions

and 10 3 respectively The chief foci of population in these provinces are Berlin (and environs) and the industrial district of the Ruhr basin out of twenty towns with popula tion exceeding 10 000 and returning the greatest increase per cent six are suburbs of Berlin and seven are in the Ruhr district. The city of Berlin however, returned an increase of only 1 5 per cent and it is clear that the process of decentralisation is at work here Outside Prussia the maritime towns of Hamburg Bremen and Lubeck show notably large proportional increases but in general the greater divisions of Germany do not show such large increases as the three Prussian provinces mentioned

The kingdom of Saxony is the most densely populated of the larger divisions but out of the twelve towns which showed descreasing populations four were in that kingdom. The smallest proportional increase is ound in Upper Alsace and in the eastern and north eastern parts of Prussia as in East Prussia and Pomerania from which there is a large movement to other parts of the kingdom. The total number of towns with populations exceeding 10 000 was 281 in 1910 and 48 exceeded 100 000 these last containing in all a population of 13 823 348 The average increase of population in the 281 towns has declined from 17 2 in 1900-05 to 15 05 in 1905-10 The birth rate of Germany in 1910 was 30 7 per thousand and the death rate 13 1. The birth rate declines and the continued increase of population is attributed mainly to the fall in the death rate and also to the decrease in emigration for is attributed mainly to the lall in the death rate and also to the decrease in emigration for the number of native emigrants in 1911 namely 22 690 (equal to 0 35 per thousand of the population) was the smallest proportion recorded in twenty years. Of the total 18 900 emigrated to the United States and 3 428 to other parts of America. The highest proportion of emigrants was from Bremen. Oldenburg. Hanover and Schleswig Holstein. The marriage rate per thousand in 1910 was 7.7 The total number of foreigners in Germany in 1910 was 1 259 873 including 634,983 Austrians. 144 175 Dutch. 137 967 Russians. 104 204. Italians. 19 140 French and 18 319 British.

Towns.—The population in 1910 of a number of the chief towns arranged territorially and including the aportals (mentioned test in each case) of the processed discussions was as

Italians 19 140 French and 18 319 British

Towns—The population in 1910 of a number of the chief towns arranged territorially and including the capitals (mentioned first in each case) of the principal divisions was as follows Alsace Lorraine Stra sburg 178 891 Mulhausen 95 041 Metz 68 598 Colmar 43 808—Anhalt Des au 56 605—Baden Karlsruhe 134 313 Mannheim 193 902 Frei burg im Breisgau 83 324 Heidelberg 56 016—Ba aria Munich 596 467 Nuremberg 333 142 Augsburg! 113 415 Wurzburg 84 496 Regensburg 52 624—Bremen Bremen 247 437 Bremerhaven 24 165—Brunsuick Brunswick 143 554—Hamburg Hamburg 931 035—Hesse Darmstadt 87 089 Maniz 110 634—Llippe Detmold 14 295—Lubeck Lubeck 98 656—Mecklenburg Schwerin Schwerin 42 519 Rostock 65 383—Oldenburg Oldenburg 30 242—Prussia (towns exceeding 100 000 inhabitants) Berlin (stadt) . 071 257 Aachen (Aix la Chapelle) 156 143 Altona 172 628 Barmen 169 214 Bochum 136 931 Breslau 512 105 Charlottenburg 305 978 Cologne 516 527 Danzig 107 337 Dortmund 214 226 Duisburg 229 483 Dusseldorf 358 728 Elberfeld 170 195 Erfurt 111 463 Essen 294 653 Frankfort on Main 414 576 Gelsenkirchen 169 513 Halle 180 843 Hamborn 101 703 Hanover 30. 375 Kassel 153 196 Kiel 211 6.7 Konigsberg 245 994 Krefeld 129 406 Magdeburg 279 629 Mulheim 112 580 Posen 156 691 Rixdorf 237 289 Saarbrucken 105 089 Schoneberg 172 823 Stettin 236 113 Wiesbaden 109 002 Wilmersdorf 109 716—Reuss Founger Line Gera 49 276—Reuss Elder Line Greiz 23 245—Saxe Meiningen Meiningen 17 131—Saxe Weimar Fisenach Weimar 34 582 Eisenach 38 36. Jena 38 483—Saxony Dresden 548 308 Leipzig 589 850 Chemmitz 287 807 Planen 121 272—Schwarz-burg Rudolstadt Rudolstadt 12 937—Wurtlemberg Stuttpart 286 218 Um 56 109 Agriculture etc—The principal crops (in tons) in 1911 were rye 10 866 116 oats 7 704 101 wheat 4 066 335 barley 3 159 915. All except oats show a marked increa e over the figures for 1910 a feature which has been generally characteristic of recent years. The area under the vine on the other hand decreased gradually but steadily from 1906 to 19

area is under cultivation and 23 per cent under vinevards the highest proportion in any

¹Since Jan 1 1911 however Augsburg has included the Landgemeinde of Pfersee

An important industrial and art exhibition was held in Dusseldorf in 1912

4 Created a Stadtgemeinde (municipality) on April 1 1911

Suburbs of Berlin

This figure represents an increase of only 15 per cent in the preceding quinquennial period and the process of decentralisation referred to above in dealing with the population generally is further illustrated by the population of Greater Berlin which in 1910 was 3,712,554 showing an increase of 24 per cent. The centre of business activity extends gradually westward from Leipziger strasse to Potsdamer and even Tauentzin strasse. Communications have been improved and extended. The underground railway runs westward to Reichskanzler platz and Wilhelm platz and a line is under construction from Nollendorf platz southward to Schoneberg. Motor omnibuses have recently been introduced and the influence of the introduced and the properties of the introduced and attended in Disseldorf in 1012.

Malstatt Burbach and St. Johann are now united with Saarbrucken

German territory the value of the grape-crop being £1 750 000 in 1911 In Baden the vine was cultivated on 38 500 acres in 1911 the figure being nearly the same as that for Prussia Wheat is especially important in Bavaria the crop being 431 000 tons in 1911 and also hops which were cultivated on 43 000 acres out of 66 000 acres in all Germany

hops which were cultivated on 43 000 acres out of 66 000 acres in all Germany

The value of the North Sea and Baltic fishery catches in 1911 was £1 800 000

Mining and Manufactures—The total population engaged in these occupations in 1910
was 6 617 584 or 10 2 per cent of the population of the country—According to the census of
1910 textiles occupied 72 000 workers and mines 49 000 in Alsace Lorraine—In Baden the
industries (salt mines—iron works etc.) occupied 246 864 persons or 11 5 per cent of
the population—In Bavaria the figures were 566 440 or 82 per cent in Prussia 3 976
709 or 99 per cent (the output of coal amounting to 151 000 000 tons in 1911) in
Saxony 769 443 or 160 per cent and in Wuritemberg 242 020 or 99 per cent—Among the
smaller states—there is a notable concentration upon textile industries in the two small
principalities of Reuss—where over 10 per cent of the population are thus employed

The output of coal has increased by about 50 per cent in the latest quinquential period

The output of coal has increased by about 50 per cent in the latest quinquennial period amounting to 160 700 000 tons valued at £78 600 000 in 1911 while lignife was raised to the amount of 73 800 000 tons (£9 200 000) and iron ore 23 800 000 tons (£5 000 000). The production of pig iron was 13 500 000 tons. development recently the number of ships built or building in private yards in 1911 being 49 vessels of war and 1 072 other vessels for service under the national flag and 3 warships and 241 other vessels for foreign countries. Among other industries which show marked recent changes is that of motor cars boats and aeroplanes for which returns of production showed a total value of 45 500 000 in 1910 including 9 568 cars (against 3 887 in 1907)
283 boats and 73 aeroplanes (against 4 in the preceding year) Seven airships were also built and 2 977 motor engines of various sorts. The brewing industry is another showing built and 2 977 motor engines of various sorts. The brewing industry is another showing a marked change but this is in the direction of a reduction of the number of breweries in the Brausteuergebiet which was 4 324 in 1910. The centenary of Krupp's the famous iron and steel works at Essen was celebrated on August 8 1912 the ceremonies being attended by the Kaiser. In June 1912 the works employed 71 221 persons.

Commercial development is illustrated by Tables II-III showing the value of the chief

imports and exports and also the trade with the principal countries in 1911

Table II Trade t	# 1911	(£ ste ling om tting oo aco)		Table III - (ount

Shipping—The numbers of the mercantile marine and their distribution are as follows for 1912. In Prussia 2 260 of 312 713 tons. Hamburg 1 348 of 1 676 376 tons. Bremen 712 of 893 387 other states 412 of 141 249. There were registered at Baltic ports 942 vessels of 316 907 tons and at North Sea ports 3 790 of 2 706 818 tons. the total being 4 732 of 3 623 725 tons.

The foreign mercantule shipping in German ports is shown in Table IV for 1910
The gross tonnage handled in the Duisburg Ruhrorter ports, where the largest inland navigation industry is carried on amounted in one year (1911-12) to 20 5-0 000 Mann heim the chief commercial centre on the Upper Rhine is the largest port on that river the tonnage of merchant vessels calling in 1910 amounting to nearly 5 000 000. The kaiser Wilhelm (Kiel) canal was used in 1912 by 54,012 vessels of 8 558 204 tons. A canal projected in 1905 which branches off from the Dortmund Ems canal crosses the Weser near Minden and leads to Hanover is now open

Railways open for traffic in 1910 amounted to 36 681 miles of which only 2 286 were under private companies the rest being under state management. In 1910 531 528 000 tons of goods including animals were conveyed by railways vielding fos 160 000 and the number of passingers carried was 1 541 000 000 yielding f11 800 000 (as against f55 450 000 in 1906). The new tariff which came into force on May 1 1907 has had the effect of largely increasing the n e of the cheapest (4th) class of accommodation by passengers the receipts

for this class having risen from 48 940 000 in 1906 to £14 960 000 in 1910

Finance —For the financial year ending March 31 1912 the imperial revenue and expenditure each amounted to nearly £160 000 000. The imperial funded debt at the end of 1911 amounted to £227 831 670. The budget for the financial year beginning April 1 191. estimated the revenue and expenditure at £144 306 755 (ordinary £137 583 100 extraor

dinary £6 723 655)

dinary £6 723 655)

In certain of the more important territorial divisions of the empire the total budget figures for 1911 were as follows in £00 000 the public debt in each case being put within parentheses Baden 128 (*80) Bavarra 359 (1000) Bremen 25 (130) Brunswick 15 (*25) Hamburg 85 (358) Hese 50 (220) Mecklenburg Schwerin 23 (71) Oldenburg 21 (37) Prussia 2043 (4760) Saxony 210 (440) Wurttemberg 139 (300, Army—The peace strength of the army in 1912 was 656 144 including 27 000 officers and 90 000 non commissioned officers. The total expenditure on the army amounted to £40 800 000 during the financial year 1911—12 and was estimated at £42 400 000 for 1912—13 By a law of March 27 1911 and a supplementary law of June 1 191. the peace strength of the army was to be increased annually until in 1915 its total strength should reach 5441 221 exclusive of officers. Prussia and the smaller states will supply 420 939 Bavaria 544 221 exclusive of officers Prussia and the smaller states will supply 420 939 Bavaria 60 351 Saxon 41 625 and Wurttemberg 21 296 men The divisions will include 651 infan try battalions 516 cayalry squadrons 633 field artillery battalions 48 foot artillery battal

ons 33 pioneer battalions 18 communication units and 25 train battalions 8 100t artificity battalions 18 communication units and 25 train battalions 18 10th artificity battalions 18 10th 32 Kustenpanzerschiffe 8 Grosser Kreuzer 18 Kleine Kreuzer 41 Kanonenboote 9 Schul schiffe 8 Spezialschiffe 14 There are also about 150 smaller vessels (torpedo boats etc.) for high sea service and 40 tor coast and harbour work together with 16 submarines

Education and Science—The following figures show the attendance at the eleven largest

universities during the winter half year 1911–12 Berlin 9829 Munchen 6 797 Leipzig 5 170 Bonn 3 998 Halle 2 879 Breslau 2 702 Gottingen 2 505 Freiburg 2 466 Heidelberg 2 231 Strassburg 2 138 Munster 2 126 The Friedrich Wilhelm University at Berlin cele brated its centenary in 1910 Including the university at Munster the number of German universities is twenty one but at Munster the full faculty of medicine is not yet established A technical high school was opened at Breslan by the Kaiser on November 29 1910 and the A technical migh school was opened at Bressau by the Kaiser of November 29 1910 and the number of such schools is now eleven. In Berlin the Kaiser Whilelm Association for the Advancement of Science was instituted on January 11 1911 and in the same year a large building was completed for the Royal Library in Unter den Linden near the university. In Heidelberg a new Academy of Science was founded in July 1909. In Hamburg an institute for tropical diseases was opened in April 1910 and a mineralogical and geological institute in December and in October of the same year the new geological department of

nistitute in December and in October of the same year the new geological department of Baden was opened in Freiburg replacing the former establishment in Karlsruhe

Religion—According to the census of 1910 there were 39 991 421 (61.6) Evangelical

Protestants 23 821 453 (36.7) Roman Catholics 283 946 (0.4%) other Christians 615 021 (10.6) Jews 208 014 (0.3) other sects 6.138 (0.0%) unclassified The proportion per cent of Roman Catholics was highest in Alsace Lorraine 76.2 Baden 59.3 Prussia 36.3 Hesse 31.0 Wurttemberg 30.4 In all the other great divisions the proportion of Protest ants is upwards of 90 per cent in Brethen it is 87 per cent and 82 per cent in Berlin where the Roman Catholics number 12 per cent and Jews 4.5 the last being more numerous there than elsewhere in the Empire (L. Mecking, O. J. R. Howarth)

German Dependencies 1

The German colonial territories are broadly distributed as follows -

In Africa In the Pacific Kiaochow	Area Sq Mile 1 028 190 94 675 213	White I opulation (1911) 20 007 1 533 3 896	Native Population (estimated) 14 000 000 600 000 160 000
	1 123 078	25 436	14 760 000

The central administration has been the Reichskolonialamt since April 1 1907 its head being a Secretary of State Kiaochow is not administered by this office but by the Reichsmarineamt

Cameroon.—This West African colony had on January 1 1911 a white population of 1455 and a native population estimated at 2 700 000. But by the Franco German agree ment of November 4 1911 the southern and eastern frontier was changed so that the territory extends to a point on the Congo river and to another on the Ubangi. This change represents an accretion of territory of nearly 100 000 sq miles the total area being now 290 000 sq miles. In recent years Duke Adolf Friedrich of Mecklenburg has assisted the development of the colony by extensive exploration. The principal products are cocoa and rubber of which there were in 1911 some 5 000 000 trees each. Bananas oil palms and coffee follow in importance. The value of exports amounted in 1910 to £1 000 000 of which rubber represented £550 000 palm products nearly £250 000 and cocoa £150 000. Imports exceeded £1 250 000 in value. The colony was visited by 529 ships of 1 291 000 tons. The ordinary expenditure for 1912 was estimated at £480 000 the revenue at £320 000. The native and house tax is the principal item in the latter amounting to £60 000. A Catholic and three evangelical missions support a number of schools with 28 660 pupils there are also four government schools with 733 pupils. The military forces in 1910 numbered 1 471 men 1 300 of whom were natives.

German East Africa has an area of 384 000 sq miles with a population estimated (though roughly) at 10 000 000. Whites in 1911 numbered 4 227. Plantations consist chiefly of sisal rubber mainhot coffee cocoa and pepper and of the total exports to the value of 10 000 000 in 1910 sisal represented £150 000 rubber £290 000 and copra £100 000. Imports were valued at marly £2 000 000. The colony was visited in 1910 by 933 vessels of a total tonnage of 2 000 000. The railways at the end of 1911 had a length of 662 miles. The central railway reached Tabora in 1912 and the cost of its extension to Lake Tanganyika has been voted by the Reichstag. The Usambara railway reached Moschi in October 1911. The estimated ordinary expenditure amounted to nearly £1 000 000 in 1912, the house and hut tax representing nearly £200 000 and the revenue was estimated at £620 000. There are a military force of 2 962 men and a police force of 1 898 both principally native. German South West Africa has an area of \$22 450 sq miles with a white population of 13 962 in 1911 and an estimated native population of 80 000. The Anglo German boundary

German South West Africa has an area of \$22,450 sq miles with a white population of 13 962 in 1911 and an estimated native population of 80 000. The Anglo German boundary at Walfish Bay was settled by agreement of May 23 1911. About 29 000 000 acros were being farmed in 1911 cattle numbered 144 000 sheep 400 000 and goats 400 000. Total exports were valued at £1 730 000 in 1910. Two years previously the first export from newly discovered diamond fields had taken place the value of the stones in 1910 was £1 350 000 and in 1911 and again in 1912 diamonds amounting to about 500 000 carats were obtained. Copper was exported to the value of £80 000 in 1910. Imports were valued at £2 220 000. Vessels visiting the colony in 1911 numbered 483 of a total tonnage of 1 328 530. There are four railways with a mileage of 1 186 at the end of 1911. Estimated expenditure (1912) £1800 000 revenue £880 000. Self government was granted on January 28 1000 and the Landscraft held its first session in May 1010.

Togo (West Atrica) has an area of 33 700 sq miles an estimated native population of 1 000 000 and a white population (1911) of 363. Palm products (kernels and oil) took the chief place (£160 000) and rubber the second (£60 000) in the export trade of 1910 the total value of which was £360 000 while imports were valued at £570 000. Shipping in 1910 had a total tonnage of 577 000. Railways extend to 201 miles a line of 100 miles from Lome to Atakpame having been opened on April 1 1911. Estimated expenditure (1912) £160 000 revenue £150 000 including a native tax providing £27,000. An agricultural school and a handicrafts school have been established. A native police force numbers 569 men.

New Guinea.—German. New Guinea includes kaiser Wilhelms Land the Solomon leaded and the Expression of the E

New Guinea.—German New Guinea includes Kaiser Wilhelms Land the Solomon Islands and the Bismarck Archipelago (New Pomerania New Mecklenburg New Hanover and the Admiralty Islands) with a total area of 93 000 sq miles, a native population estimated to exceed 500 000 and a white population (1911) of 723 Exports were valued at only £180 000 in 1910, the principal item being copra imports at nearly £200,000 The revenue

1 See H Meyer Das deutsche Kolomalreich Teipzig 1910

in 1911 was £40 000 the expenditure £70 000. There is a native police force of about 600 men. From January 18 1910 the seat of government has been established at Rabaul Knowledge of the interior of Kaiser Wilhelms Land has recently been greatly extended by the work of the German Dutch boundary commission, which navigated the Kaiserin Augusta river for 600 miles up stream

Samoa — The German portion of Samoa has an area of 1 000 sq. miles with a total population estimated at 37 500 whites numbering 490 in 1911. Here cocoa plantations have been considerably extended the number of plants being estimated at 1 250 000 and the export of cocoa was valued at £28 000 in 1910 out of a total export trade valued at £180 000. Revenue in 1912 was estimated at £40 000 and expenditure at £50 000.

The Caroline, Pelew, Marianne and Marshall Islands have a total land area of 960 sq miles and a population estimated at 55 300 whites numbering 320 in 1911 Plantations are devoted almost wholly to the coco nut palm except in the Eastern Carolines where small quantities of Manila hemp rubber and manihot are raised. In the Marshall and Caroline Islands however a new export trade of con iderable promise is developing in phosphates which were valued at £470 000 in 1910 out of a total value of exports of £550 000 Imports were valued at £120 000 Revenue (1911) £25 000 expenditure £35 000 The islands are under the governor at Rabaul (New Guinea). A somewhat serious native rising in Ponape which began on October 18 1910 was only quelled in February 1911 by the dispatch of a naval force.

Kaochow (China) with an area of 213 sq miles has a population estimated at 169 000 including 3 896 whites in 1911. The town of Tsingtau has a population of 34 000 Chinese and 1 621 Europeans and rose from the eighteenth place among Chinese free ports in 1904 to the sixth in 1910. The chief article of export is straw briad (value £670 000 in 1911 when the total exports were valued at £3 000 000. The value of imports (cotton goods and varn paper &c.) was £3 500 000. Ships visiting the port in 1911 numbered 555 of a total tonnage of 830 000 including 176 British (270 000 tons). The Shantung railway carried 900 000 passengers and 700 000 tons it goods in 1911. Estimated revenue (1912) £310 000 expenditure £730 000. There are a German military force of 2 391 men and a mainly native police force of 110. Among educational institutions may be mentioned the German Chinese high school opened on October -5 1909. (L. MECKING.)

Political History

The appointment on July 14 1909 of Herr von Bethmann Hollweg as Imperial Chancellor in succession to Prince Bulow was but a change of politicians questions continued to occupy public attention and the method adopted The new for their solution stirred up much popular dissatisfaction Chancellor issues were those of finance A deficit of 2 000 million marks (100 millions sterling) was anticipated for the four years 1909 to 1913 and ways and means had to be devised to raise a sum of some 500 million marks (5 millions sterling) each year Bulow suggested a scheme of taxation which while taxing articles of consumption in cluded death duties. But death duties were bitterly opposed by the Conservative striking at the root of the family and since the Liberals were very party as much in favour of the proposed scheme, the working agreement between Result of the two came to an end Bulow had maintained his position by their crisis of 1909 united support he was therefore forced to resign as a consequence of the The entire blame Bulow himself laid at the door of the Conserva tive party But while the Conservatives got their way - in the amended estimate

tive party But while the Conservatives got their way—in the amended estimate the property tax found no place,—the bill could be carried only with the aid of the Centre There was a good deal of truth therefore in Bulows view that one result of the crisis was to make the Centre party again the most influential group in the Reichstag a position from which it had been dislodged in 1906

One other result became apparent — there was general discontent all over the country — The middle classes were particularly dissatisfied that the burden of taxation

 1 Bulows scheme for raising the £25 000 000 required was by (a) increased matricular contributions of each state to the extent of 80 Pf per head of the population £2 400 000 (b) death duties £4 600 000 (c) taxes on spirits beer wine tobacco and advertisements £18 000 000 The scheme as adopted provided (a) duties on spirits beer tobacco sparkling wines £11 400 000 (b) stamp duties £5.475 000 (c) taxes on coffee tea and lighting appli ances £4 100 000 (d) taxes on sugar and railway to kets £4 025 000

should have been shifted on to their shoulders while the landed men did not bear The opposition between the agraman and the industrial interests had their fair share shown itself in the formation of the Hansa Bund (June 19 1909) wherein The Hansa the great captains of industry united against the feudal anistocracy The immediate (and ostensible) aim of the Bund was to oppose the financial reforms as advocated by the Conservatives and Centre From the first the Bund asserted that it was an 'economic organisation and not a political party that what it stood for was "a fair economic policy and that it drew its members from all parties - Its real aim, however was not to allow the landed interests to hold a monopoly of political power At its first meeting there were representatives of over 100 Chambers of Commerce and more than 400 other commercial and industrial organisations Altogether some 6,000 delegates took part in the proceedings

The Hansa Bund only gave expression to the general discontent which continued for a year and a half until the general elections in 1912 the results of which may certainly be attributed to its influence. Even earlier the popular temper Socialist was showing itself at the Reichstag by elections where the Social Demo crats were enabled to gain three seats out of a total of five. It was the Successes same in the state elections everywhere the prevailing discontent expressed

itself by sending Social Democrats to the legislatures The best instance is perhaps that of Saxony where the elections on October 21, 1909 took place for the first time on a system of plural voting According to this every man who pavs direct taxes has If his income exceeds £80 or if he owns 2 hectares (about 5 acres) of land or if by reason of his having passed the necessary examination he is qualified for one year's military service he has two votes. If however his income is over £100 or if he is a professional man - lawyer doctor high school teacher engineer or artist -- or being an agriculturist he owns more than 4 hectares (about 10 acres) of land he is entitled to three votes Again if his income exceeds f_{140} or if he is the possessor of more than 8 hectares (about 20 acres) of land he is entitled to four votes Finally, every man over fifty years of age has an extra vote but no man may record more than four votes altogether. Such a scheme is broad enough and therefore the striking success of the Social Democratic party 1 is of more than ordinary significance

The new Chancellor was fully alive to the situation and already in his first speech to the House (December o 1909) he attempted to discount the successes of the Social Democrats I am of opinion that there are large masses among our Policy of people who do not wish to be nurtured on revolutionary changes the new Chancellor What our people desires above all else is that it may not be disturbed in its daily work by unrest and experiment that on the con trary it looks for protection to a political policy which is stable and rehable other hand he hinted clearly enough that he had no intention of being influenced by any party that his aim would be to carry on the government independently of all

parties That was about as far as his programme went and in reality it was wherein his strength lay Those who knew Herr von Bethmann Hollweg were not surprised at this attitude An excellent administrator, he believed in no sensational policies but in thoroughness in administrative work Accordingly he appointed (June 1909) specialists to the offices rendered vacant by the financial crisis. With the rejection of the Government's estimates Herr Sydow the Secretary of the Imperial Treasury had resigned His successor was Herr Wermuth 2 To the Ministry of the Interior Herr Delbrück was appointed Herr Sydow became the Minister of Commerce

¹ The composition of the Saxony Diet after the elections was as follows
29 (in place of 46 in the previous Diet) 36 National Liberals (34 previously) Party of the
Middle Classes 1 (no change) and 25 Social Democrats (previous Diet 1)
² Adolf Wermuth born March 23 1855 Under Secretary of the Interior 1904
² Clemens Delbruck, born Jan 19 1856 Semor Burgomaster of Danzig 1896 Governor
(Oberpräsident) of West Prussia 1902 Minister of Commerce and Industry 1905
4 Burbald System been Lan 14 1851 Under Secretary of the Post Office

Reinhold Sydow born Jan 14 1851 Under Secretary of the Post Office 1901 Secretary of the Imperial Treasury 1908

and the portfolio of education for Prussia was given to Herr von Trott zu Solz 1 In other respects the new Chancellor carried on the policy of his predecessor handling of the Polish Question and his attitude to any suggestion for fiscal changes are perhaps as good instances as any. In 1908 a law had been passed facili tating the passing of land in the Polish provinces of Prussia out of The Polish Polish into German hands The scheme for expropriating Polish land owners was at once put into execution and continued all through the year 1000 In that year the commissioners appointed to purchase land reported that they had entered into possession of 20 large estates and 50 small ones totalling an area of 21 085 hectares (about 52 000 acres) at a cost of 27 million marks (f.1 350 000) Of these estates 5 of the larger and 23 of the smaller had belonged to Poles was the anti Polish policy of expatriation carried that the Poles were forbidden to build houses on their land. The Poles attempted to evade the letter of the law by living in vans and similar conveyances but their success was small since the Govern ment dealt harshly with the offenders. The Polish Question did not come to the fore again until comparatively late in 1912 having been overshadowed by more im portant events But towards the end of October in that year the Government decided on a severe application of the Expropriation Law This brought about a stormy de bate in the Diet on October 30, 1912. On the one hand the Government had to face the demands of the extreme Nationalists on the other, the Centre was strongly opposed to the anti Polish policy Moreover there was reason to believe that both the Austrian and Russian Governments looked with displeasure on the German treat ment of the Poles Nevertheless the Chancellor in this matter was following in the footsteps of his predecessor, and the continuity of policy is clear enough

As for the fiscal policy Germany had lived for thirty years under Protection which Bismarck adopted in 1870 in the hope that the increased custom duties would make the Empire financially independent. Herr von Bethmann was as disinclined to listen to the demand for free trade as Prince Bulow had been. The less so as the year 1000 had been a fairly prosperous one. The country recovered from the (conomic depression of 1007 as was proved by the read) subscriptions to loans and the large profits which the joint stock banks harvested.

In the colonies likewise there had been an upward movement partly due it is possible to the energetic and enterprising policy of Herr Dernburg 2 who was above all else a 'business' minister. His commercial and more especially The his banking experience stood the colonial administration in good stead colonies The reports from the colonies showed an increasing trade and that may have been one reason at any rate for extensive railway activity. No less than 835 miles of new line were being built. It was the first year too in which the colonies were able to make a payment (fir 7 500) to the Imperial Exchequer Accordingly the colonial estimates were rather less than in previous years - 22 million marks as against 24 millions in 1908 The general prosperity was continued in the following year and to forward it a permanent industrial committee of the colonial adminis tration was established (June 27 1910) composed of representatives of many Chambers of Commerce The promising picture was only marred by the news of a rising in the Caroline Islands which occurred on October 18 1910

The great question of the day throughout the first half of the year 1910 was that of the reform of the Prussian franchise. Plectoral reform had been in the air during the last year or two Baden and Savony both adopted new electoral systems. Even the small state of Mecklenburg was awakening to the need of reforming its constitution and adopting a franchise more in accord with the needs of the day. It was no new question in Prussia. It had been discussed in the Chamber as recently as January 25, 1909. That it was the popular will

¹ Augustus von Trott zu Solz born Dec 29 1855 Governor of Brandenburg 1905 ² Bernard Dernburg born July 17 1864 Director of the Darmstädter Bank 1901–1906 Minister for the Colonies 1907–1910

was made abundantly clear in the press and at mass meetings. It could not well be postponed much longer and it was promised in the speech from the Throne when the Prussian Diet assembled on January 11, 1910 When however, the Bill at last made its appearance (February 10, 1910) it was a sore disappointment to the popular wishes Manifestly the Bill wanted to do little The constituencies that had been formed on the basis of a census of half a century back were maintained. No regard whatever was had to the enormous changes that had taken place in Prussia making it as much an industrial as an agricultural state. Secondly, the division of electors into three classes arranged according to incomes, was left unaltered. Nor was it proposed to introduce the secret ballot long since utilised in the Reichstag elections The Bill however enlarged the basis of the first class of voters by adding an educational qualifi cation to the already existing financial one, it also substituted direct for indirect

The proposal was everywhere condemned The parties of the Right would have none of it because it did not go far enough for the parties of the Left it went too far All over the country large demonstrations were organised chiefly by the Street Social Democrats, in favour of complete electoral reform with the demos strations. secret ballot and universal suffrage On February 13 1910 there were processions through the streets of Berlin which occasioned a famous proclamation by Herr von Jagow the chief of police Its brevity did not lessen its significance 'There is talk of the right to street demonstrations. But the streets are for traffic only If public authority is disregarded the police have orders to use their weapons I give inquisitive people fair warning. The demonstrations took place nevertheless and the Government must have been impressed by them. A special committee of the Diet knocked the Bill about a good deal and the Government went so far as to accept secret voting provided a substantial majority of the House could be obtained The Conservatives and Centre were solidly opposed to it recording for the principle 238 votes the Liberals and Social Democrats only had 138. The clause was rejected on March 16 the discussion on the Bill as a whole dragged on until May 27 when the Government announced their intention of withdrawing the measure. The Conservatives were pleased since the old system continued the progressive parties were not displeased, the way being opened to more extensive reforms in the future

Greater success attended the activities of the Reichstag during the year its pro gramme included measures of financial social and legal reform. Of these the most important under the first heading was the extension of shipping dues on Shipping the internal waterways Shipping dues already existed on the canals and the canalized rivers, they were levied chiefly for the purpose of pro viding an amortization fund for the cost of construction But on the free rivers the introduction of shipping dues was still barred by \$54 of the German constitution At the instigation of Prussia a bill was introduced (October 2, 1010) in the Reichstag which proposed the alteration of the article in question, so that the levying of shipping dues might be extended Further, a bill embodying an increment tax was introduced, to round off the financial reforms of the previous year Two important measures of social reform were the institution of Chambers of Labour (parallel to the Chambers

jasurance Consolida tion Bill.

of Commerce) and the Insurance Consolidation Bill which codified the various insurance laws, reorganised the supervision of local authorities administering insurance benefits and extended the older schemes in various directions (See W H Dawson Social Insurance in Germany) No less weighty was the ordinance amending procedure in criminal cases But while

none of these became law m 1910 the Potash Bill did The supply of potash is practically limited to Germany and it is the aim of the Act to regulate the monopoly and husband the supply by putting a check on overproduction and fining prices

None of these proposals was calculated to increase party differences, and public opinion was content to tolerate the political situation in view of the approaching general election which was expected shortly It came as a surprise, therefore when in June there was a further rearrangement of office holders As in the previous year the Chancellor sought out men of administrative ability Herr von Cabinet Kiderlen Waechter 1 was made Imperial Foreign Secretary in place changes of Baron von Schoen, who became German Ambassador in Paris, and Herr von Lindequist 2 a capable official in the Colonial Office was appointed Co lonial Secretary in succession to Herr Dernburg In Prussia also, three portfolios changed hands Herr von Dallwitz became Minister of the Interior Baron Shor lemer 4 Minister of Agriculture and Dr Lentze 5 Minister of Finance

Whether the new combination pointed to a more liberal policy was not easy to On the one hand the Imperial Government had recognised the immediate determine necessity for formulating a constitution for Alsace Lorraine and in Prussia Political the authorities after a long struggle had at last agreed to make cremation tendencies legal (June 4 1010) Nevertheless, the Social Democrats and the Liberals supported by the comic papers (which in Germany exercise no small influence) main tained that the Chancellor was but a tool in the hands of the reactionaries three incidents seemed to lend colour to this view On August 25 the Kaiser broke his long silence by a characteristic speech at Koenigsberg in which recalling the coronation of 1851 he gave expression to his belief in the divine right of kings ing on myself as God's instrument I shall go my way without regard to the ideas Ouestioned as to his attitude to this speech (November and opinions of the time 26) the Chancellor stated that it was in no wise unconstitutional seeing that the King in Prussia is sovereign in his own right. Herr von Bethmann's reply was of a sort to be placed beside the exclamation of von Oldenburg Januschau a member of the Conservative party, who on January 29, 1910 laid it down in the Imperial Diet that the King of Prussia or the German Emperor must always be in a position to say to any lieutenant Take ten men with you and close the Reichstag''

The growing feeling against the Conservative and Centre coalition was stirred almost to boiling point by the issue of the Papal Encyclical Editae saepe der, on the

Papal Bacy clical against German re formers

occasion of the 300th anniversary of the canonisation of St. Borromeo 8 In a review of the Reformation the Pope asserted that its German leaders were proud and rebellious men foes of the Cross of Christ (uomini orgogliosi e ribelli nemici della Croce di Christo) worldly men whose belly

was their God (it Dio dei quali b il ventre)
They did not seek to improve
morals but cast aside the teachings of the Church in accordance with the wishes of most corrupt (pru corrotti) princes and peoples ' There was an outcry in the whole of Protestant Germany The Encyclical was discussed in the Imperial Chamber and in those of several states The King of Saxony himself a Catholic wrote to the Pope

The anti modernist

protesting against the language of the document. There was nothing for it but its withdrawal and diplomatic action at the Curia (June II 1919) succeeded in obtaining an order to the German bishops not to read the letter in their churches The storm calmed down but when the anti modernist oath was demanded (September 8 1910) from teachers priests and

Alfred von Kiderlen Waechter born July 10 1852 entered Foreign Office 1879 Secretary of the Embassy at St. Petersburg 1881-84 at Paris 1884-86 in Constantinople 1896-88 back in the Foreign Office. 1888-94. German Minister in Hamburg. 1894. in Copenhagen.

1895 in Bucharest 1900
Friedrich von Lindequist born September 15 1862 Consul General at Cape Town 1902 Governor of South West Africa 1905 Under Secretary for Colonies 1907
Johann von Dallwitz born September 29 1858 Minister in Berlin for Anhalt und represen

tative of the Duchy in the Federal Council 1903 Governor of the Province of Silesia 1909 Clemens A Shorlemer Lieser born September 29 1856 Member of the Prussian Upper House 1901 Governor of the Rhine Province 1905

Augustus Lentze born 1860 Senior Burgomaster of Mühlhausen 1894 of Barmen 1899 of Magdeburg 1906 Life Member of the Prussian Upper House 1906
 Charles Borromeo (1538-1584) was the nephew of Pius IV and one of the moving spirits of the Counter Reformation He was canonised in 1610 by Paul IV See E B iv 274

professors of Catholic faculties promising that they would remain faithful to the doctrines of the Church, bitter feelings were stirred anew. On March 7, 1912 the question was even discussed in the Prussian Diet, and the Chancellor tried to steer clear between Protestant opinion and the feelings of the Centre. He pointed out that after representations made at Rome the Pope had agreed to deal lemently with priests who had refused to take the oath. Yet the State would have to guard itself and therefore in making appointments it would be compelled to limit its choice to those who had abstained from the oath.

All this was hardly conductive to an amicable continuance of joint action between the ultramontane party and the Conservatives. It was the opportunity of the parties of the Lett. The Liberals had strengthened their position immensely by the fusion (March 6 1910) of their three wings (Freisinnige Volks parter. Freisinninge Volksparter. As for the Social Democrats, they gained most. Of the thirteen by elections in 1910 they won six thus increasing their strength in the House to fifty two. These elections successes augured well for the future. But apart from that they were gaining support in all directions by organising mass meet migs to give expression to the general discontent. The street nots in the Moabit quarter of Berlin (September 24–28 1910) added fuel to the flame. In themselves the incidents would have been of scarcely any importance, but the severity of the police (who in their attacks on the noters also wounded four English and American journalists)

called forth loud protests and the Social Democrats made the most of them Yet while the party was gaining in strength its councils were divided socialist deputies vote for the budgets of non socialist governments that was the question which produced a cleavage in their ranks. Nor was it merely The Social Democrats. of academic interest. It was a matter of practical politics German (Revisionist) wing of the party favoured joint action with the Liberals wherever it was thereby possible to achieve some tangible result. In this spirit the Socialist members of the Baden Diet had voted for the budget in Baden approved their action. But the whole of the German party at its annual congress at Magdeburg (September 18-24 1910) expressed its displeasure with the Baden Socialist deputies whereupon the South Germans withdrew from the congress But it would be a mistake to evaggerate the internal differences in the party, which are really of a more or less theoretic nature. The Kevision v Marxians ists certainly stand opposed to the Marxians but in practical politics the Social Democrats present a united front The Reichstag elections of 1917 no less

than the party congress at Chemnitz (September 15-21 1012) bore eloquent testi mony to the non existence of real sectionalism which cuts at the root of things. The coming elections, perhaps the most important in the history of the German Empire dominated domestic politics throughout 1012 and all parties made their preparations accordingly. The excitement seemed to affect the Reichstag itself

Empire dominated domestic politics throughout 1012 and all parties made their preparations accordingly. The excitement seemed to affect the Reichstag itself which contrary to its usual methods worked with such speed that it was able to pass into law a new constitution for Alsace Lorraine, the codification of the insurance laws and the introduction of shipping dues. The Bill granting a new constitution to the

conquered provinces was at last approved by the Federal Council in December 1910 and introduced into the House early in the following year Its final form differed in many respects from the original draft. For the Imperial Government, while willing to grant a new constitution to Alsace

Lorraine, was particularly anxious to safeguard the status quo in the relationship be tween the states of the Empire Accordingly the new state was given no effective influence in the Federal Council Representatives there were indeed provided for but they had no voting power. It was principally against this provision that the Social Democrats organised protest meetings in all parts of Alsace Lorraine and in the Reichstag there was also strong feeling against the exclusion. On the first reading of the Bill (January 26, 1911) the Centre the Liberals and the Social Democrats were

united against the exclusion clause. It was not surprising therefore that when the Bill was read a second time the Chancellor accepted the Centre amendment which provided that the territory shall have three votes in the Federal Council. On May 26 1911 the bill was passed by a large majority (211 to 03) and Alsace Lorraine became a state of the Federation. According to the new constitution the Emperor exercises sovereign powers in the country and is represented at Strassburg by a Governor (Statthalter) who is at the head of the Government. Local laws are made by the Emperor with the consent of the two Chambers. The First is composed of various representatives and nominated members, the Second is an elected chamber voting being by secret ballot and the suffrage universal. With regard to the representation of the new state in the Federal Council, it is not as complete as that of other states. In the first place, the votes of its representatives do not count at all on questions affecting changes in the constitution secondly whenever these votes by being added to those of Prussia can produce a majority in the Council, they are disregarded.

Important as these measures were the Morocco crisis nevertheless commanded most attention (see International Affairs Part I Sect 1) The German Govern The Morocco to German aspirations and accordingly it resolved to make sure of com pensation from France As this was not immediately forthcoming Germany without any warning sent a warship the I anther to Agadir a Moroccan port ostensibly for the protection of German firms in South Morocco but in reality to enforce its demand for compensation and moreover compensation in Morocco itself In its information to the English Government Germany denied this. But it was evident that in many quarters in Germany the feeling was that a port in Morocco should be ceded to the Germans By July 15 1911 the Cerman Government had realised that such a demand would not be tolerated. It therefore asked for territories in other parts of Africa and after much negotiation two treaties were signed between the two powers (Nov 4 1011) In the one Germany agreed to recognise the French Protectorate in Morocco by the other France ceded to Germany parts of her Congo colony The bargain was by no means satisfactory to German public opinion and among those who were dissatisfied was Herr von Lindequist, the Colonial Secretary himself He resigned in consequence and was succeeded by Dr Solf who for a time had been Governor of Samoa Nor was this the end of the matter On November 9-10 1911 when the treaties were discussed in the Reichstag the Chancellor found scant sympathy when he detended his policy. The press was unanimous in its condemnation and all parties sought to utilise public feeling for their own ends in the electioneering campaign that was already in progress

The general elections 1912 for the following January Fhe results will be apparent from the Table, showing the number of seats for each party

Composition of German Reichstag 1907 and 191

Summarised the position of the parties in 1912 was as follows the Bloc 191,

the Opposition 202 Danes 1, Independents 3, Total 39. The most striking fact of the elections was the sweeping success of the Social Democrats, who polled 34 8 per cent of the total votes registered (as against 28 9 per cent in 1907) 1

The new Reichstag opened on February 7 1912, and in the speech from the Throne social legislation was promised a first place in the deliberations of the House A hope was expressed that the state would before long become financially sound so that The Socialists among other things the army and the navy might both be strengthened and the Presidency of The first work of the Reichstag was to elect a President the Reichster fell on Dr Spahn a member of the Centre, the second strongest party in the House. To have given the Socialists the prize was really too much for all the parties but the Socialists could not be kept out altogether. Accordingly of the two Vice Presidents one was a Social Democrat (Herr Scheidemann) and the other a Na tional Liberal (Herr Paasche) But the possibility of a Socialist Speaker was a thorn in the side of the Presidential Board and Herr Spahn resigned followed shortly after by Herr Paasche Sittings were held to fill these vacancies and for a day or two a Social Democrat presided over the German Reichstag for the first time in its history On February 14 1012 Herr Kaempf was elected President and Herr Dove second Vice President The Socialist element was still tolerated. But when the day to confirm these elections came round the House had apparently decided to eliminate the Social Democrat

This was a small affair compared to the difficult financial situation of the summer of 1900 seemed to be reviving. The War office and the Admiralty demanded extra expenditure therefore fresh sources of revenue were Financial When the Secretary to the Treasury (Herr Wermuth) hinted necessary needs for defence at fresh taxation the Centre and the Conservatives were up in arms against a revival of the death duty proposals (February 1912) In the end the army and navy authorities obtained their vote for increased expenditure but no provision was made for obtaining corresponding revenue. Herr Wermuth regarded this as a wrong principle and resigned in consequence (March 16 1917) being succeeded by Herr Kuhn There can be no doubt that Herr Wermuth's dis appearance was a victory for the blue black bloc The question remains if the bloc objected to fresh taxation what alternative proposals had they to offer? Triumph of The abolition of the so called Liebesgabe (the rebate of duty on spirits the Centre which is enjoyed by distilleries in regard to the amount of spirits distilled before 1888) was their reply — a course which would produce some f1 500 000 fresh revenue But even the Centre party did not for a moment pretend that this would cover the cost of the Defence Bills The main thing however was that a Parlia But at what cost! It was a surrender mentary conflict was avoided - or postponed to the Centre party and the acceptance of a policy which was not that of the Imperial Chancellor and which was regarded by an able Finance Minister as so unsound that he resigned rather than adopt it

A new legislative period opened in January 1912 for several of the states in the Federation

The Prussian Diet met for a new session on the 15th and the speech from the Throne foreshadowed the introduction of an income tax. The the Prussian and other state Diets

Assembly and that in the Reichstag was well illustrated by the ejection of two of their number from the former (Mav 9) for a disorderly scene—the only means at their disposal in that House for making themselves heard—and their subsequent trial (September 23, 1912) before a criminal court. Yet only in Prussia is their position such. Elsewhere they show if not the same at any rate some progress in the various state Diets. In Schwarzburg Rudolstadt for example, the President of the Landtag (Iebruary 28, 1912) is a Social Democrat.

¹ The principal parties polled votes as follows Conservatives 3 per cent in 1912 (as against 4 in 1907) the National Liberals 13 6 per cent (14 5 in 1907) the Centre 16 4 per cent (19 4 in 1907) and the Radicals 12 3 per cent (10 9 in 1907)

Wurttemburg the interim committee (which according to the constitution is the executive power during the dissolution of the Diet) contained two Socialists (October 5 1912) At the elections in Bavaria, the second important state in the Empire (February 1912) the party increased its strength from 50 to 30. The remarkable thing about these elections was that Bavaria for the first time in its history obtained a purely Centre ministry with Freiherr von Hertling at the head. Former ministries had been either liberal or business administrations a Centre ministry Bavarian was something new. The justification for it however lay in the great Ultramontane

Ultramontane was something new The justification for it however lay in the great cabinet strength of the party after the elections. It had obtained 87 seats as against 35 Liberals and 50 Socialists. Nevertheless feeling in the country and in the press ran high for the appointment of the new cabinet was regarded as a success for reaction.

Of the smaller states Mccklenburg deserves a word of mention Mecklenburg has always been regarded as the home of uncompromising conservatism yet on February 18 1000 the Grand Duke received a deputation which presented a petition with forty thousand signatories (the total number of electors there is 146 910) demanding a reform of the constitution. The Grand Duke himself was quite agreeable but the nobility objected and the notorious influence of the landed proprietors in Mecklenburg was sufficient to make the scheme impossible. One other matter is worthy of mention in connection with Mecklenburg. In November 1910 the Diet agreed to the imposition of a tax on bachelors.

The death on Dec 1 1912 of Luitpold Prince Regent of Bavaria (b 18 1) may be noticed here He was the third son of King Ludwig I (abdicated 1848) and uncle of Ludwig II and the reigning King Otto He took a prominent part in New Rulers the Franco German War but mixed little in politics till 1886 when Lud io Bavaria aad wig II was declared incurably insane Prince Luitpold then became Luxembury Regent and he continued in that position when a few months later the King drowned himself and Prince Otto who had already been eleven years under re straint succeeded to the throne His rule was wise and economical and under him Bavarian relations with Prussia steadily improved He was succeeded in the regency by his son Prince Ludwig Leopold (b 1845) Mention must be made too of the Duchy of Luxemburg which though politically independent is yet for commercial purposes included in the German Zollverein The reigning Grand Duke William died February 26 1012 and was succeeded by his daughter, the Grand Duchess Marie Adelaide (born June 14 1804)

The prosperity which showed itself throughout Germany in 1909 continued the next year also. In 1910 the production of iron established a record (14 793 604 tons) and surpassed that of 1907 (13 045 60 tons). The same buoyancy was shown in coal production, which reached a total of 152 881 509 tons being an increase of 63 per cent on the production of the previous year. I oreign trade too was profitable the total exports showing an increase of 13 35 per cent on those of 1909. The railway profits were satisfactory and there was technical progress

For in 1909 the Prussian State Railway Administration was voted a sam of money in order to make experiments in electric motive power. The line chosen was that between Bitterfeld and Dessau (26 kilometres about 15 miles) which forms part of the main line between Magdeburg Leipzig and Halle. The electrification was begun on January 18, 1910, and was in working order at the end of the year.

As 1909 was the year of tamine prices for wheat 1910 registered famine prices for meat. The scarcity of cattle was due largely to the previous bad harvest of fodder which had made cattle rearing expensive. Besides it must be remem bered that even in good years the production of cattle in Germany is not sufficient to satisfy the demand. The high price of meat therefore is a consequence seeing that cattle importation is rendered difficult by the veterinary precautions which are even more prohibitive than the high duties levied on foreign live

Under the present legislation the importation of live cattle for slaughtering stock purposes is allowed, with certain restrictions from Russia Austria Hungary Switzer land. Denmark and the Umted States But no importation is permitted from France. Holland and Belgium To this general law certain modifications were introduced in 1010 by several states, but only after the outcry against high prices became extremely threatening Prussia, however declined to make any concessions, all that it agreed to was to institute a lower railway rate for the transport of slaughtered meat a con cession which was extended to December 1012 The outbreak of the foot and mouth disease in many parts of Germany in 1910 only aggravated the situation and popular feeling became very threatening in view of the steady rise in the price of meat in 1911 On October 23 1911 the Chancellor replying to an interpellation on the question gave it as his view that the agitation was unreal His mistake was brought home to him in September 1012, when the prevailing distress was sufficiently extensive to extract a promise from him for an enquiry into possible ways and means for mitigating the evil which he termed "a heavy burden on the public On September 28 101 the scheme for reliet (expressly stated to be a temporary measure only) was published It consisted largely of a relaxation of the existing restrictions A Bill was promoted in the Reichstag embodying the measure, which was to be in operation from October 1 1912 to March 31 1914 Yet there was no great improvement and in the latter part of October (23rd and 24th) meat riots occurred in Berlin When the question came before Parliament once again this time in the Prussian Diet (Oct 25 1912) Herr von Bethmann Hollweg at last laid bare his policy was clearly the duty of the state he held to do all it could to improve matters and it had already gone as far as it was possible with due regard to veterinary pre cautions (These excluded the importation of foreign meat) But as a general proposition it ought to be the aim of Prussia to keep the home meat production independ ent of foreign countries seeing that this was a most important factor in its economic independence with which its political existence was bound up

Some such idea must have actuated the Government in its oil scheme (Oct 15 1912) which was intended to counteract the influence of the Standard Oil Trust The performent scheme but of a joint stock company in which financiers and merchants will organise the wholesale oil trade under Government control. The main idea is to protect the public from foreign monopoly and to secure for the Empire any profits which the scheme can be made to yield without injury to the consumer. The interesting feature of the plan is that these profits shall not be treated as general revenue but shall be earmarked for social legislation.

In the history of German education the most noteworth; event of the year 1909 was the admission of women students to all German universities on the same terms as men Before that women might be only "visitors' (Hospitantinnen) universities in the winter Semester 1908-9 they were registered as fully privileged undergraduates. In that half year their number was 1,108, in the following summer it rose to 1432. The year 1909 is noteworthy also for the plan of a university for Frankfort-on Main (Dec. 15, 1909). The demand for academic teaching in that city came from the locality itself, but the Government is somewhat averse to the scheme and it has not yet been sanctioned. Several noteworthy anniversaries should not be left unmentioned. The university of Leipzig celebrated the 190th year of its existence in 1909 (July 30), Berlin recalled the 190th year of its existence in 1911 (Oct. 10) as did Breslau (Aug. 1911). Further more Breslau won fame in another direction, on November 29, 1910 the Eleventh Technical High School in Germany was opened there by the Kaiser

Obtuary—During 1911 the following distinguished Germans died concerning whom there are biographical articles in the E B FRIEDRICH HAASE (b 1827) the actor (see E B xi 1782) on March 17 REINHOLD BEGAS (b 1831) the sculptor (see E B in 652) on August 3 Wilhelm Jensen (b 1837) the novelist and poet (see E B xi 321) at Munich on November 24. FELIX MOTIL (b 1856) the conductor and composer (see

E B xviu 931b) on July 1 Friedrich von Spielhagen (b 1820) the novelist (see E B xxv 667b and v 616d) at Berlin on February 25 Karl Herman Fritz von Unde (b 1848) the painter (see E.B xxvu 563c) at Munich on February 26 Prominent politicians also passed away in Pull Singer, the Socialist leader (b 1844 d January 30) and Mak Liebermann von Sonnenburg, the pan German and leader of the anti-Semitic party (b 1859 d September 18) The deaths also may be mentioned of Josef Uphles the sculptor (b 1850 see E B xxiv 501a) on January 1 Gborg Jellinek the jurist (b 1852 see E B xv 315) on January 12 Albert Ladenburg the chemist (b 1842) on August 22 Higo von Tschidi art director at Munich (b 1851) on Nov 24 and the archaeologists Otto Puchstein (b 1857) on March 10 and Kerule von Stradonitz (b 1830) on March 23 1839) on March 23

(b) 1839) on March 23

Duning 1912 the deaths occurred of the following who have living biographies in the E B Richard Andres (b) 1835) the geographer and ethnologist (see E B 1 971) at Leipzig on February 22 Justus Sofhus Felix Dahn (b) 1834) the historian jurist and poet (see E B vii 734b) at Breslau on January 3 Theodor Gomerke (b) 1832) the philosopher and classical scholar (see E B xii 230a) at Baden on August 29 For Luit fold Prince Regent of Bavaria (E B ii 550d) who died Dec 12 see above.

Among Cerman public men most importance however attaches to Baron Adolf Mar Schall von Bieberstein the emment diplomatist, who died at Badenweiter on September 24 1012. He was born at Carlstuhe on October 12 1842 his father Augustus Baron

SCHALL VOV BIBBERSTEIN the children impointance, who used at backmarks of experiment of the control of the cont Frankfort on Main and at the universities of Heidelberg and Berlin He studied law and from 1871 to 1882 held various administrative offices in the Grand Duchy of Baden From 1875 to 1883 he sat in the Upper Chamber of the Baden Diet. In 1883 he was sent to Berlin as Minister for Baden in the Federal Council and from 1884 to 1890 he represented the Council in the Imperial Insurance Office. In 1890 he succeeded Count Herbert Bismarck as Secretary for Foreign Affairs under the Caprivi Chancellorship and continued to hold that office under Prince von Hohenlohe (see E. B. xi. 8921) but he had maurred the enmity of Prince Bismarck by refusing his advice when he first assumed office and the result was a fierce press campaign against him which finally obliged him to speak out when he appeared as a witness at the trial of certain journalists in 1896 for lese majeste. He was also violently opposed by the Agrarians because he advocated the reduction of corn duties and in 1897 he resigned office and a few months later was appointed German Ambassador in Constantinople There he remained for nearly fifteen years creating a commanding position for himself and a growing ascendency in Turkish affairs for his Government. To him was largely due the promotion of the Bagdad railway (see E B in 197b xx ii 439c). In general European politics Baron Marschall had taken during his Foreign Secretaryship a strongly Imperialist attitude. After the Jameson raid and the Emperor's telegram to President Kruger it was he who declared in the Reichstag that the maintenance of the independence of the Boer republics was a German interest. He was also an advocate of a strong naval policy for Germany. In 1907 he was principal German delegate in the Hague Conference. In May 1912 his appointment to succeed Count Wolff Metternich as Ambassador to Great Britain raised great expectations as to the influence of his personality on Anglo German relations but he had only been installed a short time before his health finally broke down. Another im portant loss to German public life came in the death of Alfred Von Kiderlen Warchter (b 1852 d Dec 30 1912) the Foreign Minister He was born at Stullgast the son of Robert Kiderlen a banker and Baroness Marie Von Waechter He fought as a volunteer in the Franco German War then studied at the universities and in 1879 entered the Foreign Office He held various diplomatic posts finally going to Bucharest in 1900 and remaining there for ten years when he became Foreign Secretary

Other well known men who died in 1912 may be more briefly mentioned

OTTO BRAIM (b 1856) director of the Lessing Theatre Berlin died on November 28 He was one of the founders of the Independent Theatre and took the leading part in producing the plays of Ibsen and Hauptmann

JOHAN HEINRICH BURCHARD (b 1852) Chief Burgomaster of Hamburg died at Hamburg on September 6 He served in the Franco Prussian War and afterwards studied law becoming Doctor of Laws in 1874 He entered the Lower House of the Hamburg par lament in 1884 and the Senate in 1885 From 1887 to the time of his death he represented Hamburg on the Federal Council of the Empire In 1903 1906 1908 1909 and 1912 he was 1st Burgomaster of the city

ANTON HUBERT FISCHER (b 1840) Cardinal and Archbishop of Cologne died at Neu enahr on July 30 For nearly twenty five years he gave religious instruction at Essex Gymnasium obtaining his doctor's degree at Tubingen University In 1902 he was appointed Archbishop of Cologne, and was made a Cardinal by Leo XIII in the following year In 1909 he presided over the Euchanstu Congress at Cologne 4 most notable feature of his policy was his steady support of the Christian Trade Unions (see E B xxvii, 147b) powerful innectarian organisations of labour largely managed by laymen and distrusted in some

quarters as too independent of Vatican control

THEOBALD FISCHER (b. 1846) the geographer died on September 17 at Marburg, where he had been professor of geography since 1883 He devoted himself specially to the study of Mediterranean lands and his most important work is his Mittelmeerbilder

MARTIN KIRSCRNER (b 1842) Chief Burgomaster of Berlin, died at Ehrwalt, Tirol on September 13 After holding administrative posts in Breslau he became second Burgomaster of Berlin in 1892 and First (or Chief) Burgomaster in 1898

Otto Krummel. (b. 1854) the geographer died at Cologne on October 12 In 1883 he became professor of geography at Kiel and latterly was transferred to Marburg He was recognised as the leading German oceanographer and was a member of the International Council for the Study of the Sea. He was joint author of the article Ocean and Oceanog raphy in the E B and in 1911 completed a standard treatise on oceanography

raphy in the E B and in 1911 completed a standard treatise on oceanography
Otto Liebmann (b 1841), the philosopher died at Jena on January 15. He had been
professor at Jena for thirty years. For an account of his philosophy see E B x in 236d
Paul Wallot (b 1842), the architect died on August 11. He designed the present
Reichstag buildings (see E B ii 442c) and was a professor in the Dresden Academy of Arts
Literature.—Among recent books (in Euglish) bearing on Germany and German life
the following will be found useful. J Eliss Barker Modern Germanv 4th and enlarged edi
tion brought down to July 1912. W. H. Dawson. Social Insurance in Germany (1912) as
well as his Growth of Modern Germany (1909). Herbert Perris Germany and the German Emerry (1912). Whitman German Memories (1912). GREECE AND THE BALKAN STATES

POLITICAL HISTORY 1909-12

1000 —The agitation in Servia caused by the annexation of Bosma and Herzegovina by Austria Hungary in 1908 had led the country to the brink of war with its powerful The only chance of a Servian success in such a conflict lay in neighbour Servia the hoped-for support of Russia, but when that Power acting under pressure The Bos nian Crisis from Germany declared that she no longer insisted on the provisions of 1909. Article XXV of the Berlin Treaty which regulated the Austrian tenure of the two provinces, the Servian cabinet, in which MM Milovanovich, Pashich and Ribaratz were the principal figures recognized the uselessness of further resistance and on March 31, 1909 Servia addressed to Austria Hungary a declaration, the text of which had been drawn up by the British Government, to the effect that she would con form to the decisions of the Powers relative to Article XXV of the Berlin Treaty and abandon the attitude of protest and opposition she had hitherto maintained towards Austria Hungary, reducing her army to its peace effective and disarming her bands of At the same time the representatives of the Powers at Belgrade gave assur ances to the Servian Government that Austria-Hungary meditated no attack upon the independence or territorial integrity of Servia. On April 1st the Austrian reply express ing satisfaction at the resumption of friendly relations was delivered at Belgrade By a strange coincidence a provisional commercial arrangement between the two countries expired that very day and the political struggle was replaced by a war of tariffs

Europe had scarcely been delivered from the Servian nightmare when the outbreak of a reactionary, movement at Constantinople (April 13th) once more produced excursions

The counter revolution. ia Turkey Its officies

and alarums in the Balkan Peninsula (see Turkey) After the successful march of Mahmoud Shefket with the army of Salonika on Constantinople the Young Turk faction, which had been driven from power, re established its authority, and the Sultan Abdul Hamid II was deposed (April 27, 1000) Notwithstanding their profession of Liberal principles, the triumph of the Young Turks was productive of little or no improvement in the condition

of the subject races of the Ottoman Empire An increase of militarism in the adminis tration followed, and the doctrine of "Ottomanism," which was explained to the outer world as umplying the perfect equality of all Ottoman subjects, was interpreted at home as justifying the abrogation of the ancient rights of the non Turkish nationalities privileges of the Christian churches were interfered with, political clubs were suppressed, public meetings were forbidden, and every effort was made to extinguish the national sentiments of the various races. The result was the formation of secret conspiracies and the appearance of insurgent bands in Macedonia which were aided and in part recruited by sympathizers in Bulgaria, Servia and Greece while Albama broke into open revolt. The various nationalities, which the artful policy of Abdul Hamid had maintained in a state of mutual hostility began to discover that their only hope of pre serving their rights and indeed their existence lay in combination against the common fee. The reconciliation began among the Greek and Bulgarian peasants in course of time better relations began to prevail between the clergy and upper classes on both sides which had hitherto been implacably hostile and ultimately the governments of Athena and Sofia entered into friendly discussions. A close understanding resulted and the foundations of the future Balkan alliance were laid.

The crisis which arose over the annexation of Bosnia and Herzegovina by Austria Hungary came to an end in April 1909 with the recognition of the annexation by the Powers At the same time Montenegro which had formed an alliance with Servia during the period of tension succeeded, through the good offices of Italy, in obtaining from Austria Hungary and the Powers the abrogation of various restrictions imposed on her tenure of the port of Anti-

vari by Article XXIX of the Berlin Treaty. It was arranged that Antivari should retain the character of a commercial port, but the administration of the maritime police on the Montenegrin coast by Austria Hungary, the closure of Antivari to ships of war of all nations, and other irksome provisions of the treaty, were abandoned.

The decision of the four Protecting Powers of Crete to withdraw their troops from the island led to considerable excitement in Greece as the date fixed for the evacuation

Greece political agi tation over the Cretan Question (July 7 1909) approached It was generally believed at Athens that the union of the island with Greece would follow immediately upon the departure of the troops but the Young Turks now secure of power assumed a threatening attitude and Mahmoud Shefket Pasha addressed menacing language to the Greek Patriarch The indignation in Creece was intense

especially in the army, and a secret society known as the Military League was formed among the officers. After the embarcation of the international contingents, the Cretans hoisted the Greek flag on the forts of Canea and Candia The Cretan Govern ment declaring itself unable to enforce the removal of the flags in compliance with the injunctions of the Powers resigned and was succeeded by an executive committee which at once took an oath of allegiance to King George The Greek flag at Canea was cut down by a detachment from the international fleet (Aug 18th) while that at Candia was removed with some difficulty by the local authorities on the following day Meanwhile the Porte in two Notes (Aug 8th Aug 13th) demanded from Greece categorical declarations with regard to her intentions both as regards Crete and Macedonia and received replies which were stated to be satisfactory The Powers had already (July 13th) addressed a memorandum to Turkey declaring their resolve to maintain her "su preme rights ' in Crete they now at the suggestion of Great Britain interpreted these words as implying the sovereignty of Turkey although on March 17th, 1807 they had irrevocably decided 'to recognize her 'suzerainty only

The disappointment felt in Greece at the postponement of the union the humiliation inflicted by Turkey and the tergiversation of the Powers combined to bring about a On the night of August 27 1000 a number of officers belonging Revolt of to the Military League marched out of Athens with some 2000 men and the Military Their demands included a series of radical League at occupied a hill in the suburbs Athens. reforms in the army and navy the exclusion of the Crown Prince and his brothers from military commands and a number of other changes M Ralli the prime minister, who had succeeded M Theotokis on July 20th, resigned and was replaced by M Mavromichalis The new government undertook to carry out the greater part of the programme of the League its leader Colonel Zorbas was appointed to the command of the troops at Athens and the royal princes withdrew from the army The movement was not antidynastic, but aimed at putting an end to the prolonged maladministration which had involved the country in so many misfortunes. In effect Colonel Zorbas

and ins confederates became for the time the real rulers of the country, and on their initiative a large number of legislative measures were submitted by the government to the Chamber, which passed them with mechanical docility. Some of the new laws met the real requirements of the country but others betrayed the crude statesmanship of the soldier politicians who devised them. Eventually, however, the popularity of the League declined dissensions broke out among its members and a naval mutiny at Salamis (Oct 29th) indicated a rift in the harmony between the army and navy. The Mavromichalis ministry, which the officers tolerated so long as it carried out their orders began to display a spirit of independence and certain features of the new legisla tion met with opposition. A demand for the immediate settlement of the Cretan Ques tion addressed by the Porte to the Protecting Powers (Nov. 10th) suggested the fear that Turkey would endeavour to profit by the distracted condition of Greece

After the settlement of the various questions arising from the Bulgarian declaration of independence in 1908 the relations between Turkey and Bulgaria had become normal Bulgaria. On July 23, 1900 a number of Bulgarian officers attended the celebration of the first anniversary of the restoration of the Turkish Constitution at Constantinople and during the autumn several Macedonian revolutionaries were expelled from Bulgaria. The efforts of the Young Turks however to infringe the privileges of the Christian nationalities in Macedonia caused some uneasiness and the severities practised by Djavad Pasha during the autumn in putting down a revolt in Northern Albania seemed to indicate that the new regime in Turkey had not abandoned traditional methods of repression. On November 25th King Ferdinand paid a short visit to King Peter at Belgrade

1010 — The beginning of the year 1010 found Greece in a state of confusion bordering on chaos The relations of the Military League with the Mavromichalis government became daily more strained and at the end of January M Mavromichalis (Irreece resigned being replaced in the premiership by M Stephen Dragoumis Arrival of M Venizelos, who took Colonel Zorbas into his cabinet as minister of War Conscious of its waning popularity and unable to deal with the perplexities of the situation the League had already sought the advice of M Venizelos the eminent Cretan politician who had arrived at Athens on January 10th. He at once devised a programme which enabled the League to make a triumphant exit from the political arena He suggested the convocation of a National Assembly to sanction the changes which the military reformers and, indeed the bulk of the nation desired, and in the space of a few weeks succeeded in inducing not only the officers but the opposition leaders and eventually the king to accept his proposal. The retirement of the Mavromichalis ministry became inevitable Having practically arranged the affairs of Greece in accord ance with his ideas M Venizelos returned to Crete on February 28th

The new Greek ministry under M Dragoumis who was highly respected by all parties, adopted the programme of M Venizelos, and worked in comparative harmony with the League the inclusion of Colonel Zorbas in the cabinet tending to Convecation moderate the violence of the military junta King George who had always of the Greek National played the part of a constitutional sovereign was opposed to the convoca Assembly tion of an Assembly on the ground that under the Constitution such a body could only be called into existence by the vote of two successive Chambers The holding of fresh elections however involved the prospect of a rupture with Turkey owing to the resolve of the Cretans to send deputies to the new Chamber, whose admission the Porte had declared would constitute a casus bells In view of this danger and having received assurances that the League would dissolve the king personally announced to the Cham ber (March 30th) his decision to summon a revisionary assembly as provided for by clause 107 of the constitution The League simultaneously issued a manifesto declaring Thus came to an end that the interference of the army in political affairs had ceased the military pronunciamento, which had been prolonged for a period of six months the methods of the officers were crude their intentions were excellent, and the general results of the movement were beneficial for Greece.

In Thessaly where a system of land tenure based on Turkish feudal institutions had not yet disappeared a serious agitation broke out among the peasant cultivators in March 1910 the troops were called out and bloodshed took place at Larissa. Traubles la and Karditza After the annexation of the province to Greece in 1881 Thesasiv many of the Turkish proprietors, who as a rule were easy-going and indulgent to their seris had parted with their estates, which the new landlords for the most part wealthy speculators endeavoured to administer on business principles outbreak of the military revolution at Athens the cause of the Thessalian peasants was taken up by political agitators who, with the support of the League introduced a measure into the Greek Chamber for the compulsory expropriation of the landlords led to the despatch of a sharply worded Turkish Note reminding the Greek Government that the rights of the Moslem proprietors were safe guarded by the Convention of Contantinople of July 2 1881 The proposed measure was resisted by M Dragoumis, and satisfactory assurances were tendered to Turkey

The relations between Bulgaria and Turkey had once more become strained owing to the seventies practised by the Young Turks in Madeconia and on January 2 1010. a great meeting of protest was held at Sofia On January 6th Dr Daneff Rulgaria ex prime minister was sent to Constantinople with the object of bringing relations with Turkey about an understanding and his mission resulted in a temporary mitigation of the repressive measures carned out by the Turkish authorities On March 21st King Ferdinand and Queen Eleonore who had already paid a visit to St Petersburg (Feb 23rd) arrived at Constantinople accompanied by the Prime Minister and two other members of the Cabinet and were cordially welcomed by the Sultan who gave a banquet in their honour The Greeks of Constantinople however showed ill humour at the visit and its political effects were marred by the refusal of the Turkish Government to allow the King and Queen to return to Sofia via Mount Athos and Salon-On June 12th Prince Yusuf Izz ed Din the Turkish heir apparent who had previously visited Belgrade arrived at Sofia where he spent some days. Some conferences took place between Rifaat Pasha who accompanied the prince and Bulgarian statesmen but no political results of any importance were attained

The friendly relations existing between Servia and Turkey were strengthened by the visit of King Peter to Constantinople (April 5rd) a few days after the departure of King Ferdinand The Servian sovereign was received with great honours and met with an effusive welcome from the Greek clergy and population. He was permitted to visit Mount Athos and to return to Servia through Mace donia. The policy of the Young Turks at this period was to play off the Servians against the Bulgarians in Macedonia and against the Albanians of Kossovo who had risen in revolt against the imposition of an octroi tax and other vexatious measures of the Turkish authorities. Servia was bound to keep on good terms with Turkey which dominated her only commercial outlet at Salomka her Austrian frontier being closed by a tariff war. Hopes, which proved illusory were held out to Servia that she would be allowed to construct a railway to San Giovanni di Medua on the Adriatic

On the opening of the Cretan Assembly (May 9, 1910) all the Christian deputies took an oath of allegiance to King George of Greece. A protest was handed in by Naim Bey, a Moslem deputy, but he was assaulted by one of his Christian colleagues while another tore up the document. In reply to the remonstrances of the Porte against these proceedings the Protecting Powers declared that nothing had occurred to change the status quo. The Assembly however, proceeded to vote the exclusion of the Moslem deputies while steps were taken throughout the island to hinder Moslem officials from exercising their duties. Eventually after an ultimatum from the Powers which threatened to land troops and seize the customs the Assembly revoked its decision (July 9th) and interference with the Moslem functionaries was abandoned. The proceedings of the Cretan Christians and the sympathy expressed for them in Greece entailed much suffering on the Greeks in Turkey. The 'boycott' of Greek commerce, initiated by the Committee of Union and Progress in the previous

year, was new enforced with extreme rigour All dealing with Greeks was prohibited Greek steamers were prevented from taking up or landing passengers or goods, Greek shops were in many places forcibly closed and Greek workmen were forbidden to pursue their avocations. The movement was ostensibly under the direction of Kerim Aga, a musy porter at Salonika. The embassies at Constantinople protested but were informed that the Government was powerless. The rejection by the Porte of a demand for compensation to Greek subjects in Turkey led to withdrawal of the Greek minister from Constantinopie but diplomatic relations were not suspended

At the end of August 1910 the fiftieth anniversary of the accession of Prince Nicholas of Montenegro was celebrated at Cettigne with great rejoicings in presence of the King

Montenegro proclaimed a kingdom

and Queen of Italy, King Ferdinand and Prince Boris of Bulgaria, the Crown Princess of Greece and Servia and other distinguished personages On the morning of the 28th in response to an address from the Sukpshtina, Prince Nicholas assumed the royal dignity, and accompanied by his

illustrious guests attended a Te Deum in the historic monastery of Cettigne The golden wedding of the King and Queen was celebrated next day in the little Vlaska church in which their marriage took place The festivities continued for three days amid great enthusiasm The new kingdom was immediately recognized by the Powers

Elections were held in Greece in August 1910 for the Revisionary Assembly at which M Venizelos and other Cretan candidates were returned the latter resigned their man

Greece the Revisionary Assembly

dates at the instance of the Powers to which Turkey had addressed a protest but the election of M Venizelos who was technically a Greek subject having received the freedom of Athens was allowed to stand bly was opened by King George on September 14th and four days later

M Venizelos arrived from Crete. He firmly resisted a proposal that the Assembly should assume constituent powers and that body at his suggestion formally invalidated the election of the Cretan deputies. On October 13th M. Dragoumis resigned, and M Venizelos became Prime Minister 1. The leaders of the old political

Venizelos Premier

parties at once combined against him with the result that King George dissolved the Assembly (Oct 25th) The political leaders responded by pro claiming the abstention of their followers from the ensuing elections which took place in December and resulted in an overwhelming majority for M Venizelos, who was now in a position to carry out his programme of reform

During the summer and autumn of 1910 the Young Turk Government proceeded to carry out its programme of disarmament in Macedonia. The measure was practically

Tarkish effect on the Ralkan States.

enforced against the Christian population only the Moslems with the exception of the Albanians, being allowed to retain their arms The dis in Maccoonia: armament was carried out manu mulitars by Shefket Torgut Pasha and his troops after the suppression of an Albanian insurrection in the spring The villages were blockaded by the troops during the search for arms, and some 10,000 peasants were beaten or otherwise maltreated. At the same

time armed Bosnian colonists were settled in many districts hitherto inhabited by These proceedings with regard to which complete reticence was maintained by foreign governments and the greater part of the European press, produced great undignation in Bulgaria, where large numbers of refugees congregated as well as in Servia and Greece and gave an impulse to the movement for joint action on the part of those states against Turkey In the autumn Rumania apparently prompted by Germany, declared to Turkey that in the event of hostilities between Turkey and Bul garia Rumania would mobilize all her forces on her Bulgarian frontier

Eleutherios Venizelos was born at Cerigo in 1864, his family tracing their origin to the Florentine dukes of Athens in the middle ages and claiming a patron saint in St. Philo thea Venezela who was beaten to death by the Turks in 1589 and buried in the Cathedral at Athens. His father having been expelled from Crete by the Turks Eleutherios studied law at Athensand in Germany. Although an Hellenic subject in May 1899 he became Minister for foreign affairs in Crete after the island obtained autonomy but resigned in September 1901 and from 1906 onward he was the most powerful man in the island

1911 -On January 11 1911, the Liberal Cabinet of M Bratiano resigned in Ruman ia, and was replaced by a Conservative ministry under M Carp The new Rumanian

Bratlano Cabinet in Rumania.

Prime Minister possessed only a small following in the Chamber, a large number of the Conservatives having broken away some years previously under the leadership of M Take Jonesco A dissolution followed and elections were held in February, at which, owing to strong official pressure.

a large ministerial majority was obtained M Carp, while maintaining friendly relations with Turkey, did not consider himself bound by the declaration of his predecessor On January 3 1911, the Bulgarian sobranye decided to send the members of the

Bulyaria. of Stambolovista

former Stambolovist ministry who were charged with various illegalities before a special commission of enquiry A speech delivered on this occasion by General impeachment Savoff the former War Minister, in which he stated that the Bulgarian army was perfectly ready for war with Turkey, attracted much attention The prosecution was eventually dropped Owing to the failure of protracted

negotiations for a commercial treaty with Turkey the outbreak of a tariff war seemed imminent but a provisional arrangement for one year was eventually concluded (Feb. 3d)

January 22nd revision of the Constitution

The Greek Revisionary Chamber elected in the previous year met at Athens on Among the changes sanctioned were the revival of a Council of State reduction of the number of deputies and of the number necessary to form a quorum, permanent tenure of their appointments by judges and public officials compulsory elementary education exclusion of military and naval officers from the Chamber and permission to foreigners to enter the service of the state In virtue of the last mentioned enactment the reorganization of

the army was entrusted to French, and that of the navy to British officers (April 14th) The revision of the Constitution was completed on June 5th For several days in March Athens was thrown into a state of confusion owing to an

guage Ques tion in Greece

agitation raised by some ultra patriotic University professors, who demanded that a clause should be introduced into the constitution ordaining the exclusive employment of the 'purified literary language in all departments of the state and forbidding the translation of the Scriptures into the spoken tongue Meetings of students were held, the populace became excited and it was

found necessary to occupy the streets in the neighbourhood of the Chamber with troops The Covernment yielded to the demand but the purists, encouraged by their success proceeded to insist that the employment of the popular language in schools should be proscribed by the Constitution and their leader Professor Mistriotis issued a procla mation declaring that the immortal Greek language the national religion and the race itself which had civilized the whole world were in danger and convoking a public meet ing to consider whether the nation would consent to commit suicide" M Venizelos thereupon took prompt action Troops were brought up from Chalcis the meeting was prohibited and the professor was brought to his senses by a notification that he would be prosecuted for sedition Tranquility was immediately restored

At the end of March 1911 diplomatic relations between Greece and Rumania which had been suspended in September 1905 owing to Rumanian retaliation for outrages perpetrated by Greek bands on the Vlachs of Macedonia were resumed Greece and Romania. The Thes.

salian land question

through the mediation of Russia and Italy On April and M Venizelos announced that the Government had decided to settle the Thessalian land question on the principle of voluntary sale by the landlords, and his assur ances were accepted as satisfactory by the Thessalian deputies

On March 22nd the Democratic Cabinet of M. Malinoff in Bulgaria resigned and was succeeded (March 20th) by a coalition ministry representing the Nationalist and Progressive parties M Gueshoff the leader of the former became prime

Bulgaria. new ministry revision of the Con stitutios

minister, while Dr Daneff the Progressist chief accepted the presidency of the Chamber The new government endeavoured to initiate a policy of friendship with Turkey in the hope of mitigating the violence of the Young Turk committees in Macedonia, which now displayed itself in a

series of assassinations of Bulgarian and Greek notables. By the irony of fate the most pacific of Bulgarian governments was destined to make war on Turkey in the fol lowing year. In July the Grand Sobranye was convoked to make certain changes in the Constitution resulting for the most part from the proclamation of Bulgarian inde pendence in 1908 The assumption of the royal title was sanctioned and the King and Government were entrusted with the right to make secret political treaties

In May 1011 the decision of the Turkish Government to send salaried Cadis or ecclesiastical judges to Crete caused unbounded excitement in the island The decision

Crete question of the Cadis.

which was attributed to the desire of Turkey to uphold the ' sovereign rights recognized by the Powers in the preceding year was approved by Great Britain but deprecated by the other Protecting Powers The Cretans determined to prevent the landing of the Turkish functionaries by force and the Canea Government addressed a protest to the Powers
Eventually the Powers induced the Porte to allow the question to rest

The sympathy and aid extended by Montenegro to the Catholic Malisson or moun taineers of the Albanian districts south of the Montenegrin frontier in their revolt against the methods of Young Turk administration (see Turkey) led to critical Montenerro relations with Turkey during the summer of 1911 The revolted districts the revolt of the were devastated by a Turkish army under Shefket Torgut Pasha and Mallesori large numbers of refugees passed into Montenegro, where they met with a hospitable reception while Montenegrins fought in the Albanian ranks the Porte accepted the greater part of the insurgents' terms (Aug 2d) and better rela

tions between Montenegro and Turkey were brought about through Russia

The outbreak of war between Italy and Turkey (Sept 20 1011) produced some excitement in the Balkans and led to military measures on the part of all the states of War between the Peninsula in response to the mobilization of the Turkish army Italy and soon realized however that Italy had resolved to exclude the Balkans Turkey from the area of war and no trouble resulted for the time except in Crete Effect on the where armed meetings were held a "revolutionary" Assembly was con States. voked and deputies were elected for the Greek Chamber The deputies were captured on their departure for Athens by an armed party from the international fleet and taken to Suda (Dec 15th), where they were detained until the dissolution of the Chamber (Ian 3, 1011) In September the Powers had notified to King George of Greece their decision not to fill the vacant post of High Commissioner of Crete

1912 - The year 1912 opened gloomily in the Balkans The possibility that the war between Italy and Turkey might bring about a cataclysm in the Peninsula was by

The Balkan States and Macedonia: taception of the Balkan ali)ance

no means removed notwithstanding the neutral attitude of the Balkan States, but the principal danger lay in the deplorable condition of Mace doma That province, abandoned by Europe had fallen into a state of anarchy, pillage and murder were everywhere rife, and a campaign of sys tematic assassination carried out by the local Young Turk committees led to represals on the part of the Christian population The Bulgarian Inter

nal Organization" resorted to a series of bomb outrages and a massacre of Christians followed at Ishtib The state of affairs in Albania and Epirus was no better the Great Powers looked on with indifference, and the conviction was brought home to statesmen at Athens Sofia and Belgrade, that nothing but the concerted action of the Balkan States could end an intolerable situation The tendency towards a combination was strength ened by a meeting of the heirs apparent of the Balkan kingdoms at Sofia on February and when Prince Boris of Bulgaria attained his majority The definite conclusion of alliances between Bulgaria and Servia and Bulgaria and Greece followed in a few weeks while an entente was arrived at between them and Montenegro

The unrest in Crete was kept alive by a decision of the revolutionary assembly to send deputies to the Greek Chamber (Feb 2d) and by some murders of Moslem peasants which led to a warning Note from the Protecting Powers Owing to the quarrels of local politicians a state of chaos resulted in the island, which for some days (March 12th-15th) was without a government. At the end of April notwithstanding the prohibi tion of the Powers a number of deputies proceeded to Athens but a steamer conveying

a party of nineteen was intercepted by H M S ' Minerva " which brought the deputies to Suda where they were detained on board as prisoners for comes Greek. more than a month (April 28th-June 6th) On June 1st the deputies at Athens vainly endeavoured to torce their way into the Chamber which was sur rounded by a strong force of troops, they were ultimately induced to desist from their efforts by M Venizelos who informed them that the Government had decided to prorogue the Chamber till October 14th On that day Greece addressed an ultimatum to Turkey and the long protracted Cretan Question found a practical solution in the admission of the deputies to the Chamber Shortly afterwards M Dragoumis was despatched to Canea to take over the government in the name of King George

On July 1st the death of M Milovanovich (b 1862) Servian prime minister and (since 1908) minister for foreign affairs took place at Belgrade A statesman of re markable tact and shrewdness and a highly amiable man who in early life had been a professor of law he had been a member of various Cabinets and death of M Milovan was Servian delegate to the Second Hague Conference He was succeeded

ovich in the premiership by M. Pashich

During the summer of 1912 the condition of Macedonia became more grave the state of anarchy was increased by a mutiny among the Turkish troops at Monastir which led to the downfall of the government at Constantinople another

Thean proach of WAF

revolt broke out in Albania fighting was resumed on the Turco Montenegrin frontier and a massacre following the explosion of some bombs took place at Kotchane which aroused the utmost indignation in Bulgaria Public attention in that country was distracted for a while by the celebration at Tirnovo of the 25th anniversary of King Ferdinand's pacific reign (Aug 15th) but agitation for war with Turkey soon broke out afresh Meanwhile the alfied Balkan States having matured their military plans determined on making a joint effort to secure a thorough going measure of reforms in the European provinces of Turkey

On September 30th the allied states mobilized all their forces and Turkey responded by a similar measure on the following day The Powers at last took alarm and informed

the Balkan governments that they would charge themselves with the intro Outbreak duction of reforms in European Turkey (Oct 7th) In anticipation of of war European intervention the Porte had already revived the obsolete Law of the Vilayets of 1880 (Oct 4th) Neither the promises of the Powers nor the Turkish Law seemed a sufficient guarantee to the allied states. On October 13 they addressed identic Notes to Turkey demanding a far reaching series of reforms. The Porte refused to reply and on October 15th broke off relations with Servia and Bulgaria, an effort was made to detach Greece from the alliance by an offer of the sovereignty of Crete and of long refused railway communication with Europe Greece however delivered an ultimatum demanding the revocation of an embargo laid on Greek vessels in Turkish On the 18th Bulgaria Greece and Servia declared war Their action ports (Oct 14th) had been anticipated by King Nicholas of Montenegro, who on October 9th invaded (J D BOURCHIER) Albania 1

GREECE 2

The population was estimated in 1910 as 2 631 952 In 1909-12 4 marked economic improvement throughout the country, largely due to good harvests was manifested by extension of trade, increased railway traffic development of the merchant navy and the stability of the exchange, the drachma having remained steady at par

Constitution —A new Constitution came in force on July 1 1911 The most impor tant provisions and changes were the creation of a Council of State with the double function of that of a consultative body to assist in drafting bills to be presented to the

¹ See Part I sect 1 for an account of the war and of the international crisis and peace proposals
See E B xu 428

GREECE 1012

Chamber and to revise new laws and decrees, and that of a supreme court for annulling decisions and acts contrary to law and dealing generally with administrative abuses It established the principal of the irremovability of public officials during good behaviour thus striking a blow at political jobbery It widened the electoral law, and reduced the age qualification of deputies from thirty to twenty-five years Several modifications in the procedure of the Chamber have been introduced such as the reduction in the number of deputies necessary to constitute a quorum, and new regulations under which bills can be passed into laws The Chamber must meet annually for not less than three nor more than six months. The power of verification of the mandates of deputies was transferred from the Chamber to a special tribunal. Other modifications include the transfer of the cost of primary instruction from the local authorities to the state and an article permitting the appointment of foreigners to the government services

Legislation—Other measures passed during 1911 were judicial reforms tending to facilitate and accelerate legal procedure the introduction of an income tax and the imposition of a new tax on arable land. Income is assessed for taxation on the rent of the residence of the taxpayer incomes below £160 are exempt as well as the first £160 of incomes above that amount while deduction is made at the rate of £15 for every member of the family above five in number living under the same roof incomes from £160 to £4000 are taxed on

a sliding scale and all incomes above £4000 are taxed 3 per cent

The tax on the produce of arable land to replace the old tax on ploughing animals met
with great opposition. It is imposed on cereals of all kinds and amounts to 5 per cent of the produce after deducting a certain amount for each household. It may be paid either in kind or specie. When land is let on the metajer system as is the common practice. the tax varies from a minimum of 24 per cent paid by the tenant farmer to 7 per cent p

Agriculture - The government has taken various steps to promote agriculture and to better the conditions of the peasants Foreign experts have been engaged to organize different branches of agriculture and efforts have been made to drain marshes improve watercourses and build roads A new law has been passed to reform municipal administration. Under this law each village forms a distinct unit of local government

Of the cultivated area about 1 200 000 acres are under cereals 1 200 000 acres fallow

lands 5 000 000 acres meadows and pastures and 2 025 000 acres under woods and forests

The area under the chief crops and their yield in 1911 were -

	Area (acres)) ield (cwts)	Area (acres)	Yield (cwts)
Wheat	965 000	5 600 000	37 500	290 000
Maize	300 000	2 600 000	10 000	70 000

There were about 12 000 acres under cotton and efforts were being made to encourage cotton plantation and to improve the quality of the product. There were about 40 000 acres under vineyards and the wine produced in 1911 amounted to 6 555 000 gallons. The olive crop of 1911 was one of the best ever produced amounting to 83 563 tons of olives and the yield of olive oil was 21 044,000 gallons. In 1910-11 the currant crop amounted to 144 196 tons and that of 1911-12 to 155 000 tons of which 113 000 tons were exported

Minerals—The mineral output of Greece in 1910 was iron 608 349 tons lead 185 207

tons magnesite 48 913 tons sulphur 51 531 tons cure 37 108 tons manganese iron 35 594 tons iron pyrites 27 557 tons emery 8000 tons chromite 7000 tons lignite 1500 tons manganese 1287 tons nickel 185 tons copper 91 tons marble 100 668 cubic feet

The value of all minerals extracted is estimated at £970 729. The produce of the blast calcined zinc 27 567 tons magnesite 19 294 tons and lead 16 573 tons

Army —The task of reorganizing the army was undertaken in 1911-12 with the assistance of a French military mission under General Eydoux. In 1911 the peace strength amounted to 1889 officers and 29,361 men and the war strength to about 115,000 men In 1912 a new law came into force under which the war strength was to be raised to about 200 000 men, and it was reckoned that the second reverse and the national guard would add another 50,000 men Military service was fixed to begin at the completion of the nineteenth year instead of the twenty first as before the term of service in the active army being two years Large sums of money were spent for pro viding the army with modern armaments and £1,000,000 was provided in 1912 to

GREECE

224

complete the scheme of reorganization. An additional £2 000 000 was estimated for during 1912 and 1913 as extraordinary expenditure on the army and navy

Navy - The reorganization of the navy was also undertaken under a British naval mission headed by Rear Admiral Lionel G Tufnell, who was appointed in April 1911 The only modern vessels prior to October 1912 were 1 armoured cruiser of 10,000 tons displacement built in 1910, 8 fast destroyers, built in 1907, 4 torpedo boats, and 1 There were besides three battleships of 4800 tons displacement each, built in 1889-90 The personnel numbered about 4000 men A building programme was provided for so as to add to the fleet 2 armoured cruisers 12 destroyers 10 torpedo boats and 2 submarines at an estimated cost of £5 000,000 to be spread over ten years, in 1919 I armoured cruiser I submarine and 9 torpedo boats were under construction In October 1912 Greece added to her navy 4 torpedo boats which had been built in British shippards for the Argentine government

Finance - The estimates of ordinary revenue and expenditure for 1911-1912 were -

	1911	1912
Revenue	£5 537 871	£5 745 000
Expenditure	5 651 532	5 698 000

The chief branches of expenditure in 1911 were Public Debt £1 342 832 Army £852 481

Navy £340 688 Education £244 814 Ministry of the Interior £547 604 At the end of 1911 the external debt amounted to £3-493 360

Trade—The trade figures as shown by a comparison of the totals for the triennial periods 1902-04 1905-07 and 1908-10 showed a steady progress—

	1902-04	1905-07	1908–10
Imports Exports	£15 470 400 10 250 000	£17 420 000 12 994 000	£18 028 000 13 998 000
Total	£-6 720 400	£30 414 000	£32 026 000

Of the total trade for 1902-10 Great Britain supplied 50 per cent of the imports and took 16 7 per cent of the exports

The imports were valued at 46 340 000 in 1910 and £6 388 000 in 1911 the exports at £5 502 000 in 1910 and £5 636 000 in 1911 The value of the trade with the principal countries for 1908 and 1909 is shown as follows —

	Imports from	Imports from (in {1000)		Exports to (in £1000)	
Country	1908	1909	1908	1909	
United Kingdom	1 441	I 245	1 064	1 015	
Russia	889	1071	89	57	
Austria Hungary	708	691	507	57 410

Turkey	568	465	229	255	
France		382	449	305	
United States	431	1 187	2.12	240	

The staple article of export from Greece to the United Kingdom is currants the value of which amounted to £1 716 106 in 1911

236

367

The chief articles of import and export in 1910 and 1911 were -

Italy

Imports (in £1000)	1910	1911	Exports (in £1000)	1910	1911
Agricultural products Yarns and tissues Minerals and ores Metals Chemicals Fishery products Animal products	2 045 861 773 360 294 311 239	2 251 820 1 111 275 334 316 245	Agricultural products Minerals and ores Wines and spirits Oil and olives Animal products Forest products Fishery products	2 503 1 035 765 738 215 94 57	3 024 965 730 373 220 163 37

Gommunications —In 1911 there were 945 miles of railways open for traffic The mer chant navy of Greece has largely increased during the last few years and in 1911 included 348 steamers of 383 446 tons, and nearly 1000 sailing vessels of about 200 000 tons. In 1011 2727 vessels of 3 797 997 tons entered the port of Piraeus which has some three fifths of the total shipping of Greece. Several improvements have been carried out here. Two new dry docks have been built the quays have been reconstructed to give them a depth of 28 feet and several jetties have been prolonged and widened. A new quay for the Piraeus Larissa railway was in 1912 under construction. Improvements have also been carried out at several other ports During 1912 the government proposed to spend about £600 000 for harbour improvements and for building roads (O BRILLIANT)

RITT.CADIAL

According to the census taken on December 31, 1910 Bulgaria had a population of 4,329 108 inhabitants, showing an increase of 293 533 inhabitants over that of 1900 Of these 3,203,810 were Bulgarians, 488,010 Turks, 98 004 Gipsies 75,773 Rumanians, 63 487 Greeks, 37,663 Jews and 68,828 of other nationalities The census population of the principal towns was Sofia 102,769, Philippopolis 47 929, Varna 41 317 Rust chuk 35,823, Shven, 25 141, Plevna, 23,081, Shumla 22 197 Stara Zagora, 21 947 Tatar Pazarjik, 18 081 Dobritch, 17 156, Vidin, 16,473, Yamboli, 15 054, Vratza 15 179 Haskovo, 15,095, Burgas, 15,008, Sistova, 13,063, and Trnovo, 12,625

Education -In 1909-10 there were 3786 elementary schools with 8697 teachers and

Education—In 1909—10 there were 378b elementary schools with 8097 teachers and 430 of 1 pupils and 474 secondary and special schools with 2352 teachers and 67 801 pupils In 1910—11 the University of Sofia was attended by 1673 students

Finance—The estimated revenue for 1911 was £7 137 000 and for 1912, £7 543 000

The estimated expenditure for 1911 was £7 135 000 and for 1912 £7 462 000

The budget of 1911 however closed with a surplus of nearly £500 000

For 1911 the chief branches of expenditure were Public Debt £1 617 000 War £1 585

oo or about 23 per cent of the whole budget Public Works £1 215 000 Public Instruction £944 000 and Ministry of the Interior £418 000 At the beginning of 1912 the debt con sisted of £24 240 000 consolidated debt and £1 900 000 floating debt In the autumn of 1912 a new loan of £7,200 000 was under consideration.

Army —Before war broke out in October 1912, the Bulgarian army was already highly thought of in military circles Service was obligatory for Christians from 20 to 46 years old, with certain exemptions, or from 17 in war time, the annual recruit contin gent being 26 700 of whom 17,000 went to the infantry Service with the colours was for two years in the infantry and three in other arms in the reserve of the active army 18 years for infantry and 16 for other arms, with a fortnight's annual training in the militia-ist ban, infantry 3 years, other arms 4, with one to three weeks annual training and ban 3 years all arms, with 3 to 7 days training. The peace establishment was 60 000, organized in 9 divisions of 2 brigades of 2 regiments each the units being 36 infan try 11 cavalry 9 artillery, and 3 mountain artillery regiments, 3 fortress artillery bat talions of engineers The total war strength was estimated at 400 000 it was calculated that a first line of 200 000 to 250,000 with 700 guns was available, besides 18 reserve The infantry were regiments 36 battalions 1st ban militia, 36 half battalions 2nd ban armed with the Mannlicher 8-cm 1895 magazine rifle cavalry with swords (lances for certain regiments) and 1800 Mannlicher carbine, artillery with Maxim machine guns, shielded Schneider-Canet field guns, and Creuzot 12-cm howitzers

Agriculture —Agriculture forms the chief ordinary occupation of fully five sevenths of the population Of the total area of 23 797 000 acres 7 731 000 are under crops and grass 1 576 000 arable land not cultivated, and 7 602 000 under woods and forests The area under the chief crops and their yield in 1910 were -

	Wheat	Maize	Barley	Rve	Oats
Area in 1000 acres	2 720	1 680	609	555	481
Yield in 1000 cwts	26 310	20 780	6 749	5 860	3 760

About 200 000 acres are under vineyards and 18 000 acres under rose gardens attar of roses being an important manufacture. The value of the cereal crops harvested during 1910 amounted to £15 500,000. The harvest of 1910 was good and that of 1911 still better 1 See E. B IV 774.

RUMANIA

In 1905 there were 1 693 533 cattle 476 872 buffaloes 8 130 997 sheep 1 384 116 goats 465 333 pigs 538,271 horses 124 080 asses and 11 947 mules

Industries —Native industries though in an early stage of development have shown a steady progress both in number and efficiency. Their growth has been fostered by a high protective tariff and by the law for encouragement of native industries which grants them custom exemptions and special railway rebates In 1909 there were 256 factories in opera tion representing a capital of £2 500 000 and an annual output of nearly £3 000 000 Amongst these were 61 textile factories whose annual output exceeded £650 000 98 foodstuffs factories including flour mills breweries and distilleries 22 tanneries 16 metal works 25 chemical works including those producing attar of roses soap and explosives 18 woodwork factories and 3 paper mills Sugar refineries have recently been established

Trade—The Imports were valued in 1910 at £7 093 000 and in 1911 at £7 894 000 the Exports in 1910 at £5 164 000 and in 1911 at £7 385 000

The following table shows the trade with the principal countries—

Country	Imports from (in £1000)		Exports to (in £1000)	
	1910	1911	1910	1911
United Kingdom and British Pos				
Sé SSIONS	907	1999	613	969
Austria Hungary	1 903	1885	313	423 916
Germany	I 364	1 590	569	916
France	614	987	362	445 1 168
Turkey	841	639	1 771	1 168
Belgium	340	202	8,8	2 15
Other Countries	1 123	1 392	1 771 8 _ა 8 698	1313

In 1910 the chief articles of import were cottons f1 975 000 iron 1931 000 machinery 1791 000 leather £367 000 coal £132 000 The chief exports were wheat £1 500 000 maize £539 000 live stock £292 000 attar of roses £231 000 and hides and skins £154 000 A better idea of the expansion and the possibilities of Bulgarian trade may be obtained perhaps from a comparison of the total triennial figures for 1902-4 1905-7 and 1908-10 -

	1902-04	1905-07	1908-10
Imports Exports	£11 309 480 14 776 000	£14 214 530 15 525 150	£18 765 530 14 114 880
Total	26 685 480	29 739 680	32 880 410

Of the total imports during 1902-10 Austria Hungary supplied rather over 25 o the British Nearly a third of the total was done however with Turkey Belgium took the largest share of exports 22% the British Germany 167 Servia Greece and Montenegro

Empire coming next with rather over 14% Railways open for traffic while nearly 200 m Railways —In 1911 Bulgaria had 1270 m of railways open for traffic while nearly 200 m were under construction the most important being the line from Mezdra to the port of Vidin. Several other lines have been surveved and orders given for construction. These Include lines from Sofia to Karlovo and thence to Shiven with a branch from Karlovo to Philippopolis from Nikopolis to Plevna and from Plevna to Gabrovo from Yamboli to Kizil Agatch not far from the Turkish frontier and from Silistria to Kaspitchan Harbour Improvements—Large sums of money have been spent for the improvement of

the harbours of Burgas Varna Rustchuk and Vidin and a new harbour was in 1912 shortly to be constructed at Lom on the Danube In 1910 6838 vessels of 1 990 000 tons entered and 6820 of 1 988 000 tons cleared at the Black Sea ports and 10 092 vessels of 1 905 000 tons entered and 10 078 of 1 903 000 cleared at the Danube ports (O BRILLIANT)

Rumania¹

The estimated population in 1911 was 7 086 000 There were 299 867 births 179 072 deaths and 74 550 marriages The excess of births over deaths-120 705—was the highest ever recorded The country is essentially agricultural, and the fine harvests of 1909 1910 and 1911 were accompanied by a great development of trade and industry, and by extensive building of public works Numerous banks and other financial institu tions were founded in these years while all the older institutions increased their capital An insurance law has been adopted against sickness accidents and invalidity which combines the principles of the German and English laws

¹ See E B xxiii 827

Education:—According to a special census return taken in 1909 60 16 per cent of the population over 7 years of age could neither read nor write. In 1909-10 there were 5074 elementary schools with 7780 teachers and 584,935 pupils. The number of children of sthool age was 938 456. In 1907-08 there were 57 secondary schools with 1034 teachers and 15 711 pupils, while 9585 pupils attended other technical and special schools. In 1909-10

and 15 711 pupils, while 9505 pupils attended by 3398 students and that of Jassy by 920

Finance—The estimates of 1911-12 balanced at £19 136 000 revenue and expenditure and those for 1912-13 at £20 225 000. But the budget of 1911-12 closed with a realised surplus of over £4 000 000. The chief branches of estimated expenditure in 1912-13 were Arm, £2 977 000 Worship and Public Instruction £1 928 000 Interior £3 833 000. Finance £8 280 000 and Justice £441 000. The public debt amounted to £63 068 413 on March 31 1911 and the charge for interest and redemption to £3 544 180.

4rmy -By a law passed in 1910 the time of active service was fixed at 2 years in the in army — By a law passed in 1910 the time of active service was fixed at 2 years in the infantry and 3 years in the other services. The army was organized in 5 complete army corps—a new army corps having been created in the Dobrudja with headquarters at Constanza—and 2 cavalry divisions. In 1911 the peace strength of the army was 4495 officers and staff 93 644 men 20 839 horses and 460 guns. The effective war strength was reckoned at 7600 officers 280 000 men and 650 guns

Agriculture - Of the total area of 32 153 600 acres 14 909 802 acres were under cultiva tion in 1911 1 297 400 acres fallow lands 2 504 600 acres pastures 1 213 000 acres mead

tion in 1911 1 297 400 acres fallow lands 2 504 600 acres pastures 1 213 000 acres mead ows 456 500 acres vineyards and orchards and 6 935 000 acres under forests.

The figures for area (in 1000 acres) of the chief crops and their yield (in 1000 bushels) in 1911 were. Wheat acres 4825 yield 90 827 Maize acres 5213 yield 107 288 Barley acres 1268 yield 25 348 Oats acres 1003 yield 25 411 Rye acres 329 yield 4835 Sugar Beet (1910) acres 32 yield 303 184 tons. Plums (1910) acres 182 yield 5 838 026 cwts. Vineyards acres 213 yield 21 868 000 gallons. The value of all agricultural products in 1910 and 1911 amounted to 55. 185 000 and 555 766 000 respectively.

Special efforts have been made during the last few years to develop scriculture, and the production.

out much success. In 1911 34 651 persons were engaged in sericulture and the production of silk cocoons was 386 800 lbs

Minerals - Although the petroleum industry is of recent development Rumania already ranks fourth among the petroleum producing countries. In 1910 and 1911 the production amounted to 1 352 407 tons and 1 544 072 tons as compared with 250 000 in 1900. The export amounted to 1 352 407 tons and 1 544 072 tons as compared with 250 000 in 1900 The export from the refineries amounted to 585 862 tons in 1910 and 679 399 tons in 1911 The capital

invested in petroleum undertakings up to 1910 amounted to £15 000 000

In 1912 the government decided to build a pipe line for the transportation of petroleum from Baicoi in the Prahova district where the principal wells are now worked to the seaport of Constanza Provisions were also made for connecting other districts by branches

In 1910 the output of salt was 126 607 tons

Trade—The imports were valued at £14 732 000 in 1900 and £16 388 000 in 1910
the exports at £18 602 260 in 1909 and £24 660 000 in 1910

The following table shows the trade with the principal countries

C	Imports from	Imports from (in £1 000)		(in £1 000)
Country	1909	1910	1909	1910
Germany Austria Hungary United Kingdom France	4 985 3 431 2 311	5 529 3 919 2 271 1 025	1 064 4 601 1 386 1 100	972 1 491 1 341 1 875
Italy Belgium	947 707 464	870 559	1 359 4 851	2 745 9 050
Netherlands Turkev	214 464	233 554	1 979 858	3 964

In 1910 the chief articles of import were cottons £2 648 000 woollens £1 450 000 silk goods £601 000 metals and metalware £3 959 000 machinery £1 569 000 carriages £457 000, chemicals and medicines £331 000 leather and leather goods £597 000 gar ments, milimery and fancy goods £829 000 rubber and rubber goods £302 000 The chief articles of export were grain (wheat maize flour etc.) £19 590 000 vegetables and seeds £1 390,000 timber, £1 098 000 petroleum and products £1 556 000 cartle £238 000 hides and skins £139 000 wool £92 000

Communications—the 1912 Rumania had 2230 m of state-owned railways and about

200 m. of privately-owned railways

In 1911 the merchant mavy consisted of 572 vessels of 167 511 tons of which 94 vessels of 22,893 tons were steamers

In 1910 36 737 vessels of 11 028,482 tons entered and 36 729 vessels of 11 058 707 tons cleared at all the Rumanian ports and of these 2761 vessels of 3 504 342 tons entered and

2750 vessels of 3 514,487 tons cleared at the seaports Of 1307 vessels of 2 274,493 tons which left the Danube (at Sulma) in 1910 461 vessels of 1,039 493 tons were British Among works lately undertaken to develop the seaport of Constantza are the construc

tion of a slip for ships opened in 1912 the addition of 8 petroleum reservoirs and the building of three grain elevators Great works have been started for improving the accommodation of the Danubian ports of Galatz and Braila

See H Le Pointe La Roumanie Moderne (Paris 1910) (O BRELIANT)

SERVIA 1

According to the census taken on December 31 1910 Servia had a population of 2911 701 showing an increase of 417 931 over that of 1900 Of the total population 2 528 819 lived in the country and only 382 882 in towns

The census population of the chief towns was Belgrade 90 890 Nish 24 949 Kraguye vats 18 452 Leskovats 14 236 Pozharevats 13 411 Shabats 12 100 Vranya 11 439 and

Pirot 10 737

Education -In 1909 there were 1296 elementary schools with 2584 teachers and 138 434 pupils and 20 secondary schools with 393 teachers and 7317 pupils. In 1910-11 the univer

sity of Belgrade was attended by 1025 students

Finance — The estimated revenue for 1911 was £4 805 458 and for 1912 £5 230 588

Expenditure (1911) £4 803 262 (1912) £5 230 588 The budget of 1911 however closed with a surplus of £400 000 The chief branches of expenditure in 1912 were Public Debt £1 299 248 Army £1 181 102 Public Works £7,31 692 Public Instruction £331 125

Ministry of the Interior £196 593 Ministry of Justice £121 476 On January 1 1913 the public debt amounted to £26 562 240

Agriculture—Of the total area of 11 930 740 acres about 4 750 000 acres are under cultivation and over , 800 000 acres are forests. The following are the figures for the principal crops in 1911 for area (in 1000 acres) and yield (in 1000 cwts). Maire area 1492 yield 13 000 Wheat area 971 yield 8000 Barlev area 275 yield 3000 Oats area 242 yield 1500 Rve area 116 yield 750 Potatoes area 30 yield 1500 Plums (1910) area 375 yield 6000 Innevirds (1910) area 87 yield 310 (1000 gals) About 32 000 persons are engaged in sericulture and the export of silk cocoons was valued at 435 224 in 1910 On December 11 1110 there were 057 018 heads of cattle 2808 815 sheep 627 427 work. 31 1910 there were 957 918 heads of cattle 3 808 815 sheep 627 427 goats 863 544 pigs

and 15. 617 horses

Trade—A comparison of the total triennial figures for 1902-04 1905-07 and 1908-10 shows the progress of Servian trade -

	1902~4	1905-07	1908~10
Imports	£6 569 000	6 821 000	9 196 000
Exports	7 770 000	9 004 000	10 626 000
	· · · · · · · · · · · · · · · · · · ·		
	14 339 000	15 825 000	19 822 000

The imports were valued at £2 941 403 in 1909 and £3 387 826 in 1910 the exports at £3 719 270 in 1909 £3 935 521 in 1910 and £4 676 640 in 1911

The following table gives the trade with the principal countries—

Country	Import	s from	Exports to		
Country	1909	1910	1909	1910	
Germany Austria Hungary United Kingdom and Colonies Turkey France Italy Russin	£1 154 068 711 894 303 409 1944 141 460 93 800 77 294	£1 399 033 645 930 456 997 237 382 144 144 145 798 72 925	£623 791 1 163 866 5 096 878 967 97 172 121 864 815	£876 594 712 875 66 892 938 837 47 644 42 786 541	

Austria Hungary during 1902-10 provided 40 per cent of the total Servian imports and took nearly half the exports but the tariff war which began in 1908 greatly affected the trade with the Dual Monarchy

The exports from Austria Hungary greatly diminished while those from Germany showed considerable increase A new commercial treaty with Austria Hungary came into force in 1911

Army -Since 1908 great efforts had been made to increase the efficiency of the army Under a system of obligatory service the forces consisted in 1912 of an active army organ ised in three bans and a militia for home defence. The active army represented a peace footing of 34 000 but on a war footing it was expected that 215 000 could take the field. The infantry were armed with the Mauser 1900 rifle (2d ban Koka Mauser 1880, 3rd ban Berdan) and the artillery were equipped with the Schneider 1908 Q F field gun

¹ See E B xxiv 687

Railways —Servia has 875 m of railways open for traffic, of which 155 m were built in 1911 and 170 m in 1912. One of the principal objects in view in the construction of the new lines was to provide the country with a through line from the Danube to the Adriatic. The principal line under construction in 1912 was from Kmazhevats to Nish expected to be ready in 2 years while the last part of the Danube-Adriatic railway from Nish through Prokuplye to Merdare on the Turkish frontier was under survey. Another line was being constructed in 1912 from Kralyevo to Rashka on the (then) Turkish frontier intended to open up a rich mineral district.

(O Brilliant)

HOLLAND 1

Physical Features - As Holland hes partly below sea level the dunes form the country's natural wall of defence against the sea and particular care is taken to keep them in good condition and even to strengthen them. Of late years the in creasing use of dune water, to feed the supply of drinking water which is obtained by borings and not (as erroneously supposed) from springs at the foot of the dunes has given rise to the fear that in the end salt, or at least brackish water would run from Some experts are of opinion that this is to be found in the dunes below the This fear has however, been proved idle, and according to most Dutch geologists the water obtained from the depth is no other than artesian water 2. The violent controversy which has been waged about this question for years has added to our knowledge of the deeper layers of the soil in the western part of the country But progress in this respect has been far greater still in the eastern provinces espe cially owing to the deep borings performed since 1906 by the state officials for the discovery of minerals (Rijksopsporing van Delfstoffen) These borings were made in the south and in the north of Limburg the east of North Brabant and the east of Gelderland, and in several places depths of 1 100 metres at Baarlo (Northern Limburg) in the year 1000 even of 1,400 metres were reached Among other things they showed that the coalfields in the north and in the south of Limburg are the continuation of that of Westphalia, with which they are connected without interruption, that in the east of North Brabant (de Peel) there is a coalfield extending over a large surface not too deep to be worked with profit, that in the east of Gelderland large extents of Trias namely shell limestone and grey sandstone, are lving close to the surface whereas rock salt, potassium salt and coal are found deeper down of which the potassium salt layer, however does not seem fit to be worked, that in Holland the temperature only seems to rise slowly at great depth, so that at Winterswijk at a depth of 864 metres it is not more than 38° C and in the north of Limburg and the east of North Brabant at a depth of more than 1 000 metres, only 34° C

The improvement of rivers and canals continues Work is unceasingly in progress on the Waal, to give it a depth of 3 metres. Negotiations have been in progress between the governments of the Netherlands and of Belgium about making the Maas in South Limburg navigable. A bill has also been under consideration to make the Maas from Venlo to Rotterdam navigable and to make a coal station at Venlo If this bill is accepted, it would be possible to take the Limburg coal by rail to Venlo and thence by water to Rotterdam and further

An extraordinarily high temperature and great drought were experienced in Holland in the summer of 1911 when at the Meteorological Institute at De Bilt near Utrecht the ther mometer rose to 95-7° F and an extraordinarily low temperature in the following winter when on the 3rd of February the thermometer fell to -4° F

Population —At the census of December 31, 1910 the total population was 5 045,155 (male 2,044,079, female 3,001,076), as compared with 5,104,137 in 1900 The figures for provinces were North Brabant, 633,155, Gelderland 647,567, South Holland, 1,418,007, North Holland, 1,122,996, Zeeland, 234,191, Utrecht, 292 131, Friesland 362,293, Overyssel, 387,381 Groningen, 331,248, Drente 176 043, Limburg 340,053 The population of the principal towns was as follows Alkmaar, 21 261, Amersfoort, 23,945, Amsterdam, 573,983, Apeldoorn 36,507, Arnhem, 64,168, Breda, 27,445, Delft,

¹ See E B xiii 587 et seq ² R. D M Verbeek, Drinking-water Supply of Amsterdam (The Hague 1911)

34,388 Deventer, 28 005 Dordrecht 46,862 Emmen, 28,802, Enschede, 34 992 Gouda 24 704 The Hague 280,515 Groningen, 75,341, Haarlem, 69,594 den Helder 27 358 Hengelo, 20,522 s Hertogenbosch, 35 214 Hilversum 31,792 Leeuwarden, 37,014, Leiden 59 114, Maastricht 37,653, Nilmegen, 56 035 Rotterdam, 426,888, Schnedam 32 489 Tilburg 51 600 Utrecht, 120 208 Vlaardingen 22 124 Vhssangen, 21 575, Zaandam 24 965 Zwolle, 33,928

Communications - Naturally rivers and canals play an important part in traffic hence communications—Naturally rivers and can be pay an important part in trainc neare large sums are always being spent on construction improvement and repair in 1909 the expenditure amounted to 8 million guilders. The most important waterways for transmarine traffic are the New Waterway from Rotterdam to Hook of Holland and the North Sea canal from Amsterdam to Ymuiden. Work is constantly in progress to increase their depths. Whereas in 1911 the depth of the New Waterway was 9-3 metres at low tide and 10 7-11 M at high tide, the channel of the North Sea canal was widened to 50 M and its depth brought to 10 5 M. Rotterdam so favourably situated for the transit trade between England and Germany appears to be better and better able to compete with its two great rivals Hamburg and Antwerp. The works for the improvement of the canal from Ghent to Terneuzen, which gave a depth of 8 75 M and a breadth of 67 M to this waterway. were completed in 1910 so that large sea ships can now reach Ghent In the province of North Brabant there was begun in 1910 the important Wilhelmina canal connecting the South Williams canal north of Helmond with the Maas at Geertruidenberg. The making of new canals in the province of Groningen has also been continued without interruption of late years as well as the extension and improvement of several harbours especially that of Rotterdam Here the new Waal harbour will extend over a surface of 310 hectares, but it will also require many millions before it is fimshed. The new harbour works at Delfzyl have only resulted in making this place a modest rival of the town of Emden situated opposite. The number of railway lines has also increased. Besides some local lines such as Stads.

Lanaal Zuidbroek Delfzijl and Deventer Raalte-Ommen the electric line Rotterdam The Hague Scheveningen must specially be mentioned and also the railways through the Haarlemmermeer which were opened in August 1912 namely (1) Amsterdam Hoofddorp Leiden (2) Haarlem Hoofddorp Nieuwersluis (3) Amsterdam Nieuwkoop-Alfen together they have a length of 110 kilometres Steam is used here although the original plan was to use electricity. The line Eindhoven Weerd is also nearly completed.

Several new tramways were made and several others already existing such as Flushing Middelburg Leiden Katwijk Leiden Noordwijk and the town tram lines of Arnhem Leiden and Groningen have begun using electricity as motive power Electric trains run between Amsterdam Haarlem Zandvoort (as well as Haarlem Zandvoort)

The total length of railways in Holland amounted in 1912 to more than 1950 miles and

that of tramways to more than 1380 miles

Agriculture—The amount of arable land increases every year especially in the east of
the country in consequence of the continued reclamation of high fen grounds the draining
of pools and the cultivation of waste lands

The cultivation of high fen grounds as well as of low fen grounds is it is true less extensive than it was formerly when peat was the as of low len grounds is it is true less extensive than it was formerly when peat was the generally and almost exclusively used fuel but still the vearly production of long lumps of peat (high fen) in Holland amounts to 1800 million pieces worth 6½ million guilders and that of short lumps (low fen) to 700 million pieces worth 1½ million guilders. The extent of waste lands is constantly decreasing for in the years 1909, 1910 and 1911 respectively 6657, 7148 and 9314 hectares were cultivated. The following were the figures (in hectares) and the same product of the same production of the long transfer of the same production of the same production of the same production of long lumps of long lumps of long lumps of the same production of long lumps of long lumps of long lumps of for the distribution of the soil according to the use made of it in 1911—Arable land 872 171 pasture land 1 213 073 garden land 78 097 wood 260 923 waste land 533 807 In 1911 live stock numbered—Horses 327 377 oxen 2 026 943 sheep 889 036 pigs

1 259 844

How important a part agriculture and cattle-breeding play in commerce may be gathered How important a part agriculture and cattle-breeding play in commerce may be gathered from the fact that from July 1911 until April 1912 there were exported to Germany 525 million kilograms of potatoes worth over 13 million guiders and in 1911 to Belgium 87,5 million kilograms. The production of beetroots amounted to over 2,000 million kilograms that of beetroot sugar to 255 million kilograms. Of kitchen garden produce there was exported in 1911 to Germany 183,4 million kilograms the export of bulbs to different countries was 17,3 million kilograms. Of oxen 109,042 head were exported of beef and veal nearly 15 million kilograms of which 8½ million went to England 13,5 million kilograms butter to Germany 5,3 to England and 5 to Belgium of cheese to those three countries respectively 13, 11,8 and 10,1 million kilograms of condensed milk (1910) 30,3 million kilograms 29,4 million being to England. Another important article of export is fish, as in 1910 there were exported 645,427 tons (1,000 kilograms) of herring 16,2 million kilograms fresh sea fish and 7 million kilograms river fish. The whole fleet of sea-fishing craft consists of 5,336 ships the crews numbering 20,377 men. The most miportant place for the trade of 5 336 ships the crews numbering 20 377 men. The most important place for the trade in fresh fish is Ymuiden, where in 1911 nearly £460 000 worth of fish was brought in

The total imports were valued at £261 450,000, the exports at £204 560 000, in 1910

The imports from England were valued at £24,500 000 and the exports to England at

LAI 600.000 while for Prussia the figures were about £57 200.000 and £104 000,000

Mining remains restricted to the south of Limburg but there it extends over a larger surface every year

Stone used for building has for years no longer been obtained from the St. Prefersberg near Maastricht but is now found near Valkenberg, Libbe and other places in the Geul valley 6 coal mines are being worked four of which are in private hands and two belong to the state these six mines lying in the neighbourhood of Kerkrade and Heerlen in 1910 produced 1 292,289 tons (1 000 kilograms) of coal worth 8 2 million guilders and the number of men working in them was 7 238 of whom 5 374 were Dutchmen In 1912 a bill was passed to enlarge the territory of the state mines by buying the so called Maas fields. The rich layers of coal which by deep borings have been found in the north of Limburg the east of North Brabant and the east of Geiderland are not being worked yet neither are the salt layers near Winterswijk although the salt is very pure and thick So far the working of coal mines has not had any influence on industrial activity and the

little iron ore that is found in Overyssel and Gelderland has not been smelted in Holland since 1885 Let industrial activity in Holland has become livelier of late years it manufactures and sends abroad excavating machines such as dredgers suction dredgers elevators etc. The most important branch of industry however is that of textiles especially cotton

etc The most important branch of industry nowever is that of teaches especially Fenance—The budget in millions of guilders (12 guil = £1) has shown the following

Year	Exp	Rev	Year	Exp	Rev
1909	197 4	191 3	1911	2134	195 5
1910	204 7	199 5	1912 (est)	222	202

The national debt in 1912 amounted to 1 105 000 000 guilders on which 32 400 000

guilders interest has to be paid

Defence —As to the army in 1911 a new bill (the Militia Bill) was passed which brought the yearly contingent of the army militia from 17 500 up to 23 000 that of the navy militia from 600 up to 1000. In the same year a bill was passed for the raising of officers pay after the government in 1910 had had to take back a bill on this subject which had caused the minister of war to resign. This was specially of importance because in consequence of this the bill for the improvement of the defence of the coast was also postponed which necessitated an expenditure of 46 million guilders and provided amongst other things for the building of a fortress at Flushing had attracted much notice abroad. In 1912 the government presented a new bill more restricted and consequently less expensive for the defence of the coast in which the fortress at Flushing is kept

Education - Mention must be made of the largely increased number of private sectarian schools of late years since they are largely subsidised by the state. In 1912 the Rijksland bouwschool (state agricultural college) was removed from Wageningen to Groningen and an Indian agricultural school was founded at Deventer. The college for higher education in agriculture, hortculture and forestry remains at Wageningen. The University of Groningen, totally destroyed by fire on the 30th of August 1906 was rebult in a more modern. style and the number of laboratories and other scientific institutions which was already large before was further increased. At The Hague there was founded an Academy for the Government of the Dutch Indies (1909) for the higher education of officials there

Dutch Colonies - The Dutch colonies in the Malay Archipelago have now a population of 38 000 000, of whom 80 000 are Europeans 570 000 Chinese 30 000 Arabs and 23 000 other immigrant Asiatics The population of Java alone is 30 100 000 65 000 being Eu ropeans 300 600 Chinese 19 000 Arabs and 2 800 other immigrant Asiatics Of late years Dutch authority has been extended over many regions where hitherto it had only existed in name or not at all, such as the interior of Celebes Flores Soemba Soembawa Timor Ceram etc The interior of Sumatra has also been subjected entirely and a new residence (Djambi) formed there while the sultan of Riouw has been dethroned. Of special importance is the increased knowledge gained of Central Celebes and South New Guinea where the Snow Mountains were reached and snow summits were discovered of more than 16 700 ft such as the Carstenz Juliana and Wilhelmina summits This was accomplished in 1909 by an expedition under Mr H A Lorentz who already in 1907 had pushed his way from the East-bay along the North river to the Hellwig mountains a promontory of the Snow Moun In order to determine the boundary between Dutch and German New Guinea a great combined expedition was at work in 1910 in the basin of the Empress Augusta river New Guines was visited not only by Dutch travellers civil service men and officers but also by foreigness, such as the Englishman Pratt, the Swiss Hirschi and the Dane Mikkel sen Especially remarkable was the discovery in South New Guinea of pygmies and also of tribes who are still kvang in the Stone Age as the use of metals is unknown to them Another Dutch accentific expedition left Holland in August 1912 for South New Guinea to continue the work begun by the Lorentz expedition. Conducted by Captain A Franssen Herderschee it will examine the Central Mountains above a height of 2 300 meters (7 666 ft). the part that was not examined by the preceding expedition. Other important explorations were those of Nieuwenkamp in Bali (1906) of Hirschi in Central Borneo (1907), of Mosskow ski in Central Sumatra (1907) of Elbert in the Small Sunda Islands (1908), of Wanner in the Moluccas (1909) of Abendanon in Celebes (1909 and 1910) of Kleiweg de Zwaan in the isle of Nias (1910) of Molengraaff in Timor (1910) of Heim and of Rouffaer (1910) in the Small Sunda Islands of Deninger Tauern and Strefemann (1910 and 1912) in the Moluccas especially in the isle of Buru

The Dutch West Indies consist of the two governments of Surmam and of Curação. In 1911 the population of these two together amounted to 147564 not counting the Indians and the negroes of Surinam together perhaps some 10,000. The detailed figures were Surinam 92 142 Curação 32 585 Aruba 9 357 Bonaire 6 383. St. Martin (Dutch.) 3 385, St. Elistatius I 325 Saba 2 387. Of late years our knowledge of Surinam has been greatly increased by a series of scientific expeditions organised by the Dutch Geographical Society which have traced all the larger.

rivers to their sources and drawn maps of them. The government has published a large new map of Curação while those of Aruba and Bonaire will follow soon. There has also appeared a map of Curação s capital Willemstad and a beginning has been made to improve its harbour in connection with the approaching completion of the Panama Canal

Political History—The cabinet formed in 1905 by Theodoor Herman de Meester (b 1851) had to resign in 1907 on account of the rejection of the war budget by the Second Chamber In its place came a cabinet of moderate anti revolutionaries and Roman Catholics under the leadership of Theodorus Heemskerk (b. 1852) assigned to this cabinet was to settle the quarrel with Venezuela, which had opposed the economic development of the colony of Curação as much as possible and finally forbade the Dutch consul-general the country When lengthy negotiations with Pres Castro of Venezuela remained fruitless the Dutch government sent some men of war to the West Indies In the beginning of November 1998 a naval demonstration was made and two Venezuelan ships were taken by Dutch war vessels The stagnation of trade and the internal difficulties in the republic which caused the fall of Castro, led in December to the reopening of negotiations with Pres Gomez He sent the minister of foreign affairs Paul, to Europe to carry on the negotiations and revoked the meas ures directed against Curação Up to the end of 101 however, the differences between Venezuela and Holland had not been settled

The elections of June 1907 assured a majority of 60 to the Heemskerk cabinet Meanwhile it appeared that the opinion of this majority about different political questions was not so undivided that they could set to work energetically on social There was a change in the cabinet when towards the end of 1909 the minister for the colonies A W F Idenburg (b 1861) was made governor general of the Dutch East Indies He was succeeded by the anti-revolutionary Jan Hendrik de Wasl Malefijt (b 1852) In June 1909 the accusation brought against the ex premier Dr Abraham Kuyper (b 1837) that during his ministership he had conferred orders of knighthood in a way that was not quite correct caused a great stir in the country and a council of honour was appointed which acquitted Dr Kuyper A bill which caused great difficulties was that for the regulation of the bakers' trade and the prohibition of night labour in it Discussion was repeatedly postponed and when at last it was taken up the measure was rejected in June 1012 a new bill being subsequently Another bill for the regulation of the defence of the coast, presented in 1910, met with still greater opposition not only from military experts but from the public. It would require an expenditure of 46 million guilders and many people doubted both its necessity and its practical efficiency The bill attracted considerable attention in France England and Belgium In particular, the proposed fortress at Flushing in regard to which pressure was believed to have been applied from Germany (a supposition strengthened by not very clear communications from the former am bassador in Sweden, van Heekeren concerning intimations from the German Emperor as to Holland's means of defence) was persistently opposed. Meanwhile the naval minister of the De Meester cabinet, W J Cohen Stuart (b 1857), had introduced a naval defence bill, which entailed an expenditure of 80 million guilders Before it came into the chambers the war minister, Wouter Cool (b 1848), had to resign on another bill for the raising of officers' pay in which a regulation of pensions was not

included His successor was the Dutch-Indian, Major H Colin (b 1869), who had only been a member of the Second Chamber for a short time A revised labour bill of considerable importance was passed in 1911, it protects the labour of young persons from 13 to 17 years old and of women. There was also passed a stone-cutters' bill for the protection of men working in that trade

Political interest during the first half of 1911 centred in the reform of the suffrage The Social-democratic Labour party, together with the Liberal democratic league, or gamsed a petition for extending the franchise, which was signed by 317 522 persons 115,000 of whom were women On September 10, the day of the opening of the States-General, a procession of 20,000 men and women took it to the minister for home affairs During this year the militia bill already mentioned was also intro duced into the chambers, and after prolonged discussion it was passed as was also the bill for raising officers' pay In 1912 a bird bill was passed which made it possible for Holland to join the convention of Paris and also a bill (Bouwwet) which allowed important subsidies for the building of private sectarian schools. On May 7 the naval minister, Jan Wentholt (b 1851), left the cabinet, his bill for the building of an ironclad of 7 000 tons for the defence of the Dutch Indies having been rejected, and the naval department and the war department were temporarily combined in one office A new copyright bill was passed in 1912, as a consequence of Holland's joining the convention of Bern.

Obstuary — During 1911 two eminent Dutchmen died Joseph Israels (b 1824 d Aug 12) the painter (see E B xiv 885) and J H Van't Hopf (b 1852 d March 1) the physicist (see E B xiv 886) The deaths may also be mentioned during 1911 of Pieter Cornelius Tobias Snellen the entomologist (b 1834 d March 29) J C de Marer Oijens Minister of Waterways and Railways (b 1845 d Aug 3) and Jonkheer P J Swidderen jurist and vice-president of the Council of state

ITALY 1

Population -- According to the provisional results of the census of June 10 1911 the total resident or "legal' population of Italy was 35,959 077, and the actual popu The increase in the actual population since 1901 was therefore lation 34 686,683 2,213,430, or 6 6 per cent The compartments showing the highest rate of increase are Ligura (10 7 per cent), Lombardy (11 4) and Venetia (12 1), the provinces showing the highest rate being Milan (192), Treviso (186), and Naples (171) The only compartments showing a decrease are Abruzzi and Molise (0 0) and Basilicata (3 5), but three provinces in Campania show a slight loss owing to emigration, while Messina (which suffered from the earthquake of December 1908) has a decrease of 5 1 per cent

The actual communal populations of towns over 100,000 with the increase or decrease per cent since 1901 were as follows Naples, 723 208 (+27 4) Milan 599 200 (+20 8) Rome 538 634 (+15,9) Turin, 427 733 (+26 5) Palermo 341 656 (+10 0), Genoa 272,077 (+15 4) Fibrence, 232 860 (+9 0) Catama 211 699 (+40 4) Bologna 172 639 (+43 1) Venue 160,727 (+5 7) Messina 126 172 (-15 3) Leghorn, 105 322 (+6 9) Bari, 103 522 (+32 5) Roggia 76 534 shows an increase of 42 6 per cent The rate of increase in the towns is thus considerably higher than in the country as a whole

The marriage rate has risen slightly of late years, having been about 7 7 per 1000 since 1905 with a sharp rise to 8 3 in 1908. The birth rate has varied from 31 4 to 33 4 during the period averaging about 32 4 the illegitimate births were 4 9 per cent for the whole king dom in 1909. The death rate has varied from 21 9 to 19 6 (1910) with the exception 0 1908 when the earthquake in Calabria added 77 283 deaths to the total and brought the rate up to 22 6. The total number of emigrants in 1910 was 651 475 (including 242 381 to other parts of Europe 10,209 to Canada 262 554 to U.S.A. 19 331 to Brazil 104 718 to Argentina). The total number of Italians living outside Italy is calculated to be 5 552 730. Public Health has improved materially of late years. The deaths from making and pellagra have decreased respectively from 4 871 and 2 024 in 1906 to 3 533 and 1 420 in 1909. On the other hand tuberculous illnesses show a slight increase (56 310 to 57 382). In 1910

On the other hand tuberculous illnesses show a slight increase (56 310 to 57 382) In 1910 and 1911 there were outbreaks of cholera the majority of cases occurring at the seaport towns and in the south The latter was the more severe and there were 15 603 cases resulting in 5 960 deaths There was no recurrence in 1912 The precaution in some of the more remote villages caused rioting among the ignorant classes There was no recurrence in 1912 The precautionary measures

The physical condition of the nation seems to have improved considerably in the last few years and the generations now growing into manhood show an encouraging progress from the conditions emphasized by Nathan in 1906

The physique and morale of the troops sent to Tripoli were excellent and the change from ten or twelve years ago is quite marked This is no doubt mainly due to the years of prosperity which Italy has been enjoying and games (especially lawn tenns) are spreading to some extent bicycling is largely indulged in (though little by women in Rome and the south) and football and rowing are becoming popular while winter sports are beginning to find favour and are even carried on in the Abruzzi. There are too a few golf courses (Rome Florence, Palermo Varese etc.)

Agriculture — The production of grain and maize allowing for the temporary decreases caused by bad harvests shows little variation (in 1912 the south of Italy and the islands suffered from drought but the total decline on the average of the last three years was only 350 000 tons) but the wine and oil crops oscillate much more violently. The vintage of 1909 reached nearly 62 million hectolitres while that of 1910 fell to under 30 million and that of 1911 was about 42 million. The area under the vine has increased to over 11 million acres (4 477 200 hectares). The production of olive oil was only 632 000 hectolitres in 1908.

The estimated production of agrums (oranges lemons etc.) for 1911 was about 635 000 tons and of chestnuts a little more the former figure being considerably below the average of the previous two years. A compulsory association among the exporters of citrate of lime from bicily was founded in 1908 to regulate prices but its working has not altogether given satisfaction The production of silk cocoons has also diminished considerably being 43 300 tons for 1910 and 38 600 for 1911 according to government figures those of the Silk Assomation are somewhat higher. The 1912 crop was 15 per cent above that of 1911 but 8 per cent below the average of the preceding five years. The hemp and flax crops were both low in 1911 (67 350 and 2 757 tons) The production of sugar beet was 1 440 000 tons The total value of the whole agricultural production of Italy in 1910 including forests. The total value of the whole agricultural production of Italy in 1910 including forests. In the district of the Emilia cooperative pro-

duction is much in vogue

An International Institute of Agriculture founded on the initiative of the King of Italy on the suggestion of Mr David Lubin was inaugurated in Rome in May 1908 for the collection and publication of statistics and information. Forty two countries are repre-

sented and the staff is international

Reafforestation —The indiscriminate devastation of her forests in the 19th century has done great harm to Italy and a vigorous campaign in favour of reafforestation is being made by the Touring Club Italiano It is pointed out that apart from the actual loss of rainfall and of woodland there is the difficulty of regulating the torrents which descend It is pointed out that apart from the actual loss from the bare hills and bring with them stones and soil to the ruin of the fertile land beneath The hills themselves too become denuded and even disintegrated and whole villages may be destroyed. There is also the loss of water supply. Harm has sometimes been done by the attempt to introduce cultivation upon steep slopes, where trees were necessary to hold the soil together. See Il Bosco al Pascolo al Monte (Milan 1912). Hosco Conto al Torrente (Milan 1912). Many of the largest subscribers to the propaganda are the electric power companies who fully understand the importance of well regulated water supplies. In 1910 about 6 000 acres were reafforested about half of the area being in Basilicata.

Many of the purplet of spring decreased from 1828 in 1902 to 1904 in 1910. With no

Mining—The number of mines decreased from 1580 in 1902 to 1044 in 1910 with an output valued at £3,210 000. The tonnage of iron has increased very largely having been 551 000 in 1910, but the output of copper has decreased (to 68 000 tons). Zinc increased but lead diminished this industry however is now in a flourishing condition in Sardinia The output of antimony has decreased considerably but that of mercury is nearly doubled (from 44,000 to 87 000 tons)

Among the minerals of which the output has recently grown are iron pyrites (165,000 tons in 1910), anthracite and lignite (\$52,000) salt (500 000) asphaltic and bituminous rock (162,000), and graphite (12 500) Sulphur ore has decreased from 3 580 000 in 1902 to 2,815 000 tons in 1910 A compulsory coalition of all the sulphur

interests in Secily was made by the law of August 1 1906. The output of stone from quarries

interests in Secily was made by the law of August 1 1906. The output of stone from quarries the number of which has been on the increase had in 1910 a value of over £2 000 000 Fuheries—The number of boats has again risen—from 23 908 in 1902 to 26 676 in 1909, manued by 111 272 persons the value of the catch being nearly £900 000 according to figures which are beheved to be below the truth. The great rise in the price of fish as of food of all kinds is noticeable. The sponge fishery in the water of Lampedusa produced 31 tons of sponges and the coral fishery only 50 tons (135 tons in 1908 but the figure varies greatly) and only 515 men were employed. The tunny fisheries have also had varying fortune (3 800 in 1908 and 5,700 tons in 1909)

Manufactures—Industrial progress has been strongly marked despite the fact that certain maintactures are still so highly taxed as to render their development difficult jam making and the distilling of spirit from surphis wine being cases in point. Considerable

making and the distilling of spirit from surplus wine being cases in point. Considerable progress is visible in almost all the metallurgical industries. The production of pig from increased from 135 000 tons in 1906 to 353 000 in 1910 wrought iron from 237 000 to 311 000 steel from 333 000 to 670,000 Importation of ores and metals continues to increase also (with fluctuations owing to strikes etc.) owing to the large increase in consumption in Italy (See Report on Trade of the Consular District of Mulan for 1911. No 4988)

The total quantity of electrical machinery required in 1910 was about 16 000 tons of which Italy produced more than half. There is a rapid extension of the application of water power to lighting The production of raw suk shows a considerable decrease (from 6 047 tons in 1906 to 4,891 tons in 1910) and the cotton industry suffered greatly from the war The production of raw silk shows a considerable decrease (from 6 047 with Turkey which in 1910 had taken over 10 000 tons of textiles from Italy though other with furkey which in 1910 had taken over 10 000 tons of textues from italy though other causes also contributed to the crisis. The value of the chemical output has risen enormously from £4 093 000 in 1906 to £6,001 000 in 1910. The production of beet sugar has risen to 173 184 tons together with 62 700 tons of syrips and molasses.

The output of alcohol is slightly above that of 1906 but is much below the average greatly from 359 921 hectolities in 1906-7 to 598 315 in 1910-11

Labour Conditions etc.—The condition of the working classes has greatly improved.

Wages have risen though owing to the general rise of food prices and rents also there is some wages have including owing to the general use of 1000 pixes and relication of the first and them go as far as before, especially as there has been no reduction of taxation on the prime necessaries of life. The number of strikes varied irregularly between 1904 and 1910 from 628 involving 110 832 workmen in 1905 to 1891 involving 327 113 workmen in 1907 while in 1910 there were 1021 involving 172 969 workmen. These figures

are far above those for 1871-1900.

There has been a great and continuous rise in the deposits in the various savings banks credit banks etc showing a continuance of hard work and thrift. In 1901 the total of the deposits showed an average of £3.45.0d per head at the end of 1010 it was over 214½ mill ions sterling an average of nearly £6.35 od per head. In September 1911 the amount in the post office savings banks had risen to nearly 74 millions (and it has risen another 13 millions in the succeeding 12 months) while at the end of June 1911 the amount in the ordinary savings banks was over 28 millions representing a rise of two millions since Determine 1910 At the end of June 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1910 At the end of June 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1910 At the end of June 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1910 At the end of June 1911 the amount in the ordinary savings banks was over 208 millions representing a rise of two millions since Determine 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1911 the amount in the ordinary savings banks was over 98 millions representing a rise of two millions since Determine 1911 the amount in the post of the 1911 the amount in the post of the 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine 1911 the amount in the post of two millions since Determine ber 31 1910 At the end of 1910 there were 5 064 co-operative societies and of these statistics are available for 4,222 these had 817 529 members and a capital of nearly 41 millions. The Cassa deposite e Prestiti which was founded as early as 1863 has had its functions considerably enlarged by various laws between 1896 and 1911. It is a central State chest for voluntary deposits or those ordered by law, which are invested in State bonds or guaranteed bonds or in loans to provinces and communes. Its principal receipts are from the post office savings banks but it also manages the revenues of certain benevolent and provident institutions such as the national sickness and old age pension fund etc The total funds with which it had to deal in 1910 amounted to nearly 93 millions sterling of which nearly 6 millions came from the Post Office savings banks

Insurance - The law of April 4 1912 constituted a State monopoly of life insurance and a national institution for carrying it on, which is obliged to invest its capital in State bonds or bonds guaranteed by the State. It will place a large amount of capital at the ummediate service of the State which will prevent the necessity of immediate taxation to meet increased expenditure. In 1910 358 325 workmen were subscribers to the national pension fund (Cassa Nationale de Previdenza), the number having risen very rapidly since the foundation of the fund which is an entity independent of the State though under the

indisambher (from Brazil). As regards exports an increase of about £3 000 000 under the head of spirits, wises and ods and of over £1,400,000 in cotton goods has taken place but this was largely due to forced shies of accumulated stocks at a loss owing to the higher price of the raw material. With the expeption of the silk trade, which has a decrease of £1 300,

ITALY DOAK

000 in exports there was a rapid recovery from the world wide depression of 1908 and most trades participated in the general increase. Motor cars however showed a slight decrease owing to the growth of competition in Germany Belgium and Switzerland. Great Britain purchased no less than 813 out of 2 130 cars exported. On the other hand there has been a large increase both in the importation and the exportation of indiarubber tires.

Imports of live cattle in 1910 reached a very high figure (about 170 000 head) while the exportation dropped to 5 000 head half the amount of the previous year owing to the prevalence of foot and mouth disease but there was an even greater fall in value (over £800 000) in the importation of salt and preserved fish and in preserved meat cheese fats etcThe importation of frozen meat has not hitherto been as successful as expected

From January 1st to September 30 1912 the imports were valued at £103 535 000 and the exports at f67 607 000 being increases of £2 385 000 and £4 685 000 respectively over the corresponding period of 1911. It was calculated that between 1898 and 1910 Italian imports had risen 143 per cent and her exports 124 per cent—increases which surpass those

of all other countries except the exportation figures of the United States.

As regards trade with the United Lingdom which is second to Germany on the list of imports imports fell by about £573 000 to just over 19 millions the decrease in coal alone amounting to nearly £800 000 owing to the fall in price and increased importation from Germany During the war with Turkey however 11 million tons valued at about £12 ooo ooo were imported in the year 1911-12 Power to the amount of nearly 2 000 000 hp is now derived from hydro-electric plant and Italian electrical engineers have under taken a number of bold schemes of long distance transmission Machinery therefore showed a heavy decline (£1.86654 as against £1851690 in 1909 as in the case of all other countries exporting it to Italy) but scientific instruments copper brass and bronze wares and tools all showed large increases. Exports to the United Kingdom which is now fifth among Italy's customers have increased rapidly (£8416000 in 1910). The increase is mainly in silk tissues eggs fruit and preserves raw hemp and olive oil.

Shipping—In 1910 the number of ships that entered and cleared Italian ports was 312 689 with a tonnage of 102 390 908. The Italian mercantile marine included at the end of 1909 680 steamers with a tonnage of about 630 000 and 4723 sailing ships with a tonnage of about 440 000 Of the steamers 49 were over 3 000 tons (more than double the figure for 1906) The Navigazione Generale Italiana now undertakes only Trans atlantic services the subsidized services in the Mediterranean having been taken up by the

new Societa Nazionale da Servizi Marittimi

Ports —The trade of Genoa amounted to just over 6 million tons of imports (including over 3 million tons of coal) and just under a million tons of exports in 1910 while the total of shipping entered was 5 970 with a tonnage of 7 475 583 of which 139 were in ballast and of that cleared 5 979 with a tonnage of 7 485 717 of which no less than 2 257 (mostly colliers) were in ballast 170 000 passengers were landed and nearly 190 000 embarked Of the total shipping 37 per cent were foreign ships. From the figures available there has been a slight decrease in 1911. The increase is therefore not rapid as in some other ports owing to the difficulty of expansion and of providing increased railway facilities though during the eight years 1903-1911 (1 600 000 have been spent in railway improvements by the Harbour Board The new Vittorio Emanuele dock should be ready by 1915 A new trade has been established between the River Plate and Italy in live cattle and frozen meat The harbour works and railway communications of Messina were not seriously damaged by the earthquake of December 28 1908 The population was 167 824 on December 31 1907 and was estimated at 60 000 in 1909 by the census of 1911 it had already recovered to 126 Messina owing to precautionary measures was not affected by the cholera outbreaks of 1910 and 1911 Extensive villages of temporary structures of timber corrugated iron and concrete have sprung up The port of Messina has naturally not yet recovered from the effects of the earthquake but there has been a steady increase in trade ever since to the increase in the Transatlantic passenger service. Naples in 1910 obtained the first place among Italian ports for the number and tonnage of ships entered (7 344 of 7 542 or6 tons—a rise of nearly 3 million tons since 1906) and cleared (7 330 of 7 513 596 tons). During the war with Turkey Naples became the principal shipping port for Tripoli. Con siderable further expenditure on the harbour has been authorized and new cranes etc are being added. In 1910 Palermo was third among Italian ports as a passenger harbour. The Palermo ship-building yard is of considerable importance. New ironworks have also been erected. In 1910 Venice stood third among Italian ports for mercantile trade and fourth in passenger traffic. New cotten docks have been exceed here and a material field. fourth in passenger traffic. New cotton docks have been erected here and a patent fuel and other factories. Taranto is mainly a naval harbour, but in 1909 was adopted as a port of call by the Orient Line for the outward Austrahan mail

Finance - The war with Turkey interfered very little with the national life and prosper Foreign capital was not deterred by it for in the first six months of 1912 which was a period of war just over £5 000 000 of new capital were paid up while in the corresponding period of 1911 which was a period of peace only a little over £3 000 000 were paid up A good impression was no doubt produced by the fact that it was not necessary to have recourse to a loan to meet the expenses of the war. The actual amounts placed at the

disposal of the Mynistries of War and Marine respectively by the Minister of Finance dur ing the campaign were £15,440 000 and £2 880 000 but about £4 000 000 of this expenditure was devoted to the replenishment and accumulation of stores and for repairs in dockyards so that the cost was just under 1,000 000 lire (£40 000) per diem On the other hand there remain to be paid (a) the annual contribution of at least £80,000 representing the loss to the Ottoman treasury of the revenue from Tripoli (by Article X of the treaty of Lausanne Turkey may ask for this to be capitalized at 4%, thus converting it into a single payment of (2000,000) (b) the cost of dishandment and repatriation of the greater part of the troops in Libya. The cost of the war was met by the creation of five year 4% Exchequer bonds for over £16 800 000 whereas the floating debt outstanding of June 30 1911 was about £4 320 000 During the war Italian consols paying only 3; per cent (since January I 1912) fell from 104 to 94 (on October 31 1912 they had recovered to 98 on the Rome bourse though only quoted at 94-96 in London) and the exchange on London has hardly been higher than 25 60 lire

During the year from October 1 1911 to September 30 1912 (which almost exactly covers the duration of the war) the total receipts of the Italian exchequer amounted to £125 640 000 and the expenditure to £117 040 000 showing increases respectively of £8 280 000 and £4 280 000 over the preceding 12 months. The improvement in the yield of taxation was greater than the average advance during the preceding five years. The principal direct and indirect taxes (exclusive of the import duty on grain) and the Post Office revenue yielded £79 800 000 (as against £78 640 000 for 1911) the gross receipts of the railways in the year ending June 30 1911 were £19 920 000 (£16 240 000 in 1906-7) while the improvement between October 1 1911 and September 10 1912 as against the corresponding 111 months of 1910-11 amounted to £1 480 000 Of this increase £320 000 were due to the additional charges for the benefit of the sufferers by the Sicilian earthquake of December 1908 so that the net advance was still £240 000 in excess of the average growth

between the years 1906-7 and 1910-11

The service of debt still represents a large proportion of Italian expenditure in spite of the reduction of the interest to 3½ per cent on Consols In 1910 the total amount of debt was £523 116 074 (exclusive of State bonds held by or to be repaid to the State) and the amount paid in interest £20 169 871 of which only about 12 per cent was paid abroad the

rest being held by home investors

The cost of the earthquake of December 28 1908 to the State was covered in four years by the surplus in the budgets and by additional taxes of 2 per cent on business of 50 or 10c on railway tickets etc Beyond this however there were of course large subscrip tions raised These were in the main paid in to an autonomous Central Committee which has never published detailed accounts Besides this various Italian organisations and foreign countries raised funds which they administered independently though in consultation with the Italian authorities thus the last half of the British Mansion House Fund (which amounted to about £140 000 in all) was administered by the British Embassy

Railways etc —On November 1 1912 a new arrangement of the administration of the State Railways came into existence the branches into which it is divided are traffic locomotives rolling stock works department (combining the functions of the engineer and superintendent of the line) health department solicitors department accountants depart ment. No new lines of any importance have been opened since 1908 except a line from Bassano to the Austrian frontier providing a new route to Trent, but a certain amount of doubling of existing lines has been done and the construction of complementary lines in Sicily has been begun. The capital value of the railways on June 30 1911 was estimated approximately to be £259 500 000 and the profits were calculated at nearly six millions or 2 31 per cent on the capital but this included (a) the actual profit paid over to the treasury about £1 520 000 (b) the taxes on tickets on the wages of the personnel etc (c) the interest and extinction of some paid by the treasury to the companies which worked the railways until 1906—about £2 300 000

ways until 1906—about 42 300 000
The State Railways have considerably improved in every way. A direct electric line
Line of construction. Electric power has been from Rome to Naples (about 120m) is in course of construction. Electric power has been extended to the line between Genoa and Busalla and will be applied to the line from Savona to S. Giuseppe di Cario, in the line to Turin. Besides the ferry boats crossing the Straits of Messina the State Railways now work fast ships from Naples to Palermo and Civita veoches to Golfo Aranci in Sardinia

The length of steam and electric tramways (including city tramways) has increased fairly rapidly; at the end of 1911 it was 3 018 m. Motor omnibus services on the highroads carrying mails and passengers are increasing very rapidly in numbers, covering nearly 2 000 m of roads. They receive a subvention from the government and from communes.

Post Telegraphs and Telephones.—The number of post offices (including over 700 collecting officers) was 10 236 th 1910. The number of State telegraph offices has risen to 5 033

This period does not correspond with the Italian financial year (July 1st to June 30th) nor the balance with that of the ordinary financial returns (above) It is probable that It is probable that some of the extra war receipts and expenditure are reckoned on both sides of the account.

while the number of station offices is 1930 as in 1904. The parcel post and money order services are increasing rapidly (17 million parcels were sent and 80 million pounds worth of orders paid in 1909-10) and the value of the foreign orders paid in Italy has gone up to over 91 millions of which over 11 millions came from the USA. (nearly double the whole total of the foreign money orders paid in Italy in 1901-2) while the orders of the Banco di Napoli sent home by emigrants amounted to nearly half a million more

The length of the telegraph lines has been considerably increased and on December 1 1910 the internal telegraph tariff was reduced to 60c for the first to words In 1909-10

there were 219 urban telephone systems and 426 interurban lines. The number of trunk and international calls has increased by over 50 per cent since 1907-8

Government —The number of senators has been considerably increased during the present (the 23rd) parliament of the Italian kingdom From March 24 1909 to December 31 1911 103 were nominated and 68 died making with the 335 already in office a total of 370. As to the Chamber the number of deputies (508) remains the same but the number of electors on the list of 1011 was 3.27 183 or over cent of the total conduction as expect of electors on the list of 1911 was 3 227 183 or 9 per cent of the total population as against 7 6 in 1904 The percentage of voters in the election of 1900 was 65 3 (62 7 in 1904) A bill for almost i miversal male suffrage however was passed in the spring of 1912 Those who have served in the army and navy at once become voters while those who have reached the age of thirty years even if illiterate are added to the existing electorate. Women's suffrage has not yet come into practical politics and the Court of Appeal has ratified the cancellation of the name of Signorina Labriola from the list of Counsel in Rome

Crime — The total number of prisoners is on the decrease and at the end of 1909 there were only 52 155 of whom 4 323 were women with a diminution in all the various classes of criminals. There is however a slight increase in the number of offences due in part to a continuance of the rise in the number of contravenzions and the figure per 100 000 was still 2 439 in 1908 which is only a little under the average of the quinquennum. It is said (but this remains to be seen) that the deathblow to the Camorra was struck by the Cuocolo murder trial which in order to remove it from the atmosphere of Naples in which it would have been hard to obtain a verdict took place at Viterbo near Rome and ended after about 17 months on July 8 1912 in severe sentences on all the accused over 30 in number who were supposed to be its leader and chief officials

Army - The strength of the army in 1909 showed a considerable increase on previous Army—The strength of the army in 1909 showed a considerable increase on previous figures Of 198 o82 who were liable 108 794 were physically unfit 127 528 were put back for re examination at the next levy (mostly after medical inspection) 48 865 failed to appear and 212 895 were enrolled for service. Of these 151 839 were assigned to the active army, 34 079 to the second category (for short training) and only 26 977 to the third category (territorial militia). The former term of service for the active army was 3 years in the infantry and 5 in the cavalry but it is now 18 months except for those who do not become efficient who serve 6 months more. Those who pay 448 and pass an examination serve one was only. They then have one month per anyum for another 6 years. The peace establish year only They then have one month per annum for another 6 years. The peace establish

ment (including carabinieri) is nearly 14 000 officers and 255 000 men

Naij — The Italian navy possessed at the end of 1912 four battleships of the Dreadnought type built in Italian yards one of about 19 000 tons with twelve 12 inch guns in four centre tine triple turrets and twenty 5 5 inch guns while the other three are of 21 500 tons and will have thirteen 12 inch guns nine in triple and four in twin superposed turrets. The two ships laid down in 1912 will have twelve 13 5 inch guns in four turrets. Next come the

ships of the Vittorio Emanuele class

The warships available at the beginning of 1912 were as follows battleships 18 (9 are somewhat antiquated) armoured cruisers 1st class 15 (each about 7 000 tons) 2nd class 10 3rd class 11 torpedo vessels 5 destroyers 23 torpedo boats 82 submarines 7 At the same time they were building 4 battleships (two Dreadnoughts) 9 destroyers 30 torpedo boats and 13 submarines The naval expenditure for 1911 was £8 379 940 of which £2 277 302 was for new construction The personnel on active service in 1910 con

sisted of 1 927 officers and 27 529 men.

Education —The number of infant schools has hardly increased at all since 1901 the total number of elementary schoolrooms both public and private (the latter having decreased by 2 000) has risen from 61 777 to 68 031 and the number of pupils from 2 783 349 to 3 150 249 or 9 3 per cent of the total population but there are still not enough classes while children who have more than 1½ m from the school need not attend it. In the poorer villages the three classes are often grouped in most inadequate buildings while the teachers salaries are low. In 1911-12 nearly one million sterling was devoted to the increase of funds for elementary and popular education, so that improvements may be expected The new schools for adult illiterates founded by the laws of 1904 and 1906 gave instruction to 128 000 individuals four fifths of whom were men and about three-fifths of them passed the examination uais four firms of whom were men and about three-firms of them passed the examination imposed on them. In 1909—10 there were 478 Ginnasi with 45 699 scholars (meluding 234 government schools with 32 303 scholars) 500 Technical schools with 83 621 scholars (237 government with 61 492), 216 Licel with 14 947 scholars (133 government with 12 125) 102 Technical Institutes with 20 305 scholars (60 government with 16 849) and 20 Nautical Institutes with 2 026 scholars (19 government with 1 998). These figures show a large

decrease in the Granasi and Licei since 1902 but a much greater increase in the technical schools and institutes as regards both schools and scholars. The 33 Scuole Normali or training schools for male students had 2 663 pupils in 1909-10 as against 2 484 in 1908-9 while those for female students 102 in number had 29 792 pupils (exclusive of those not on Government footing of which there were 142 with 3 371 students). The total attendance of students at the higher universaties and institutes appears to be practically the same as in 1902 (about 26 000) Law engineering and economics and commerce show an increase medicine and surgery and the professional diploma in pharmacy a decrease while philosophy mathematics and agriculture show little change

Antiquities and Fine Arts - There has been considerable activity in excavation all over In Rome itself important work has been done in the further investigation of the lower strata of the buildings on the Palatine the baths of Caracalla and Diocletian have been further studied. In the Lucis Furrinae, where Caus Gracchus met his death remains of a sanctuary of various Oriental deities have been found and numerous minor discoveries have been made in the course of building operations. At Ostia near Rome the work of laying bare the remains of the ancient seaport town is being resumed on a large scale with interesting results. The excavation of Cumae Paestum and Pompeu is proceeding and at the last named special care is being taken to preserve the remains of the upper stories which had balcomes and pillared openings so that the town did not present that monotonous appearance hitherto attributed to it. Among the works of art which have passed into the State Collections may be noted the so-called Maiden of Antium and a fine statue of Au gustus while a splendid statue of a daughter of Niobe found in Rome in 1906 is now in Milan Numerous prehistoric cemeteries and other objects and buildings have been found all over A number of provincial picture galleries have been reorganised (at Bergamo The publication of a new list of national monuments (Elenco degli Edifici the country Prato etc) Monumentali) was begun by the Ministry of Public Instruction in 1911

Rome 1—Municipal Administration in Rome was in 1912 still in the hands of the coalition (the so-called blocco) with Sig Ernesto Nathan the Syndic at their head. The Munic ipality has started its own system of tramways and its own electric power and lighting works and will take over those already existing constructed by private companies. Other companies run electric trams to the Alban Hills from Rome and to Civita Costellana north of Rome (to be extended to Viterbo). The embankment of the Tiber is now practically com plete no serious floods have occurred since 1900. The death rate was 1621 per 1 000 in Malaria in Rome is now unknown and in the Campagna and the Pomptine Marshes

it is decreasing rapidly

A new station has been opened in the Trastevere quarter on the right bank close to the new railway bridge over the Tiber The transformation of Rome into a modern city is proceeding apace the exigencies of traffic are continually calling for the widening of the

streets and the city seems destined to lose much more of its picturesqueness.

The enormous monument to Victor Emmanuel on the Capitoline Hill was inaugurated. on June 4 1911 As a whole it is fine but it does not combine well with its venerable surroundings as regards either architecture or colour though it probably gives us a fair idea of what the immense erections of Imperial Rome must have been. It is said to have cost already at least 2 millions sterling including the cost of the removal and rebuilding of the Palazzetto di Venezia The Palace of Justice has cost over 12 millions The various demolitions in the centre and the growth of population have rendered necessary extensive building of working-class dwellings further out largely on co operative principles while the rich display a tendency to abandon flats in favour of houses standing in their own grounds in the outskirts Rents are higher in Rome than in any other city in Italy

The architecture of the new quarters of Rome is not remarkable for its taste though the new Piano Regolatore della Citta di Roma drawn up in 1908 by Conum E Sanjust di Teulada (and published in book form under the above title) allows far better than was ever done before for the adequate provision of open spaces. One of the most important of these the so-called Passeggiata Archeologica is now completed and important excavations in connexion with it are being made in the Baths of Caracalla, an interesting Mithraeum having been discovered in the subterranean portion while in the peribolus the libraries connected with the Baths have been found

A stadium a new racecourse and a zoological garden have been added to the popular resorts of Rome An industrial quarter (new gasworks storehouses factories etc.) is spring ing up outside Portas Paolo where a river harbour is being made. There is some talk of making a ship canal from the sea

An International Exhibition was held in Rome in 1911 in connexion with the celebration

of the 50th anniversary of the foundation of the Italian kingdom. It was divided into four

sections—the Archaeological house in the Baths of Diocletian, which illustrated the various provinces of the Roman Empire 1 the Mediaeval and Historical in the Castle of S. Angelo 1 A restored model of Ancient Rome by M. Paul Bigot was also exhibited the Ethnographical dealing with the various regions of Italy at the Piazza d Armi and the International Fine Arts Exhibition at the Valle Guiha. At this last the British Pavilion and the Mark Mark Mark Pavilion at the Valle Guiha. designed by Mr E L I utyens contained besides contemporary pictures a splendid exhibit tion of British masters of the 18th and 19th cent and is being reconstructed as the per manent home of the British School at Rome which received a Royal Charter in July 1912 The Commissioners of the London Exhibition of 1857 have founded nine scholarships for students of painting architecture and sculpture. The site has been given by the Municipality of Rome. The Third International Congress of Archaeology and the Trith International Congress of the History of Art were held in Rome in October 1912

Turin — In connection with the celebration of the 50th anniversary of the proclamation

of the Italian kingdom an international industrial exhibition was held in Turin in 1911 Venice—The famous Campanile of San Marco which fell on July 14 1902 has been exactly reconstructed and was inaugurated on St. Mark's Day (April 25th) 1912

Italian Dependencies

The Italian dependencie - Tripoli Cyrenaica Eritrea Italian Somaliland and Benadir —have been placed under a Ministry of the Colonies the first Minister being Signor Bertolini
Tripoli—The Italian trade with Tripolitana in 1910 amounted to £128 000 worth of
imports out of a total of £477 500 and £176 000 worth of exports a considerable increase
on the figures for 1909 (£64 600 and £116 500 respectively) British exports in 1909 were
nearly £160 000 and imports in 1910 about the same Tripoli can now be reached in 48 hours from Rome via Syracuse

The western frontier of Tripoli (as far as Ghadames) was accurately surveyed for the hrst time by the Franco Turkish boundary commission of 1910-11 with the result that the position of Ghadames was shifted some miles to the eat of that previously assigned to it M. Pervinquiere at the same time explored the region from the geological point of view The most recent maps of Tripolitania ii 400 000) and of Cyrenaica (1 600 000) were published in 1911 by the Italian Ordnance Survey

Italian Somaliland.—A minor frontier question which had arisen between Great Britain and Italy owing to the shifting of the mouth of the Juba was settled by the acceptance in 1911 by the former of the new mouth as the terminal point of the frontier. A map on the

scale of 1 200 000 (1910) is being publi hed by the Italian Ordnance Survey

Eritrea —The budget of 1910-11 shows an expenditure of £559 000 of which Italy con Entrea — The budget of 1910-11 shows an expenditure of £559 000 of which Italy con tributed nearly half. In this is included £200 000 for the construction of the railway from Ghinda to Asmara. Another line is to be built from Asmara to Keren. The railways already working earned £12 000 as against £7 480 in the previous year. The military expenses are now only £175 500 while the civil expenditure is £383 600. Products exported from the colony to Italy enjoy preferential duty, the most important are cattle coffee wheat and cotton. It has been calculated that Entrea will be able to produce enough cotton. to make Italy independent of American importation as soon as there are adequate means of transport to the coast. The total external trade is of the annual value of about £700 000 of which a third is with Italy while India follows with £150 000 worth of imports. A new edition of the map on the scale of I 100 000 of the whole colony and a map on the scale of I 50 000 of part of the colony have been published by the Italian Ordnance Survey. (T ASEBY)

Political History 1909-1912

The Italian general election of March 1909 had returned a strong majority in favour of Sig Giolitti but the Premier found himself confronted with the question of the steamship subsidies the old agreements with the companies having lapsed bill was defective from various points of view and the Opposition led by Sig Sonnino delivered a series of vigorous attacks on the measure which shook the position of the Cabinet so seriously that Sig Giolitti deemed it prudent to adjourn the debate until the autumn Sig Enrico Ferri, the Socialist leader, whose experiences among Italian emigrants in South America had convinced him of Italy's need of a more virile foreign policy, delivered a stirring Imperialist speech in the Chamber on June 22nd which marked his severance from the Socialist party and the beginning of its collapse, subsequently he declared himself willing to accept a portfoho were it offered to him In October the Tsar Nicholas of Russia visited King Victor Emmanuel at Racconin. an event destined to establish that entente between Italy and Russia which was to prove an important feature in the international situation.

1050 ITALY

When Parliament reassembled in the autumn Sig. Giolitti was forced to modify the bill on the steamsing conventions, but on a point of procedure the Cabinet was defeated and resigned (December 2nd) Sig Sonnino was now called upon for the Sommino second time to form a Ministry, and he succeeded in gathering some of the Ministry best talent in the country Count Guicciardini took the Ministry for For eign Affairs Sig Luzzatti that of Agriculture and Trade, Sig Salandra that of the Treasury, Admiral Bettolo that of Marine while General Spingardi remained at the War Office. The new Cabinet, however, although it enjoyed the favour of the country at large could not count on the support of the majority in the Chamber which if it had temporarily seceded from the late Prenner, was his creation and still Giolittian at heart, and when the debate on the shipping bill as modified by Sig Sonnino was resumed in March 1910 it was clear that his Government would be in a minority On the 21st, after a hundred days of office, as in the case of his former Government he resigned and Sig Luzzatti formed a new Cabinet, which included the Marquis di San Giuliano then Ambassador in Paris (and previously in London) as Minister for Foreign I nvestil Affairs Signori Tedesco, Facta, Sacchi, and Credaro Admiral Leonardi Ministry Cattolica as Minister of Marine and General Spingardi as Minister of War The new Premier, in spite of his financial genius and great self-confidence proved unequal to the task of leading an administration, and it was obvious that he held office on suffer ance under the tutelage of Sig Giolitti who was waiting until the steamship bill and one or two other troublesome questions were settled to return to power Sig Luzzatti's weakness appeared in his dealings with the various labour agitations, especially in the The 3% railway loan of 260 000 000 lire to build new lines agrarian riots in Romagna and double track and improve existing ones was quickly covered although the net profits of the system remained very low owing to extravagant management of that year a cholera epidemic broke out in Apulia and spread to Naples and other parts of Southern Italy the sanitary officers dealt vigorously with the disease but the igno rance and superstition of the peasantry in certain districts rendered their task by no means On December 1st the Premier presented a bill for extending the franchise and providing for compulsory voting, but on the question of the date when the measure was to come up for discussion although the majority voted for the Government most of the Radicals voted against it, the two Radical Ministers Signori Sacchi and Credaro there fore felt bound to resign The whole Cabinet followed suit on March 18 1911 and the King entrusted the now inevitable Sig Giolitti with the formation of a new Ministry, most of the former Ministers including Sacchi and Credaro, retained their (Halitti A grotesque incident of this crisis was created by Sig Bissolati Ministry the Socialist deputy summoned to the Quirinal with a view to being offered a seat in the Cabinet he went but refused office ostensibly because he could not make up his mind to don a dress suit, in reality because he feared to lose caste with his more uncompromising followers

The year 1911 being the 50th anniversary of the creation of the Italian kingdom great festivities were organised to celebrate the occasion. An international exhibition

Jubilee of Italian Unity of fine arts an ethnographic exhibition of the Italian provinces and archeological and historical shows were held in Rome an exhibition of Italian portraits in Florence, and an international industrial exhibition in Turin The two latter were successful in every way, but the Roman exhibition in the two latter were successful in every way, but the Roman exhibition in the two latter were successful in every way, but the Roman exhibition in the successful in every way, and the successful in every way way was a successful in every way way was a successful way was a successful in every way way was a successful way was a

bitions, although artistically very beautiful owing to defective organisation, an unusually hot summer and a second outbreak of cholera, resulted in a considerable deficit

The Cabinet's programme presented to the Chamber on April 6th, included the extension of the tranchise to all illiterates over 30 years old, thus increasing the number

Franchise and insurasce Bills. of voters from three to eight millions the payment of members, and the creation of a Government monopoly for life insurance. These bills largely the outcome of a desire to gain the support of the Extreme Left, found little fayour in the country, and Sig Sonnino not having succeeded in

retaining office, the more active conduct of parliamentary opposition was undertaken

ITALY 1051

by a group of vounger members led by Sig Romeo Gallenga the member for Perugia. In the debate on the Insurance bill the Government cut a poor figure and was finally induced to limit the proposed monopoly to policies of over 15 000 lire capital or 1 500 lire of annual interest while the companies were given ten years during which to liquidate their business for insurances below those figures. Even in this modified form the meas ure was strongly opposed and the Government finally agreed to defer the final debate until the autumn. The Chamber rose on July 10th

In the summer Italy had a dispute with the Argentine Republic in consequence of The Argentine Government professing not to be satisfied with the cholera epidemic the very drastic precautions taken by the Italian authorities, demanded Dispute with that Argentine medical commissioners be placed on all emigrant steamers Argentina bound from Italian ports to Buenos Ayres The Italian Government who had its own commissioners on all emigrant vessels naturally refused to admit this interference with its jurisdiction whereupon the Argentine established a quite unneces sary quarantine on Italian steamers. Italy retaliated on July 30th by suspending emigra tion to that country The truculent attitude of the Argentine appeared to indicate its contempt for Italy and the latter's energetic action with its injurious consequences to the trade and agriculture of the Republic probably came as a painful surprise to that Government but did much to enhance Italian prestige and the position of Italian citizens throughout South America Negotiations were eventually instituted for the conclusion of a sanitary convention which after much laborious discussion was signed on August 17th 1912, the document contained all the provisions on which Italy had insisted so as to prevent similar conflicts from arising in future

During the last few years Italy's relations with the Ottoman Empire had been grow ing strained with the advent to power of the new regime the situation became worse instead of better for the Young Turks in their blind hatred of everything foreign and believing Italy the weakest of the great Powers, lost no oppor Turkey tunity of showing their contempt for her - Italian enterprise was hampered in every way and in the vilayet of Tripoh where Italy's reversionary interest had been recognised by Great Britain and France where much Italian capital had been invested and where the Italian Government had created schools hospitals etc, the hostility of the Ottoman authorities was even more marked and the life of Italian residents ren An Italian missionary Father Guistino had been murdered by a dered intolerable native at Derna on March 27, 1908 and another Italian, Gastone Terreni, near Tripoli by a Turkish Zaptieh on June .oth with the direct complicity of the local authorities but it proved impossible to obtain redress for these crimes Italy s efforts at concilia tion proved unavailing and were regarded as proofs of weakness incidents multi plied and Turkish gunboats even fired on and sank Italian sailing craft in the Red Sea Italy had originally intended to extend her influence in Tripolitania only by means of pacific penetration but with the reopening of the Morocco question it became clear that the last unoccupied Mediterranean lands were being divided up and Italy who with her large emigrant population has need of more territory where her sons can settle under the national flag realised that this was her last chance of acquiring a colony

For some time the Nationalist party which had come into being at the Florence Congress in December 1910 had been conducting a propaganda in favour of a more vigorous foreign policy and roused public opinion to the need for action although the Gioliti Cabinet was most anxious to avoid international complications it could not disregard the new spirit pervading the Italian people By July it informed the Powers that the conduct of Turkey could no longer be tolerated and no change for the better having occurred military preparations were begun on September 20th. On the 23rd the reservists born in 1888 were called back to the colours and a Note was presented to the Porte on the 26th calling its attention to the risks to which Moslem fanaticism was subjecting the Italian residents, and adding that the sending of reinforcements or arms to the African vilayet would be regarded as a very serious act. On the 27th the Turkish steamer "Derna, 'flying the German flag

TO52 ITALY

arrived at Tripoli and disembarked 15,000 rules which were distributed among the Arabs. The Italian Government then sent an ultimatum to that of Turkey on the 28th and no satisfaction having been obtained declared war on the 29th. It is unnecessary here to deal with the events of the war itself, which are fully narrated in Part I Sect 1 of the Year Book. On November 4th, Italian sovereignty was extended to Tripolitania and Cyrenaica by Royal Decree. Towards the end of November a conflict broke out with France in consequence of the arrest and search by Italian warships of the two French steamers Carthage and Manouba suspected of carrying Turkish officers and contraband the incident led to a violent outburst of anti-Italian hysteria in France and although it was eventually referred to arbitration it made the Italian public realise how little it could count on French sympathy, and served to strengthen the somewhat weakening bonds of the Triple Alliance. On February 22nd Parliament reassembled and the full for converting the sovereignty decree of November 4th into law was voted by an overwhelming majority amidst scenes of great patnotic enthusiasm

Various attempts at mediation were made by the Powers but without success In July, 1912 however negotiations were instituted between unofficial Italian and Turkish delegates in Switzerland and after laborious discussions during The Peace which the situation in the Balkans became menacing and Montenegro declared war against Turkey the peace preliminaries were signed at Ouchy on October 14th and the final treaty on the 18th Turkey renounced her sovereignty over Libya and undertook to withdraw her troops the Sultan preserving only his spiritual authority as Khalif over his former subjects, while Italy agreed to restore the Aegean Islands to Turkey as soon as the Turkish troops had quitted I bya but the inhabitants were guaranteed liberal reforms and local autonomy This settlement did not arouse much enthusiasm in Italy as many believed that the Balkan States having now declared war against Turkey Italy might have put herself at their head and eventually acquired great moral prestige throughout the Near Last But the objects for which the war was fought had been achieved and in view of the situation in the near East the Italian Government wished to have its hands free

Throughout the campaign officers soldiers and sailors had shown great bravery discipline and staying power while the organisation of the army and the navy proved excellent. Some of the commanders, however came in for much criticism and the general conduct of the campaign inspired apparently by political rather than by military considerations, was disapproved of by a part of public opinion. The total expenses of the undertaking are estimated at 458,000 000 hre including the value of supplies not all of which have been used up and it is remarkable that this sum was paid for out of the budget surpluses of the last few years redeemable Treasury bills. Treasury reserves credits with banks, etc. no loan having been raised nor fresh taxation levied. On the conclusion of peace the Treasury still had 386,000,000 hre at its disposal. Business was not very much affected by the war and indeed Italian exports during the period from January 1st to September 30th 1912 in spite of the suspension of trade with Turkey had increased by 117,000,000 hre while the State's principal revenues from October 1st 1911 to September 30th 1912 had increased by 79,000,000.

In the field of domestic politics there is little during 1912 to be recorded. An unsuccessful attempt on the King's life by an anarchist named D Alba on March 14th gave occasion for enthusiastic demonstrations of loyalty showing how deeply attached to the Monarchy the Italian people had become. The various Government bills—the Insurance Monopoly, the extension of the franchise and payment of members—although not popular, were voted by Parhament without much opposition, as there was a general determination not to embarass the Ministry as long as the war lasted. The Socialist party which had been gradually losing its hold over the masses for some time past, now found itself wholly out of touch with popular feeling concerning the war and while it officially condemned the enterprise many of its leaders refused to put party before country and were excommunicated

ITALY TO33

m consequence at the Congress of Reggio d'Emilia in June Thé result was a definite spht up of the party into two separate organisations. Signor Gioliti continued to exer cise great authority although with the conclusion of peace a revival of Opposition activ ity was to be expected

OBITUARY —Among prominent Italians who have died since December 1909 the fol

lowing may be noted

ALFSSANDRO FORTIS the statesman (see E B xx 82c) born 1841 died December 4 In 1866 he joined Garibaldi as a volunteer and fought under him in the Trentino in 1867 at Mentana and in 1870 in France Under the influence of Aurelio Saffi he became a republican and was arrested as a Mazzinian conspirator in 1874. In 1876 he abandoned the Republican Party although still adhering to democratic ideals. Elected deputy for his native town of Forh in 1880 he helped the Royal visit to Romagna hitherto regarded as a hotbed of anti-monarchical views. He made a reputation as a Parliamentary debater but lost favour with his constituents who were largely republican and only held his seat with the help of Livio Quartaroli Mayor of Forli and Saffi when they died his position became untenable and he was not re-elected He then won a seat at Poggio Mirteto which he continued to represent until his death He became Minister of Agriculture in the Pelloux Cabinet (1898-99), and in 1905 on the fall of the Giolitti Cabinet became Premier But his administration fell after seven months over the commercial treaty with Spain, which aroused the violent opposition of the Italian vine growers — He reconstructed the Ministry but was beaten at once and had to resign

VITORIA AGANOOR the poetess (see E B xiv 912c) died on May 7 1910 Al though of Armenian extraction she was thoroughly Italian in spirit and from her master the Abate Zanelli she imbibed a genuine classical elegance and culture. Her first volume of verse was entitled Nuove liriche Leggenda eterna followed and after her death a complete edition of her poems was published. She married Guido Pompili deputy for Perugia and sometime Under Secretary of State for Foreign Affairs who after her death under an opera

tion committed suicide

ANGELO MAIORANA the statesman b at Catania in 1865 d at Catania on February 9 1910 Graduating in law when only 16 years old at twenty he was already well known as a writer on constitutional questions and two years later he was appointed professor at the university of his native town of which he eventually became rector. He was elected deputy for Catama in 1895 and at once took an active part in politics. A follower of Signor Giolitti he became Under Secretary for I mance 12 1903 and in the following year was promoted to Ministerial rank. In 1906 he was appointed Minister of the Treasury and Sig Giolitti publicly designed him as his successor for the premiership. But his health broke down and he was forced to retire. In 1909 he was Vice President of the Chamber. His chief works are Parlimenterismo. Il Principio soviano della costituzione degli Stati and La Teoria costi tu tonale delle entrate e della spesse

Andrea Costa the Socialist leader b at Tinola in 1851 d at Tinola January 19 1910 The son of a small shop keeper at an early age he joined the extreme revolutionary party in Romagna becoming a prominent member of the International He was arrested more than once but gradually modified his views and was elected Socialist deputy for Ravenna in 1882. He was again implicated in revolutionary agitations and arrested but eventually he came to represent the more moderate section of his party and was regarded almost as a

Antonio Fouazzaro the novelist b at Vicenza 1842 d at Vicenza March 7 1911 (see E B x 590) His last novel Leila is in a sense a sequel of Il Santo for it breathes the spirit of the latter's dead hero Benedetto throughout and shows us the effect of his teaching on his followers. The whole course of logazzaro's literary career is a struggle between spirit and matter the object aimed at being the purity of the soul. In his earlier works from Miranda to Il mistero d un poeta it is love as represented by various charming pictures of women which can save the soul when conscience is not enough. In his later phase the soul

women which can save the sout when conscience is not enough. In his accr phase the som is led onward no longer by the redeeming hand of woman but by religious faith. Princess Maria Clothide of Savoy widow of Prince Napoleon (E.B. iv 197a) b. in 1842 d on June 25, 1911. She was the daughter of Victor Emmanuel II and her marriage in 1859 to Plon-Plon was part of the consideration for the Franco Sardinian alliance which resulted in the war against Austria. In Paris she led a very secluded life devoting herself to the education of her children Princess Laetitia (who married the Duke of Aosta) I rince Victor and Prince Louis Napoleon and after 1870 she retired to the castle of Moca

hen near Turin where she died

Mario Rapisardi the poet (E B xiv 912c) b in Sicily 1844 d January 4 1912 At the age of 24 he published Palingeness, a pompous epical history of humanity but his Lucyfer (1877) a philosophical poem of atheistic tendencies describing the struggle between free thought and religion showed genuine literary talent. In his Poemeth a volume of Lyrics he reached a higher level and Guistishs a collection of political poems exalting every form of rebellion contains some excellent verse

IAPAN 1054

ADMIRAL AUGUSTO AUBRY d March 4 1912 He entered the Italian navy in 1866. served at Lussa and reached the rank of rear admiral in 1903. In February 1911 he was appointed commander of the Italian fleet in the Mediterranean and on the outbreak of the

war with Turkey (September 1911) he conducted the opening naval operations

GIOVANNI PASCOLI the poet (see E B xiv g12c) b at San Mauro in Romagna December 31 1855 d at Barga, April 6 1912 In 1891 he published his first volume of verse entitled Myricae and in 1897 his Primi Poemetti Other volumes—Secondi Poemetti I canti di Castelvecchio Odi ed sini Canti convivali, Li Canzoni del Re Enzo In addition he wrote much elegant Latin verse. He was also known as a prose essayist and for his Dante studies which led to his appointment as professor of Italian literature at the university of Bologna An ardent lover of nature and of simple rustic things he could never quite reconcile himself to modern progress. He had been a Socialist in his early days and had strongly opposed the Abyssiman campaign of 1895-6 but in later years he made politics subordinate to patriotism. The Conzoni del Re Enzo tell of the glories of the Mediaeval communes of Italy the poems published on the occasion of the Jubilee festivities of 1911 celebrate the triumphs of Italian unity, while his speech delivered in November 1911 at Barga was the finest piece of prose evoked by the war in Tripoli

GIULIO RICORDI the music publisher b in 1840 d at Milan on June 6 1912 He succeeded his father Tito in 1888 as head of the firm founded by his grandfather Giovanni in 1808. He was the personal friend of Verdi and was brought into business relations with many other composers. He was himself a composer of songs and piano music which he

published under the pseudonym of Jules Burgmein

ELISABETTA DUCHESS OF GENOA b in 1830 d on August 15 1912 at Stresa A
daughter of King John of Saxony she married Ferdinand Duke of Genoa son of King
Charles Albert of Sardina and brother of Victor Emmanuel II in April 1850 Her daughter Margherita afterwards married her cousin Prince Humbert and became Queen of Italy Two years after the death of the Duke of Genoa in 1855 his widow married Marchese Rapallo Enrico Annibale Butti the art critic novelist and dramatist (see E B xiv 912c) b 1856 d November 26 1912

PIERRO LACAVA the addet momber of the Cl. 1866 d November 1866 d November 26 1912

PIETRO I ACAVA the oldest member of the Chamber of Deputies in which he had sat continuously for 44 years formerly minister of Public Works and of Finance b 1835 d December 26 1912 (Luigi Villari)

JAPAN 1

The population of Japan Proper increased from 48 774,285 in 1907 to 52 200 000 in 1912 (26,380 000 males 25,820,000 females) The density is about 350 per sq m Korea had a population of 13 461 300 Formosa 3,443 600 Saghalien 43 000

Agriculture — More than 60 per cent of the Japanese population is engaged in agricul tural pursuits The Government have made consistent efforts to encourage co operative enterprise, and a Law with this object in view was introduced in 1899 and amended in 1909 by which special concessions were granted in order to stimulate the industry Special banks have also been established for facilitating the supply of capital for agricul tural purposes The Co-operative Societies Law had as its object the formation of societies for assisting those with small capital. The societies formed under this Act numbered 8,663 at the end of 1911 In 1910 the Government provided facilities for borrowing money at low interest through the Japan Hypothec Bank and the Hokkaido Colonial Bank A State Agricultural Experimental Station was established in Tokyo with branches in Kyushu Kinai (Middle Provinces) and Riku u (North eastern Prov mces) for the purpose of carrying out investigations relative to soil, fertilisers seeds diseases, insect pests, stock breeding and agricultural implements. Horticultural experiments are also carried out in the Horticultural Experimental Station in the Prefec ture of Shidzuoka and in many of the local agricultural stations

The chief agricultural products consist of rice barley and wheat millet soy and small red beans buckwheat poratoes cotton hemp indigo and sugar cane The cultivation of tea, tobacco and silk are also extensive and growing industries The total areas, in 1909

rea, under cultivation for these different products are shown in Table I

In 1917 the figures (1 = 1000) for rice were 7,432 7 acres and 206,406 7 bushels barley
rye and wheat 4,412,5 acres and 108 631 3 bushels tea 77 0 acres and 69 894 4 pounds
It should be noted in regard to tea that although the total area under cultivation has
been considerably reduced, the quantities produced have consistently increased the year
1911 being the most prolific period in the industry

The great attention which has been
paid by the Government to questions of cultivation and manufacture at the State Agricultural

See E B xv 156 et seg

Experimental Station has resulted in the reduction of labour the cost of production and

improvement in the quality of the tea

Suk -- Sericulture one of the most valuable industries of Japan has under the scientific and economic care of the Government expanded considerably during the last few years. There are two State Sericultural Training Institutes and a number of Sericultural Schools have also been established in Yokohama and for improving the quality of raw silk a National Graine Factory was erected in 1911-12 Graines are manufactured here and distributed with the object of improving and unifying cocoons A Central Cocoons Inquiry Commis sion is investigating the selection of graine. The production of silk has been as follows (1=1000)—(1908) 29 051 5 lbs (1909) 31 225 0 lbs (1910) 33 302 0 lbs

Stock Breeding—Great attention is given on the part of the Government to the improve

ment of the breeding of horses and cattle and stock breeding farms are established where matters connected with the improvement of rearing and distribution of cattle sheep dairy products and the cultivation of fodder are studied and experimented upon three Government Studs for breeding and one Stallion Remounting Depot for rearing and The Government also undertakes to lend bulls and stallions to private applicants for the improvement of breeds. Large pasturages have also been established under the management of the Imperial Household from which high class horses and cattle are produced In 1911 a Manutactory was established for the provision of serum for securing immunity from rinderpest. This serum is distributed free in localities where the disease has been prevalent. In 1910 the figures for live stock were—Horses 1 564 643. Cattle 1 384 183. Sheep 3 357. Swine 279 101. The number of slaughter houses in 1910 was 489.

Forests—Japan which possesses a tertile soil and humid climate has very large areas of forest lands and the total acreage of forests and plains in Japan proper amounts to 55 121 75.

acres forming about 74 per cent of the total area of the country Practically one half of this is occupied by State Forests and Plains Until recent years forestry was not treated in a practical manner but as manufacturing industries developed the demand for timber forced home the necessity of conserving forest lands on a scientific basis. During the last few years the Government have reorganised the forestry administration and encouraged afforests tion by strictly enforcing the Forestry Act The production of timber in the year 1910 is valued at £13 110 724 while the land was afforested to the extent of 271 772 acres at a co t of £332 403 Incidental to this also the improvement of irrigation has been studied and a programme covering all the branches of forestry administration was introduced in 1911 extending over a period of eighteen years. Meteorological observatories are to be established in the most important forests and special subventions are granted for the restoration of waste public lands and for promoting and protecting forests. The revenue from the sale of waste public lands and for promoting and protecting forests. The revenue from the sale of timber and other products and from rentals amounted for 1908-09 to £949 634. in 1909-10

of timber and other products and from rentals amounted for 1908-09 to £949 634 in 1909-10 to £1 001 453 and in 1910-11 to £1 088 505

Foreign Trade —The foreign trade of Japan has shown considerable expansion during the last few years. In 1908 the total value of the exports amounted to £37 824 567 and in 1911 to £44 743 388. The total value of imports for the first named year amounted to £43 625 746 which had advanced to £51 380 570 in 1911. The total value of foreign trade for these two years was therefore £81 450 313 and £96 123 958. A large part of the export trade is to countries in Asia of which China is far the most important, but the United States is the principal customer European countries taking a considerably smaller amount.

Of these Erance has the most extensive dealures. Great Britain coming next. Although Of these France has the most extensive dealings Great Britain coming next Although Assauc countries supply the largest proportion of imports (India being chief among them)
Great Britain is far the largest exporter the United States coming third

Table II shows the value of exports from and imports to foreign countries for 1910-11

Finance — The total revenue amounted in 1909-1910 to £67 754 623 of which £48, 324,217 was Ordinary and £19 430,411 Extraordinary revenue, in 1910-1911, £67 287,378 (£49 133,132 and £18 154 245), in 1911-12, £57 399,699 (£49,671 645 and £7 728,054) and m 1912-13 (est) £57,597 699 (£50,259 719 and £7 337,980) The expenditures for the same periods were as follows, showing Ordinary and Extraordinary 1909-10, \$53, 280,363 (£39,419 313 and £13,870,050) 1910-11, £56 915 403 (£41,200,918 and £15 714,

Mining -For the efficient administration of the Mining Industry Japan is divided into five districts, each of which is under the control of a mining inspection office. The total area of mining land leased amounts to 7 013 265 acres and of this area 1 252 146 acres are occupied by mines actually in operation. The mineral products obtainable in Japan include occupied by mines actually in operation. The mineral products obtainable in Japan include gold silver copper lead, ziac coal iron antimony manganese graphite sulphur peat and petroleum. The total number of persons engaged in the mining industry amounted in 1910 to 222 195 and of these 137 467 were employed in coal mining. The output of the different metals for 1910 was as follows (1=1000)—Gold 140 3 oz Silver 4 550 5 oz Copper 130 530 2 lbs. Lead 10 419 2 lbs. Antimony 345 9 lbs, Sulphur 116 925 8 lbs. Pig Iron 157, 894 7 lbs. Steel 20 744 8 lbs. Iron Pyrites 213 319 I lbs. Coal 15 681 3 met tons Petroleum 76 621 9 gals. In 1911 an increase of 58 per cent occurred over the previous year in the number of applications for coal prospecting, and an increase of 337 per cent in applications in regard to sulphur. During the latter year also the value of mineral exports amounted to 14 364,872 and of imports to 18 680 746 an increase on the preceding year of £1 659,060 the increase being chiefly due to the export of coal and in mining on the rounding 1911 amounted to 14.272,887. The aggregate nominal capital of mining companies at the and of this year amounted to 12 330 826 of which £16,389 568 was paid up

Interver The fishing infinitity was valued in 1910 at about £8 018 681 sterling and has shown remarkable progress during the last few years. In 1908 the fisheries of every descrip-

IAPAN

tion realised a revenue of £7 338 000 and in 1909 the value was £7 759 000 The number employed in this industry in 1908 amounted to 810 717 and no less than 423,403 vessels of employed in this industry in 1908 amounted to 810 717 and no less than 423,403 vessels of the old Japanese type were engaged therein in addition to 467 sailing vessels and 130 steamers for trawling and whaling. An important recent development in the industry is the use of oil engines for driving the fishing boats and there are stated to be about 1000 engaged in this section of the business. Pelagic Fishery has made great progress in recent years the value of deep sea catches amounting in 1910 to £864 174. By the Fishery Agreement made with Russia in 1907 the fishing rights of Japan extend as far north as Kamschatka, and the value of catches in these parts has steadily increased. This has been due to a great extent to the introduction of the Pelagic Fishery, Engographer Act, a few years are. introduction of the Pelagic Fishery Encouragement Act a few years ago The principal introduction of the relagic rishery Encouragement for a few years ago. The principal fish caught in Japanese waters are herring sardine mackerel bonito tunny grey mullet salmon trout and cod and among marine mammals the whale and seal are extensively caught. Shell fish of various kinds are also largely produced. An export trade in fish with China has been built up and with Europe and America in fish of isnglass shell buttons. tunned crab salmon and trout amounting in the aggregate to £1 572 825 in 1910 while the total value of manufactures in these directions amounted in the same year to £4 479 824 Fishery and Marine Products Guilds have been established to the extent of 3 729 A

rishery and Mathie Products Guilds have been established to the extent of 3 729. A Fisheries Institute has also been organised in the capital and similar institutions in the provinces numbering altogether 38. The largest association connected with this industry is the Dai Nippon Susan Kwai which receives a special grant from the Government Industrial Employment—The number of operatives employed in different industries in 1910 was as follows (1=1000)—Textiles 426 o Machine & Tool Factories 55.5 Chemical Works 65.5 Food & Drink Factories 52.1 Printing & Publishing 19.7 Wood & Bamboo Work 13.3 Electrical 3.0 Metal Refinences 38.4 Mining Manutactures 15.9 The rate of wages markedly appreciated in nearly every industry during 1910-12.

Tartif—The new Tariff came into force in July 1011. Under this tariff raw material.

Tariff -The new Tariff came into force in July 1911 Under this tariff raw mate rials are admitted as a rule duty tree upon partly manufactured goods the duties im posed are light and on manufactured goods the rates vary from 15 per cent to 40 per Duties as high as 50 per cent are levied on articles of luxury as the extent of their importation is very limited. Under the Tariff Convention with Great Britain a guaran tee was given by which ten principal articles of export from Japan to the former country should be exempt from Customs Duty while concessions were made in the Japanese Customs Duties upon important British merchandise including cotton and woollen tissues mixed tissues of wool and cotton linen yarns paints and sheet iron. In the Convention with Germany in consideration of concessions made on the Customs Duties upon important Japanese products reductions were made by Japan in the duties on goods from Germany embracing, leather salicylic acid quinine artificial indigo, coal tar dyes woollen yarns mixed tissues of wool and cotton packing paper zinc plates and sheets and gas oil and hot air engines. In regard to the Convention with France reciprocal treatment was also arranged France receiving in consideration of the applica tion of the French minimum rates to important Japanese products reductions on sar dines in oil butter wines olive oil, perfumery woollen yarns and tissues, binoculars, automobiles and parts of knitting machines

Railways —Of the 6060 miles of railway 4870 miles belong to the State the purchase of which from the original companies was completed in 1909 484 miles were private lines and 706 miles belonged to the South Manchurian Railway Company For the year 1910-11 the number of passengers carried on the various systems was 166 888 048 freight to the extent of 31 718 399 tons while traffic receipts amounted to £11 213 921 The estimated receipts and expenses for 1912-13 of the Imperial Government Railways are £10 252 244 and £9 165 739 respectively showing a net profit of £1 086 505 A Light Railways Act was introduced in 1910 which removed certain obstacles to the extension of this type of railway the result being that a considerable impetus was given to their construction is anticipated that light railways will now be laid every year to the value of over a million pounds sterling. The private and light railways at the end of 1910-11 numbered 59 having an aggregate capital of £8 096 099 The number of passengers carried during the year amounted to 25 909 254 and goods to the extent of 2 314 367 tons while traffic recepts and expenses amounted to £458 191 and £219 535 respectively On the South Manchurian Railway the number of passengers carried for the year 1910-11 amounted to 2 349 088 the total amount of goods to 3 922 164 the total receipts to \$2 537,917 and the expenditure to \$2 158 083. There are also 38 electric railway companies having an aggregate capital of \$8 279,217 with a total mileage of 350 while an additional 150 miles were under construct tion at the end of 1911. The total extent of projected electric lines was 348 miles and the Tokyo and Osaka municipalities own 82 miles of tramways open with 71 miles projected

The Kyoto municipality also have 16 miles in course of construction

Shipping and Shipbuilding—Great attention has been given to these industries and the progress in construction is shown in the following figures—

	S	teamers	Sailing Vessels		
	No	Gross Tonnage	No	Gross Tonnage	
1908	2,304	I 160 440	5 379	384,481	
	2 366	I 198 194	5/937	404 089	
1910	2 545	I,233 909	6 392	413 720	
	2 789	I 386 047	7 978	447 307	

Under a new law Japanese subjects or companies engaging in transportation business receive from the Government navigation subsidies according to mileage tonnage speed and age in regard to steel steamships with a gross tonnage of not less than 3 000 tons a speed of not less than 12 knots per hour and not more than 15 years old which are registered in the Japanese shipping register. During 1912 the improvement of the Yokohama Harbour pier was begun, and was to be completed in 1916 at a total estimated cost of £1 073 850.

The total entrances of steamships of all nations including Japanese were for the years

The total entrances of steamships of all nations including Japanese were for the vears 1908 to 1911 inclusive as follows—In 1908 10 330 vessels of 20 104 257 tons in 1909 9960 vessels of 19 670 790 tons in 1910 9442 ve.sels of 20 073 680 tons and in 1911 8576 vessels of 19 993 397 tons Sailing vessels entered Japanese ports in 1908 to the extent of 2 699 with a total tonnage of 111 320 in 1909 2370 with a tonnage of 123 661 in 1910 the figures were 1726 and 100 107 tons and in 1911 433 and 60 172 tons. Of the total number of steam ships Japan's proportion of the entrances of 1908 was 43 per cent. British vessels figuring to the extent of 32½ per cent. In 1911 the respective proportions were 47 per cent and 30 8 per cent. The entrances into and clearances from all ports in 1910 amounted to 13 599 with an aggregate tonnage of 39 815 225 in 1911 the figures were 18 026 and 40 103 283 tons.

Army and Navy — The Japanese Army in 1912 consisted of 936 companies of infantry of squadrons of cavalry 152 batteries of field artillery, 53 batteries of heavy artillery 10 batteries of mountain artillery 58 companies of engineers 38 companies of commissariat 12 companies of communication troops, 5 companies of telegraph corps and an airship Under the new system the Fortress artillery was converted into Siege Artillery In order to strengthen the efficiency and the mobile power of this corps lighter guns have been adopted and horses provided for their movement The formation of this corps has had the effect of introducing the unification of organisation of artillery corps in strength, whereas under the old system the strength of a regiment or a battalion varied in different fortresses Mountain artillery has also been converted into Field artillery Formerly this brigade consisted of three regiments but this has now been reduced to one brigade of two regiments the number of brigades being increased from two to three Under the system of conscription, able bodied males of from 17 to 40 are liable for service Young men of the better classes who are termed one year volunteers must pass a scholarship equal to graduates in the Middle School After a year's service they are enrolled in the Reserve Service with the rank of non commissioned officer Teachers in Primary schools undergo the six weeks' service, having the regular training of the ordinary soldier, after which they are enrolled for territorial service

The Japanese Navy consisted in 1912 of 15 battleships with a tonnage of 212 980, 13 armoured cruisers of 151,303 tons, 47 other war ships of 165,253 tons, 55 destroyers of 20 508 tons 77 torpedo boats of 7,258 tons, or a total of 207 vessels of 557 302 tons, compared with 157 vessels with a tonnage of 283,743 tons at the time of the outbreak of the Russo Japanese War The bulk of these vessels were constructed abroad, either in England, France or Germany Great efforts are being made to provide facilities for the construction of battleships in Japanese yards the present difficulty being the supply and construction of materials Published figures indicate that were it possible for Japan to construct its own vessels a saving would be effected of about 18%

Education—The educational system which obtained up to 1911 provided for scholars in the primary school entering at the age of six, where they stayed until they were twelve years of age. At the conclusion of this period they were transferred to the Middle school for five years and then graduated to the High-school for three years, subsequently entering the University for three or four years

These courses occupied some seventeen

JAPAN 1059

or eighteen years and precluded students entering one of the Universities before the age of 23 or 24 In many cases therefore it was found that their education was not com plete until they were about 28 The unsatisfactoriness of this system was recognised and in May 1010 the authorities decided to remodel it The new programme reduced the course of study in the high school to two years and the higher-middle and middle courses were combined subject to the approval of the authorities while at the middle school, technical subjects are optional This new curriculum was introduced in 1911 for the Middle School and in 1912 for the higher grade Graduates from the latter The Department of Educa school are now admitted to the higher school by diploma tion is divided into the Minister's Secretariat and their bureaux, which deal respectively with special, general and technical affairs Several new State Educational Institutions have been or are being organised including the College of Sciences of the North Eastern University at Sendai the College of Engineering at Fukuoka, Sericultural College at Uveda the Mining College at Akita, 5th Higher Commercial School at Otaru 6th Medi cal School at Nugata, and 7th Higher Technical School at Yonezawa The number of schools of all classes in 1908-09 were 34 376, the number of instructors and teachers 160 878 the number of students and pupils 6 627 104, an increase of about 300 000 in the previous year and graduates 607 521 The Department of Education employed 96 foreign teachers 25 being English, 22 German, 21 American, 6 French 3 Russian, and other countries 19 There are 405 Kindergartens where infants from 3 years of age are educated until they are old enough to enter the elementary school

Physical culture which includes Military and Gymnastic exercises is conducted in all schools from the Primary to the University preparatory schools. In the Primary schools there is military drill without arms after the fourth year. In the secondary schools drill is compulsory through the whole five years. During the last three years students are given drill with arms and trained in the practice of giving command. In the High and similar schools military training with arms is continued. Gymnastic training in Japan is a combination of all the best systems of different countries, and fencing and unitsu are also taught in many schools.

Religion —The prevailing religion of Japan Shintoism was represented in 1908 by 162 442 temples or shrines at which 14 826 ministers officiated. Buddhism the old religion was represented by 71 927 temples with 5 268 priests. Christianity represented by the Protestant Roman Catholic and Eastern Orthodox churches possessed 1132 176 and 174 places of worship respectively in 1909. The total membership of each branch was 75 608 64 118 and 31 538. The missionaries including wives numbered 931 Protestants 319 Roman Catholics and 2 Eastern Orthodox while the native ministers amounted to 563 Protestants. 34 Roman Catholics and 38 Eastern Orthodox.

estants 34 Roman Catholics and 38 Eastern Orthodox

Poor Law and Charity — The State Relief Fund amounted in the year 1907-8 to about 43 488 437 The disbursements from this fund for the same year amounted to £53 600 This included the relief of destitute cases and cases of death not identified. The State also provides for the support of paupers. The hospitals established by the Red Cross Society at the end of 1909 amounted to twelve institutions attached to which were 3.787 doctors pharmaceutists and nurses. The number of members in this year amounted to 1.525 822 compared with 1.443 420 in the previous year. In addition to this there are at the present time 260 asylums and orphanages and about 50 public and private reformatories for bovs. There are in addition a number of other hospitals for special diseases. Good work is also being carried out in connection with the Ex convicts reform the fund for this purpose totalling approximately £180 000. Fifty five homes had been established to carry out this work at the end of 1908 the number dealt with for this year amounted to 390. There are in addition five or in the criminal code of Japan which came into force in 1909 is in many Justice. Crime etc.—The criminal code of Japan which came into force in 1909 is in many

Justice Crime etc.—The criminal code of Japan which came into force in 1909 is in many ways an advance over its predecessor which was based chiefly on the French model. The new code gives a greater amount of discretionary power to judges. The punishments provided under this code include capital punishment penal servitude imprisonment fines and detention with confiscation as a subsidiary penalty. Penal servitude ranges from not less than one month. Any attempt on the life of a member of the Imperial Court or a Prince of Royal blood receives capital punishment and for less majesté penal servitude varying from two months to five years. The importation or manufacturing of option is also a punishable offence the term of imprisonment varying from six months to seven years and for smoking option imprisonment for three years or under. For gambling or lottery and for games of chance a fine is imposed of 1000 yen (about £100) or under and for habitually

roco JAPAN

indulging in games of chance imprisonment for three years or under. The assuing of lottery tickets or acting as lottery agents is also punishable by imprisonment or fines. At the end of the year 1909 there were 370 courts in the country one Supreme Court set en Appeal 50 District and 312 Local courts. The number of judges was 13 037 distributed respectively as to 25 133 598 and 581. The number of cases tried in the Supreme Court in this year was 676 in the Appeal Court 5 677. The criminal cases tried in these courts numbered 2,453 and 11,353 respectively. At the district and local courts during the same year the number of civil and criminal cases numbered 588 153, the prosecutions amounting to 230 955. The number of prisons at the end of 1908 was 149 in which were 53 619 prisoners 47 312 of these being convicts. The total revenue derived from prisons in 1908–9 amounted to about £131 594 and in 1909–10 to £125 238. The expenditure for all items amounted in the same years to £589,439 and £603,327 respectively. The number of police stations at the end of 1907 was 16 072 police officers and men numbering 37 110. The number of suicides in 1908 amounted to 9 600 (5 897 males and 3 703 females). The number of fires occurring in 1908 was 15 351 by which 37 380 houses were destroyed or damaged.

Political History—The last few years have been marked by a general expansion of

Political History—The last few years have been marked by a general expansion of Japanese home industries and foreign trade together with retrenchment in expenditure on Army and Navy, the improvement of conditions of labour and considerable activity in connection with the construction of inland transpirt facilities—Briefly the Government have been concentrating their attention on the economic problems which always accompany a transition in industrial development—The Japanese are essentially an agricultural people and the building up of manufacturing industries has introduced new economic conditions—This is clearly instanced by the fact that whereas in 1908 the value of iron and steel imports amounted to £3 726,406 in 1911 the value was £4 706 201 the value of other metals imported in 1908 was £786 566 and in 1911 £1 090 527 while the imports of machines and machinery were valued in the latter year at £4 692 828 and £4 313 412 respectively—In ten years the figures for these items about trebled

An important step was taken in 1910 by the introduction of a new Tariff of a highly protective character. The objects of this tariff were to provide an increased amount of revenue and to encourage the building up of home industries. Provision however was made for the reduction of certain duties on commodities imported from countries with whom conventions had been arranged. Substantial concessions were made to Great Britain by a commercial treaty in April 1911 in return for the free entrance into the latter country of Japanese goods on which Great Britain levied no duties. In recognition of her treatment, Japan agreed to the entrance of British cotton and linen goods and iron and steel manufactures at a considerably reduced rate, these classes of manufacture representing about 80 per cent of the total British exports to Japan

During 1910 further progress was made in the exploitation and absorption of Korea, an agreement was signed with Russia by which the two Powers agreed to the mainte nance of the status quo in Manchuria and to refrain from indulging in any antagonistic rivalry in its development, and a Bill was introduced having as its object the granting of permission to foreigners to hold land, provided that foreign Governments granted similar privileges. This latter Bill was passed after the introduction of an amendment to the effect that such a concession should be restricted to persons and to business firms The year 1011 was chiefly of note for the development of the internal resident in Tapan resources of the country and the provision of better transport facilities and accommoda With this purpose in view the sum of £13 484,000 was allocated to the improve ment of waterways and fo 800,000 to the extension and improvement of railways £1,000,000 was devoted to the improvement of roadways in Korea, and nearly £850,000 to the construction of custom houses, the Harbour Commission also recommended the expenditure of £10,000,000 on new harbour works at various ports The issue of a loan in Great Britain for £6,000,000 was also carried through for the extension and improve ments on the South Manchuria Railway

The most important political event in 1911 was the renewal in July of the alliance between Japan and Great Britain for a further period of 10 years a new condition was introduced into the terms of the alliance, whereby it was agreed that if either of the contracting parties was at war with a Power with which it had a Treaty of Arbitration mether of the parties should be under an obligation to give its support. Marquis J

JAPAN 1061

Komura (b 1853) whose political services to his country were crowned by his diplomacy in making peace with Russia (E B x1, 892) died November 24, 1911 created Marquis in 1910 in connection with the annexation of Korea

In 1912 Japan came to an understanding with Russia for detending the interests and policy of both countries in Mongolia The year was chiefly memorable however for the death of the Emperor Mutso Hito (b 1852, d July 30th) under whom modern Japan had been created (E B xix 100) and for the dramatic suicide, on the occasion of the Emperor's funeral of General Count Maresuke Nogi (b 1849, d Sept 13th), the hero of Port Arthur and Mukden (E B xix 7,3, xxiii 926 et seq)

In 1909 the Japanese Cabinet was formed as follows Premier and Minister of Finance Marquis Gen T Katsura, Foreign Affairs Count J Komura Home Depart ment Baron Dr T Hırata Justice Viscount C Okabe, Education E Komatsubara Agriculture and Commerce Baron K Oura Navy, Baron Vice Adm M Saito Cabinet lasted until August 1911 when in consequence of differences on financial policy Marquis Katsura resigned Marquis K Saionji then became Premier the following being the principal other Ministers Foreign Affairs Viscount Y Uchida Finance Tatsuo Vamamoto Home Affairs K Hara Justice M Matsuda Agriculture and Commerce Baron S Makura Education S Haseba Communications Count T Hayashi Army Baron Y Uehara and Navy Baron Saito

A Cabinet crisis occurred on December 2 1012 by the resignation of the War Minis ter Baron Uehara as the result of his colleagues unanimously deciding on grounds of economy against his scheme for establishing two military divisions in Korea Prime Minister was faced with the difficulty that under the regulations in force the head of the War Office had to be a soldier, and military opinion was entirely on Baron Uehara's side Being unable to find anyone to take the War Office in his place on December 4th the Marquis Saionji submitted the resignation of the Cabinet to the Emperor The Council of Elder Statesmen met on December 6th consisting of Marshal Yamagata Marshal Inouye Marshal Oyama and Prince Katsura and recommended the Emperor to send for Count Terauchi the governor general of Korea to form a government The situation was however a new one in Japan the struggle being definite ly between the military party controlled by Marshal Yamagata and the supporters of a policy of retrenchment Eventually on December 19th a new Cabinet was formed under Prince Katsura as Premier with the following as his colleagues Foreign Affairs Baron Kato Home Baron Oura Communications Baron Goto Agriculture, M Nakashon Ren Finance M Wakatsuki Reijiro Justice M Matsumuro Education M Shibata Kamod Army Lt Gen Baron Kikoshi Yasutsuna Navy Baron Saito

Korea — The Pennsula of Korea was annexed by the Japanese Government as a result of the Russo Japanese War This annexation took place in August 1910 and a Governor General was appointed by the Japanese Government In the 1910-11 Budget the total revenue was £694 475 and the expenditure £694 455 For 1911-12 the total revenue amounted to £4 874 178 This revenue was do oted to road construction to the extent of £1 024 275 to Customs Accommodation Works to the extent of £847 263 to railway construction and unprovement to the extent of £7 203 80. Spread over a period of warry. The £1 024 275 to Customs accommodation works to the extent of £947 203 to railway construction and improvement to the extent of £3 703 895 spread over a period of years. The estimated revenue and expenditure for 1912–13 amounted to £5 289 220. The industrial products of Korea include cotton and linen goods coloured papers earthenware hides wood and bamboo work metal work etc. The staple industry is agriculture the chief product being rice while wheat barley millet and beans are also produced. Cotton tobacco hemp and ginseng are also cultivated and the raising of live stock is carried out to a small extent. and ginseng are also cultivated and the raising of live stock is carried out to a small extent. The most important mineral products are gold copper iron graphite and coal the export of gold amounting in 1910 to £921 848. The fishing industry although carried on in a primitive manner is extensive and the value of the annual catch reached in 1910 a total of £819 420. The chief fish caught are cod sardines lobster herring salmon mackerel whale etc. The forests have an extent of about 12 500 000 acres red pine and other confers being the principal trees The total foreign trade in 1910 had a value of £7 169 927 and in in 1911 f.7 471 539 Imports were valued at f.4 074 567 in 1910 and exports at f.2,039 332 in 1911 imports were valued at f.5 540 o68 and exports at f.1 931 471

The chief railway is the Seoul Wiju Railway which is 309 9 miles in length

The con

struction of a bridge over the Yalu commenced in August 1909 was finished during 1912

¹ See E B xv 908 et sea

The Ho-Nam Railway has a length of 175 8 miles and the Seoul Wonsan line 136 3 miles

is being extended by a length of about 20 miles

Formosa.—In the chief industry of this island namely agriculture the following were the yields of products in 1910 (000 omitted) — Rice 20 769 9 bushels Tea 36 708 0 lbs Sugar 444 642 9 lbs Salt 265 251 8 lbs Cane sugar 5 762 394 5 lbs Sweet Potatoes 1712 886 4 lbs Indigo 42 580 8 lbs Of the mineral products coal was the chief the output for 1910 amounting to 275 800 tons Sulphur camphor gold and silver are also mined The value of imports and exports was as follows (000 omitted) — (1910) exports £1 198 6 imports £1 985 2 (1911) exports £1 217 5 imports £1 955 5

for 1910 amounting to 275 800 tons. Sulphur camphor gold and silver are also mined. The value of imports and exports was as follows (000 omitted) — (1910) exports £1 198 6 imports £1 985 2 (1911) exports £1 217 5 imports £1 955 5.

Saghalien — The chief industry of this island is fishing for salmon and trout. The manufacture of herring oil-cake is also carried on. Agricultural industries have been en couraged since 1906 and at the end of 1911 1 737 families had settled on the land and every encouragement was being given for the production of cereals and for stock raising. During the last few years Saghalien has been proved to possess good indications in regard to oil deposits and prospecting and development work has been carried out.

(Sydney H North)

LATIN REPUBLICS OF SOUTH AND CENTRAL AMERICA

General Survey

The 420th anniversary of the discovery of America by Columbus (October 12 1492) The remarkable transformation in both the political commercial and social conditions of the twenty different American Republics lying to **Progress** the South of the United States and known geographically as 'Latin in Latin America," which began with the struggle for independence early in the America. 19th century is however a matter of quite modern development and year by year, particularly in the case of the more important South American countries national progress now becomes more and more marked. Since 1909 on the whole the rate has been well maintained. The improvement has not alone been noticeable in those States which possess the largest extent of territory it is, perhaps the smaller and less-important countries which have shown the more remarkable advance. In the case of Argentina Brazil and Chile a stage had already been reached several years ago in commercial expansion and social development which makes at least a further normal progress each year more or less a matter of course But, while Mexico with its 767 000 square miles of territory and its population of nearly 14 000 000, has lately retrogressed owing to a continuous state of revolution which began in November 1010 it is interesting to note that the Republic of El Salvador with but little over 9 600 square miles of superfi cial area and 1,200,000 inhabitants, has shown improvement in each department of its administration while it has remained commendably free from such disturbing influences as have affected other neighbouring States notably Nicaragua Honduras and Cuba

The year 1912 proved politically trying for some States and financially perilous for Nicaragua has been in a continual state of revolution since 1909 when the others disturbances in the internal affairs of that country provoked interference by the United States Honduras has been likewise affected by the affairs of her neighbour while Para guay has violently changed her Government four times after as many revolutions within Santo Domingo and Haiti have continued their perpetual internal and ex ternal quarrels, while Ecuador has experienced serious and sanguinary fraternal encoun ters resulting in the deaths of several of her prominent politicians Mexico has known no political peace since the displacement of General Porfirio Diaz in 1910 after a quarter of a century's faithful public service Argentina, Brazil and Chile have suffered and are still experiencing financial tension, due to a propensity for large expenditure, which is a natural consequence of the rapid exploitation of their natural resources Nothing like a financial crisis can be said to have occurred to any one of these latter States, but the serious attention of their respective Ministers of Finance has been devoted to curtailing disbursements, in order to avoid injury to the national credit. The somewhat cool reception which the investing public in Europe has offered to several recent government-supported loans-in Brazil especially-shows that the notice of lenders abroad has been attracted to the danger of extravagance

1 See E B x, 669 et seq

Venezuela and Colombia have partially redeemed their good name by maintaining their service upon their Public Debts although in the case of the latter Republic there is evidence that severe sacrifice has had to be made in order to find the Flanace amounts falling due upon the half yearly coupons Guatemala has re mained obdurate in regard to the resumption of her interest payments, some fourteen years in arrears but there is reason to believe that the British and United States Govern ments working in union, intend to insist on arrangements being made for the benefitof her long suffering creditors A serious warning to both Guatemala and Honduras was contained in Mr Tait's last message to Congress the President observing- 'Failing an arrangement it may become impossible for the Government of the United States to es cape its obligations in connection with such measures as may become necessary to exact justice to legitimate foreign claims. The poor arrangement arrived at between the bondholders and Costa Rica (another defaulter over long years) has so far, been adhered to while Nicaragua which had suspended payment upon her Debt since January (1912) resumed with the maturity of the July coupon which was paid in October Difficulty was encountered as usual, in regard to Ecuador's (Guayaquil & QuitoRailway and Salt Bonds) Debt but the coupons were eventually paid in driblets. On the other hand, the smallest of the Latin American States (El Salvador) showed remarkable punctuality in meeting the interest upon her loan the credit of this Republic consequently standing high on the London and Paris markets Cuba's financial condition has become acute, and at the end of 191, it appeared clear that the assistance of the United States would sooner or later be invoked the Republic's creditors being found for the most part in that country Mexico s prolonged internal strife has brought down her once high credit and abundant resources to a very low ebb and the administration while confessing to the absolute necessity of further substantial borrowing has so far found no European or American The good financial standing of Peru has been house willing to make further advances recognised by the encouragement given to her last appearance in the loan market

The natural resources of all the Latin American countries alike have been still further developed mainly by the aid of foreign capital which has continued to flow towards this part of the world in spite of the unstable political conditions prevailing in some cases. This may be explained by the fact that in but few instances have the financial interests of foreign investors suffered indeed upon comparison there have been fewer and less serious losses in these countries than in other parts of the world

One circumstance to be noted is the tendency of the influence of Great Britain in Latin America to wane by comparison with the commincial progress made by Germany and Britain the commercial and political progress made by the United States while the greater part of the transportation by land and sea remains in the commercial progress made by the United States while the greater part of the transportation by land and sea remains in the commercial progress made by the United States while the greater part of the transportation by land and sea remains in the commercial progress.

Cuba, Paraguay and Mexico the greater part of the Central American transportation arrangements are now in the hands of the North Americans. Thus with the one exception of El Salvador, where the principal railway and its alhed steamship service remain British, the whole of the railways as well as the steamship transportation services of Pan ama Costa Rica Honduras Nicaragua and Guatemala have become United States en terprises. In Argentina Brazil and Paraguay a gigantic combine of American French in terests has latterly acquired control over the systems some of which were formerly British

In other branches of commercial enterprise competition has been keenly felt. While neither German nor French interests have hitherto been particularly aggressive in regard to railway construction, both as well as Dutch and Italian lines have been energetically competing for steamship traffic, in the dry goods trade Germany has proved a very formidable rival. United States enterprise has vigorously attacked what were predominantly British Latin American markets in cotton and woollen goods hardware, iron and steel manufactures and more especially the British ship building connection having drawn away several orders for battleships given out by the Argentine and Brazilian Governments. Even in the frozen meat trade United States firms have latterly entered

the field, parchasing several of the more important establishments while they have con structed others near British factories, the better to compete with them

The Belgians again have encroached to a very great extent upon the British galvanised wire and coal (briquette) trade, and other countries have entered with greater freedom the Latin American markets where a couple of decades ago they were hardly to be found at all Japan, for instance has now a valuable Latin American connection her enterprising people have a line of steamships running regularly to the principal South American ports while the formal opening of the Panama Canal in 1915 will witness a new service of trading steamers also flying the Japanese flag state trade between the various Latin American Republics has likewise increased to a considerable extent, and this fact combined with the establishment (especially in Mexico and Argentina) of a number of well equipped factories to use the native grown raw material has further reduced British imports into those countries

The total foreign trade of Latin America (export and import) may be conservatively estimated at an annual value of £435 000 000 The increase during the past decade

has not been less than £ 60 000 000 While Great Britain retains the lead Foreign in regard to exports to these countries both the United States and Cermany trade are fast challenging this superiority. The different Republics of South and

Central America in 1910-11 were customers of Great Britain to the amount of 26 03 per cent of the whole of their imports the United States supplied 23 31 per cent and Germany 15 45 per cent Trading figures show that the Latin American States are the largest homogeneous unit in British foreign trade For the year mentioned these coun tries took British goods to the value of £53 000 000 the greater part being manufactured The imports from the United States in 1910-11 were valued at \$-40.66, 2 articles

In imports from Latin-America, the United States leads with 34 51 per cent, followed by Great Britain with 20 99 per cent Germany with 11 41 per cent and France with 8 20 per cent and the opening of the Panama Canal is bound to give a further stimulus to North American activity The total foreign trade of the twenty Latin American Republics with their population of 70 000 000 for the year 1910-11 exceeded £508 744 806 Of this total the South American countries (exclusive of Mexico Central America, Cuba Haiti and Santo Domingo) were responsible for £468 744 806 or an increase over the preceding year of nearly £40 000 000

During the last fourteen years the foreign trade of Latin America has grown by 1,74 per cent, taking the States of Mexico and the six Central American Republics apart we find that the ratio of increase has amounted to 189 per cent in the first and to 148 6 per cent in the second case The purchasing power of the Latin Republics has therefore increased at the rate of between 11 and 12 per cent per annum

While Great Britain enjoys fully one third of the entire trade of these countries her share might well be expected to be substantially greater since it is mainly with British

Relative decilne in

capital that these South and Central American States have been opened up their railways constructed and their waterworks telephones docks and har British trade bours completed it is principally with the aid of British capital that their banks and insurance institutions have been brought into being Moreover

the reinvestments from Great Britain in Latin American enterprises amount to over £42 000 000 per annum, taking an average for the last three years one quarter of the whole amount of foreign capital finding its way into the South and Central American countries has been of British origin. The sum of such capital invested to date is es timated at £685 000 000 sterling

For some years past nevertheless British trade has by comparison been steadily falling off, while that of the United States has been gaining headway At the same time Great Britain as more and more dependent upon the products of these countries more especially of the Argentme Republic for supplies of wheat and meat looking to them as the legitimate market for her manufactured goods The proportions of British trade of tate with these countries have increased it is true for while in 1900 Latin America took one-eighth of British exported products by 1005 the total had reached the proportion of one-seventh and by 1910 one sixth But about two thirds of all the British Latin American trade is carried on with only three of the Republics—Argentina, Brazil and Chile

The problem of Central American unrest remained during 1912. The revolution in Nicaragua has threatened the political stability of the neighbouring States of Guate Central mala Honduras and Costa Rica. The Central-American States collectively have resented the recent armed interference of the United States in Nica raguan affairs but the local issues involved have remained rather obscure being dominated to a large extent by private financial and commercial interests

A state of revolution upon a less serious scale has been observable in Paraguav In Brazil several minor uprisings against constituted authority have been noted but in these cases the Federal Government has proved competent to deal effectively with the situation. Mexico has presented the most serious and prolonged state of upheaval one revolution after another occurring in rapid succession the amount of damage to life and property has proved considerable. Foreign interests however have hitherto escaped lightly. The two negro Republics Santo Domingo and Haiti have maintained their unenviable reputation for internal disorder and U.S. Gunboats have been despatched to both in order to protect American interests.

In a diplomatic note presented to the Nicaraguan Government by the United States Minister Mr Weitzel the United States announced a new extension of its policy towards the smaller republics of Latin America via Santo Domingo Cuba Guata mala El Salvador Nicaragua Honduras Costa Rica and Panama They have been notified that the Northern Republic would strongly support all duly constituted good governments in these countries but that it would exert its force physical and moral against selfishly inspired revolutions and that it would protect American legations and American citizens there resident. In effect the United States now extends a broad protectorate over the countries mentioned

For the third or fourth time there has been put forward the proposal of a Confederation of the Central American States with the President of Guatemala (Senor Manuel Estrada Cabrera) as the first President. The earliest attempt at such 4 Confederation was made in 18 4 when El Salvador Honouras Guatemala Nicaragua and Costa Rica formed themselves into the Central American Federation with Senor Manuel Jose Arce as the first President. It was dissolved in 1839 further efforts were made in 1842 when the promoter General Morazan lost his lite in the attempt and yet again in 1909 when Senor Jose Santos Zelava President of Nicaragua was expelled from his country. There is little reason to anticipate any ultimate success even should the proposal make any further headway.

Early in 191 Dr Blair Bishop of the Falkland Islands visited England for the purpose of raising a sum of £100 000 to provide churches chaplains schools and nursing

homes throughout his vast diocese comprising the whole western seaboard of South America and including the Republics of Ecuador Colombia Bohvia Peru Chile and Argentine Patagonia as well as the British possession, the Falkland Islands—in all about 200,000 square miles of territory. In spite of a vigorous Press campaign, there was but a meagre response to the Bishop s appeal, and he was obliged to return to his diocese with less than one fifth of the amount for which he had asked. The Anglican Church in South America remains in a very un satisfactory condition the attendances at divine service even in such large cities as Buenos Aires, Rio de Janeiro, Lima, Santiago Valparaiso and Asunción, are decidedly scanty

The year 1912 was notable for the large number of new treaties entered into and old ones ratified between the different States, the principal exceptions being in the Treaties cases of Peru with Ecuador, and of Peru with Chile Boundaries were also adjusted leaving but few questions of settlement still open

The amount of newly invested capital in Latin American enterprises was somewhat less than during the previous year, the largest borrowers having been Brazil and Chile

menced in Mexico, Brazil and Chile

while a few Argentine industrial (land) and manufacturing issues, a Central American constructional railway project, as well as a Mexican light, traction and power company and a Brazilian traction company, among others, were well received A Bolivian tin mining proposition, on the other hand was adversely regarded, as were one or two minor enterprises. Several important engineering contracts for works in South America were awarded, the chief among them being the construction of the Valparaiso Dock and Harbour (to Messis S. Pearson & Son) for the sum of about £3,000 000 an enormous reservoir in connection with the comprehensive sanitary improvements scheme undertaken by the Federal Government of Argentina (awarded to the Cleveland Bridge and Engineering Co of Darlington) for £3,500 000 the extension of Buenos Aires port and harbour involving an outlay of £5,000 000 (awarded to Messis C. H. Walker & Co.) and four destroyers (ordered from Messis Cammell Laird & Co., of Birkenhead), while other port and harbour works were com

The great event of the year 1913—great from a world wide as well as a Latin American point of view—promised to be the completion of the Panama Canal the huge enter

Panama
Canal

prise undertaken by the United States of America at a cost of over £75 000
000 sterling
The official opening is designed to take place in January 1015
but it is probable that the new waterway will be operative for trial purposes
considerably before that date

Attention has been prominently directed to various scandals connected with the rubber industry of Peru consequent upon the publication in July (1912) of Sir Roger

Casement's belated report upon the slavery conditions prevailing in the Putumavo districts Much public indignation was occasioned by these revelations both the British and Peruvian Governments instituted further and appointed Commissioners to proceed to the spot a Select Committee of the House of Commons sat for several weeks to take evidence while a prosecution of the parties responsible British and Peruvian alike has been promised

In the following sections on the individual Latin American Republics they are taken for convenience of reference an alphabetical order

ARGENTINA¹

Argentina has an area of 1 139 079 square miles and the population according to the most recent estimates is 7 171 910 giving an average of 6 1 inhabitants per square mile. Imports were valued in 1910-11 at £71 161 273 and exports at £6 991 3 4 imports from Great Britain being valued at £21,727 400 and exports to Great Britain at £18 368 246. Imports from the United States at \$43 918,511 (U.S. currency) and exports to the United States at \$59,000 732. In 1911-12 the imports from the United States were valued at \$53,158,170 and the exports to the United States at \$29.84,016. The revenue was estimated according to the budget of 1912-13 at \$348.572.812 and the expenditure at \$308.741.629 paper (\$1 gold = 48.\$1 paper = 18.94). The total public debt amounts to £104.513,655 the external to £60,285.785, and the internal to £44.2.7.870. There is about £90.000 of additional debt made up of cedulas and currency provincial loans and government guarantees. The total mileage of railways is 19.843 and that of telegraph lines 37,229. The army has a strength of 24,466 men and 2,444 officers. The navy comprises 27 vessels with a personnel of 3,500.

Doctor Jose Figueroa Alcorta entered upon his office as President in March 1906, at a period when general prospenty prevailed. His succession to President Quintana who died during his second year of office gave rise to much jealous feeling but he succeeded in holding the scale evenly between all parties, and for the most part adhered to the policy of his predecessor.

About this time the shipping returns of the principal ports of the Republic, other than that of Buenos Aires, began to augment and before 1906 closed it showed the largest number of vessels entering and clearing on record (aggregate tonnage 2,876

See E B 11 460 et sea

780) There were also recorded the largest number of patents solicited, 717, of which 637 were granted. In regard to trade marks 2 324 were solicited and 2,107 were granted.

Early in 1907 was published the report of the Boundary Commission with Brazil by which the dividing hine was decided as follows—From the mouth of the Cuaren to the mouth of the Pepinguazu, from the mouth of the Pepinguazu to the main head waters of the river San Antonio, and from this point following the bed of the San Antonio to its disembougement into the river Iguazu, from the mouth of the San Antonio following the bed of the Iguazu to its disembougement into the Parans

On February 17 1907, the President appointed a Commission to investigate and revise existing tariff rates, with the idea of rendering articles of prime necessity cheaper for the consumer Commerce continued to progress the total amount for 1907 (including exports \$296 204,369, and imports \$285,860,693) amounting to \$582,065 052

In 1908 the national prosperity continued, the trade balance showing an advance of \$100 000,000 (about £0 000,000) in exports over the imports while immigration surpassed all records The agricultural area showed an increase of 216 per cent as compared with 1895 An Arbitration Treaty was concluded with Brazil (Nov 1908), while Argentine delegates were sent to attend the Refrigeration Congress in Paris

On January 5, 1910 a protocol was signed in Montevideo between Argentina and Uruguay, in regard to the navigation and use of the waters of the Rio de la Plata In September the Minister of Foreign Affairs in a remarkable speech referred to the fra termity between Chile, Argentina and Brazil, observing "We are the three strongest nations we must direct South America upon the path of peace and progress, other coun tries will see a powerful guarantee for liberty and justice in this triple friendship?

This being the centennial year of the Republic great rejoicings took place throughout the state and Argentina was the recipient of numerous congratulations and friendly messages from most foreign governments. The continued prosperity of the country was shown in the revenue increase, which amounted to 17 per cent over the budget anticipation, as compared with 8 per cent for 1909 and 6 per cent for 1908. The total volume of trade showed an increase of $3\frac{1}{2}$ per cent the imports increasing by \$49,000,000 while exports decreased by \$24,725,000. Among the several exhibitions held in the capital during the year were the International Agricultural, the National Industrial the International Fine Arts the International Exhibition of Hygiene and the International Railways and Transport. The Fourth Pan American Conference, in addition to several other conferences and congresses, was held in Buenos Aires.

In October 1910 Dr Alcorta's presidential term of office came to an end, when Doctor Roque Saenz Peña and Dr Victorino de la Plaza assumed the offices of President and Vice President respectively. The new Government met with a friendly welcome, and the President's programme of legislation advocating economies was well received Towards the end of the year (Dec 16th) Mr (now Sir) Walter Beaupré Townley the British Minister, received notice of transfer to Bucharest his designated successor being Sir Reginald Thomas Tower, who had served as British Minister in Mexico since 1906 In the last days of the year the British fleet, under Vice Amineral Arthur Murray Farquhar, visited the River Plate, and met with a cordial reception a number of enter tainments being both offered and returned in connexion with the event. The arrange ments in connexion with the demarcation of the Argentine Chilean boundary progressed satisfactorily. The Andine tunnel, connecting the two Republics of Argentina.

1 Pesos.

and Chile by rail, was completed and opened to traffic early in May, while as agreement was signed between Argentina and Uruguay for the laying of a cable between the capitals of the two countries, to form a part of their national telegraphic departments. Steps were taken towards establishing wireless communication with Europe, Asia and Africa, stations having already been erected along the Argentine coast. During the latter part of 1910 Mr James Bryce, British Ambassador to the United States, paid a visit to five of the South American States, including Argentina, calling twice at Buenos Aires

In January 1911 a series of destructive conflagrations occurred in Buenos Aires generally attributed to incendiarism property was destroyed to the value of £3 000,000 including the Custom House and most of its contents, as well as a large number of places of business. On February 13th the severe drought—the worst known since 1877—broke. In the following month (March 10th) two Argentine steamers were seized by Paraguayan insurgents and several Argentine citizens suffered ill treatment. Sir Walter B Townley left Buenos Aires on March 3rd. In the same month, the Argentine Club was opened in London. In April diplomatic relations with Bolivia after a long period of suspension were renewed, the Bolivian Minister in Lima. Peru, being selected as the representative at Buenos Aires. In May were held the centennial celebrations of the birth of Sarmiento a former President of the Republic. Serious scandals in connexion with the administration of the Government Land and Colonies Department were brought to light and an official investigation was ordered but upon the earnest representations of influential parties the President in June ordered all proceedings to be stopped. On July 29th the new British Minister Sir Reginald T Tower, arrived

An executive prohibition regarding Italian immigration occasioned much ill feeling between Argentina and Italy Difficulties had arisen between the two governments owing to Argentina insisting upon sending medical inspectors on board emigrant liners which were already under the supervision of a medical officer of the Italian navy Upon the Argentine government refusing to withdraw this measure in spite of the objection of the Italian government to admitting on board the medical officers of the republic the Italian Government 'with a view to upholding the national dignity' suspended by decree all emigration to Argentina The decree was cancelled in August 1912, and the emigration movement from Italy was resumed

The Foreign Offices of Argentina and Chile entered into a railway agreement between the two countries with the object of preventing a tariff war and of facilitating international communication. On August 26th the new Argentine. Dreadnought 'battle ship the "Rivadavia" was launched at Quincy, Mass. U.S.A.

In September the President vetoed certain subsidies agreed to by Congress but which had not provided the necessary resources the Executive exercising his prerogative under article 70 of the Constitution. In this month the Supreme Court of the Argentine Republic ruled that all railway companies were liable to payment of Municipal Taxes against which decision, appearing to be in contravention of article 8 of the Mitré Law the different companies petitioned Congress

A further 2345 miles of new railway were constructed in 1911 of which 746 miles were State lines. The total mileage in the Republic now amounted to 19 843 miles. Owing to labour troubles and inundations some of the railways suffered in their traffic receipts, although dividends were but little affected. The government sanctioned the amalgamation of the Buenos Aires Western and the Buenos Aires Great Southern Railway Companies with a combined capital of ever £68,000 000 subject to a railway being constructed from Dolores to Ajo, and a deduction on all freights being granted to the Government

In August 1912 the administrations of the Cordoba Central Railway, the Cordoba and Rosario Railway and the Cordoba Central Buenos Aires Extension Railway, agreed upon amalgamation subject to the approval of the Argentine Government A powerful London-New York Syndicate, in July 1912, consummated the combination of an important system of railways in Argentina, including the provinces of Entre Rios and Corrientes In November the Government refused the offer made by an Anglo French Syndicate for the acquisition of the State Railways.

In 1912 the estimated number of cattle in the Republic was 29,400,000 horned beasts, 7 615 000 horses 67,394 000 sheep Concurrently with the outbreak in Great Britain of foot and mouth disease it appeared in a milder form in Argentina The ports were closed to cattle from Great Britain from July 6th

The financial resources of the State were proved by Dr Rosa Minister of Finance, to be heavily embarrassed there being a net deficiency of \$70,000,000 as sum of \$400,000,000 was due upon public works under construction, and \$70,000,000 upon armaments. It was shown that the Agricultural Department absorbed 9 per cent and that official salaries required 40 per cent of the country 5 total resources the service of the National Debt called for 25 per cent, thus leaving 6 per cent to meet all other habilities. In July the Government issued, in Paris a 4½ per cent loan for £14,000,000 (\$70,000,000 gold) which was offered at 99½ per cent. The public financial responsibilities of Argentina amounted to £104,513,655 in addition to £90,000,000 of unpaid debts made up of cedulas and currency debt guaranteed by the National Government and loans issued by the Provincial Government and the Municipality of Buenos Aires. The Currency debt carries no interest but interest has to be found upon £150,000,000 (out of the total of £194,515,655). Dr Rosa resigned his portfolio on August 3rd, and was succeeded in office by Senor Enrique Perez.

Two Argentine Bolivian Sub Commissions started on June 28 and July 3 1912 escorted by troops drawn from both Republics, to map out the demarcation lines of the frontiers During the investigations a Bohvian fort (Valibran) was discovered on Argentine territory no doubt accidentally erected there the River Pilcomayo near which the fort was built frequently changing its bed Friendly negotiations ensued for the removal of the fort to the Bolivian border In July, General Roca formerly President of Argentina, went to Brazil as Special Envoy and was accorded a builiant reception He retired in September 1912 and was succeeded by Dr Lucas Ayarragaray The return to Rio of Dr Campo Salles Brazilian Minister at Buenos Aires as Mmister took place in July In this month also Dr Jose Figueroa Alcorta President 1906-10 was offered the post of Special Ambassador to Spain, while the Argentine Minister to London was raised to the dignity of Envoy Extraordinary and Minister Plenipotentiary On August 5 1012 was signed the protocol of a treaty of reciprocity between Argentina and Uruguay relative to coasting and river navigation commerce

For the first time during the past decade the position of the country's trade (in 1911) showed in an unfavourable light the trade bilance against the Republic amounting to \$4° 11, 148 while in 1910 the balance had been in its favour to the amount of \$-0.855 399 For the first 6 months of 1912 (to June 30th) the balance once more showed in favour of the Republic Serious strikes occurred upon the railways and in the docks, and endured for some months while bad crop weather up to August was experienced

The cost of living in the capital again increased and showed an advance of fully 100 per cent above that prevailing 20 years ago (The population of Buenos Aires on October 31 1912, was 1,405 061) Meanwhile dividends and salaries remained un changed Railway expenditure has advanced very rapidly but revenue has shown very little inclination to meet it rates displaying a tendency to fall Yellow fever proved troublesome and a plague of mosquitoes visited the greater part of the country The Government passed a special vote to fight the danger threatened

On June 30th the Government submitted to Congress a law imposing the principle of taxation on land values the project following closely along the lines of the English Finance Act 1900-10. In July four new destroyers built by Messrs Cammell Land & Co of Birkenhead — "Santago' "San Luis," "Santa Fe" and 'Tucumán "—which were intended to be added to the Argentine Navy were completed. The order, how ever was subsequently rescinded and in October these vessels were sold to the Greek Government. In spite of the opposition offered by the Ministers of Foreign Affairs and Finance, the Senate had adopted by 15 votes to 14, a minute asking for the construction of a third "Dreadnought" (Sept. 17th)

General José Inocencio Arias, Governor of the Province of Buenos Aires, and one

of the leading statesmen of the Republic, died at the age of 75 on September 11th, being succeeded by Colonel de la Serna

BOLIVIA1

Bolivia has an area of 708,195 square miles, and the population according to the most recent estimates is 2,267 935, giving an average of 3 38 inhabitants per square mile Imports were valued in 1910-11 at £5 837 141 and exports £8 263,117 Imports from the United States in 1910-11 were valued at \$891,624 (US currency) and exports to the United States at \$327, in 1911-12 imports at \$991,525 and exports at \$9 884 The public debt amounts to £1,752,291 (£1,500 000 external and £252,291 internal) The mileage of railways is 860, and of telegraph lines 3,100 The army has a strength of 52 500

A Commercial Treaty between Bohila and Peru was signed June 1, 1906, and the Customs Tariff Act of December 31 1905 came into force that year. The monetary system was reformed, providing for a gold standard (finally adopted on Dec. 31 1908) the national credit improved and the system of taxation was revised. Concessions for new railways averaging 836 miles were granted to an American Syndicate New mining regulations came into force April 20th. On December 16th the interest on unpaid licences was reduced to 9 per cent per annum. the law of October 1800 and article 69 of the mining rules and regulations of October 28 1882, were also modified.

The financial resources of the State were increased during 1906 by the payment of the Brazilian and Chilean indemnities approximately \$14,000,000 being used exclusively in railroad construction. Treaties were signed with Brazil for the verification of the River Verde and the demarcation of the boundary line. It was agreed to extend over the period of one year the negotiations of the arbitration tribunal created for the purpose. A dispute arose between the Government and the Holy See because of the adoption of an amendment to Article 2 of the Constitution, and a law abolishing ecclesiastical privileges and the establishment of civil marriage. Finally, Bohivia withdrew her diplomatic representative from Rome

On June 20 1907 a new Land Law comprising 70 articles was introduced

Improvement in the value of farming lands took place in 1008 the increase in prices since 1903 amounting to nearly 50 per cent. On August 6th the 4 years term of President Ismail Montes ended when he should have been succeeded by the President Elect Dr Fernando E Guachalla, formerly Bohvian Minister to the United States he how ever died in July Señor Montes continued in office until August 1909 when he was succeeded by Senor Eliodoro Villazon, elected to the chief Magistracy for the 4 years ending August 6, 1913 Important economic measures were enacted to further the de livery of native products at the Pacific coast ports the unification of the railway systems of the Republic, extending to about 400 miles of main line, was determined upon. A commercial treaty was signed with Germany to last for ten years

For the years 1909—10 the financial obligations of the Republic were met, despite loss in revenues from Custom House receipts. A loan amounting to £1,500,000, raised in Paris (Nov. 1910), the second foreign indebtedness contracted by Bohvia (and out of which the £500,000 borrowed in 1908 was to be repaid) was arranged, including principal and interest upon the Home Debt and upon the £400.000 Morgan Debt (Dec. 1908) the total funded debt of the Republic amounted to a little over £1.700.000. The Bud get account showed a deficit of 7,553,996 bohvianos (silver), although the Presidential Message had estimated a surplus

In January 1911 the establishment of a National Bank was authorised with a capital of \$2,000,000 one half contributed by the Government the remainder by Umted States financiers The Mercantile Bank and Banco Francisco Argandona respectively increased their capitals to £1 000,000 On July 15th the Government sold to the Peruvian Corporation for £374,912 the 101 kilometres of the Guaqui La Paz Railway

Early in 1911 a new Cabinet was formed and an extra Session of Congress was sum moned for the purpose of discussing the Chilean Protocol concerning railway guarantees,

BRAZIL 1071

also an Extradition Treaty and a Treaty of Commerce and Navigation with Brazil were passed. In April three German officers were engaged to instruct the Army. Colonel Fawcett. British Commissioner, continued his work (commenced in 1910) of defining the boundary with Peru, the undertaking proving of a prodigious nature. Instead of confining his explorations to the rivers. Colonel Fawcett struck inland in order to investigate the rumours that 'white Indians inhabit the unexplored regions."

In March 1912 a Consular Convention with Belgium a General Arbitration Treaty with Brazil and a Treaty of Peace with Colombia were promulgated. On August 6 1912 the Arica-La Paz Railway was opened the Presidents of Bolivia and Chile being present. A discovery of coal near Lake Titicaca was made which meant a great deal to industrial development of the country, all coal hitherto having been imported from Great Britain or Austraha at great trouble and expense. The Republic also celebrated the eighty seventh anniversary of its Independence on August 6 1912. On September 23, 1912 the Cabinet was further reconstructed after a 15 months' existence.

A monopoly was created (Sept 10 1912) in the sale of hrearms ammunition, and explosives the proceeds being devoted to the purchase of war material and erection of a cartridge factory

BRAZIL1

Brazil has an area of 3 °18 091 square miles and the population is 21,461 100 according to most recent estimates giving an average of 6 6 inhabitants per square mile. Imports were valued at £47,154 000 and exports £62,001 287 (1009–10). Imports from the United States in 1910–11 were valued at \$27 240 146 (U $^{\circ}$ currency) and exports to the Linited States at \$100 867 084, in 1911–12 imports at \$34,678,081 and exports at \$123 881 644. The public debt amounts to £134 833 160 (£95 383 120 external and £39 450 040 internal). The mileage of railways is 13,271 and of telegraph lines 72 /31. The army has a strength of 31 823 men and 750 officers. The navy comprises 37 vessels with a personnel of 8,500

Upon the death (June 1909) of Doctor Alfonso Penna during his term of office (1906– 10) as Chief Magistrate the Vice President Senhor Nile Peçanha succeeded to the Presi dency, and served until the end of the interrupted term (Nov 1910) The Republic at this time was slowly recovering from the severe commercial depression which had existed for two years The balance of trade proved to be the greatest ever recorded in the history of the country and for the first time the aggregate value of imports and exports exceeded the fit ooo ooo mark In other directions Brazil enjoyed peace and progress twenty one different Arbitration Treaties being signed in 1909-10, making 28 treaties concluded within a few years the countries covered including Chile Argentina Portugal France Spain Mexico Honduras Venezuela Panama, Peru Ecuador Costa Rica Cuba, Great Britain Bohvia, Nicaragua Norway, China, El Salvador Switzerland Haiti and the Dominican Republic On October 8 1900, a convention was rathed at Rio between Brazil and the United States establishing the status of naturalized citizens who renew residence in their country of origin On April 27, 1910, Congress approved the boundary Treaty between Brazil and Uruguay, drawn up on October 30, 1909 by which the latter country obtained full rights to the navigation of the Lake Mirim, which hes between the two countries and also the use of several small islands on the lake Upon the same date a treaty was approved with Peru fixing the boundary between the State of Acre and the river Javary All rights in this State were abandoned by Peru, but Brazil ceded a small portion of adjoining territory rich in rubber, and agreed to expend £2,000,000 upon the construction of a railway to a point whence the rubber could be transported by way of the Amazon River to the markets of the world

A payment of \$540 000 (£108,000) was made to Bohvia in connection with the award of the Commission, given on November 17 1903 Colonel Fawcett continued his work of defining the boundaries between Brazil and Bohvia joining his party at Matto Grosso in August, and, after being captured by the Paraguayan revolutionaries, ultimately reached

1074 BRAZIL

Buenos Aires on October 11th, and La Paz on November oth Brazil was represented abroad at several important international Congresses, while the State was added by the Brussels Sugar Convention to the list of countries according bounties

On October 21, 1909, the Department of Agriculture, Industry and Commerce established the Bureau of Animal Industry, designed to promote cattle rearing

The mancial condition of the Republic which had been somewhat improved under the Presidency of Dr Alfonso Penna, again showed signs of distress. The Executive found it necessary to issue a decree (Aug. 12, 1909) reorganizing the financial administration of the Acre Territory, and drawing the attention of the public generally to the great excess of expenditure over revenue. The increase in the National Debt was explained partly by new loans which had been raised for national improvements such as increased dock facilities and new failroads. The railway mileage increased by 366 miles and important concessions were granted to many foreign syndicates and individuals Port improvement works were also commenced, or were continued at Rio de Janeiro Manaos, Pará. Natal, Cabedello Pernambuco. Bahia. Santos. Florianopolis and Rio Grande. The line uniting Brazil with Uruguay was completed in July 1012.

On January 3 1910, financial conditions again being mended payments on account of the Foreign Debt were resumed anticipating by eighteen months the time specified in the Funding Loan agreement with foreign bondholders (of June 1898) when the amortisation was suspended for thirteen years until June 1911. The Public Debt was also later on reduced by £3 121 961. On March 1st Marshal Hermes da Fonseca was elected President for the ensuing term and shortly afterwards he commenced a tour of Europe, being well received at most of the foreign Courts. He visited London in Septem ber returning to Brazil in November.

On March 17 1910, a new 4 per cent (gold) Federal Loan for 100 000 000 frs was floated in Paris, being offered at $89\frac{1}{2}$ per cent, and intended for the construction of the Goyaz Railway. At the same time negotiations were authorised for the raising of a loan of £10 000 000 by the House of Rothschild for the purpose of converting the 5 per cent gold bonds of the Foreign Debt into 4 per cent thus saving £400 000 per annum in interest. Financial conditions continued to strengthen, the annual deficit in the revenue showing a considerable reduction. The rate of exchange rose towards the middle of the year to 37 cents ($1/6\frac{1}{2}$) gold per milress but by decree the Government established the rate at 32 cents ($1/6\frac{1}{2}$) gold

Commercially the Republic showed the highest total of foreign trade since its history the exports exceeding the imports by £14,926,370 On June 2 1910, a surfax of 20 per cent for the port imports at Pará was abolished On September 2nd an official decree authorised the creation at Rio de Janeiro of a Merchant Ship Brokers Exchange On November 15th Marshal Hermes da Fonseca took office as President and shortly after wards approved a new code of criminal procedure for the Federal district

Within a few days of the beginning of Marshal da Fonseca's term the country was confronted with a senous naval mutiny which broke out on November 24 1010 on board the two "Dreadnought" battleships— Minas Geraes" and 'Sao Paulo' The mutineers who complained of ill treatment at the hands of their officers fired upon the capital causing considerable damage several people being killed in the streets. The President who in 1904, while head of the military school at Rialengo, had been enabled to prevent the students from joining in the revolution against President Rodriguez Alvez, found much difficulty in dealing with the situation. An amnesty was granted to the mutineers, while a battalion of troops which had joined them was allowed to surrender without undergoing punishment. The first mutiny was shortly afterwards followed by a second, which, however was suppressed with less difficulty.

Apart from political and financial troubles, the progress of the Republic was satis factory. The Customs returns for 1910 showed an increase of 10,000,000 milress over the previous year, while the number of factories throughout the Republic increased to 3,300. The rate of exchange was again raised to $1/\delta_{17}^{2}$, but a change of Government shortly following resulted in the rate again being made 1/4. Railway mileage increased

BRAZIL 10/3

by 1,162 miles over the previous year, bringing the total indeage of railways in the Republic up to 13,279 miles Towards the end of 1910 the new Government floating dock, built by Messrs Vickers at Barrow-in Furness, and costing £187,700, arrived at Rio The number of immigrants in 1910 was 88,564, a total much above that of the previous ten years, but still below that of the decade preceding

Following upon the naval mutiny (1910) the navy, by Governmental Decree was entirely reorganised in 1911 Doctor Nilo Peçanha, ex-President, visited Europe, including London and Paris in June 1911 The Government successfully concluded arrangements with the Italian Government regarding emigrants from that country entering Brazil The result was a considerable increase in the number of colonists arriving over 100 000 Italians leaving (Sept 13th) for the Republic through Rio The total number of immigrants amounted in 1911 to 133 600, an increase of 45 036

Considerable improvement took place in foreign commerce excluding specie to the value of £10,205 300, the value of the trade for 1911 was £129 842 300 (as compared with £122 735 800 for 1910) an increase of £7 106 500 or 57 per cent. The increase in the exports amounted to £4 300 000 making the total exports for 1911 equal to 1,005 000 contos (£30 250 000). The total receipts of the State Railways amounted to 32 197,000 milress which, however, still left a loss upon the working.

The deaths of several prominent Brazilian statesmen and ex statesmen may here be noted. Dom Joaquim Murtinho died on November 12 1911. Early in February 1912. Baron do Rio Branco Minister for Foreign Affairs died at the age of 65 his successor being Senhor Lauro Severeano Muller, who under President Alvez, had been Minister of Public Works and Railways. On February 21, 1012. Visconde de Ouro Preto a prominent figure in the days of the Empire died at the age of 76 while on March 10th Senhor Guinle a considerable land owner died aged 66. In July 1012 General Quintino Bo cayuva one of the founders of the Republic died at the age of 76

The better relations established between Brazil and Argentina were proved by the appointment in July 1012 of Dr Roca to represent Argentina at Rio de Janeiro (being succeeded in November 1912 by Dr Lucas Ayarragaray) and of Dr Manuel Ferraz de Campo Salles, ex President of Brazil (1898-1902) to act as Minister to Argentina. The latter was an appointment which gave considerable satisfaction in Argentina since Dr Salles during his administration had striven to arrive at a good understanding with the neighbouring Republic having been the first Brazilian President to visit Argentina (Oct 1910) while President Roca, in July 1899 had at his invitation been the first Argentine President to visit Brazil

The finances of the Republic continued to show a deficit although the amount for the year 1911 did not exceed £100 000. The National Debt however had been in creased during the previous year by the sum of £5 571 363 and frs 60 000 000 and now stood at £83 383,120 and frs 300,000 000. By the end of 1912 the total deficit was expected to reach 260 000 contos (£1,300 000), and the external and internal international debts to exceed 3 000 000 contos (£150 000 000). The financial situation was described by Senhor Serze dello Correa ex Minister of Finance as extremely delicate? In spite of the fact that the national revenue had nearly doubled in the decade 1901-11. A feature of the Government's policy in order to increase the revenue was the gradual elimination of exemptions from import duty while full taxation was also imposed upon all materials imported in all departments—Federal State and Municipal. This action on the part of the Government senously affected foreign companies working in Brazil

As a further effort to save the national treasury from financial loss the Central Rail way (built and operated by the Government at an enormous annual deficit) was offered on lease to a syndicate — In the last days of July 1911 a serious collision occurred upon the Central Railway which resulted in the death of over 100 persons — The line uniting Brazil with Uruguay was inaugurated at Rivera, the frontier July 18, 1912

In June 1911 Dr Rodriguez Alvez ex-President of the Republic took over the Presidency of São Paulo from Dr Albuquerque Lines who had held it for four years The State of São Paulo had now reached the apex of its prosperity immigration progressing

1074 CHILE

and railway extension increasing to an unprecedented extent while the high prices of coffee, upon which its prosperity mainly depends, were well maintained

On January 13, 1912, the Minister of Marine—Admiral Marques Leão—resigned, and was succeeded by Admiral Belfort Vieira—Serious political disturbances occurred this year at Bahia (capital of the State of the same name), the Government resigning, and being succeeded temporarily by the President of the Court of Appeal. The troubles arose from the city of Bahía refusing to obey a writ of Habeas Corpus issued by the Federal Court regarding certain Opposition Deputies—Troubles continued for some time, while a similar condition prevailed in the State of Cerá, where, owing to the elections of a new Governor feeling ran high—In September 1912 an outbreak, led by a fanatical monk, occurred in the State of Catharina, but was suppressed by Federal troops

On July 24, 1912 the Senate passed a bill making it obligatory upon all States in the Republic to obtain the Federal sanction before contracting any loans. The bill was intended to prevent abuses, and to avoid complications between the different States of the Federation. The State of Rio de Janeiro floated a new loan for £3 000,000 at 5 per cent in London on September 30th, which fell to a discount, the public subscribing less than 20 per cent of the amount.

In May 1912, at the banquet of the Pan-American Society held in New York, some sensation was occasioned by the Brazilian Ambassador Senhor da Gama denouncing the attitude of the United States towards Latin American especially the seizure by the American Government of nearly 1 000 000 bags of coffee belonging to the Brazilian Coffee Trust, but the United States subsequently released the coffee

In July 1912 a new Brazilian coinage was authorised the standard gold coin corresponding in weight, denomination and form with the British pound sterling the silver money to correspond with that of France

The protracted labour unrest, which first became acute in January, came to a head in August 1912 when serious strikes occurred at both Rio de Janeiro and Santos the stevedores in both ports refusing to work. Thousands of strikers prevented ships from being loaded and unloaded, and the railways from operating their lines. Heavy losses were incurred by merchant shippers. The Santos strike terminated on September 6 but a further strike among the employees of the Port of Para Co occurred on September 28th. In the same month frosts caused damage to the coffee crops in the State of Sao Paulo, the loss being equal to 20 per cent reducing the production to 10 000 000 bags.

On September 27, 1912 the Minister of Agriculture introduced a measure conferring all rights of citizenship upon the Indian population, which had hitherto been regarded in the eyes of the law in the position of orphans

CHILE 1

Chile has an area of 292 580 square miles and the population according to the most recent estimates is 3,329 030 giving an average of 111 inhabitants per square mile Imports in 1910-11 (one year) were valued at £26,174 276 and exports at £25 455 702 Exports to Great Britain were valued at £11,012,989 in 1911 and imports from Great Britain at £8 382 586 Exports to the United States in 1910-11 were valued at \$10 041,000 (U S currency) and imports from the United States at \$12 044,578, in 1911-12 exports at \$20 164,848 and imports at \$15,491,846 The revenue was estimated according to the budget of 1912-13 at £15,799 870 and the expenditure at £17 368 045 The total public debt amounts to £43 056,007 (£34,728,800 external and £8 328 00, in ternal) The total mileage of railways is 3,571 and that of telegraph lines 16,407 The army has a strength of 17 123 men. The navy comprises 28 vessels with a personnel of 6,000

Peaceful conditions continued during the early years of President Jorge Montt's tenure of office, which began in September 1906, cheap money proving favourable in many ways to business and contributing to a general and steady improvement in trade. The overtrading and excessive speculation in shares, which had occurred in 1908, prac

1 See & B vi 142 et seq

CHILE 1075

tically ceased by the end of 1000 while accumulations of goods imported in great haste and undue quantity after the earthquake were rapidly absorbed. The Government had intended to return to gold currency in January 1910, but a new law was passed deferring the conversion for a further five years.

The condition of the nitrate industry at this time proved very unfavourable, the trade combination, restricting the output having terminated at the end of April 1909, and the efforts to renew it having failed The price fell steadily to § a quintal

The Republics of Chile and Argentina celebrated their centenaries in 1910 and the Presidents of the respective States exchanged visits. At the Chilean celebration Great Britain was not represented owing to national mourning but a special mission of congratulation was subsequently sent to Chile being entrusted to two British warships. The diplomatic rupture with Peru continued, the Peruvain Minister being recalled from Santiago while the proposals formulated by Chile in March 1910 for carrying out the disputed plebiscite in accordance with the Treaty of Ancon were left unanswered. In December 1912 however a settlement was said to be in sight

On August 16 1910, President Jorge Montt, while on a visit to Bremen Germany succumbed to heart complaint His successor Señor Elias Temandez Albano Vice President also died at Santiago September 7th The vacant presidency was filled by the election of Don Ramon Barros Luco November 15 1910 His nomination was unopposed being a matter of compromise between the different Liberal factions and meeting with the benevolent neutrality of the Conservatives The political atmosphere however was much disturbed at this period, two measures advocated by the Government but strongly opposed by Congress being under consideration These measures were the extension of State primary education rendering it compulsory and the Sanitary Code destined to include compulsory vaccination. The Government was also faced with a heavy deficit, 1864 000 000 such amount being due on account current to the Bank of Chile and borrowed at the highest legal rate 6 per cent per annum of the financial stringency existing the Department of Public Works entered upon an especially wide programme of new undertakings including railway extensions and the construction of port works at Valparaiso San Antonio Iquíque and Talcuhuáno

On July 5 1011 the award made by King George V acting as aimable compositeur in the Alsop case dispute between the United States and Chile was signed and published This was the second occasion upon which a British sovereign had been appealed to by Chile the previous award settling the boundary dispute between Argentina and Chile being made by King Edward VII The Alsop claim had its origin in a certain con cession made by Bolivia to Dom Pedro Lopez Gama a Brazilian who came to Chile in 1860 and married a Chilean in 1882 dying in 1883. Previous to his death he had mortgaged his concession from the Bolivian Government to Messrs Alsop & Co a Val paraiso firm which included a number of American citizens After the war of 1879 between Chile and Bolivia the former State took over the liabilities in connection with the Alsop claim against Bolivia Being unable however to arrive at a compromise Mr Secretary Knox of the United States in November 1909 sent Chile an ultimatum demanding that the sum of \$1 000 000 (£200 000) should be paid to the claimants within 10 days or alternatively that the matter be submitted to the Hague tribunal in to the friendly arbitration of King Edward VII and on his death the office devolved upon King George V The original amount of the claim was £600 000 with interest the sum offered by Chile (in 1904) was foo ooo, while the sum adjudged by the arbitrator to be paid by Chile to the claimant through the United States was £187,000

The financial position of Chile which had appeared satisfactory in 1909 caused some misgivings towards the middle of 1910 the foreign debt at this period amounting to $£25\,636,000$ In the following year (Nov 1911) a further £5 000 000 was bor rowed, in addition to a sum of £2,000 000 which had been raised towards the end of 1910 for the reconstruction of the Valparaiso harbour and the completion of the Arica-La Paz

¹ One Chilean gold \$ = 1s 6d

Railway. General depression was experienced in financial circles and the economic situation was regarded with some apprehension. The extent of the paper currency was largely responsible for checking the influx of further foreign capital, and after many discussions in the Chamber the Parliamentary Committees and the Government parties on April 24, 1912, agreed not to make any further issue of paper money

In August 1911 a new Ministry had been formed with Senor Ramón Gutierrez as Premier succeeding the Ministry which had been formed as recently as the previous April. The new premier recognised the necessity of regulating the national finances and his first endeavour was to reduce the expenditure. By July 1st the foreign debt of Chile had however increased to £35,454 475 since somewhat reduced. In December 1912 the Government intimated its intention to raise a further internal loan for £5 000 000 exclusively destined to renovate the workshops and rolling stock of the State Rail ways and to double track certain portions of the lines. Further revenue was also to be raised by loans for the construction of harbours.

The ordinary and extraordinary national revenue for 1911 amounted to £8 173 400 in notes and to £6 517 200 in gold. The expenditure both ordinary and extraordinary totalled £10 215 300 in notes and £4,558 200 in gold thus showing a deficit of £915 000 in paper and an excess of £837 200 in gold. The addition of these balances to the corresponding figures of 1910 gave the total result at the end of 1011 as a deficit of £4 320 600 in notes and an excess of £1 426 200 in gold the net deficit being £2,800 500. The year 1912 opened with a deficit of \$66 265 939 to which was added a further sum of \$5 480 883 corresponding to interest paid to the Bank of Chile. The total amount of deficit thus came to \$71 746 818. The year s (1913) working was expected to show a deficit of \$41 452 970 in the absence of the rigid economies recommended. If these should however be exercised the financial year scemed likely to close with a surplus

On April 10 1912 the Chamber approved a law regulating the framing of the Budget in such a way as to prevent the expenditure exceeding the receipts. The recommendation however proved ineffective the expenditure being maintained at a high rate and exchange fell with disconcerting rapidity

The Chilean Railway over the Andes from Arica to La Paz (Bolivia) was completed on March 4 1912 having been commenced in June 1909. The distance is about 2,0 miles 24 of which are constructed on the rack system. On December 7 1912 Govern ment engineers completed the plans for a new transandine railway through the Maipo River Valley, placing Santiago de Chile the capital of Chile in direct communication with Buenos Aires the capital of Argentina, the journey to occupy but thirty hours

On August 8 1912 the Rivera Figueroa Ministry resigned and a new Cabinet composed of Senores Jara Rivas, Gana Vicuna Villegas Echiburu Vienna Subercaseaux Oscar Viol and Hunneus was formed

The nitrate industry was very prosperous throughout 1912 prices advancing steadily the forward quotation for 1913 was 78 6d per quintal. On October 2nd the Government offered for auction 600 hectares (= 1500 acres) of nitrate grounds in the Province of Tarapaca. The minimum price was 18 for every 100 kilogrammes of nitrate in the lots. The results obtained in the south of Pena Grande were so satisfactory realising \$5414,102, that the Government announced a further series of sales

COLOMBIA 1

Colombia has an area of 438,436 square miles and the population according to the most recent estimate is 4,313,000, giving an average of 9,8 inhabitants per square mile Imports were valued at £3,405,127 and exports £3,525,030 in 1909-10. Imports from the United States in 1910-11 were valued at \$4,905,934 (U S currency) and exports to the United States at \$8,994,460 in 1911-12 imports at \$5,748,859 and exports at \$11,219,481. The total public debt amounts to £3,444,634 (£2,786,600 external, £658,034 internal). The total mileage of railways is 614 and that of telegraph lines

is 10 557 The army has a strength of 7000 men The navy comprises 9 vessels with a personnel of 850

Under the regime of President Rafael Reyes from 1905 onwards, the mineral, agricultural and timber resources of Colombia were actively developed. The despatch of Senor Enrique Cortes to the United States as Colombian Minister, in 1907 had the effect of directing North American capital to the Republic, and considerable United States investments were made in mines and railways among the latter was a line between the cities of Palmira and Cartágo, in the Department of Caúca, in addition to that of Nemocón to Santa Rosa de Viterbo. Important tariff modifications were introduced, exempting certain merchandise from the payment of import duties, and a decree was issued for the protection of the national forests containing specific restrictions applied to the exploitation of rubber and tagua, or vegetable ivory

In February 1908 a new Province, that of Camilo Torres was created by the division of the province of Santander into two equal parts. Municipal government was also much encouraged and increased facilities were afforded to the people for a more decentralised form of government

Political peace after a war of three years duration, was maintained with but few interruptions between 1906 and 1909 when a wide spread agitation against the govern ment of General Rafael Reyes and threats against his person, were occasioned by the introduction of an unpopular tripartite treaty between Colombia, Panama and the United States The entire country protested against ratification This feeling was so strong that the President's life was endangered which led to his leaving the country with great secrecy, by way of the little used port of Santa Marta. He arrived in England, on board a Manchester trut boat accompanied only by his two young sons, on June 28 1909 After his departure the Vice President General Jorge Holguin, for merly Minister of War temporarily occupied the position of Chief Magistrate His most important enactments were the re-establishment of commercial relations with Venezuela after a break of several years the settlement of the long outstanding bound ary question with Peru and an ad referendum arbitration Convention between Colombia and Peru, covering the navigation of the Amazon river and the commercial rights thereon while arbitration treaties with Great Britain and France were also signed and approved The diplomatic and consular services of the republic were reduced to two in Europe and two in America with a total of eight consulates

In July 1909 revolts took place in the capital and martial law was proclaimed Similar disturbances occurred at the chief port of the country. Barranquilla where the military revolted and a provisional government was set up. The feeling was strong against General Holgium on account of his close connections with the refugee ex Presi dent Reyes. The popular demand for his resignation and the election of General Ramon Gonzalez Valencia, the Vice President, was conceded. The election took place on August 4th the period being for the remainder of General Reves unexpired term, about twelve months. The American Minister to Colombia. Mr. Elhott Northcott on account of the political situation was unable to leave Barranquilla and the U.S. Government despatched the cruiser 'Tacoma' to protect him. The port of Barranquilla was blockaded by the Colombian gunboat 'Cartagena. Shortly afterwards the revolutionary leader. General Daniel Ortiz surrendered, and was permitted to go free

The new Government speedily found that the reported improvement in the Republic's finances during the rule of President Reves had been exaggerated, as a matter of fact, the State was even more deeply involved financially than before. The Government became seriously embarrassed having no ready funds with which to meet even pressing obligations while the fees due to members of Congress remained unpaid. The credit of the country fell very low exchange being quoted in the ratio of 1 to 100. The reported balance in favour of the country 5 trade, as in 1908, also proved to be inaccurate while the economy which was supposed to have been exercised in the administration under the last President appeared equally fictitious, notwithstanding several decrees that had been issued dealing with the matter

During the regime of General Valencia efforts were made to restore the credit of the country—which generally remained under perfectly peaceable conditions—Great monetary stringency nevertheless was experienced, and towards the end of November 1909 it appeared doubtful whether the coupon due upon the Foreign Debt would be paid—A few days however before the time expired, a private firm in London, holding considerable interests in Colombia, found the necessary balance, and the coupon was duly met—Since then, payments have been made with more regularity

Railway progress continued slowly a passenger and freight service was established between the capital of Bogotá and the Magdalena River port of Gerardót The agricultural industry of the country also advanced, and at the end of 1909 it was estimated

to contain 4,000 000 head of cattle

Diplomatic negotiations with the United States respecting compensation for the loss of Panama, which had been initiated by ex President Reyes while serving as Special Ambassador at Washington in 1906 were definitely broken off. The United States Legation was stoned by a mob on March 8, 1910 but the Minister Mr Northcott was uninjured. An anti American sentiment continued to manifest itself and on March 22nd some Englishwomen, named Martin, being mistaken for Americans, were mobbed and ill treated

In April 1910 a popular outbreak occurred in Bogota against Peru the Legation being attacked by a mob incited by a proclamation issued by the President of Ecuador (General Eloy Alfaro) soliciting Colombia's aid against Peru on account of frontier disputes

On July 15, 1910 Señor don Carlos E Restrepo was elected Constitutional President by Congress to serve for the four year term 1910-14 Financial stringency was still experienced and the Government laboured under difficulties. Strict and effective economies however, were for the first time introduced, and the revenues were officially reported to show a surplus. A further limited amount of foreign capital mostly from the United States found its way into the country and among other industries which were thereby developed was that of banana-cultivation while cattle breeding upon a more definite basis and the establishment of packing houses, was initiated. In this year the President invited a Military Mission from Chile to establish schools, and to reorganise the Colombian Army

The Centennial Celebration took place between July 20 and August 7, 1910, when the national fetes were attended by delegates from all parts of the world

The financial condition of the country became steadily worse in 1911 and it appeared from the President's address to Congress in July that 'the country was starving itself in order to meet the obligations upon its foreign debt'. All classes of officials were without the payment of their salaries and this extended to a portion of the army and police. The estimated revenue was \$9.779.500 gold (£1,955,900) and the Assembly voted expenses to the amount of \$11.768.450 gold (£2.353,690). In accordance with Laws 33 of 1892 and 59 and 83 of 1910 the Government suppressed several official posts reduced salaries and diminished other expenses by a total of \$2.830.761 gold (£566.152). A contract was awarded to an English firm for a new silver coinage equal to £50.000. The long-outstanding dispute between the Government and the Pacific Steam Navigation Company was settled, and a new postal contract was entered into

In March 1912 the relations between the United States and Colombia threatened to become further strained, in connection with the projected visit to the Latin American States by Mr Philander Knox, the United States' Secretary of State The Colombian Minister at Washington General Pedro Nel Ospina, addressed a strong letter to the Assistant-Secretary of State at Washington (Mr Huntington Wilson), stating that "in his opinion the visit of Mr Philander Knox to Colombia would not be welcome "Although the Minister declared later that "he was authorised by his Government at Bogotá to make this statement" he was recalled at the request of the Washington Government being replaced by Señor Don Julio Betancourt A Treaty of Amity between Colombia and Bolivia was signed at La Paz on March 21st

Severe and prolonged drought in the early months of 1912 was experienced

throughout the country, resulting in practically the whole of the river traffic being suspended for several months. The British Minister (Mr Strong) was unable to travel up the Magdalena River to the capital while the operations of the largest of the transport undertakings the Colombia Navigation Company and the Cartagéna (Colombia) Railway Company, were affected owing to the cessation of their traffics. The coffee crop proved a partial failure some 50 per cent being lost

Negotiations were subsequently reopened at Washington between the United States represented by Mr Huntington Wilson, Assistant Secretary of State and Co lombia represented by Señor Don Julio Betancourt Colombian Minister, for a settle ment of the outstanding disputes. At the same time there was manifested an agitation among the prominent citizens of the Pacific provinces to force the Colombian Govern ment to settle the differences with the United States before the opening of the Panama Canal which would have an important effect upon the development of the provinces along the Pacific Coast in which one third of the inhabitants of the Republic reside In August 1912 the United States vice Consul Mr William B Macmaster was assas smated in Bogota, after several fruitless attempts upon his life had been made

COSTA RICA¹

Costa Rica has an area of 23 000 square miles and the population according to the most recent estimate is 379 500 (including about 4000 Indians) giving an average of 165 inhabitants per square mile. The imports were valued at £1 630,500 and exports £1 728,901 in 1910. Imports from the United States in 1910–11 were valued at \$3,473 376 (US currency) and exports to the United States at \$4,838 416 in 1911–12 imports at \$3 647 187 and exports at \$3 817 861. The revenue was estimated according to the budget of 1912–13 at £8.7 700, and the expenditure at £825 339. The total public debt amounts to £6 185 234 (£3 380 500 external and £2 795 734 internal). The total mileage of railways is 427 and that of telegraph lines is 1472 7. The army has a strength of 1000 men

Adverse natural conditions materially militated against the prosperity of Co ta Rica in the early months of 1909. Disastrous storms the failure of the crops and stagnation in commercial circles combined to bring about severe economic depression. In this year the total trade declined by about \$3,500,000 (£700,000)

The Central American Court of Justice sitting at Cartago, rendered in 1909 its first decision in the settlement of Central American questions. This tribunal had been established through the action of the Peace Conference held in Washington at the end of 1907 the Court being inaugurated in May 1908 in a special building provided by the generosity of Mr. Andrew Carnegie at a cost of \$100,000 (£20,000)

The unsettled political conditions of Nicaragua, in combination with those prevailing in Guatemala and Honduras were to some extent reflected in the internal affairs of Costa Rica. In connection with the presidential elections in the month of September rioting occurred both in the capital of San Jose and other cities. The two candidates were the retiring president. Senor Iglesias and Dr. Ricardo Jimenez president of the Costa Rican Congress. The latter was elected to succeed Señor Cleto Gonzalez Viquez and assumed office on May 8, 1910.

The financial conditions of the Republic continued difficult in 1910 Since 1901 there had been default upon the foreign loan amounting with accumulated interest to approximately £2 593,000 In January 1911 the bondholders were compelled to accept a very unsatisfactory compromise which was denounced by Lord Avebury the Chair man of the Bondholders Committee in London, as "dishonourable' An offer sub mitted by American bankers for settlement of the external debt had been rejected by Congress in October 1909 Previous abortive efforts had been made in 1905 and 1908

Notwithstanding the difficulty experienced by foreign bondholders in obtaining any better terms the government was actually in a stronger financial position than had been the case for several years. Considerable expansion in the revenues of the country had

¹ See E B vii 219 et seq

roso CUBA

taken place since 1901 Whereas in that year the receipts from Customs dues amount ed to £289 000 in 1907 receipts from the same source had totalled £505,800, in 1908-09 there was a falling off to £442,500 between 1909-10, and again from 1910-11 an ad vance was shown in all branches of the government's receipts Increases were marked in the import trade of all countries except France while the export trade increased considerably with the United States, advancing from 58 73 per cent in 1909 to 60 22 per cent in 1900 The reverse had been the case with Great Britain, the figures falling from 36 02 per cent in 1909 to 35 32 per cent in 1910

A serious disaster visited the Republic in May 1910, when Cartágo—for the second time in its history—was destroyed by an earthquake, entailing great loss of life and irreparable damage to many of the historical buildings including the but recently completed Central American Court of Justice which was to have been dedicated and opened in the following month of June. The national disaster occasioned a disturbance in the routine work of the government and much activity was devoted to effacing as far as possible the results of the earthquake, and in rebuilding what had been destroyed

The Pacific Railway was completed and opened to traffic on October 21 1010 affording uninterrupted transportation from the Atlantic to the Pacific side of the Republic

The dispute between Costa Rica and Panama (dating from 1896) regarding the boundary limitations continued to form the subject of diplomatic negotiations various proposals for arbitration being made but rejected by one side or the other. At last how ever the question was referred to the arbitral decision of the Chief Justice of the United States and the Commission returned to New York on October 29, 1912.

In November 1911 a loan for 35 000 000 francs (£1,400 000) at 5 per cent with amortisation in 40 years, was arranged in France, the price being 91\frac{1}{2}

For the twelve months ending December 30 1911 the total trade amounted to £3 662 380 imports representing £1 825 830 and exports £1 836 550. The increases were 12 3 per cent in the first instance, and 6 6 per cent in the second over the figures of 1910. The share of imports secured by the United Kingdom and Colonies was 17 34, by the United States 46 29 and by Germany 19 03 per cent. The figures for the United Kingdom had steadily decreased during the past three years while those of Germany and the United States had correspondingly advanced

On June 21 1912, an eruption of the volcano Poss took place much damage being occasioned and many lives being lost

In September 1912 a new banking institution—the International Bank of Costa Rica—was formed by a group of English, Canadian, American and German financiers

CUBA1

Cuba has an area of 44,164 square miles and the population according to the most recent estimate is 2 161 662 giving an average of 46 2 inhabitants per square mile. Im ports were valued in 1911 at £22 653,399 and exports at £24 627 275. Imports from the United States in 1910-11 were valued at \$60,709 062 (U S currency) and exports at the United States at \$110,309 468 in 1911-12, imports at \$62 203 051 and exports at \$120,154 326. The revenue was estimated in the budget of 1912-13 at £7 588 040 and the expenditure at £6,794 829. The total public debt amounts to £19 400,000. The total mileage of railways is 2186 and that of telegraph lines 5033. The army has a strength of 4311 men and 212 officers. The navy comprises 13 vessels with a personnel of 120.

The Cuban Republic was inaugurated on January 28 1909, for a second time after the Spanish-American War in complete independence of American supervision, and the American troops which had been supporting the provisional government since President Palma's resignation in 1906 left the island on April 1st Under General José Miguel Gomez (leader of the Miguelista faction) as the new President, and Alfredo Zayas (leader of the Zayista faction) as the new Vice President the administration started well. In the words of a Times correspondent (May 27, 1912), it "preserved

1 See E B va 605

CUBA 1081

unbroken the admirable record of the Americans in matters of public health and sanitation 'it did much to encourage foreign capital, to improve communication by building roads and bridges and by dredging harbours to develop education, and to forward the agricultural interests of the island 'it organized an efficient and well disciplined force of rural guards and preserved the public peace with satisfying vigour"

During 1909-10 the first year of General Jose Miguel Gomez's administration, the public finances of Cuba were put into a better condition and public order was well preserved. The staple crops proved good and sold at fair prices. Both the political and commercial outlook appeared bright. In October 1910 however, much damage was wrought by cyclones over the provinces of Pina del Rio. Hayana and Santa Clara.

Trade and commerce continued to improve in 1911, while the population had increased by 58,612 during the last two years. By the end of 1910 the balance of trade was considerably in favour of Cuba, the excess of exports over imports amounting to \$21 000 000 (£4 200 000) upon a total of \$237,275 000 (£47,455 000). On April 17th the government ordered the payment of the 732 outstanding bonds issued by the revolu tionary government of 1896 payment being commenced on October 1, 1911, after which date the bonds ceased to draw interest

On July 1 1911 the posts of Envoy Extraordinary and Minister Plenipotentiary were created for Peru Colombia and Venezuela. The Ministers Resident at Brazil Chile Belgium and Norway were raised to the ranks of Envoys Extraordinary and Ministers Plenipotentiary the post of Minister Resident in Uruguay was abolished and the Minister Plenipotentiary to the Argentine Republic was accredited to Bolivia while the Minister Plenipotentiary to Colombia was likewise accredited to Ecuador the Minister Plenipotentiary in Norway was accredited to Sweden and Denmark and the Minister in Germany to Russia and Austria. New Consulates general were created in Paris and Panama consulates of the first class in Asuncion (Paraguay). La Paz (Bolivia) and San Jose (Costa Rica), and a consulate of the second class at Quito (Ecuador).

The financial position of the republic had improved since 1909 when the situation was undoubtedly serious. A rigid economy introduced by the government had continued over a period of two years and served to leave a small balance of \$1 000,000 (£200,000) in the treasury which by the end of the following year had increased to \$ 000 000 (£400,000). The revenues from all sources amounted to \$32,595,552, of this total \$24 826 012 were for customs receipts the port of Havana alone collecting \$17 185 3 2. In September 1911 a New York banking firm arranged a further loan of \$100 000 000 (£20 000 000) primarily for the redemption of the republic s existing debts which at this period amounted to \$97 000 000 of which \$10 874 100 represented the internal debt this is being cancelled at the rate of \$50,000 (£10 000) per annum

In November 1911 the following conventions were approved by the senate and promulgated by the president (a) Convention for peaceable settlement of international disputes (b) Convention concerning methods and customs of war on land (c) Convention concerning nights and duties of neutral Powers and neutral persons in case of war on land (d) Convention concerning status of increhant vessels of the enemy at the beginning of hostilities, (e) Convention relating to bombardment by naval forces in time of war (f) Convention for the adaptation to maritime war of the principles of the Geneva Convention Ratifications of the arbi ration agreement between Cuba and Brazil were concluded a treaty of extradition between Cuba and Venezuela was arranged, and a treaty of friendship with China was projected

Up to the autumn of 1911 whatever might be the case in Havana where there was much talk of corruption under President Gomez's administration in the granting of concessions and the multiplication of offices the country districts were contented and prosperous Party politics however as between the factions of the ins" and the outs," suddenly became complicated at this period by a 'campaign of proscription" being started on behalf of the veterans of the war of independence against all office-holders who had then shown Spanish sympathies, with such violence that Congress was forced to suspend the Civil Service laws, and that (apparently at President Gomez's

1082 CUBA

own suggestion) a stern Note of warning was sent in January 1912 from Washington by the United States government. Order was temporarily restored after President Gomez had capitulated to the demands of the Veterans. Association and executed or dismissed a number of the objectionable office holders, but the ferment again began when one of the dismissed officials brought a suit before the Courts and obtained a judgment de claring the suspension of the Civil Service laws to be a breach of the constitution. The situation was also embittered by the fact that the electron of President Gomez as president in 1909 (to hold office till Jan. 17, 1913) had been the result of a Liberal victory at the polls in 1908, and that an arrangement had been effected by him with Señor Zayas by which the latter would be the Liberal candidate in the autumn of 1912, an under taking which Gomez was no longer inclined to observe so that the Liberals were divided into two camps while the Conservatives were attacking the Liberal government

The political unrest and commotion started by the action of the Veterans' Associa tion communicated itself without delay to the army and to the negroes and in the spring of 1912 the turbulence became increasingly serious. In the east of the island a large number of negroes broke out in open insurrection and labour troubles were creating much mischief and danger to mills and plantations particularly in the province of The lives of American citizens and others in Cuba and foreign property conservatively valued at \$220,000,000 were threatened by this crisis. Mr Knox the American Secretary of State, visited Hayana in April 1911, at the conclusion of his tour through the Central American Republics, and at Washington during May it was felt that forcible American intervention might again be necessary. For this purpose eight battleships with adequate auxiliary equipment, were concentrated at Key West in order that the right of the United States (under the 'Platt amendment' of 1901 E B vii 604) to intervene "for the protection of Cuban independence and the maintenance of a government adequate for the protection of life property and individual liberty might if necessary be vindicated. These preparations occasioned great excitement in the Cuban capital but succeeded in overawing the insurgents and towards the end of July conditions improved, the Cuban government having the situation then well in hand By the close of the year only a few small bands of insurgents remained while General Ivonet, the negro leader was eventually captured

The financial condition of the Republic became acute in the early days of September 1912 The United States presented a peremptory demand for a monthly instalment of \$400 000 (£80 000) towards the cost of sewerage and paving in Havana on behalf of the American contractors On September 25th the Cuban government paid up

The granting by presidential decree of a concession and a subsidy of \$6 000 per kilo metre for a new railway between Caibarien and Nuevitas and also between Camaguey and Santa Cruz del Sur, to an American Company proposing to expend \$25,000 000 (£5,000 000) upon constructing the 305 kilometres, occasioned great opposition upon the part of the Cuban Central Railways—which had held an exclusive concession. The British Ambassador at Washington was appealed to, and on December 2 1912 Mr Bryce lodged an emphatic protest against granting the concession called for by the Cuban North Coast Railway, alleging that such concession was granted under scandalous circumstances, and was prejudicial to the legitimate vested interests of the Cuban Central Railways Company, a British undertaking

General Mario G Menocal was elected President and Señor Enrique Jose Varona Vice President at a quiet election on November 1, 1912 Less than 50% of the registered voters went to the polls The election was a victory for the Conservative party, which had a majority of some 13,000 votes and elected five governors and secured two senators in each of the provinces except Camaguey where because of the recent death of a senator three were elected The eleven newly elected Conservative senators together with two senators formerly Liberals, who fraternised with the Conservatives because of local issues, gave the Conservatives a strength of thirteen against an opposition of eleven in the senate

In the lower house, after May 20, 1913, when the newly elected ministry comes into

ECUADOR

1083

power, there will be forty three Liberals and forty eight who are listed as Conservatives Five of the latter however, are Liberal mugwumps' and they will hold the balance of power. The Liberals claimed that fraud was practised during the election campaign and the Conservatives replied by counter charges. General Menocal, the new President, had been manager of the largest sugar estate in Cuba for many years. In his programme he promised to cultivate closer relations with the United States and to seek agricultural and industrial development, and at once to open negotiations for a revision of the tariff with the United States.

ECUADOR 1

Ecuador has an area of 116 000 square miles and the population according to the most recent estimates is 1 500 000—inclusive of some 200 000 Indians only partly civilised—giving an average of 128 inhabitants per square mile. Imports were valued at £1 604 821 and exports at £2 733 74 in 1909—10. The revenue and expend ture were estimated in the budget of 1012—13 to balance at £1 89, 132. The total public debt amounted to £4 180 000 (£2 680 000 external and £1,500 000 internal). The total mileage of railways is 350 and that of telegraph lines 2591. The army has a strength of 7 810 men. The navy comprises 7 vessels with a personnel of 200.

On January 1 1907 General Eloy Alfaro was re elected president for a further term of 4 years Under his rule the country made but httle progress numerous revolts and border disputes serving to prevent any advance in its economic or financial conditions

The boundary question with Peru which dated from 1822 became acute m 1908 and numerous frontier encounters occurred between armed bands of both nationalities International conditions improved somewhat later on when Senor Federico Elguero the Peruvian Minister to Ecuador exerted his influence in favour of peace. In 1909 the United States Brazil and Argentina offered their joint mediation, which was accepted at once by Peru but refused by Ecuador as were also the alternative suggestions of the arbitration of the King of Spain and a reference to the Hague Tribunal

In July 1909 excitement was caused by the publication of some documents found among the private papers of ex President Garcia dealing with the sale of Galapagos Island to the United States—It appeared that negotiations had also been opened with France but had been interrupted owing to the belief that the United States would not consent to the acquisition of the island by a European Power—In January 1911 fresh negotiations were entered into between the United States government and President Estrada with a view to leasing the island for a term of 99 years in return for the cash payment of \$15,000,000 (£3,000,000). Again however, the offer was rejected upon the grounds that its acceptance would be unpatriotic

In September 1909 a financial delegate was sent to Europe for the purpose of arrang ing a loan of £4,000,000 the proceeds of which were to be used for the reorganisation of the national finances The negotiations were not successful Others having for their object the raising of a loan of £2 000 000 were opened in November 1909 but Congress withheld its assent A few weeks later an English syndicate advanced the government the sum of £250 000 at 85 per cent taking as security 50 per cent of the customs receipts on exports The finances of the country continued in a very unsatisfactory condition and on July 2 1910 the Government defaulted in regard to the interest due on the 4 per cent salt bonds In the following September however the coupon was met and pay ments were continued thereafter with more or less regularity. Arrears of interest were also due upon the Guayaquil Quito railway bonds In April 1911 Mr J P Cooper the Secretary of the Council of Foreign Bondholders (representing the Guayaquil Quito Railway) had visited the Republic with a view to settling the claims of the bond holders upon whose coupons the interest had not been paid for over twelve months. Although President Plaza promised in September to remedy the default, payments remained unsatisfied They were resumed however, in October 1912

Towards the end of General Alfaro's term of office political conditions became both ¹ See E B vii 910 et seg

Britain, France, Germany, Italy and the United States of its refusal to accede to the recent demands for settlement of all outstanding debts within three months. Shortly afterwards (July 20th) a revolution broke out, Americans and other foreigners being placed in danger. The United States German and Italian Legations made urgent requests to their governments for the despatch of warships to Hait. The United States gunboats "Petrol' and "Peona" were consequently despatched to Port au Prince, and there received on board a number of American women refugees, as well as The French consul was wounded. The Simon government was finally overthrown, General Firmin, the leader of the revolutionary party and his followers capturing Port au Prince. A formal blockade of the ports of St. Marc. Gonaives and Forte Liberte was proclaimed, but proved ineffective as the government possessed only one warship

On July 23, 1911, General Jean Jacques Dessalines Michel Cincinnatus Leconte landed at Cape Haitien from exile in Jamaica and collected a considerable force. Two days later the German cruiser. Bremen was despatched from Montreal to Port au Prince. On August 7th General Leconte made his triumphal entry, and was shortly afterwards elected provisional president of the republic. Almost immediately, however another revolution broke out under the leadership of General Calisthene Fouchard, Haitian Minister to Germany, and former head of the army of the negro republic, the entire State of Haiti from Jeremie to Aux Cayes taking up arms for him as it had also done in 1008. He however failed in his attempt.

On August 19 1911 the United States Government formally recognised General Leconte as president of Haiti. In the early days of September as his government had shown a disposition to recognise the claims of foreigners the representatives of the Powers decided not to proceed with their intention of forming an International Commission for the purpose of presenting their claims. On August 8 1912, however General Leconte perished in a fire at his palace caused by an explosion in an adjoining powder magazine. 300 soldiers and several civilians succumbing at the same time. It was supposed that the cause of the fire was the accidental ignition of quantities of ammunition stored in the cellars of the palace. General Augusto Tancred formerly minister of public works, was elected to succeed General Leconte but his rights were disputed by General Saint Just, who led a body of malcontents against him. Senator Lusemburg Cauvin formerly minister of the interior was another candidate.

The finances of the country are still involved although serious efforts have been made to balance the budget. The finances are administered by an American citizen as general receiver of customs under the convention with the United States. A compulsory Education Law has been passed, and a contract for a national railroad signed

HONDUR 4S1

Honduras has an area of 46 250 square miles, and the population according to the most recent estimates is 553,460 giving an average of about 11 inhabitants per square mile. The revenue was estimated in the budget of 1912-1913 at £1,095,034 and the expenditure at £1,092 258 The total public debt amounts to £24 207 914 (£23 397,240 external and £810,674 internal). The total nuleage of railways is 57 and that of tele graph lines 3190. The army has a strength of 2060 men

In 1908-1909, during the administration of President Miguel R Davila unsuccessful attempts were made to solve the settlement of the foreign debt of Honduras Various offers were submitted by United States capitalists, but in each case Congress rejected them. The finances of the country remained in an unsatisfactory state, and pending a more peaceful outlook there was small encouragement for the introduction of foreign capital. Nevertheless various concessions were granted, mostly to United States citizens, for the navigation of rivers, the construction of railways and the opening of mines. There is great need of a railway between the Atlantic and the Pacific coasts, and another between Amapala and Tegucigalpa. The only railways existing are ¹ See E. B. xiii 649 et sea

MEXICO 1087

narrow gauge banana carrying lines belonging formerly to foreigners, but acquired by the Government on February 9 1912 and now known as the National Railways

On February 16, 1910 the mint of Honduras was reopened after having been closed for two years owing to the fact that most of the silver in bars is exported

In 1911 the boundary question with Nicaragua was settled by the award of King Alfonso XIII of Spain while the settlement of the dispute with Guatemala by consent of the government of that state, was extended for a term of two years. The mining industry made some progress there being at the end of 1911 700 known mines, of which one third were working. The Rosano has yielded £3 500,000 on a capital of £250 000

On March 28 1911 the political unrest assumed considerable importance, which induced the president General Miguel Davila to resign. He was succeeded as provisional president by Dr. Francisco Bertrand who served until the general elections of November, when he failed to retain his position. General Manuel Bonilla, a previous president who for years had been a refugee in the United States was chosen (Nov 3 1911) for the term of 4 years (1912-1016). He assumed office on February 1 1912 with Dr. Francisco Bograu as Vice President. A strong feeling of discontent prevailed among the peasant classes and uprisings occurred in some parts of the country. Many of the ignorant peons recalled General Bonilla's last presidential term, when the country was stricken with an epidemic of yellow fever. The intense heat which prevailed all over the country in the month of June 1912 likewise contributed to the general feeling of unrest. The banana crops were almost entirely runed cattle died from thirst and lack of pasturage while vast areas of forest land were destroyed by conflagrations.

Early in 1012 the Government offered to enter into a contract with United States bankers for a loan of \$000 000 gold (£100 000) in the form of Customs notes, bearing 5 per cent interest and pavable half vearly. This was followed afterwards by a general reorganisation of the state funds and a further offer made by United States financiers of \$6 000 000 gold (£1 200 000) for 40 years at 5 per cent sinking fund after 5 years a per cent the proceeds were to be limited to the refunding of the Honduran foreign debt. The contract however was not completed owing to political difficulties. A new bank known as La Ceiba was established in the capital and a similar institution on the northern coast of the republic

The treaty of commerce peace and navigation between Honduras and Great Britain made on January 1 1887 the exchange of ratifications of which occurred on February 3 1900 was extended until April 6, 1913

MEXICO1

Mexico has an area of 767 000 square miles, and the population according to the most recent estimate is 15 063 207 giving an average of 19 6 inhabitants per square mile. Imports were valued in 1910-11 at £10 201 376 and exports at £29 490 393 imports from Great Britain being valued at £2 238,175 and exports to Great Britain at £3 950 737. The total public debt amounts to £44 333 932 (£30,548,919 external and £13 785 013 internal). The total mileage of railways is 15 251 and that of telegraph lines 46 112. The full strength of the army is given as 49 332 men and 6336 officers. The navy comprises 10 vessels with a personnel of 1163.

In April 1910 for the eighth time General Porfino Diaz was elected president but his new term proved short lived. For some time previously mutterings of discontent had been heard the general sentiment among the people being that after so many years of rule under the same executive, a change would prove beneficial. Had the choice been left to General Diaz alone he would have respected the popular demand for it was known that he intended to occupy the presidential chair for the last time having in view as his successor Senor José Yves Limantour, the minister of finance. General Diaz however allowed himself to be persuaded against his own judgment with the result that a revolution at the head of which Senor Francisco Madero placed himself broke out in the following November, and gradually spread to all parts of the republic

¹ See E B xviii 317 et seq

1088 MEXICO

Guerrilla fighting spread in the province of Chihuahua, and extended to El Paso on the American border, and for some time the situation seemed likely to make intervention by the United States necessary. The American government, in view of eventualities, sent a considerable body of troops within striking distance in case of emergencies. Pressure had been put on the United States by the foreign financial houses in Mexico for this purpose, but actual intervention was not required. The octogenarian president, who had ruled Mexico for more than a generation, being unable to take the field personally, lost his grip upon the army as well as upon the people and in May 1911 he was compelled to resign and to leave the country (May 30th) with his family. General Diaz arrived at Plymouth June 15th on the German steamer. Ypiranga "reaching London the same day, but pausing there but a very short time before proceeding to Switzerland.

After his departure a provisional government was installed under the presidency of Señor Francisco Leon de la Barra who continued, with some changes in his ministry to rule until the popular elections in the following October when Senor Madero was chosen constitutional president for the period 1910–16. A number of further revolts almost at once occurred while several districts were overrun by armed bands of robbers under different leaders, the authorities being unable to cope with the uprisings which in many respects recalled the early days of Mexican independence before the strong hand of Diaz had effected so great a reform. The federal army, on the whole had remained remarkably loyal to the Madero government.

At one time there were four different presidential candidates in the field namely General Gomez, Senor Pascual Crosco Colonel Felix Diaz a nephew of the ex president and General Bernardo Reyes. The last had formerly been governor of the State of Nuevo Leon for nearly twenty five years under the Diaz regime and having conspired against Diaz, he was bainshed from the country. Towards the spring of 1910 however the Diaz government had recalled Reyes in order that he might help to save the situation Before he landed upon Mexican soil agents of the Madero party approached him with the idea of his abandoning Diaz and supporting his rival, the inducement being the promise of the portfolio of minister of war in the new government. Reyes at first consented but changed his mind, and gathering a few malcontents he set up as an independent candidate for the presidency. With his small body of followers he undertook a campaign, which soon ended owing to the desertion of his supporters, his surrender as a prisoner of war to the government, then followed.

Yet a fifth candidate presented himself in the person of General Zapata who although nominally a supporter of General Gomez was known to aspire to the presidency. It was generally beheved that Zapata and other agitators were being financed by American money as so many revolutions in Panama. Cuba and Nicaragua had been in previous years and a strong anti American feeling was aroused several citizens of the United States losing their lives while many others sought safety in flight across the border

In January 1911 a new government department of Labour was created, while a new legation was established at San Salvador (Republic of El Salvador) making it independ ent of Guatemala Congress amended articles 78 and 109 of the constitution by which the presidential term was extended from 4 to 6 years and provided that neither president nor vice president should be eligible for re-election, nor any state governor serve for more than 6 years An arbitration treaty was ratified December 26 1911 with Brazil

Although 79,484 immigrants entered the republic during 1910—11 a large number of residents left on account of the revolution. In this year (1911) little progress was made in new railway construction owing to lack of labour, most of the available peons having enlisted as fighters upon one side or the other, and the attention of the railway companies being devoted to repairs to damaged track and rolling-stock. Altogether, some 80 kilo metres were added, bringing up the total length to 10 877 kilometres. The working of the national railways showed a decrease in the earnings of 2,097,752 pesos (£209 752)

In March 1912 revolutionary conditions still raging, the United States government formally forbade the exportation of arms to Mexico under penalty of \$10,000 fine, or imprisonment for 2 years But the decree came too late to have much effect. In May

several prominent Americans were forcibly deported from Mexico for having again been found supplying the rebels with arms The situation became more and more acute, and Pres Tait was said to have threatened to resort to intervention unless some amehoration were manifested Pres. Madero sent a notification to the United States that 'if a single foreign trooper crossed the border there would be war between the two countries" Pres Taft, however, denied any intention of active intervention. Iwo Americans were found hanged at Cananea in the state of Sonora July 31st

Great Britain, Germany and France meanwhile addressed enquiries to the United States asking what steps were contemplated in regard to protecting foreign interests in Mexico, and in June Mr Philander Knox, the United States' Secretary of State, submitted a plan to create a neutral zone for 15 miles on each side of the Rio Grande where any troops of either the Mexican or United States armies during times of revolution

and riot might enter to protect the lives and property of their countrymen

Early in August 1912 serious damage was done to the property of the Tominil Mining Co a British concern and the intercession of the British foreign office was necessary A battle between the federal troops and the revolutionaries, lasting several days was fought some 45 miles from the capital the losses being very heavy upon both sides September 8th permission was given by the United States government for 1200 Mexican federal troops to pass through part of Texas into Mexico to attack fleeing rebels

The opposition to the government although crushed in some parts of the country. broke out afresh in others and in July 1912 the president found it necessary to request the United States Great Britain France Germany and Spain to accord formal per mission to suspend the constitutional guarantees a request which was declined by all Outrages were perpetrated by roying bands of revolutionists a passenger train was stopped at Tucumán (Aug 11 191) when 30 of the travellers were murdered and mutilated, on the previous day the town of Ixtapan, in the state of Mexico was captured by a body of 1000 rebels who put 300 of the inhabitants to death residents at Cananea the border mining town were armed with rifles and ammunition by the United States government Other mining camps were similarly provided A further revolution having for its object the reinstatement of ex-president Diaz broke out October 17th, the port and town of Vera Cruz being seized and held by the reaction aries at whose head Colonel Felix Diaz a nephew of the ex president placed himself After a single encounter between the federal troops and the revolutionaries the latter were defeated and Colonel Felix Diaz was captured (Oct 24th)

Notwithstanding the turmoil in political circles and the large amount of wanton damage occasioned to property, such as the destruction of railway bridges and trains the burning of plantations and the pillaging of business houses the economic condition of the country suffered less than might have been supposed as was evidenced by the promptitude with which all foreign obligations were met The house of Speyer Brothers notified the Mexican Government that it was prepared "to offer financial assistance to any moderate amount," a statement which created a favourable effect upon the stock markets of London and Paris A serious financial condition, however was revealed in September 1912, when President Madero admitted in his message to Congress (Sept 25th) that only a small amount (\$2,000 000) remained out of the last loan for \$20, 000,000, which had been raised in June (1912) It was decided to borrow a further Messrs Speyer Bros were not, however, applied to, the government \$20 000,000 (gold) deciding to place the issue in Europe, a proposal which owing to the Diaz revolution of October 17th-24th, temporarily at least proved impossible of realisation

The receipts for 1911 fell far short of those of the previous year, the revenue showing a decline of \$1,884,001 while the expenditure increased by \$8,332,020 It was found necessary to draw hiberally upon the treasury reserves, which by June 1911 had already shown a reduction to \$3,414,119 A paper surplus of \$10,228,478 for 1911-12 was more apparent than real In August 1911 the government had borrowed from the banking house of Speyer £2,000,000, the proceeds being used by the monetary commission in connection with the currency and exchange operations

The political troubles of the republic were reflected in the unsettlement of mining, agricultural and other industrial operations, a textile workers' strike occurred at Puébla on August 5 1914, and 3,000 operatives came out, railway communications were cut in many places and even in the towns life and property were not considered safe from mob violence. The British-owned mines at Tominil were again attacked and dynamited the staff being compelled to seek safety in flight. Both Great Britain and the United States vigorously protested to the Mexican government without result

The budget of the fiscal year 1912-13 provided for an increase of \$2 870,000 (£574 000) for the current year, the total amounting to \$25,000 000 (£11 000 000). Customs and harbour dues showed a decrease of \$5,000,000 as compared with the previous year, and of \$2 000 000 on the estimates

The principal feature in the foreign trade (1911-12) was the continued increase in Germany's share of the imports, which showed an advance of 26 12 per cent as compared with 7 76 per cent for Great Britain. Belgium however showed an even larger increase 73 70 per cent. In the 1910-11 exports the United Kingdom had already taken second place to the United States, while Canada held seventh place in imports.

On February 29 1912, a presidential decree was published concerning the distribution of government lands, amounting to approximately 10 000,000 hectares situated in the states of Guerréro Coahuila Chiapas Chihuahua Durango San Luis Potosi Sonora Tabasco Vera Cruz Yucatan and the territories of Tepic and Lower California

On October 7th the Chamber of Deputies voted by 115 to 20 to double the salaries of members formerly \$8 50 (=175 per diem) to \$17 00 (=348)

Numerous concessions to foreigners were granted for further railway construction electric power stations water plants and factory installations while irrigation schemes upon an excessive scale were commenced. The establishment of an institution known as the Land Bank for irrigation works was introduced under government auspices.

In June 1912 Mexico City was severely shaken by earthquake 63 persons being killed and 75 injured while the damage done to property exceeded \$150 000. On July 19th disastrous floods which visited the Northern section of the country affecting an area of 20 000 square miles damaged property to the extent of several millions of dollars and caused many lives to be lost. On July 30 1912 a severe earthquake visited the Guadalajara district (state of Jalisco) rendering 10,000 people homeless.

In the last days of October 1912 the seaport of Acapulco, on the south coast was almost destroyed by a hurricane.

NICARAGUA 1

Nicaragua has an area of 49,200 square miles, and the population according to the most recent estimate is about 600 000 giving an average of 12 2 inhabitants per square mile. The total public debt amounts to £2,297 736 (£1 276,273 external and £1 0 1 463 internal). The mileage of railways is 170 and of telegraph lines 3614. The army has a strength of 4000. The navy comprises 10 vessels with a personnel of 170

Notwithstanding the programme of peaceful policy laid down by President José Madriz (maugurated Dec 21, 1900) and his general popularity among the people the Conservative party led by Generals Emihano Chamorro and Ména continued to resist the new government in conjunction with General Juan J Estrada governor of Blue fields. One of the first acts undertaken by President Madriz was to order a court of enquiry into the execution of two Americans maned Groce and Cannon "with a view to punishing those responsible" although it was known that the order to kill the men had been given by the ex president José Zelaya Both Groce and Cannon were American mercenaries, fighting against the constituted authority in Nicaragua. The new President sposition was rendered doubly difficult by the fact that the United States Government had persistently refused to recognise either him or his government. On the other hand, President Taft acknowledged the revolutionary leader General Juan J Estrada as the Executive, although the United States Congress (Jan 14, 1910) had declined to

¹ See E. B xx 624 et seq

endorse the President's act, and rejected Representative Sulzer's resolution providing for Estrada's recognition as the legitimate President of Nicaragua

On February 10 1909, the revolutionists 1200 strong among whom were many United States citizens, under Generals Emiliana Chamorro and Masis, captured Malagalpa a town of 9000 inhabitants, the Government troops having evacuated it. On February 22, 1910, an encounter took place between the forces of General Chamorro and the government troops at Tisma, when the former were completely defeated, Chamorro barely escaping with a handful of his followers. His loss in killed, wounded and captured was 600, that of the Government about 300

Some sensation was occasioned by the publication of a cablegram from the German Emperor addressed to President Madriz, in which His Majesty expressed a desire—for the continuance of the strong friendship which had always animated the relations be tween the two governments. Although intended to strengthen the hand of the government the publication of the telegram had little or no effect for the revolution continued in several different directions, being materially assisted by the continued refusal of the United States government to recognise President Madriz in spite of the fact that England France and other European nations had extended such recognition

The principal leader of the revolutionary faction and candidate for the presidency, General Juan J. Estrada appealed to the United States to intervene actively but while that government failed to respond directly, General Estrada was greatly assisted in his campaign by a large number of American citizens who fought under his banner. President Madriz was finally defeated and compelled to retire seeking refuge in the neighbouring state of Costa Rica. where he shortly afterwards died

General Estrada was then elected provisional president under a law issued on September 15 1910 and was succeeded in October 1911 by Senor Adolfo Diaz as Constitutional President for the full term

In the early days of August 1912 a further revolution was promoted by General Luis Mena minister of war and marine who refused to resign his portfolio when requested to do so by the president General Mena seized the forts at Managua, cut the telegraph lines and took possession of the city of Granada Here he was engaged by General Chamorro and later a truce was effected whereby General Mena agreed to resign the po sition of minister of war in favour of Dr Barbarossa Troubles however broke out afresh, the rebels hombarding the capital and causing many casualties among the natives no foreigners were injured United States sailors, guarding the presidential palace and the A sanguinary battle occurred August ad when Legation took part in the repulse 1000 dead were counted on the field A pestilence broke out and the situation became The United States gunboat Annapolis 'visited the port of Corin extremely serious to and on August 6th landed 100 marines quartering them at the capital, Managua The Nicaraguan government was said to have consented On August 22d the Nicara guan army composed of 7500 men was almost annihilated at Leon On August 24th additional American troops were landed both at Bluefields and Corinto 75 in the first named and 2000 in the second named place On the same day United States Senator Bacon introduced a resolution into the Senate providing for an investigation into the United States interference in Nicaragua, which he declared was unwarranted August 26th 120 Nicaraguan non-combatants were slain during the bombardment of Managua. Peace was however re-established on October oth

The financial and economic conditions of the state naturally suffered severely in consequence of the complicated political situation and in January 1912 the government defaulted in regard to the coupon due upon the 6 per cent (1909) Loan. In June a provisional agreement was entered into for the settlement of the external debt of Nicara gua, through the houses of Messrs Brown Brothers & Co. and Messrs J. & W. Seligman & Co. of New York by which the interest of the 1909 loan was reduced from 6 per cent to 5 per cent, and the entire customs receipts of the republic were given over at security Considerable improvements took place in the customs revenue dating from the time when the United States appointed a collector general (Dec. 1911), to commence his

duties January 1 1912 Resumption of payment upon the Nicaraguan Debt coupons, which was suspended on January 1st took place on October 25, 1912 The couponidue January 1, 1913, was also met

PANAMA1

Panama has an area of 32 380 square miles, and the population including the Canal Zone (see under United States section 1) is 386,745 giving an average of a little less than 13 inhabitants per square mile. Imports were valued in 1910-11 at £1 973,000 and exports at £570 745, British imports being valued at £453,480 and exports to Great Britain at £25,034. The mileage of railways is 51 (exclusive of 151 miles of narrow-gauge banana railways), and of telegraph lines 497. There are 1,000 native police. Revenue for 1911-12 amounted to £739,177 and expenditure to £737 265

On November 3 1903 Panama had broken away from Colombia and under the aus pices of the United States became an independent Republic The present constitution was promulgated on February 13 1904 and on February 25th the first president Gener al Manuel Amador Guerréro was installed He served until 1908 when he was succeed ed by Senor José Domingo de Obaldía who died in office on March 1 1910 The second vice-president Dr Carlos Antonio Mendoza, then became president, the first vice presi dent having died in the previous year. Under the aegis of the powerful northern re public Panama made great progress, both commercially and industrially while each branch of the administration showed an improvement year by year The country is very fertile and offers exceptional possibilities for colonisation. Moreover it is be heved to be very rich in mines, gold bullion being steadily shipped from mining prop erties near Darien Agriculture is carried on to a very considerable extent the latest statistics regarding live stock showing 120 000 head of animals 50 000 sheep and goats cattle 55 000 horses and mules 15 000 A progressive trade is carried on in bananas, while cacao, rubber coffee and sugar of unusually good quality are produced In Panama the sugar cane grows continuously for fifteen years without replanting

The financial condition of the Republic is strong in 1910 \$6 000 000 (£1 200 000) lay on deposit in New York Banks and \$1 000 000 (£200 000) was lodged in legal institutions. There is no public debt, and no paper money in circulation

A change in the United States diplomatic representation occurred in April 1910 when Mr R S Reynolds Hitt was appointed to Panama, this post he left in the following July being replaced by Mr Thomas C Dawson Dr Pablo Aroseména became president on October 1, 1910 He retired on leave of absence February 2d and resumed office March 7 1912 On November 14, 1910, President Tast visited the canal works and spent three days upon the isthmus

On January 1, 1911, a new tariff came into existence the ad valorem duty being raised from 10 per cent to 15 per cent except upon wheat flour, corn rice and alfalfa

On July 22 1912, the third presidential election which had taken place in Panama was held under the direct and invited supervision of the United States. The elections were remarkable for the fact that for the first time on record candidates journeyed into the provinces in order to harangue the voters in true democratic style. Dr. Belisanio Porras was elected president from October 1 1912 for four years by an almost unammous vote. An innovation was the granting of votes to the military and police forces. The defeated candidate for re-election President Arosemena, declared at the opening of General Assembly (Sept. 2d) that the elections "had been very unfair and that the United States had introduced methods little calculated to insure impartiality"

Mr Philander Knox, United States Secretary of State, visited Panama in the U S waiship * Washington " on February 27, 1912 In June two Englishwomen arrived en rouse for Cocos Island in search of some pirates' hidden treasure

PARAGUAY 2

Paraguay has an area of 171,204 square miles, and the population according to the most recent estimate is 715,841, of whom about 8% are Indians, giving an average of See E. B. xx, 664 et seq

4 6 inhabitants per square mile Imports were valued at £1 250,496 and exports £057 813 in 1909-10, imports from Great Britain being valued at £525 098 and exports to Great Britain £3042 The total public debt amounts to £2,149,134 (£763,590 external and £1 385,544 internal) The total mileage of railways is 232 and that of telegraph lines 1987 The army has a strength of 100 officers and 2500 men and the navy comprises 3 vessels with a personnel of 40

Towards the end of 1909 a movement was set on foot to bring about the downfall of the government of Dr Emiliano Gonzales Navero (who became president on July 5 There were three political parties in existence—the peon or peasant class which took no part in the government and desired merely to live a peaceful agricultural life the whites mostly descendants of the old Spanish families who had always been an exclusive class and had equally little to do with politics, and the military party which was desirous of obtaining control of the administration of the country In January 1911 the ferment which had been so long in progress broke out in the form of a violent revolution under the leadership of Colonel Albino Jara minister of war and marine who had previously headed a mutiny against his own father while the latter was in command of an artillery regiment Colonel Jara forcibly assumed the office of president in opposi tion to the constitutional president Senor Manuel Gondra (formerly minister for foreign affairs) who had been inaugurated November 25, 1910, but the country soon rose up against the new dictatorial rule and found a leader in Dr Riquelme Colonel Jara then summoned to his aid a number of ex Chilean officers "soldiers of fortune Riquelme was captured and decapitated his body being also horribly mutilated one of the Latin American republics nor any of the European governments recognised the presidency of Colonel Jara. In July 1911 Señor Liberto Rojas who had been presi dent of the Senate, was offered and accepted the provisional presidency of the republic and Colonel Jara notwithstanding his attitude towards the constituted authority was offered the post of minister of war but subsequently under pressure this offer was can celled and Colonel Jara continued his revolutionary campaign

The Governments of Brazil and Argentina at this time showed considerable powers of restraint refraining from interfering with Paraguayan affairs although the interests of both states were seriously jeopardised by the reign of anarchy in the neighbouring republic. In December 1911 the British and German ministers were appealed to by the so-called Paraguayan government to support its authority but declined

A rupture finally took place between Paraguay and Argentina, which resulted in the withdrawal of the minister of the latter republic. Dr. Martinez Campos, from Asunción and the despatch of the Argentine gunboat. Paraná to the Paraguayan capital. President Jara telegraphed to the Argentine executive. It is time that a stop was put to this era of Paraguayan revolutions fomented and organised in the country of your Excellency. The reply to this provocative message was the despatch of two additional Argentine gunboats and two destroyers to join the flotilla under the command of Rear Admiral O Connor in Paraguayan waters. The special envoy from Paraguay Senor Enrique Solano Lopez, the son of a former president was refused an audience by the head of the Argentine government.

Early in March 1912 for the second time in as many months. Señor Liberto Rojas was deposed from the Presidency and Dr. Pedro Pena was elected in his place. On the 22d of the same month a further revolution took place, this time under the leadership of Dr. Gondra the former president deposed by Colonel Jara, the mominee for the Chief Executive was also a former president. Dr. Emiliano Gonzalez Navero who had served as chief magistrate in 1908, he was elected as provisional president March 13, 1912. Dr. Peña, the ex president, with a number of his followers, took refuge in the Uruguayan Legation. A new government was formed with Dr. Gondra as minister of war, and this was at once recognised by the diplomatic corps.

On May 17, 1912 in the course of a fresh revolutionary outbreak, Colonel Albino Jara who had been mortally injured, was captured with many of his officers. He succumbed to his wounds within a few hours. A new presidential election was held in

PERU:

July, when Señor Eduardo Schaerer formerly mayor of Asunción, was elected president and Dr Pedro Bobaculla vice-president.

The prolonged political upheaval was responsible for severe depression in financial Early in 1912 attempts were made to float a new loan for and commercial circles from ooo, of which from ooo was offered in France. In view of diplomatic repre sentations however and after a discussion in the French Chamber, the whole of the money paid on application by subscribers was returned. The budgets of 1910, 1911 and for the first quarter of 1012 showed the heavy deficit of \$22,000,000 and a total debt of \$27,000 000 Most of the state employes were without salaries The general financial condition was described 'the worst at any time in recent years' Notwith standing the adverse conditions the trade and commerce of Paraguay for the year 1910-In proved rather more favourable than that for the previous twelve months but the want of money was severely felt Merchants while finding it difficult to dispose of stocks during the months of civil war were enabled to place orders in Europe and else where on the customary terms of long credit 42 per cent of the imports entering the re public were British The total value of the goods imported for the year 1910 had amounted to £1 196,000, purporting to show a large advance over the previous two years as did the amount of exports, which came to £9,0,200 Upon examination how ever the import figures proved misleading, since out of the total above referred to £233 000 related to the material for the Paraguayan Central Railway which paid no The progress of the railway suffered considerably in consequence of the political troubles construction was completed to the terminus at Encarnación and the gauge was finally changed throughout In June a fusion of railway interests was completed by an American French Syndicate the Paraguay Central being brought into working association with the North-East Argentine and the Entre Rios railways

In July 1912 occurred the death of Senor Juan G Gonzalez a former President (1890-04) who had been deposed and banished to Argentina. In September the British Min ister Sir Reginald T Tower paid his first official visit to Asuncion

PERU 1

Peru has an estimated area of 670 600 square miles (subject to boundary disputes still unsettled) and the population (mainly Indian and mestizos) according to the most recent estimate is 4,900,000, giving an average of 7 2 inhabitants per square mile. The total public debt amounts to £4,483 230 (£680 000 external but authority to raise a fund of £6,000 000 was granted by Congress on Sept 12, 1912, £3 803,230 internal). The total mileage of railways is 1728 and that of telegraph lines 6475. The army has a strength of 7000 men and the navy comprises 14 vessels with a personnel of 250.

In January 1909 the United States Pacific fleet visited Peruvian waters and in compliment to the republic it was agreed between the United States and the republic of Panama that any dispute arising out of the treaty of February (1909) should be referred to the president of Peru for decision

Notwithstanding advancing prosperity, in May 1909 a political uprising took place, and the capital itself upon more than one occasion was the scene of disturbance. Senor Leguia who had been president since September 1908, was seized by the mob and his life threatened upon his refusal to sign a document placing the army in charge of political opponents. Timely arrival of a squadron of national troops put an end to the incident

An executive decree prohibited the entrance into Peru of Chinese emigrants possessing less than £500 in cash. The government also put into force rules restricting the promiscuous entry of Chinese manual labourers, and passed laws for the alienation of public lands, promoting colonisation and stimulating better-class immigration

A treaty was signed in September 1909 between Peru and Colombia, settling the boundaries in the far north-east the signatories being Señor M F Porras for Peru, and Señor Luis Tanco Argaes for Colombia. The frontier line between Peru and Bohvia was definitely fixed from the mouth of the Heath to that of the Vaverija.

¹ See E. B xxx 264 et seq.

PERU 1095

In January 1900 a treaty was signed between Peru and Brazil settling the boundary question so far as those two republics were concerned, but still leaving open that portion of the frontier claimed by Ecuador Several British officers took part in the Peruvian Brazilian frontier delimitation—namely Colonel Arthur J Woodroffe R E who had had much experience in defining the boundaries of East Africa, Captam H S Toppin Lieutenant M R C Nanson, and Lieutenant C G Moores The Commission sailed from Europe for the second time on October 20, 1912

The unfriendly relations which had so long existed between Peru and Chile regarding the provinces of Tacna and Arica were accentuated when in February 1910 the Peruvian minister in Chile Senor Arturo Garcia, was withdrawn At the end of 1912 however

a friendly settlement was reported to be in progress

A fresh outbreak of popular fury directed against the Peruvian legation at Bogotá Colombia occurred on April 1 1910, the outcome of an inflammatory proclamation addressed by the president of Ecuador Senor Elov Alfaro. This was productive of much angry correspondence and threatened reprisals between the two governments Peruvian troops were moved to the Ecuadorian frontier and in the month of May it seemed as if a border war was inevitable. The excitement gradually calmed down, however and normal conditions were restored. The Ecuadorian frontier question remaining unsettled the United States Brazil and Argentina in June offered their joint services as mediators between Peru and Ecuador, the offer was accepted by Peru but was refused by Ecuador as was also the suggestion that the whole question should be referred either to King Alfonso XIII of Spain or to the Hague Tribunal

The boundary dispute between Peru and Ecuador differs materially from the usual squabbles in which 'the honour of the flag' and the 'dignity of the nation' play prominent parts. Here there is involved a senious question of territory namely the entire province of Loréto. This large tract of land covers an extensive region in the centre of South America, and is divided into northern and southern sections. Peru claims the northern section from Ecuador and as this claim means the relinquishing of one fifth of the whole territory, the objection of Ecuador can be appreciated.

During 1910 commerce and finance advanced encouragingly and education also made headway. The government carried on the policy of providing educational establish ments upon the principle initiated by President Manuel Pardo in 1872 whereby education was made free throughout the republic. Wireless telegraphy introduced into Perubefore it was adopted by any other South American republic, showed remarkable progress aviation also met with encouragement. In September 1970 the Peruvian aviator. Jorge Chavez. Dartnell the first man to fly across the Alps. was killed in Switzerland.

On November 3 1970 a new cabinet was formed under Dr Jose Salvador Cavero but was compelled to resign (Dec 10th) on account of a vote of censure passed by the Chamber of Deputies upon one of its members, Dr Porras minister for foreign relations. The minister of finance Dr Carlos Forero had previously resigned and had been replaced by Señor Deyada. On Dec 28th the Cabinet was reformed under Dr Basadre, being with two exceptions the same as that which held office under Dr Cavero.

On January 20, 1011 a law was passed providing for compensation for accidents to workmen and employees in receipt of not more than £120 per annum. In May a law governing the exportation tax upon crude rubber was promulgated providing that all rubber exported should pay an 8 per cent ad valorem duty based upon the quotation for the commodity prevailing on the Liverpool market

On October 5 1911 a further attack upon the Peruvian legation at Bogota Colombia took place, the mob stoning the residence and tearing down the escutcheon. The out rage was due to ill-feeling over an alleged encroachment of Peru upon territory claimed by Colombia.

The Ministry soon underwent yet another change, Dr Agustin Ganoza, former Minister of Justice, becoming premier on October 20 1911 the attempt to form a Cabinet under Senor Ego Aguirre on the 12th of that month had failed. A boycott of Chilean steamers was instituted at the ports of Mollendo and Pisco in December, but

collapsed owing to the prompt steps taken by the government. The exodus of Perumans from northern Chile continued unabated, leaving the Chilean mines and nitrate fields bare of labour. In the autumn relations with Chile much improved, public processions being held through the streets of Santiago-de-Chile in honour of Peru's centennial

A treaty of amity commerce and navigation between Peru and Cuba was signed at Lima on April 25 1912. The Peruvian navy was now reorganised, the Government purchasing a discarded French cruiser, the "Puy de Lome," for the sum of £150,000, in addition to two submarines, bringing up the total strength to 9. The new vessels were brought over from France by Rear-Admiral Villvicencio in March

The presidential elections, which were fixed for May 25 1912 were productive of so much political trouble that it was found impossible to hold them upon the date select ed. The President who had been petitioned to postpone the date refused to interfere or to summon a Special Congress leaving the question to be dealt with by the ordinary Congress meeting July 28th. There were two candidates,—Señor Aspillaga supported by a combination of several important factions, and Senor Guillermo Eduardo Billing hurst who had been mayor of Lima since 1909, vice-president of the republic (1908) and minister to Chile (1900–1902). Señor Billinghurst was elected August 19th. He commenced his term on September 25 1912 the period being for 4 years and terminating in 1916. The President's first Cabinet was composed of Dr. Eliäs Malpartida president of the cabinet and minister of government, Dr. Wenceslao Valera, minister of foreign affairs. Mr. Baldomero F. Maldonado minister of finance and commerce General Enrique Verala minister of War and Navy, Dr. Francisco Moreyra y Riglos minister of justice, church and instruction, Mr. Fermin Malaga Santolaya, minister of Fomento and public works.

Grave scandals in connection with the conduct of an Anglo-Peruvian concern the Amazon Rubber Company whose business was carried on in the district of Putumayo were brought to light in an official report (July 1912) made by Sir Roger Casement British Consul-General at Rio who was deputed to hold an investigation. It was shown that a terrible system of cruelty prevailed in compelling the natives to collect rubber and public opinion in England and America was deeply stirred. The Peruvian government was blamed for allowing these scandals to exist but defended itself by declaring its entire ignorance of the state of affairs, and claiming to have subsequently sent a commission to investigate crumes and punish the offenders. Three further commissions were nominated to draw up a scheme of reforms, while a judge and a commissioner were appointed to reside in the district

The conditions of trade meanwhile showed further improvement, the revenue from all sources displaying an increase. The estimated revenue for 1911-12, namely £2,784,513 was exceeded by £442,904. With other sums brought in, the excess amounted to £607 602. On the other hand the estimated expenditure for the same period was exceeded amounting to £504 035, leaving a balance in the treasury of £13 567. The receipts for the year 1912-13 were estimated at £3,209,237 and the expenditure at £2,879,924 showing a surplus of £329,113.

The Senate (Sept. 11, 1912) approved an internal loan for £6,000,000 for pur poses of national defence, while the Chamber of Deputies (Oct 17th) sanctioned a loan for \$1,500,000 (£300,000) at a maximum interest of 8 per cent.

SALVADOR 1

Salvador has an area of 7225 square miles, and the population according to the most recent estimate is 1,700,000 giving an average of 235 2 per square mile—Imports were valued in 1910-12 at £1,078,078 and experts at £1,681,262, imports from Great Brit ain being valued at £328,847 and exports to Great Britain at £104,604—The revenue was estimated according to the budget of 1912-13 at 13,140,415 pesos gold, and the expenditure at 13,095,101 pesos gold (1 peso gold #4s, 1 peso paper = 3s id) The total public debt amounts to £2,685,500 (£885,500 external and £1,700,000 internal). The

total mileage of railways is 97 and that of telegraph lines 2706

The army has a strength of 5554 men and officers (exclusive of about 18,000 militia)

The navy comprises one vessel with a personnel of 10

The Amapala Conference of November 1907 which was held between the presidents of Salvador, Honduras and Nicaragua was not productive of permanent peace, as had been anticipated. In December 1908 a further effort to stir up revolution in Salvador was made by the then president of Nicaragua, Señor Jose Santos Zeláya who also instigated an attack upon General Fernando Figueroa, the president of Salvador. Both attempts proved unsuccessful. A state of excitement and unrest nevertheless, prevailed all through 1909 but the strong hand of the government succeeded in suppressing the threatened uprising. In April 1909 the United States found it necessary to despatch three warships to Nicaraguan waters in order to prevent a further incursion into Salvadorian territory. The Government of Salvador at this time showed much self restraint and great administrative capacity with the result that the situation was robbed of mich of its latent danger and while a state of unrest continued in the neighbouring Republics of Nicaragua and Honduras Salvador settled down to peaceful conditions.

Several important railway contracts were entered into in 1910 with an American syndicate more especially one for 75 miles of track connecting Zacapa (in Guatemala) Santa Ana and San Salvador thus securing communication with the Guatemala railway and forming the eastern division link of the Pan American railroad. This contract was followed by another for the construction of a railway from San Salvador to the port of La Libertad on the Pacific coast. Very slow progress has been made with either project.

General Fernando Figuero who had been elected president on March 1 190, retired from office at the end of his four years service being succeeded by Dr. Manuel Enrique Araujo (March 1 1911), under whose administration the republic made consistent headway. Not only have the general trade conditions improved but advancement has been manifested in other directions. The railways telephones and telegraphs have been extended and several other important industrial projects initiated. The attention and the resources of the Government have been devoted to the improvement of the cart roads (carreteras) which are used to a large extent for internal traffic. Salvador already possesses one of the best systems of highways in Central America.

On November 5 1911 was celebrated the centennial anniversary of the state sinde pendence when several additional highways were opened to traffic. The new Salvador line of steamships inaugurated at the end of 1908 continued to play an important part in the economic development of the State and the well managed Salvador Railway of which the steamer service forms a subsidiary undertaking likewise contributed to this advancement. Owing to the favourable public rates which the Salvador line had introduced a rate war' had been anticipated, but through skillful administration this was avoided. The Salvador steamship line has succeeded in restoring the British mercantile flag to Central American waters from which it had entirely disappeared and is carrying on a very extensive trade between Salvadorian, Guatemalan and Mexican ports

In 1912 there were 486 primary schools, of which 203 were for males, 200 for females 83 being mixed, they employ 851 teachers 382 being males and 469 females. The number of pupils m the republic is estimated at 20 569, and the total population of school age is 173 495. In March 1912 an officer of the Spanish Civil Guards Captain Martin Garrido, arrived under contract with the government to reorganise the police force of the country, and to establish a body of Rural Guards for the better protection of life and property in the republic

The finances at the end of 1912 were in a satisfactory state. In 1911 the revenues amounted to 12,359,874 pesos as compared with 10,620,86g pesos in 1910. Under the administration of Dr. M. E. Araujo, large repayments have been made on account of the public debt, payments to the army and navy, which under previous administrations had been in arrear, were liquidated and have since been regularly maintained. Diplomatic and Consular representatives abroad who had not been in receipt of salaries for several months, were paid in full while credits with foreign firms in Europe and the United

States, also for some time suspended, were renewed. Considerable economy on the other hand has been exercised in the control of the public service, expenses not absolute ly necessary have been stopped, freedom from custom house dues is no longer permitted the port of Mazanila, through which many thousands of tons of goods were formerly smuggled is now closed, the strictest scruting is exercised over the collection of revenues old collectors having been removed and new ones appointed, firms and bankers who had advanced loans to the government have been induced to suspend interest for 6 months customs tariffs on articles used by the rick classes have been raised 20 per cent gold while tariffs upon articles consumed by the poor have been lowered, and finally the stamp tax has been rigidly enforced.

The practical results of the financial policy of the government include the increase in the revenue in one year of 1,730,008 pesos 1,000,000 pesos of old debts cleared off many public works of first importance completed and paid for out of revenue the British foreign debt coupons faithfully met (the Salvador bonds have recently stood at the high est price attained namely 101 per cent) and 1,637,000 pesos of the Internal Debt in addition to \$1,000,000 of unpaid salaries, cleared off. The revenue of the state has increased over 16 per cent and the national debt has been reduced by 9 per cent

SANTO DOMINGO1

Santo Domingo has an area of 19,325 square miles, and the population according to the census of 1911 is 675 000, giving an average of 34 89 inhabitants per square mile Imports were valued in 1910-11 at £1 389,932 and exports at £2 200 981 The total public debt is £5 000,000 (£2,835 700 external and £2,164,300 internal) The total mileage of railways is 225, and that of telegraph lines 1028 The army has a strength of 1300 men The navy comprises 6 vessels with a personnel of 100

The year 1909 marked an epoch in the history of the Republic as regards prosperity and progress trade with the neighbouring republic of Haiti was also more active than in any former year. The completion of two railways was effected namely the line between Santiago and Moca, and that between Salcedo and Puerto de Sanchez. An extradition treaty with the United States was celebrated on June 19, 1909.

The national Bank of Santo Domingo was established in 1910 with an authorised capital of \$2,000,000 the president being a United States citizen and the stock holders mainly Cuban financiers. A concession was granted to a British corporation for a rail way line from Puerto de Sanchez to La Vega. Three important measures were enacted, the mining law, stamp-tax law, and diplomatic reorganization law. The republic had a cash balance of about \$6,000,000 which was devoted to public works.

In November 1910 political dissensions again broke out between Haiti and Santo Domingo, in regard to the boundary dispute, both governments finally agreeing to sub mit the controversy to the arbitration tribunal of the Hague

In November 1911 President Ramon Caceres was assassinated Señor Eladio Victoria assumed control of the republic's affairs, and was subsequently elected provisional president (Dec 6th) His nephew, General Alfrédo Victoria aged 27, was appointed commander-in-chief of the army and minister of war and marine

On February 5, 1912 at the meeting of the Chamber the election of Señor Eladio Victoria was confirmed, his appointment now being that of constitutional president for the full term of 6 years. On February 28th a new Cabinet was formed, General Alfredo Victoria retaining the portfolios of war and marine and assuming in addition the temporary secretaryships of the interior and police. On April 18th the pecuniary claims patent, copyright and trade marks Conventions adopted at Buenos Aires in 1910 by the Fourth International Conference of American States were ratified.

The finances of the republic which, in accordance with the convention between the United States and the Santo Domingo governments, are placed under the supervision of an American citizen as general receiver of castoms showed marked improvement from 1000 to 1012, the receipts have increased from \$3,914,300 to \$4 257 000. The

¹ See E. B xxiv 194-5.

imports advanced from \$4,425 913 in 1909 to \$6,257 691 in 1910, while the exports improved from \$8,113 690 in 1909 to \$10 849 623 in 1910 During the first quarter of 1912 the customs receipts resulted in an increase of \$205,522 as compared with the corresponding period of 1911

On June 5 1912 a further revolution broke out under the leadership of one D'Orcihen the government troops at the first engagement being defeated Disturbances continued at intervals throughout the months of July August and September On September 13, 1912 the United States decided to intervene, and despatched the cruiser 'Des Moines' and the gunboat Wheeling' to protect American interests On September 24th a force of 750 United States marines was despatched to protect the customs houses (which had been seized by the revolutionists), in accordance with the Convention of 1907

URUGUAY1

Uruguay has an area of 72 210 square miles and the population according to the most recent estimate is 1,112,000 giving an average of 15 3 inhabitants per square mile Imports were valued in 1910–11 at £0 537 4 3 and exports £0 63 607 imports from Great Britain being valued at £1 030 531 (Jan to July 1910) and exports to Great Britain £437 93, (Jan to July 1911) The revenue was estimated in the budget of 1912–13 at \$35 142 380 and the expenditure at \$35 000 000 (\$1 gold=45 3d) The total public debt amounts to £27 813 077 (£26 185 07, external and £1 628 000 internal) The total mileage of railways is 2011 (including lines under construction) and that of telegraph lines 4819 The army has a strength of 7500 men and 600 officers The naty comprises 12 vessels with a personnel of 660

The presidency of Senor Claudio Williman which began in 1907 was characterised by a cautious financial policy nevertheless considerable sums were devoted in 1909 by the Government to the founding of agricultural colonies the construction of port works, and to the subsidising of certain new railway lines. The general prosperity of the country was shown in the growth of imports and exports. In spite of the Public Debt (amounting to £27 \$13 077) being a heavy one for a country possessing but little over 1 000 000 inhabitants the natural resources of the Republic which are as yet only partially developed are such that the public credit of Uruguay continues to stand high On October 30 1909 the Brazilian Uruguayan Treaty concerning the joint-ownership of the Mitim lagoon and the Jaguareto river was signed

In the early days of 1910 further insurrections were attempted the penal code countenancing such revolts and allowing participators to escape punishment. Many of the disturbances took place in Montevideo in connection with the presidential candidature of Senor Battle y Ordonez (President 1903-07). Much public dissatisfaction was occasioned by the large increase in the strength of the army, and the consequent heavy charge on the Budget (1910).

During President Williams administration a reduction was made in the exportation duties of meat products and the light-dues were diminished the 5 per cent tax on salaries and pensions and the Postal surcharges were eliminated. On the other hand fees were instituted upon industrial and professional licences. Cable rates were reduced by order of the Government and provision was made for the tariffs schedule of cable companies to be revised annually.

From January 1 to February 2 1911 the South American Postal Congress was held at Montevideo this provided for the establishment in that city of an International South American postal bureau under the direction of the government of Uruguay The object of the bureau is to collect arrange publish and distribute data of special interest to the postal service of South American countries including Argentina Bolivia, Brazil Chile Colombia Ecuador Paraguay, Peru, Uruguay and Venezuela

In March 1911 Señor Battle y Ordoñez was elected president of the republic for the second time. Almost immediately an extreme socialistic policy was put forward, with the result that a strong opposition to the government was created. Among other

1 See E B xxvii 805 et seq

measures which were introduced in rapid succession were—a Labour bill (July), opposed by all foreign interests and especially by the British railway companies an Insurance Monopoly bill (July), forbidding within the territory of the republic the carrying on of life and accident insurance operations otherwise than by the State a bill (August) for the establishment of a state meat factory intended to promote open competition with established foreign interests a bill (August) for the establishment of a state mercantile marine, and a scheme for the construction of a number of economic State railways, also intended to promote competition with the existing lines built with British capital. A state monopoly in the manifacture of matches was announced in August 1912. The threatened Insurance Monopoly drew forth a protest from the British minister at Montevideo, Mr. R. J. Kennedy, after the matter had been raised in the House of Commons (Aug. 17th) by Mr. Annan Bryce. M.P. for Inverness Burghs.

Towards the end of May 1911 serious industrial strikes occurred which affected the whole of the labour in Montevideo So far from attempting to control the situation the government ostentatiously stood aside during three days thousands of willing work people were unable to follow their occupations. For this period by decree of the Labour federation, the industrial business and commercial activities of Montevideo were par alysed the supplies of daily food were interrupted theatres remained closed marriages were postponed, and it was difficult even to bury the dead with the customary cere monies. For eleven days following public order remained disturbed. The president openly encouraged the strikes, and declined to extend either police or military protection. Further hostility was shown to foreign enterprise by the cancellation of an important contract entered into in the month of May 1910, between the government of Uruguay and the city of Montevideo Public Works Corporation a British company although the Chamber of Deputies had formally approved of the contract in October 1910 and the executive had signed it.

In September a legation was created at Havana (Cuba) Señor don Rafael J Fossalba being appointed first envoy extraordinary and minister plenipotentiary while Senores Don Juan Zorilla de San Martin and Don Jose Pedro Massera were appointed to represent the republic on the Permanent Arbitration Court at the Hague

In August 1912 Dr Juilo Herrera y Obes, a former president passed away A painful impression was occasioned by President Battle y Ordoñez refusing permission for the deceased to receive burial in the National Pantheon The Chamber insisted however upon this honour being rendered and the president was compelled to give way

The financial conditions of the republic show that the national expenditure has been fast overtaking the revenue. The latter was placed (1912-13) at \$28 535 000 (£5 707 000) while the former was estimated at \$35 132,171 (£7 026,434). A later estimate raised the revenue to \$35 142,380, thus showing a balance of \$10 000 but in local financial circles the realization of this estimate was not anticipated.

VENEZUELA 1

Venezuela has an area of 393 976 square miles and the population according to the most recent estimate is 2,713,703, giving an average of 6 9 inhabitants per square mile Imports were valued in 1910-11 at £3,678 9,9 and exports £4,536 876 imports from Great Britain being valued at £1 050,772 and exports to Great Britain £253 275 (these figures exclude Trinidad, British Guiana and British West Indies) The revenue and expenditure were estimated in the budget of 1912-13 to balance at \$2,500,800 bolivars (1 bolivar = 01 d). The total public debt amounts to £7,686 581 (£4,361,420 external and £3,325 161 internal). The total mileage of railways is 542, and of telegraph lines 4899 The army has a strength of 9600, and the navy comprises 6 vessels with a personnel of 400

After the sentence of exile pronounced upon ex-President Cipriano Castro, which was determined upon mamediately after his departure from Venezuela, December 1908 the conditions of the country began to improve Commercial prosperity was not only resumed and subsequently maintained but more harmomous associations with other

¹ See E B xxiii, 988 et seq

countries, which had been rudely interrupted during the lafter days of General Castlo's term of office were again instituted. Steps were also taken to settle several outstanding boundary questions with both Great Britain and Colombia, and, with the laster republic commercial negotiations as well as the interchange of diplomatic representatives, were resumed. In February 1910 the Governments of Venezuela and the United States agreed upon the appointment of the Earl of Desart who had been in charge of the British case before the International Commission of Inquiry into the Dogger Bank incident (December 1904) as third arbiter in the disputes submitted to the Hague

On April 27 1910 General Juan Vicente Gomez who had assumed office of President in November 1908 upon the departure of General Cipriano Castro was elected Constitutional President for the full term of 4 years On April 30th the Venezuelan Cabinet resigned, but several of the members joined the new Government Legations were established in Cuba and Nicaragua while diplomatic relations were re established with Italy The government failed to arrive at any arrangement with Great Britain as to an additional duty of 30 per cent upon goods imported from the British West Indies

Relations with France and the Netherlands remained raptured. When the new administration was inaugurated assent had been given to the German Minister's proposal of friendly mediation between Venezuela France and the Netherlands the Venezuelan Government being anxious to resume diplomatic intercourse with both States When however an adjustment was expected both the French and Dutch governments made new demands which were considered by Venezuela to be unacceptable. The balance of payments owed by Venezuela to Spain for acts committed in the war of Independence remained unsettled but negotiations on the subject were again resumed Several other pending diplomatic questions between Venezuela and the United States continued unadjusted but on the other hand claims in connection with the Asphalt Company's concession were settled by compromise. The decision of the Hague Tribunal by which Venezuela was condemned to pay the sum of £46 867 in connection with the Orinoco Steam Navigation Company's claim was also satisfied.

In April 1911 important changes were introduced in the Customs tariff the whole tariff law being revised. At the end of this year the payment made by Venezuela under the protocols of Washington of 1903 to Belgium. France. Mexico the United States Spain. Holland Sweden and Norway amounted to 15 817 131 bolivars. The original claims amounted to 21,106 436 bolivars, so that there remained (November 30 1911) an unpaid balance of 5 289 354 bolivars. These amounts do not include the sums paid previously to Germany, Great Britain and Italy aggregating 17 835 150 bolivars.

On January 8 1912 the arbitration convention made between Venezuela and Brazal was ratified the convention to remain in force for 5 years. Negotiations were reopened for the resumption of diplomatic relations between Venezuela and France French citizens retaining their rights to submit their claims to arbitration. On February 12th legal time was established throughout the republic at 4½ hours later than Greenwich the time being telegraphed every second day from the observatory at Carácas (the capital) to each port. The duplex system of telegraphy was adopted by the government upon the whole of its lines. Wireless telegraph stations were established at La Guaira Puerto Cabello Maracaibo and Cumaña. On May 18 1912 an executive decree provided that none but the decimal system should be accepted officially in the law courts, offices of the states and territories of the republic. Several important contracts were entered into between the government and a British and North American corporation, including a sanitation project as well as a paving and a water supply scheme for the capital, but eventually the syndicate was notified that the work must be stopped

In August several persons were arrested for smuggling dynamite and munitions of war into the country from Trinidad, while diplomatic representations were made to the British authorities by the Venezuelan government

In November 1912 by Presidential decree six Venezuelan foreign legations of the first class were established, assigned as follows—(1) the United States, Mexico and Cuba, (2) Colombia, (3) Ecuador Peru and Bolivia, (4) Brazil, Uruguay, Paraguay, Argentina

and Chile, (5) Spain and Italy, (6) Germany; Beigium and the United Kingdom In December 1912 the Department of Finance deposited in the Bank of the Republic Caracas, subject to the orders of the respective legations, the balance of the Debt ac knowledged in the protocols of Washington of 1903, and amounting to 349,587 bolivars (Percy F Martin)

LIBERIA 1

Since 1909—10 the frontier with the French possessions has been limited on the spot by a Franco-Laberian Commission, on which the principal Liberian representatives were two Dutch officers Naval Captain S P L Honoré Naber and Naval Lieutenant J J Moret. On the west the frontier with the adjoining British protectorate of Sierra Leone has been changed. Liberia has ceded to Great Britain the small district of Kanre Lahun (a name which should really be pronounced and written Käre Laun) which therefore brings the frontier of Sierra Leone in a loop farther to the north east On the other hand Sierra Leone has ceded to Liberia the district of equivalent size known as the Morro Forest between the upper River Mano (formerly the boundary) and its western tributary the Morro This boundary is altogether more satisfactory as it no longer subdivides tribes into different sections under Liberia and Great Britain It gives to Great Britain better trading access to the river Makona (towards which the Baima railway will now be carried) and yields to Liberia the whole of the great Gora Forest, valuable for its rubber and timber

With regard to the flora of Liberia a few fresh discoveries have been made by Mr Bunting Dr Otto Stapf of Kew has pointed out the existence in Liberia of a valuable fodder grass the Pennisetum purpureum. This is likely to prove very useful as clearings in the forest increase and greater attention is given to stock raising. From the apparent absence of tsetse fly in much of the Liberian hinterland and the consequent success which attends cattle breeding it is hoped that as the country settles down into a peaceable condition the attention of the natives may be more and more concentrated on stock rearing as well as on agriculture for the question of food supply in West Africa is becoming a very important one. It is absurd that Liberia should import such enormous quantities of rice meat and fish when all these things could be obtained locally if the attention of her inhabitants could be concentrated on the land and the waters of the coast instead of being almost entirely absorbed by factious political questions slave-raiding and civil war.

In regard to the fauna of Liberia the first capture and export of living specimens of the pigmy I iberian hippopotamus were made in 1912 by a German big game hunter Major Schomburgk, of Hamburg Two hundred pits were dug by this energetic naturalist (who was assisted in his explorations of Liberia by his wife) and five pigmy hippos in excellent condition were captured quickly became tame, and were distributed between the zoological gardens of the United States and Germany through the agency of Carl Hagenbeck. For the first time naturalists were able to get a clear idea of the aspect of the pigmy hippopotamus when alive. It was seen to differ from its larger relation not only in size (it is little bigger than a large pig) but in having a more stender muszle a more arched profile along the line of the nose and a less wrinkled body. It stands proportionately higher in the legs and is obviously much more active on land than Hippopotamus amphibius. According to Major Schomburgk's researches this pigmy hippopotamus though well able to swim does not spend much of its time in the water but leads a life in the dense forest and sleeps on land very often making long burrows or tunnels in the dense herbage or undergrowth of the jungle. With its fore-feet in which only the two front hoofs ordinarily touch the ground it is able to do a great deal of burrowing and will rapidly conceal itself from sight by digging hollows in the mud, into which it subsides. It would also seem from Schomburgk is researches that Liberia possessed a pigmy form of elephant as well as a hippopotamus somewhat akin in the shape and size of its ears to the well marked small variety found in the Cameroon

As segards minerals an important discovery of genuine diamonds was made in the western part of Liberia in 1909—10 near the lower St Paul River, further stones being found in 1911. The diamonds were discovered by agents of a British company engaged in constructing a motor road due east from the river to the coffee planting districts. Affuvial gold had been discovered by the same company, and it was in the search for gold that diamonds were obtained from the gravel of small streams. These diamonds are of good water, and very similar to those of Brazil. So far no very large stone has been found but it is believed that such as have been exported (about 154 in number down to 1917) indicate the ensistence of a matrix in this part of Liberia which may quite possibly furnish stones rivalling those of Brazil and Ginaris—countries which greatly resemble Liberia in their petrology

LIBERIA 1103

A diamond was also obtained from the vicinity of the Finley Mountains in 1912 There has been a slight increase in the output of gold but nothing at present to indicate that any one part of Liberia is highly auriferous

The journeys of Captain Braithwaite Wallis, formerly British Consul General in Liberia (since transferred to French West Africa), an account of which was published in 1910, threw some light on the cause of the grievous troubles which have recently convulsed the hinterland of Liberia and hindered access to the trading centres. After the successful campaigns (1890-1898) of the French against the Mandingo Mahdi, Samon, and his Sofa following,1 it is evident that remnants of Samon's army found refuge in the dense forests of Liberia, where they joined with quasi Mahommedan, tribes partly of Mandingo stock in a common hatred of the white man's encroachments The settlement of these Sofas amongst the Buzi, Toma, and Ghalin tribes provoked further trouble with the French in the form of border raids and it has become more than ever incumbent on the Liberian Government at Monrovia that the Republic should possess an efficient police force capable of maintaining order in the interior and firmly opposing itself to acts of brigandage and intertribal war

On January 1, 1912 Mr Arthur Barclay was succeeded in the Presidency of the Republic by the Hon Daniel Howard Important concessions have been made to the German South American Telegraph Company giving them the right to establish and operate a system of wireless telegraph communication to and within the territory and Republic of Liberia The concession originally made to a British company in 1800 for the working of the Liberian rubber forests, the planting of rubber trees, etc., has been revised and amended, bringing it more into line with the interests of other foreign traders and at the same time compensating the company for the past investments and sacrifices which it has made by defining closely the area of its forest preservation and allotting to it at a low rental for a long period areas of unoccupied land for experi mental planting purposes. In return this company, which has already achieved considerable success in its introduction of the Hevea or Para rubber has agreed to distribute widely amongst the indigenous people of Liberia the seeds and stumps of the Pará tree, which is likely to become much cultivated in the territories of the Republic so similar in their soil and climate to the regions of Brazil from which the Hevea has been derived. But the most important Act of the Legislature in 1911 was the Loan Act for the negotiation of a loan through the good offices of the United States Government for the refunding and extinguishing of all debts and pecuniary obligations of the Republic whether foreign or domestic

This loan, it was arranged was to be issued in the form of bonds payable in New York both as to principal and interest in gold coin of the United States the bonds to be issued in such form as might be necessary to secure their admission to the stock exchanges of New York London Paris and Germany the annual interest on the bonds not to exceed five per cent the bonds to be issued for a period of not less than forty years and to be redeemable under the provisions of the sinking fund at a premium of not more than two and a half per cent of their face value during the first ten years from the issue of the loan and afterwards at par For the service of this loan there was to be set aside monthly from the revenues assigned to that service a sum not exceeding twenty per cent of the gross receipts during the preceding month which amount should not be less than 7 600 dollars in United States After the payment of the interest and necessary expenses the residue was to be set aside as a sinking fund and this sinking fund was in no case to be less than 12 500 dollars per annum. The security for this payment of interest and principal and of all charges on the loan was to be the revenues from the customs duties and the rubber tax, also if need be, the shipping tax on native labourers going abroad for service. The collection and administration of this revenue during the life of the loan were invested in a customs receivership to be administered by a general receiver of customs who should be from time to time designated by the President of the United States of America and thereupon commissioned by the President of Liberta and associated with three assistant receivers to be designated respec tively by the governments of the Republic of France, the German Empire and the United Kingdom of Great Britain and Ireland The accounts of the general receiver should be rendered monthly to the secretary of the Treasury whose emoluments and those of his assistant receivers were to be fixed at such amounts as the President of the Umted States might approve During the existence of this receivership the general receiver would have ¹ See E B xxiv 642d 643a xxv 56d Samori died in 1900

MONACO 1104

full and complete authority to collect customs and other assigned revenues as he might deem necessary for this purpose and should be supported by an adequate customs guard and patrol service on land and sea by the Republic of Liberia. And if the Republic should fail to provide an efficient customs guard and patrol service the general receiver might establish such himself and pay the expenses thereof out of the assigned revenues. For the further security of the revenue during the maintenance of internal peace there was to be maintained during the life of the loan an adequate frontier police force the officers of which were to be designated by the President of the United States of America. The general receiver of cus toms (an American) would also exercise the functions of a financial adviser to the Republic, and co-operate with the secretary of the Treasury to bring order and system into the finances, and further exercise a reasonable control over the expenditure in each fiscal year and a proper accounting for all the moneys received and disbursed

The conclusion of the loan was made contingent on the settlement of the outstand ing claims of the creditors of the Liberian Government Many of these were Germans and some delay was caused by the discrepancy between the German claims and the views of the Liberian Government, but on June 25, 1912 an agreement was finally reached on a basis described by both sides as very satisfactory' The negro Re public of Liberia has thus come within somewhat the same financial administrative control on the part of the United States as has so greatly benefited the Republic of Santo Domingo in the West Indies

The intervention of the United States has checked the ambition of France to eat away by degrees the hinterland of Liberia. The Liberians would add that it has equally checked the desire of the Sierra Leone Government to absorb Liberia from the west It is doubtful whether such a desire has ever existed, though it is certain that both the British colonial government of Sierra Leone and the local government of French Guinea were becoming increasingly exasperated by the continual disorder prevailing in the Liberian hinterland and the effects that such disorder had on the populations and on the trade of the adjoining territories It can only be to the advantage of both British Sierra Leone and French Guinea and their respective railway systems that the Republic of Liberia should become a stable, prosperous, and homogeneous state a great rubber producing country, and one which by its peculiar vegetable and mineral products rather takes a place of its own in the West African system than becomes a rival to the industries of British and French West Africa.

Statistics - The approximate revenue of Liberia for 1909 was 378 300 dollars (about Statistics — The approximate revenue for one not yet published but are said to show a slight increase fro cool. The returns for 1910 are not yet published but are said to show a slight increase. The revenue for 1905 (the year before British customs collectors were appointed) was about £53 200. The total annual trade in the last year for which complete statistics are issued (1909) was worth (imports and exports nearly equal) £407 200. The chief exports are still rubber palm oil and palm kernels piassava fibre coffee ivory ginger and camwood Bribliography — A Journey through the Libertan Hinterland by Captain C Braith waite Walks Geographical Journal 1910 Op Expedition met de Franschen and de Fransch-Libertuansche Gronsregelings-expedition in de jurn 1908 in 1909 by Captain Naber and Libert Moret. The Hague 1910 (an exceedingly interesting and well written work in 1908 in 1909 by Captain Naber and Libert Moret. Dutch on inner Liberia and on the recent political troubles) (H H JOHNSTON)

MONACO 2

On January 5 1011 a Constitution was granted by Prince Albert I of Monaco to his subjects It was based upon a report made by three French juris-consults — Jules Roche Louis Renault and André Weiss The government of the principality is carried on under the authority of the Prince by a minister of state assisted by a council of govern ment consisting of the minister and three councillors nominated by the Prince three councillors perform the duties of ministers of the Interior, Finance and Public Works. A council of state is established, which includes the minister, a secretary of state, the three councillors, the first president of the Court of Appeal, and the procureur general The legislative power is exercised by the Prince and a national council This council is composed of twenty one members elected for four years by universal direct suffrage with a scrutin de liste and is presided over by a president and a vice-president

¹ Mt. Reed P Clark, of New Hampshire, was appointed ² See E B xviii 684.

MOROCCO

nominated by the Prince It holds sessions in May and October The Prince has the power after consultation with the council of state, to dispolve the national council, but a new election must take place within three months thereafter. All communications from the Prince to the national council must be made through the minister of state The initiation and sanction of laws with certain reservations are made by the Prince, who legalises each law by the promulgation of an edict but no direct tax can be imposed without the authority of the national council. The constitution gives full individual liberty no proceedings can be taken against any person and no pumishment can be inflicted except in accordance with the law Property is inviolable and freedom of education and religion and the right of public peaceable meeting are assured

By the constitution the principality is divided into three communes corresponding with those which already existed namely Monaco the Condamine and Monte Carlo A mayor and communal council is established in each This council consists of nine members elected for three years by universal suffrage with a scrutin de liste. The courts of justice consist of a tribunal of first instance a court of appeal and a Conseil de Revision constitution does not alter the judicial organisation heretofore existing as defined by the Edict of May 18 1909 with the exception that it establishes a supreme court composed of ten members five appointed by the Prince one by the council of state one by the national council two by the court of appeal and one by the civil court of first instance

A residence of ten years in the principality by a foreigner over the age of twenty one vears or authorisation granted by the Prince under Article 13 of the Code Civil and a residence of three years after the promulgation of the authorisation is necessary before

naturalisation is granted

The population of the principality in 1908 the date of the taking of the last census showed a total of 19 121 including 8 241 Italians 7,306 French 516 Germans 391 Swis 385 English 219 Belgians 210 Austrians and 1 482 Monegasques Included in these 1 482 Monegasques are 847 naturalised subjects consisting of 676 of Italian origin 85 of French origin and the remaining 86 of various other nationalities

It should be noted that there is a large floating population of a heterogeneous character which annually visit the principality and must be taken into consideration when attempting any calculation as to the actual number of the population The principality contains incs This does not include the domain of the Prince authorised to the activation as the property not built upon exclusive of the domain of the Prince is estimated at 150 000 000 francs. The value of the property not built upon exclusive of the domain of the Prince is estimated at 150 000 000 francs. The value of the property of companies authorised to carry on business in the principality such as hotels etc. represented by shares

and debentures in January 1909 amounted to 397 000 000 francs

The reigning Prince (b 1848) is a man of great scientific attainments and devotes much of his spare time and a considerable portion of his fortune to research especially in oceanog rephy. He has of late given much attention to aviation and was the first reigning Prince to make an ascent in an aeroplane. He has initiated great improvements in the principality, more particularly in the founding of the Musee Oceanographique and the construction of the harbour which when completed will be formed of two stone built sea walls making a rectangular water space of approximately 150 000 sq. ft. The south quay is equipped for the handling of merchandise being connected up with the Paris Lyons and Mediterranean. Railway while at the quay facing it there is special accommodation for yachts. Recently many of the large Mediterranean liners have made Monaco their port of call lying off the coast and communicating with the harbour by tenders

MOROCCO 1

Recent History -At the beginning of 1910 there seemed to be an opportunity for France to pursue her work of pacific penetration' in Morocco free at least from Works of public utility were planned medical services were orinternal troubles ganised and a Franco Algerian school was opened in Fez Mulai el Kebir a brother of the Sultan and a pretender to the throne decided upon submission and removed from his place of refuge at Ain Sidi Melluk to Fez. The peaceful progress of the country appeared the more likely through the defeat at Tadia (June 1910) of Ma el Afnin This sheikh and his followers known as 'the Blue men' who came from the Sahara, had greatly troubled the southern borders of the empire and were bitterly hostile to European influence Ma el Amin's withdrawal to the Sahara after his defeat, was followed by his death at Tiznet (Oct 28, 1910) Another factor which tended towards peace was the settlement during 1910 of the claims made by the suf

¹ See E B xviii 851 et seg

feners from the hombardment of Casabhanca in 1907. This work was carried out by an International Commission which after fourteen months labour awarded £447,000 as compensation, against a total of £1,060,000 claimed. Of the compensation money £148,000 was awarded to Moroccan subjects. A convention between Spain and Morocco with regard to the frontiers of the preside of Ceuta was signed on November 17, 1910. Morocco agreed to pay Spain, m 75 yearly instalments, £2 600,000 as compensation for the expenses of the Riff campaign of 1900.

Before the end of roro, however, new trouble arose Mulas Hafid remained in active at Fez and lost popularity because of his dependence upon France while the Berber hill tribes were roused to revolt by the exactions of his grand vizier El Glawi the head of a great Marrakesh clan, one of whose sons was Basha of that city In October 1910 the tribes around Fez rose against the Sultan and by the beginning of 1911 the whole of northern Morocco was in an unsettled condition Mequinez was captured by the rebels Mulai Zin, a brother of Mulai Hafid being proclaimed Sultan there By March 1911 the situation was serious The Sharada, Beni Hassen and other tribes proceeded to invest Fez and there was much fighting. The position of Mulai Hafid and of the Europeans in the capital became one of discomfort if not of grave perl and France decided to send a force to disperse the tribesmen April 26 a small body under Commandant Bremond reached Fez after four days hard fighting On the same date France notified the signatories of the Act of Alge ciras of the measures she was taking to save the Europeans at Fez Bremond's force was insufficient to disperse the tribesmen who were gathered round the city though in numerous engagements he inflicted upon them heavy losses. Reinforcements under General Momer reached Fez on May 21 and the siege was raised just as the inhabitants were beginning to run short of food. Mulai Hafid received the French troops as friends and with their aid the discomfiture of the rebel tribesmen around Fez was completed while El Glawi was dismissed from the Grand Vizierate

General Monier after the pacification of the Fez district proceeded to Mequinez and obtained the submission of Mulai Zin (June) who was taken to Fez and placed in the Sultan's palace Meantime General Tontée had pacified the region of the middle Muluya and all overt opposition to Mulai Hafid's authority was crushed

The action of France in occupying Fez was followed by the despatch (July 1 1011) by the German Government of the gunboat "Panther" to the closed port of Agadir in Southern Morocco the ostensible reason given being the peril in which German employes and property were placed by disturbances in the Sus province. In reality Germany challenged the whole position of France in Morocco and by sending the 'Panther" to Agadir forced the reopening of negotiations regarding the situation. The international crisis is discussed elsewhere (see under "International Affairs Part I Sect i). As far as Morocco itself was concerned the position was defined by the resulting Franco-German agreement of November 4 1911. By this agreement that of February 1909 was confirmed. France again agreed to safeguard economic equality in Morocco, while Germany withdrew all opposition to French political action in Morocco. An arrangement for the hearing by an arbitrator of complaints against the French authorities in Morocco (when the consular authorities were unable to settle them) was among the minor provisions of the new convention

Mulai Hafid accepted the new situation without public protest and on March 30 1312 he signed a treaty with France which formally ended the independence of Morocco Mulai Hafid acknowledged a French protectorate which was also subsequently recognised by the powers, who withdrew their diplomatic representatives. In place of the French minister (M Regnault) General Lyautey was appointed Resident General He arrived in Fez on May 25 1912 and was received by Mulai Hafid who intimated his desire to abdicate. His helplessness and the loss of the freedom of his country arreatly affected ham. But the French refused at the time to sanction his abdication

"Sår Regmald Lister (1865-1912) Bertish Minister to Morocco since October 1908 died at Tangier on November 10, 1912 No successor was appointed

The autumn of rour had witnessed a renewal of lewlessness in Morocco After General Momer's arrival at Fez in May of that year French officers were placed in command of the Sherifeen troops, and Commandant Brémond was in charge of a mehalla which routed the Ait Yussi (Sept 1911) who had been pillaging Saru, to the south of Fez Not for the first time criticism was eccasioned by the inability of the French officers to prevent acts of barbarity by the Moorish soldiers under their com mand. There was an isolated outbreak, but in the Riff country there was in September and October 1911 renewed and widespread fighting The sudden occupation by Spain of Laraiche and Al Kasr al Kabir (Alcazar) in June 1911 while the Franco-German negotiations were still proceeding, added both to the local and the European uneasiness Alcazar lying across the road from Tangier to Fez and thus in hostile hands threatening French communications.1 The tact of the Spaniards in main taining friendly relations with the Moors in the occupied territory eased the local A treaty between Spain and France signed on November 27 1012 fixed the extent of the Spanish zone and settled railway and other questions. Spain ob tained control of a continuous strip of northern Morocco extending from the Muluva to Ceuta, as well as the Alcazar Laraiche region and the Ifni enclave in the south

Another rising at Sifru at the close of 1911 was followed in the spring of 1912 by a revolt among the Sherifeen troops at Fez For three days during April (17th 18th and 10th) the rebel troops held great part of the city producing a reign of terror Many lives were lost including those of thirty nine French officers or civilians Gen eral Monier's 2 arrival with a strong force at Fez on the 20th restored order to the city, which was placed under court martial. In the reprisals many innocent persons unfortunately suffered On General Lyautey's arrival in May a wiser course was adopted and the proposal to fine the townsmen for a revolt in which they had been the victims was abandoned. The Sherifeen army at Fez was disbanded a certain number of the troops being allowed to enlist in the French force of occupation

The advent of a new pretender in the South of Morocco caused further anxiety This pretender, Hamed el Hiba a son of the notorious Ma el Amin was declared Sultan by the Sus tribes though it was stated that he described himself simply as the Khalif of one of the imperial princes resident in Tafilalt On August 18 el Hiba occupied Marrakesh Shortly before this event Mulai Hafid had moved to Rabat and there on August 12 he was permitted to abdicate the throne, appointing his brother Yusef his successor (Mulai Hafid immediately after his abdication visited France and in September 1912 took up his residence in Tangier where Abdul Aziz the brother whom he had supplanted, was also quartered Hafid was granted a pension from France) Mulai Yusef who was virtually the nominee of the French at once notified his adhesion to the protectorate treaty Hiba's troops were routed on September 7 by a French force under Col Mangin and the pretender fled south whither he was not pursued Nine Frenchmen who had been shut up in Marrakesh were rescued uninjured and on September 10 Yusef was formally proclaimed emperor at Marrakesh His accession had already been accepted by the other Moorish cities In October General Lyautey occupied Agadir At that period France had 58 000 troops in Morocco including a strong detachment of black soldiers from Senegal

One result of the negotiations between the Powers in 1911-12 was the decision that the port of Tangier while remaining under the nominal sovereignty of Morocco should be 'internationalized" It was placed under the administration of a specially created body, financed from the customs levied at the port as well as from direct taxation

The agreements with Germany (1911) and with Spain and Italy (1912) accepted the suppression of the Consular Courts when the other Powers exercising judicial jurisdiction in Morocco also consented to that course. Austria and Russia made

¹ One or two regrettable meidents such as the strest of a French consular agent for carrying arms contrary to Spanish regulations occurred at Aleazar but they were rectified by the good sense of the French and Spanish governments

² On August 31 1912 General Franchet d'Esparey succeeded General Monier as com-

mander of the French troops in Western Morocco

1108

sumilar declarations The consent of Great Britain was contingent on the suppression tif the consular regime in Egypt

Economic Conditions—Some progress has been made in mapping Morocco but there remain considerable tracts unvisited by Europeans Trustworthy statistics of the population are still lacking The British Consul General in 1910 considered 5 000 000 to be approx tion are still lacking The British Consul General in 1910 considered 5 000 000 to be approximately the correct figure Fez had a population of about 102 000 Rabat Salli 47 000 Tangier 46 000 (including 12 000 Jews and 9 000 Europeans) Tetuan 30 000 (including 7 000 Jews and 400 Europeans) Marrakesh 60,000 Casablanca 32 000 (including 5 500 Europeans), Mequinez 24,000 The development of the resources of the empire has been retarded by the internal troubles, by the lack of railways and the absence of good accommodation at the ports. Up to the close of 1912 practically none of the public works contemplated by the Act of Algeciras (1906) had been begun though the survey for a railway from Tangier to Fez was undertaken Only in the Shawia province (in French occupation since 1907) has there been any development in agriculture on modern lines. A 2 ft gauge

The total trade of Morocco in 1910 was valued at £6 456,000 imports £4 190 000 exports £2 266 000 This was an increase of £524 000 or over 9% on the trade of 1909 but this increase was due entirely to greater trade with Mehila and on the Algerian Morocco frontier the trade at the ports being £573 000 less than in 1908 The decline was largely attributable to shortage in the harvest for Morocco being 1908 The decline was largely attributable to shortage in the harvest for Morocco being a purely agricultural and pastoral country the purchasing power of the people depends on the harvest Barley oxen and sheep skins and hides wool almonds and eggs constitute their main exports. At the ports (Melilla excepted) the imports of which textiles and food stuffs are the chief totalled in value in 1910 \$\ifsigle 2,468 000 a decrease of some 12 % compared with 1909. The decline was more apparent than real as since 1909 a new method of levying durty makes the average value of goods imported considerably less than in former years. The exports in 1910 were valued at £1,575,000 which compares with £1 807 000 in 1909. The trade on the Algerian frontier was valued at £1 001 000 in 1910 an increase of 48 over the previous year. By this route two-thirds of the exports consist of live stock. In return the Moors buy sugar tea (more drunk in Morocco than coffee) flour and cotton and woollen goods. Taking the whole trade of Morocco the British percentage fell from 39 6 in 1908 to 24 7 in 1910 the French percentage increased from 36 6 in 1908 to 41 8 in 1910 the German percentage (which had been 14 1 in 1907) decreased from 10 9 in 1908 to 9 8 in 1910 the Spanish percentage rose from 5 3 in 1908 to 17 1 in 1910. These four countries take between them over 93 % of the external trade of Morocco. A Franco-Italian declara tion of October 28 1912 assured to Italy most favoured nation treatment in Morocco. The customs revenue at the ports (since 1910 under European control) is from £400.

The customs revenue at the ports (since 1910 under European control) is from £400 000 to £500 000 a year. In 1912 the external indebtedness was £12 250 000

NORWAY 1

Population — The resident population of Norway in 1910 (Dec 1) was 2 392 698 or roughly an increase of 150 000 since 1900 The chief reasons of the smallness of this growth are the heavy emigration to the United States (190,000 persons) during the period, and the declining birth rate. The largest increase has taken place in the northern south-eastern and Trondhjem districts, coinciding practically with the de velopment of industrial enterprise, while in the midland peasant districts and the coast districts in the south the population is stationary or declining

Since 1905 tourist traffic has developed beyond all previous records A great num ber of new botels have been opened, new and more modern conveyances have been supplied speluding a number of motor cars, and on several lakes motor boats have been introduced. The number of tourists is roughly put down at 50,000 per annum, and the money brought into the country from this traffic is about £1,000,000

Railways - Since the completion of the Christiania Bergen trunk line (Bergensbanen) in the autumn of 1900 only a few new lines of minor importance have been opened for traffic. The total length of Norwegian railways is now about 1920 miles 1620 of which are owned by the State. In 1908 the Storthing passed a new railway scheme for the construction of

¹ See E B xix 799 et seq

railways at a total length of 320 miles. In 1910 Norway got her first electric railway, belong ing to a private company but electric traction is to be further expanded, the important line

between Christiania and Drammen being actually rebuilt for electric traffic

between Christiania and Drammen being actuary replicit for electric trains:

Agriculture — According to the latest official statistics (1907) the agricultural area amounts to 2 2 million acres and the area suitable for agriculture to some \$20,000 acres Since 1907 at least some 30 000 acres have been laid under the plough the percentage being greatest in West and North Norway. The characteristic feature in Norwegian agriculture within the last decade has been the constant increase of small freeholders having for their specialty the cultivation of root crops and breeding of cattle. The implements may gen specialty the cultivation of root crops and breeding of cattle. The implements may generally be described as thoroughly modern. The export value of the agricultural products in 1911 chiefly hay butter and condensed and sterilized milk and cream was about

The produce of an average agricultural year may be valued at £14,000 000

The total area of forests is approximately 2 750 sq m. with a value of about Forestry -£30 000 000. Upwards of 61 4 per cent of the forests are grown with pine and fir trees Next to agriculture forestry ranks highest from a national economic point of view the export value of its products for the last ten years being annually more than £4 000 000 besides what is consumed at home During the last decade forestry has made important progress chiefly owing to the scientific efforts of the Norwegian Forest Association (1898) which within the last five years only has had annually planted between 10 and 12 millions of new trees It is still however the general opinion among forest experts in Norway that the amount of annual lumbering exceeds the increase in the natural growth of the trees

Fisheries —Up to the close of the 19th century the Norwegian fisheries generally retained the character of coast fisheries which they had had for centuries. Since then an enormous change has taken place. The great bank fishery carried on with fishing steamers and motor vessels chiefly from Aalesund (about 14,000 inhabitants) though initiated towards the close of the last century is chiefly a development of the last decade. The same remark also applies to some other important fisheries. At the same time the great coast fisheries have been thoroughly modernized as to outfittings implements etc. The Norwegian fishing fleet consists at present of about 14 000 modern vessels, including 183 steamers with an approximate value of £1 600 000 Along with these practical reforms, by which the Nor wegian fisheries are now extending over greater areas than formerly energetic efforts have been made and are being continued to improve the methods for the utilization and the preparation of the produce its transport etc the result being a great expansion of the trade. In 1911 the value of the exports of fishery was estimated at £5,400,000 as against £2,700,000 An important whaling industry has since 1906 been developed in the distant waters of the South Atlantic At the end of 1911 the number of Norwegian whaling companies was about 50 with a share capital of £1 800 000 the profits for the season of 1911 being estimated at about £800 000

Mining —The oldest and most important branch of the mining industry is the working of copper ore and sulphuric pyrites. It seems however as if within no distant future the working of iron ore will become the principal mining industry of the country. This is partly because of the extensive deposits of iron chiefly in North Norway estimated by official experts at 175 million tons yielding about 100 million tons of iron partly because of the rapid development of the electrolytic methods for the melting of iron ore three important plants having actually been laid down for this industry. The value of the exports of the mining industry for 1911 amounts to about £700 000 as compared with £200 000 in 1901 The value of the exports of the In connection with the mining industry must also be mentioned the manufacture of nitrate

of calcium which is gradually developing into an important industry.

Manufactures —During the first decade of the 20th century Norway became more and more of a manufacturing country the number of plants with more than 100 hands having increased from 149 in 1900 to 220 in 1909. During the same period the total number of hands increased from 80 000 to 105 000. About 34 per cent of the plants are owned by joint stock companies with a fully paid up capital of about £16 000 000. 61 per cent of which

is Norwegian and 39 per cent foreign investment

Shapping and Commerce—Since 1900 the Norwegian mercantile fleet has been rapidly passing from sail to steam. In 1910 Norway had 1738 steamers and 1205 sailing vessels with a gross tonnage of respectively 1 470 385 and 685 072. Besides the sea going fleet there was a fleet of 104 motor vessels with a gross tonnage of 5 500 chiefly employed in the there was a need of the total value of the merchant fleet is estimated at £17 000 000 and the annual profits to the country at about £5 500 000 The total personnel is about 37 000 annual profits to the country at about £5 500 000 The total personnel is about 37 000 20 per cent being supposed to be foreigners. In 1910 Norway was owning 4 5 per cent of the aggregate tonnage of the world. The value of imports has increased from £17 000 000 the aggregate tonnage of the world in 1901 to £26 000 000 in 1911 and the exports within the same period from £8 900 000 to £16 600 000, the latter increase being chiefly due to the number of new commercial products within recent years, among them nitrate of calcium and condensed milk and cream Great Britain and Germany are still the countries principally trading with Norway, the former taking the majority of her exports the latter supplying most of her imports. The statistics of the last three years however show a growing tendency to reverse these figures.

Government—The only important change in the system of parliamentary government

(see EB xxx, 804) within the last few years is that by a measure adopted by the Storthing in 1910 the members (numbering 123) instead of being paid at a rate of 13s 4d a day during session have a fixed salary of £166 for the session irrespectively of its length and in additional contents.

tion to their travelling expenses

Finance etc.—Since 1905 the Norwegian state budget has been divided into two chief sections one embracing the ordinary the other the extraordinary revenue and expenditure. The annual revenue and expenditure for the two last financial years (by a measure adopted by the Storthing in 1907 the financial year was altered from April-March to July-June) were respectively 16 100 000 and 16 600 000. In 1911 the Storthing passed an amendment to the constitution by which Norway is, under ordinary conditions to have a fixed unassail

able reserve of \$2,222 222

Army and Navy —In 1909 the Storthing passed an army bill (in force since Jan 1 1911) by which the former organization of the army was entirely changed Instead of the old divisions (E B xix 805) the conscripts by the new division are enlisted in two units the line (12 years) and the infilia or reserve (8 years) the total service being 20 years. Besides these two units there is a second reserve (landslorm) including all men from the 18th to the 50th year of age In war every man is liable to service from the 18th to the 55th year of age The country is divided into 47 conscription districts corresponding to the number of infantry battalions When the new organization is worked out in all details Norway will be able to raise an army of about 115 000 men. The military budget shows an annual expenditure of about £800 000 The navy has been increased by a submarine and two de stroyers For the summer of 1912 the Storthing voted the necessary means for the construc tion of two battleships and one submarine two submarines being in construction

Local Government — Norway is divided into 61 town communes and 589 rural communes the former being administered by councils numbering from 20 to 84 members the latter by councils of 12 to 48 members. The electoral period is three years. In 1910 the electoral period is three years. toral franchise for local county election was extended to women on the same conditions as for men the suffrage being thereby made universal for both sexes in municipal affairs

Principal Towns -In 1899 Christiama began to suffer from a reaction after some years extraordinary growth and the result of a disproportionate development was an economic crisis which made the population decline and for some years held the city paralysed. In 1905 the pressure began to give way and since then the progress has been very satisfactory the increasing importance of the city having chiefly manifested itself in the extensive port and railway arrangements for the rapidly growing traffic. The population has again in creased being at the municipal census of 1912 (Feb 1) 247 588. In the period 1906-1911 the estimated value of the imports of Christiania increased from £7 500 000 to £11 400 000. and her exports from £2 000 000 to £2 700 000 At present 50 per cent of the imports and

and her exports from £2 000 000 to £2 700 000. At present 50 per cent of the imports and 16 per cent of the exports of Norway are forwarded via (hristiania The development of Bergen during the past decade although generally satisfactory especially since 1906 has not been so rapid as in other leading towns of Norway. The population was in 1912 (Feb. 1) 77.983. The chief event in the history of Bergen within recent years has been the establishment of the railway connection with Christiania in 1909. The estimated value of the imports of Bergen which in 1906 was about £3 300 000 had in

1911 increased to £4 100 000 and the value of her exports within the same period from about £1 500 000 to £3 300 000

The population of Trondhjem increased between 1900 and 1910 by more than 7 000 being 45 228 in 1910 (Dec 1) Her importance as an exporting town has been established on a broader basis than ever and extensive port works are being executed to meet the growing demands of the traffic. The chief event in the recent history of the town has been the opening of the Technic Academy in 1910. The estimated value of the imports of Trondhjem. increased from about £1 600 000 in 1906 to £2 000 000 in 1911 and the value of her exports

Stavanger has become the leading town of Norway in the canning industry and the centre of her exportation of tinned foods. The population rose in 1900-10 by about 7 000 being 37 118 in 1910 (Dec 1). The estimated value of the imports intereased from £700 000

in 1906 to £1 300 000 in 1911 and the exports from £470 000 to £900,000

Recent Political History -By the dissolution of the Union with Sweden in 1905 the national conflict between the two great political parties of Norway (Conservatives and Liberals) came to an end for ever The constitutional differences having in all essential points been settled in 1884, the country was left free to grapple with the social and economic questions of the time By far the most important of these questions—in fact the pivot of Norwegian politics in 1906-12-was the so-called "Concession case ' we, the right of foreigners as well as natives to hold by government concession real property in Morway, especially forests, mines and waterfalls. At the general elections of 1906 at which was resumed a Liberel majority of 27 against 36 Conservatives and 10 Socialists the "Concession-case" had not yet come decayvely to the front, but during the second

half of 1906 and the first half of 1907 it quickly grew in importance and it gradually became obvious that it was about to cause a split in the great Liberal majority

In October 1907 M Michelsen (b 1857) withdrew from public life his government being reconstructed by M Löwland (b 1848), foreign minister of the Michelsen administration. During the subsequent six months the split in the Liberal majority became more and more obvious, and finally led to a rupture into "Consolidated Left" and Liberal Left, the former name being however, practically dropped in 1912. In the spring of 1908 M Lövland's administration backed up by the Conservatives and the Liberal Left was driven to resign by the opposition of the Lefts and the Socialists who, though not acting in co-operation like the two other parties—a distinction which has been kept up ever since—agreed as to stronger "Concession rules" than those embodied in a bill submitted by the Lovland government. A new government was sub sequently formed by the radical leader M Cunnar Knudsen (b 1848), whose government will for ever be memorable for the Concession Acts of 1909 chiefly the work of the Minister of Justice M Johan Castberg (b 1862). These laws concerning (1) water falls mines and other real property and (2) forests, were sharply opposed on the pre-

himinary stages by the Conservatives and the Liberal Left, as too strong an encroach

ment upon private property

At the general elections of 1909 a new Storthing was returned containing 63 Conser vatives and Liberal Left, 47 Radicals 11 Socialists and 2 Independents as against 57 Radicals 50 Conservatives and Liberal Left 10 Socialists and 6 Independents during the latter half of the past session. When the new Storthing met in January 1910 M. Gunnar Knudsen tendered the resignation of the ministry Wollert Konow (b 1845), leader of the Liberal Left then formed a cabinet consisting of Liberal Lefts and Con servatives the former party being in a majority within the government, although the latter were in the majority in the Storthing This caused friction between the two allied parties which ultimately brought about a crisis resulting in the resignation of M. Konow and some of his Liberal colleagues (Feb 1912) The government was reconstructed by M Brathe (b 1856) with the Conservatives as the chief element Among the members of the Konow administration who passed into the Bratlie Cabinet was the Foreign Minister M J Irgens (b 1869) formerly Norwegian minister in London When M Brathe became Premier he had to resign his seat in the Storthing (mem bers of the government having no seat in the House by the mandate of the electors) and was replaced by the vice-deputy member 1 Mile Anna Rogstad (b 1854) who in 1011 had been in the Storthing for about a fortnight during the temporary absence of The case attracted general notice as Mile Rogstad was the first female representative in any independent National Assembly, outside that of Finland, which admitted women in 1907

The chief laws passed under the Konow administration were an amendment to the Municipal Act making the municipal suffrage universal for women as well as men a new Concession act (1911) and a new municipal taxation act (1911)

Second only in importance to conflicts over the "Concession case" in recent politics must be mentioned the continuance of the "maal" controversy (see E B xix, 818) is the effort to create an entirely independent Norwegian literary language based upon the peasant dialect (landsmaal) descended from the old Norse in place of the Dano Norwegian rigsmaal Generally speaking the rigsmaal and the landsmaal have their respective partisans and opponents in all the political camps From a party point of view, however, the Conservatives and Liberal Left must be described as the rigsmaal and the Left and the Labour Democrats as the landsmaal party, the Socialists being as a party indifferent to the question

At the general elections of 1912 (Oct 21), out of 61 candidates returned on the first ballots 37 Radicals (Left and Labour Democrats) were returned, 9 Socialists (or Labour

¹ In Norway every member of the Storthing has a "vice deputy member,' elected in the same way and at the same time. This vice deputy has to sit in place of the actual member if he is prevented from attending through illness etc. or is included in the government.

PERSIA'

Party), and 15 Conservatives and Liberal Left,—these being now the names under which parties are divided. At the second ballots (Nov. 4 for towns and Nov. 11 for country districts) the Radical wave which had already manifested itself practically swept the country, the final results being 76 Radicals (Left 70, Labour Democrats 6), 24 Conservatives and Liberal Left, and 23 Semalists. The Government, however, decided to remain in office till the Storthing met in January 1913. The new Storthing contained no woman, the few female vice-deputies who were candidates for some of the Christiania seats being beaten with their male colleagues there were no women candidates elsewhere either as regular members or as vice-deputies.

The rapid industrial development of the country during the past six years has often brought about friction between workers and employers, resulting in numerous strikes and lockouts This was especially the case in roll, when a number of agreements as to conditions and payment of labour expired which were only renewed after protracted negotiations and in some cases very serious conflicts. The most important of these conflicts which created general notice not only within but beyond the frontiers of the country, originated in the Mining Industry The agreements within that industry expired on January 1, 1911 On October 24, 1910 negotiations were opened but resulted in a strike no agreement being arrived at During the following spring the Employers Association tried to induce the Norwegian Workmen's Association to prevail upon the striking miners to resume work but when the latter Association refused to do so the Employers' Association subsequently declared lockout against the organised workers commencing with the workers in the wood pulp, cellulose and paper mills and subse quently including the iron industry, until 32 000 workers or about one third of all Norwegian workers were left unemployed The conflict was finally settled on August 23 1011 by special mediation In the same way was also settled an important strike in the summer of 1012 embracing the steamship engineers and stokers which at first seemed likely to bring about a deadlock in the regular coast traffic have brought about a growing interest in the establishment of mediation and arbitra tion courts for the settlement of labour disputes.

Among important recent national events mention must be made of the centenary of the University of Christiania (Sept 2, 1911), which was celebrated throughout the country and resulted in a national subscription to the University of about £40,000

Authorities — The chief source of statistical information is Norges officielle Statistik (1861–1911) with a complete record on essential subjects of economic and social interest. Amteries obnomiske Tulstand, official publication (last volume 1900–1905), gives a quinquennal summary of the economic and social development of all towns and counties in Norway For Christiania see also Krishania Beretning om den ökonomiske Tulstand (quinquennial last edition 1906–10 published 1912). For the commercial development of Bergen and other towns Norges handkalender (published every third year last edition 1911–12) may be recommended. J. V. Heiberg s. Unionens. Optosming 1905 (1906) is a complete collection of all official documents bearing upon the dissolution of the Union with Sweden. The stand and work in Norwegian history within recent years is Norges Historie Exhibited to the Norwegian People by A. Bugge. E. Hertsberg. Osc. Alb. Johnsen. Yngvar Nielsen. J. E. Sars and A. Taranger (1919, not completed) of which 6 half volumes have appeared embracing the following periods: Period before about 800 A.D. about 800–1030. 1537–1588. 1588–1660. 1660–1746 and 1884–1905.

PERSIA 1

Neither the concession of a "constitution" in 1906, nor the abdication of Sultan Mohamed Ali and the accession of his son Sultan Ahmad Mirza (b 1896) in July 1909 availed to bring order into the Persian chaos. The history of Persia from the opening of the new national council or Mejliss (Majlis) in November 1909 is indeed one of progressive anarchy. The actual events are disconnected and in many cases individually unimportant, but their cumulative effect is evidence of the gradual paralysis of the operatal government. The root cause of this paralysis is not difficult to trace. It lay in the inability of the Mejliss to work with the Cabinet. Votes of censure followed hard upon 1800 E. B. NI. 187-2021 240-5.

PERSIA III5

the news of any unsatisfactory incident, and the Executive was thus made impotent whenever it was required to act with vigour

The leading figures in the Government which faced the Mejhss in the autumn of 1900 were the Premier, Sipahdar, and the Minister of War, Sardar-i-Assad--thanks to whom the ex Shah had been expelled from Persia in September The Cabinet Difficulties programme laid emphasis on the need of restoring order after the revoluof the But neither police nor troops could be maintained without money and Cabinet the government at once attempted to obtain an advance of £500 000 from Then their difficulties began Great Britain and Russia The Meths was divided into two groups of which the larger known as the moderates, was prepared to work with the government But the smaller, or extremist group, was animated by the most violent feeling against Russia-feeling to which it did not fail to give noisy expression This group secured representation on the Foreign Affairs Committee and eventually in the Cabinet It was thus able to prevent the conclusion of the all important joint loan, and at the end of four months the Melliss had really done nothing except harass the

Cabinet and provide itself with a debating hall fitted up in luxurious fashion

The progress of the loan negotiations is thus linked up on the one side with political intrigues in Teheran, and on the other with the situation in the provinces of Azerbaijan and Fars and with the consequent activity of Russia and Britain Disorder ta triple thread will be discerned in the following narrative. It opens with south and a serious piece of news which reached Teheran on November 25th, ten days north after the opening of the Mejliss M Passek the Russian Consul General at Bushire who was travelling to his post together with his subordinate, was attacked by tribesmen on the road At the same time Mr Bill the British representative at Shiraz, reported a difficult situation in the town while the general authority of the Governor of Fars was threatened by Kashgais under Soulet ed Dowleh with whom the government vainly negotiated By the end of November the road from Ispahan was closed and the position had become critical Consular reports of robberies fill the record of the early months of 1910 until at last, on April 15th Mr Bill was himself attacked by robbers and two Indian sowars were killed A strong British note was at once presented. Meanwhile matters had been going ill in the north In November 1909 Sattar Khan the representative of the new government, was driven out of Ardebil by adherents of the ex Shah under Rahim Khan Russian troops were sent to restore order and a force under Yeprim the Armenian Chief of Police came up from Teheran Yeprim a capable man acted with comparative vigour, and by the beginning of Febru ary Rahim Khan had fled across the frontier The extremists in the Assembly believed that he owed his life to Russian protection and the Prime Minister resigned resignation was withdrawn but its effect on affairs in the north was most unfortunate Sattar Khan and Bagher Khan who were joined by Yeprim's men gave rein to their nationalism and were reported to be contemplating an attack on Russian banks in Tabriz St Petersburg took the alarm and Teheran hurriedly recalled the natriots But it was not until March 10th ten days later that they left for the capital

In such circumstances the progress of the loan negotiations could not be smooth. The British Government knocked £100,000 off the sum demanded but was otherwise willing to lend. The Russians concurred and in February 1910 just when the situation in the north was most difficult, the two Powers submitted their conditions. They included demands that the programme of expenditure should be submitted to the two legations, and that French officials should be attached to the Ministry of Finance. A month later the Minister of Finance expressed the view that the Mejliss would be certain to reject these terms, and an alternative project for raising a loan from another source was vetoed by the two Powers. The deadlock continued for a month when the Cabinet was reconstructed. More time was wasted by the House toying with the idea of an internal loan, but at last towards the end of May, the appointment of foreign advisers was accepted in principle. The legations reported that circumstances had changed for the better, but a week afterwards all was

THE PERSIA

confusion again. A Russian officer of Persian extraction started a movement in Azerbaijan in favour of the ex Shah. The Russians captured the rebel at once, but the Nationalists were not to be pacified. Matters went from bad to worse. In June there was trouble in Tabriz, followed by Russian action. At the end of the same month the unrest in the south grew more acute, spread to Kermanshah, and found expression in damage to the telegraph. The British issued further warnings. The Nationalists put all the blame on the Cabinet, which they turned out of office on July 12th. Four days later a political murder was committed in Teheran. The two Khans from the north had reached the capital, and a serious outbreak appeared imminent.

On receipt of this news Sir Edward Grey suggested an immediate and unconditional advance of money. Taken six months earlier this step might perhaps have saved the situation. But in July the British representative (Sir G. Barclay) had to report that such a proposal would only convince the Nationalists that the two Powers were scheming to put financial fetters on Persia. Besides, £400 000 would no longer suffice. Sir Edward Grey accordingly fell back on warnings to Persia and an appeal to the Russians to support strong action. Happily the danger was averted by promptitude in Teheran The Ministry formed in the last week in July was a coalition Government, with National ists in charge of Foreign Affairs and Finance. But it saw that the ultra-patriotic elements must be subdued. Their disarmament was ordered and on August 7th, after fighting during which Sattar Khan was wounded, the government asserted its authority

The effort exhausted its energies Besides the health of the Regent Asad ul Mulk had begun to fail and intriguers were busy with the question of his successor. The Regent died on September 22nd and Nasr ul Mulk was elected on the fol lowing day. The choice of a moderate man reputed capable was a good omen. But Nasr ul Mulk was in Europe, and much was to happen before he reached Teheran. In the closing days of September Sir George Barclay telegraphed that nothing had been done to tranquillize the south. The Minister of the Interior had resigned on the question of Southern policy, and no successor had been appointed. On October 14th, a British ultimatum was presented. Unless order was restored on the Ispahan Bushire road within three months police work would be undertaken by a loyal force 1 000 to 1 200 strong under British officers lent by the Government of India

It was high time that action was taken, for throughout October chaos had prevailed in the south and it had even been necessary to land a small force of British blue jackets at Lingah. The Persian Government, however pointed to an increase in Customs receipts as proof that things were improving, and explained that the trouble was due partly to the presence of foreign troops partly to lack of funds. With this latter argument the British Minister agreed. The need of a loan was urgent.

The British ultimatum had, as will be seen below considerable effect in Teheran but it resulted in no permanent improvement in the south and the events there may be noted before returning to the situation in Teheran Something indeed Progress of was done Nizam ea-Sultaneh who had made a successful Governor of events in Kermanshah, was transferred to Fars, and preparations were made to send the south a force of 2,000 to 3,000 men to Shiraz However robbenes ceased to be recorded after the beginning of December, though the new security was due rather to the seventy of the weather than to the vigour of the administration. In January the British Government expressed itself fairly satisfied adding, however that it would renew its demands if need arose. The words were not followed up though the need arose soon enough In March 1911, the road was again blocked and a httle later there was trouble at Shuraz. The troops were without pay and got out of hand. In May 1911 Sir Edward Grey inquired with some anxiety whether Europeans in Shiraz were safe in case the Shuaz Consulate was attacked, and towards the end of the same month the British Government reported protests from Manchester firms against the insecurity of the roads. Sir George Barelay did not regard these protests as justified, and apart from the strengthening of the Consular guards nothing more was done either then or later By June 1911 anarchy again provided, and time brought no improvement. In the autumn

of 1912 Kashgais and Bakhtiari closed the roads from Ispahan to the Gulf and the British Foreign Secretary when questioned on the matter took the view that only a military occupation of the country—such as Britain was not prepared to undertake would bring relief In default of any official explanation regarding the lettisoning of the original plan for policing under British officers it must be assumed that the intention of the Foreign Office now was to strengthen the hands of the new Regent in his endeav ours to bring the extremist party to reason. But the year 1912 closed with a still more serious example of general internal insecurity. On December 11th grave news was received from Teheran that a small shooting party, consisting of two British Eckford officers accompanied by 26 Indian sowars, had been attacked by tribesmen murder near Shiraz and that one of the officers Captain A. B Eckford of the 30th Central India Horse had been killed The attack was made by about 300 of the Boer ahmadis tribesmen and the raid appears to have been made for plunder as some of the regimental mules were carried off also a whole caravan of merchandise proceeding to On December 13th a strong British note was presented to the Persian Government by the British Minister pointing out the serious nature of the crime and asking for the severe punishment of the tribesmen. An answer was received admitting the seriousness of the offence and promising full reparation

To return however to the situation at Teheran in 1910 The British ultimatum of October had convinced the Mejliss that a loan must be raised at once Only seven weeks after its presentation—a short interval as things go in Persia—a Situation at plan was discussed in open session and the necessity of some form of foreign Teheran control was properly emphasised. The year which had opened not un hopefully thus closed in gloom and confusion. But 1911 brought some improvement possibly because rumours of the ex Shah's intended return stirred the government to In its opening days Persia applied to the Swedish Government for officers to organise a gendarmerie. This force was originally intended for the province of Fars but the project was quickly amended to cover the whole country The Great Powers proved agreeable The Swedes consented, and three officers—who were later joined by seventeen colleagues—arrived in August 1011 Their work has done something to mitigate the dangers of a deplorable situation. In January also application was made for five American financial advisers On February 9th the Regent reached Teheran It was March before he took the matter before the Mediss but in the interval he had prepared the way for the statesmanlike speech he then delivered He told the House that the future rested with the Deputies They must organise themselves into two quite definite parties must indicate their choice of a Prime Minister and must accord him proper support The advice was duly accepted the Regent's efforts to appease anti Russian feeling appeared successful and a Cabinet headed by Sipahdar again as sumed office after receiving full promises in advance from the Mejliss Russia did what she could to give the new government a chance The debt to the Banque d Escompte was consolidated and the Russian force withdrawn from Kasvin Application was then made to the Imperial Bank for advance on a loan and on May 8th the contract was signed after Nationalist protest The nominal sum was fit 250 000 but debt had to be repaid and only a little over \$400 000 was actually netted

Four days later the Americans reached Teheran. The American Mission was headed by Mr. Morgan Shuster who had had experience of Customs work in Cuba and the Philippines. He held the appointment of Treasurer General and dur mr. Shuster ing the greater part of his stay in Teheran had the services of three American assistants. His contract was for three years, but he resigned after eight months. Mr. Shuster was capable and keen, and his arrangements for the collection of revenue were probably sound. Unfortunately he cherished ideas about the political regeneration of the country which brought him into conflict with the Great Powers, and he forgot that it was really to their agitation that he owed his appointment at all. He considered himself the servant of the Persian people, a view which in practice involved to operation with the Nationalists. In this way he drew

tri6 PERSIA

upon humself the the vitable hostility of Russia, without ever realising, it would appear, that a Power to which Persia was heavily in debt would necessarily be alarmed by the fact that a vigorous anti-Russian had assumed control of the Persian finances. Ignoring the realities of the situation, which needed a delicate adjustment of British and Russian relations with Persia, Mr Shuster acted on the diplomatic fiction of Persian independence. The conditions of Persian government, which provided him with an ineffective Cabinet and an amenable legislature, were formally favourable to a spirited policy on his part. Cabinets came and went, sometimes there was no Cabinet at all, but Mr Shuster could always get laws passed by the Melliss

While Mr Shuster was putting his house in order the Meiliss arranged to spend the At the end of May, however he was ready to act He took the view—expressed in a bill drafted by his own hand—that ' if a person undertakes a grave responsibility without previously obtaining the necessary powers he is either a fool or a rogue' bills gave Mr Shuster the necessary powers The first, passed on May 30th put the loan in his hands the second passed on June 13th, made the Treasurer General Shah of Persia in everything but name He was given direct control of all financial and fiscal operations and was also empowered to authorise payments, could make economies and had authority over the personnel. It is not surprising that Russia felt some anxiety about the debt secured on the Northern Customs. Mr Shuster's first difficulty was Sipahdar finding his demands refused, rushed out into the street with the Cabinet and told his coachman to drive to Europe He went as far as Resht and returned to Teheran in July But by refusing to work with him Mr Shuster undid all the work accomplished by the Regent in the previous four months. Next came a difficulty with M Mornard the administrator of Customs a Belgian officer whom Mr Shuster ac cuses of dishonesty M Mornard, who was supported by the Russian Government refused to accept Mr Shuster as his superior The Belgian had a case as it was claimed that his contract made him responsible only to the Persian Government Mr Shuster never noticed the claim for him the law of June 13th was final

This affair took a month to settle, and while it was still causing friction Mr Shuster requested that Major Stokes the British military attache at Teheran, might be permit ted to accept the command of the Treasury gendarmene which he was Stokes about to organise He stated that the gendarmerie would act especially in incident. the south, but it was clear to Sir George Barclay that any attempt to confine Major Stokes' activities would give a political colour to the appointment. It will be noted that Mr Shuster ignored the Swedish officers appointed by the Mejliss his case was that a newcomer would lack 'knowledge of the language habits and modes of thought of the Persian people" and he asked for Major Stokes because he thought him the best man available. The question was referred to London which consulted St Petersburg St Petersburg suggested either that a Swede should be chosen or that a Russian should be appointed to a separate command in the north Such was the posi tion on July 18th when the ex-Shah landed at Gumesh Tepe on the shores of the His arrival created the 'Stokes incident." It was the desire of the British Government to inform the ex Shah that he would not be recognised The Russians, on the contrary, preferred to wart If Mohamed Aligot to Teheran they were not prepared to turn him out again by force Sir Fdward Grey appears to have desired to remind the Russian Government that British views must be taken into account and yielding to further pressure from Mr Shuster he now (m a telegram on July 21, 1911) went so far as to say that before Major Stokes assumed the command he would have to resign his commission. Mr Shuster interpreted this as acquescence overcame the hesitation of the Cabinet-which was on the point of resignation-and formally proposed the appointment. The two Great Powers speedily patched up their differences. A joint note regarding the conduct of the ex Shah was presented at Teheran, and the Russians suggested that Major Stokes might have Russian subordinates. Sir Edward Grey, who had received a warning telegram from Sir George Barclay, wavered in his support of the Treasurer-General, influenced, as Mr Shuster believes, by the European crisis over PERSIA

¥117

Morocco Fearing that Mr Stokes might engage in the contest with the ex Shah, his language became sharper and sharper until on August 7th, he said that he would not protest against any objection that Russia might take to the employment of Major Stokes in the north He held indeed, that such objection would be justified. Two days later he had come round altogether to the Russian views and Russia no longer hesitated to veto the appointment Mr Shuster had committed himself deeply, and his prestige was affected. It is not too much to say that the telegram sent by Sir Edward Grey on July 21st was the beginning of the end for the Treasurer General

We must now return to the ex Shah premising that the tale of the military operations is too disjointed and in some respects too obscure to be given in any detail. Mohamed

Ah had landed in Persia on July 18th with a very small band including Ex Shah a his two brothers He had evidently expected support on the spot, and not troops The Turcoman and Kurdish tribes of the north had never deteated without reason been loyal to the new government, and in the towns except Teheran there was a belief that any change would be for the better. In the capital panic prevailed The Mejhss declared martial law, but afterwards wasted its energies in brawls with prominent politicians much to the distress of the unhappy Regent Yeprim Khan and Mr Shuster alone kept their heads. Between them they called up and equipped Bakhtiari, and 500 men were hurriedly enrolled in the gendarmerie Early in August a forward move was made There were four centres of insurrection First, there was the ex Shah himself who had roused most of the Caspian littoral. Next was Rahim Khan now called Suja ed Dowleh who was operating about Tabriz Thirdly there were the tribesmen in the west under Salar-ed Dowleh, the ex Shah's brother and finally Arshad ed Dowleh his best general was moving on the capital from the south Early in August the ex Shah's troops were defeated by the government forces at Feruzkuh in the mountains to the north east of Teheran. The reverse destroyed the morale of the ex Shah's troops but the decisive victory was won on September 5th when Yeprim attacked Arshad ed Dowleh at a point some 40 miles south-east of Teheran and completely defeated him The rebel leader was captured and was shot the day after the Yeprim hastened on to meet Prince Salar ed Dowleh who had by this time proclaimed himself king On September 27th, in a battle well to the south of Teheran the government won a complete victory and the capital was freed from danger By October the insurrection had been practically suppressed except in the north

The Great Powers which had been watching events now re asserted themselves Faced with the paralysis of British trade in the south the British Government decided

Russia s forward policy to bring up troops from India with a view to strengthening the Consular guards at various places within and without the British sphere. The Russians when informed of this move announced that they would take corresponding steps in the north, where the atmosphere was becoming from

their point of view too British. The news threw the British Foreign Office into a panic and helped to force a crisis. For the situation in the Russian sphere was so bad that if Russia once moved there was no telling where she would stop. Her representations were no longer sure of attention still less of acceptance in Tcheran. It was there be lieved that she had connived at the ex Shah's attempt, and Mr. Shuster was now hand and glove with the extreme Nationalists whom he had made the dominant faction in the Mejliss. He had come to the conclusion that the Russians were utterly antagonistic to all Persian reform and in the middle of October sent to the London Times a long letter embodying his complaints. The Russian government seized the opportunity to inform the London Cabinet that they contemplated measures of extreme urgency. The man of political experience, the Regent even Yeprim the Chief of Police, realised the fatal tendency of events in Teheran. But a rupture with Russia was inevitable unless either the Mejliss or Mr. Shuster was rendered impotent. So matters dragged on until at last both the Mejliss and Mr. Shuster found their work summarily closed.

Two incidents occasioned the crisis First, at the beginning of November, Mr Shuster appointed as his financial agent in Tabriz a Mr Lecoffre, who had been em

mis PERSIA

ployed at Teheran On its ments this appointment was defensible. But Mr Lecoffre was a British subject and a strong Russophobe The Russians protested, but Mr Shuster was past all listening On the contrary, he was forcing a crisis over Friction his attempt to confiscate the properties of the ex-Shah's brother Shoa-es The Prince was officially a Turkish subject, but a house of his Sultaneh Mr Shuster close to the Russian Consulate General had been mortgaged to the Russian When Mr Shuster's officials arrived at this house, the Russian Consul General a strong advocate of a Russian forward policy, sent his men to chase them away day Mr Shuster dispatched one of his American assistants to explain matters. At the same time he sent a hundred of his gendarmen to seize the house. There was a scene. The Russians accused the gendarmes of airning their rifles at them. The Persian Govern ment-or Mr Shuster acting through it-peremptorily demanded the recall of the Russian Consul-General. It was more than the Russians could stand. On November 11th, they presented an ultimatum in Teheran. The Treasury gendarmerie must be withdrawn and an apology tendered The Persian Prime Minister ordered Mr Shuster to withdraw his men Mr Shuster demanded an order signed by the whole Cabinet -a most unfair proceeding, as he knew there was no Cabinet in existence. Meanwhile the Russians were preparing to back up their ultimatum with 4 000 troops from the Cauca As soon as it was clear that an immediate apology would not be forthcoming Sir Edward Grey strained every nerve to avert a Russian occupation of Teheran The Russians fully realising the difficulty of his position, let it be known that if their troops once entered Persia a new situation would be created and it would no longer suffice for the Persians to accept the ultimatum of November 11th Matters would have to be put on a stable footing for good, and important constitutional changes were suggested Sir Edward Grey said that Mr Shuster was the root of all the trouble and advised the Russians to formulate a case against him before marching on the capital The Russians who had now got everything they wanted, replied that the formulation of a case would lead to much futile diplomatic friction But they would think over the idea of demand ing the dismissal of Mr Shuster, and would not move their troops past Resht until the Persians had had ample time to consider their final demands On November 24th thirteen days after the presentation of the ultimatum a Cabinet was finally got together and an apology tendered to the Russian Minister M Poklewski intimated however. that further satisfaction would be required before the Russian troops could be with drawn, and on November 29th, a second ultimatum was presented. It demanded that Persia should dismiss Mr Shuster and Mr Lecoffre, should obtain the consent of the two Powers before offering further posts to foreigners and disminsed. should pay the costs of the Russian expedition The ultimatum was laid before the Meilles on December 1st and was rejected by an unanimous vote a few Deputies abstaining With its rejection disappeared the last hope that the Russians would immediately withdraw their troops The danger now arose that they would march on Teheran and reinstate the ex Shah. It seemed as though the complete collapse of authority in the capital would provide them with an excuse. There were bread nots there was danger of fighting between Yeprim's police and the Bakhtian tribesmen there were boycotts of British and Russian goods, there was the Meiliss with its open provocation of Russia. The Cabinet tried to destroy the Meiliss, by persuading some twenty deputies to resign and thus make it impossible for a quorum to be formed That plan failing, Ministers asked for full powers At last when the Russian troops had reached Kasym it was agreed that a small committee of the Melliss should be em powered to approve the Cabinet's action. The language of the clause ordering Persia to submit her nominations for approval was softened and on December 24th the ultima tum was accepted. Mr Shuster handed over his papers on January 7, 1912, and a week later was out of Persia! M Mornard, the Russian nominee, succeeded him and his gendarmene was taken over by the Swedes.

The surrender had come a few days too late On December 22nd there were fights

Mr Shuster's own account is given in his book, The Stranging of Persia (1912)

between the Russians and the Nationalists both at Reslit and at Tabriz Instead of withdrawing their troops the Russians bombarded Tabriz titadel and opened the New Year by executing eight leading Nationalists among them a prominent Skuation ecclesiastic. The British Government, regarding these events as a prehm In 1912 mary to a permanent occupation, endeavoured to persuade the Rus sians to withdraw their advance force at Kasvin But British efforts were weakened by an attack on the British Consul at Bushire and the necessity of landing a small force at the Gulf Port It now became clear that the Russians were established at Tabriz The fact that their dead had been mutilated had inflamed Russian country and destroyed all immediate prospect of withdrawal There was nothing for it but for the two Powers to accept the situation and to discuss the means of providing Persia with a loan and of persuading the ex Shah to return to Europe and a pension. With his departure the Persians could dismiss their irregular troops and the work of re-organisation could be taken in hand. No progress was made in regard to the loan, but in view of the urgent request of M Mornard it was arranged to advance a small sum £400,000 was suggest ed but the Russians insisted that this amount should be halved The conditions were that the ex Shah should be pensioned and that the Persian Government should conform its policy to the agreement of 1007 and should consult the Great Powers as to the forma tion of a small regular army There was trouble about the formula and much hag gling as to the pension But in March the negotiations hastened to a conclusion. The Russians withdrew their force at Kasvin Mohamed Ali left for Europe and on March 5th the money was advanced A similar sum was advanced a few months later

In the summer of 1912 there were persistent rumours that the two Powers had decid ed to partition Persia and when M Sazonoff visited England in September it was suggested that the necessary treaty was about to be concluded. It is understood how ever that no such arrangement was made and though the decisions reached were not made public the two governments were stated to be in complete accord Thus at the end of 191 the whole Persian problem still awaited settlement Unsatisfactory as the status quo remained —as was shown in the murder of Capt Eckford referred to above no decisive step was likely to be taken if either Russia or Great Britain could help it until the possibility of a wholly new policy had been thoroughly considered involved the linking up of the Russian and Indian railway systems by the construction of a trans Persian line Britain, France and Russia were to finance the work but no decision had yet been come to and questions as to route break of gauge etc. had not even been raised The project had only reached the stage that a Societe d Etudes had been formed to make an investigation and to submit proposals. (GEORGE LLOYD)

PORTUGAL 1

At the end of 1912 the Portuguese Republic which came into being in October 1910 had grown in strength and stability despite the fact that these two years were a period of great social and industrial unrest. Most of the richest families were in exile volun tary or enforced Capital was transferred to other countries and as a result many estates went to ruin and many shops, hotels, theatres and other industrial establish ments were closed. The ecclesiastical property upon which a large number of charitable institutions were dependent was confiscated. These have been some of the principal causes which have led to widespread destitution and to emigration on an enormous scale Great social changes have been taking place Socialism and Syndicalism have gained a remarkable hold upon the workmen of the towns and strikes have been organised on a scale and with a frequency unknown under the Monarchy The Republic had hardly been in existence two months when it was compelled to concede the right to strike—at 24 hours' notice—to all classes of labour except Government employés (Dec 7, 1010) Railway strikes have paralysed traffic on many occasions and in all parts of the country, Lusbon has been in darkness owing to the strikes of gas workers and electricrans in May 1911 all the cotton operatives in Oporto left their work; on January 32 See E B xxu 134 el set

1912 Lasion was placed under martial law owing to the dangerous character of the labour disturbances. Attempts have been made to organise a general strike of all workers, and "sabotage" has been common. Poverty, the financial embarrassments bequeathed by the Monarchy, and the exaggerated hopes aroused by the establishment of the Republic, contributed to the industrial unrest. Great discontent was also manifested by the agricultural classes, especially in the North, where the Royalist invasions caused considerable distress. The disappearance of the large land-owners, and the exodus of capital, were felt in all parts of the country.

Meanwhile a new governing class came to the fore, its members being for the most part lawyers, journalists or professional men, the Church, the aristocracy and the land owners ceased to exercise political influence. On all sides the visitor to Portugal who knew the country under the Monarchy saw the evidence of a great social transformation, everything was changed even the names of the streets and the public buildings

The Constitution — The Provisional Government, with Dr Theophilo Braga as its President, remained in power until August 24, 1911. Its three principal achievements were the maintenance of the Republic, the Disestablishment of the Church and the organisation of means to create a new Constitution. The new Electoral Law under which the Constituent Assembly was elected, was finally decreed on March 18, 1911. It gave the vote to all male Portuguese over twenty-one years old who could read or write, or who supported their parents or other felatives. It included priests and officers of the army and navy, the only exceptions being soldiers on the active list naturalised Portuguese and persons proscribed for political reasons. This last exception made it impossible to organise a Monarchist party. No soldier, sailor priest magistrate Government contractor or director of a company subsidised by the state was permitted to stand for election, and certain civil servants were also excluded Lisbon and Oporto each formed two constituencies returning ten deputies apiece. The other districts were limited to four deputies apiece and the colonies to one Payment was fixed at 17s for each sitting of the Assembly

On the 28th of May the elections were held Polling took place in halls theatres schools and private houses instead of in the churches, as had been the previous custom. There was no serious opposition to the candidates put forward by the Government Committees and the only deputy supposed to be a Monarchist was Senhor Charula, representing the minority at Braganza

On June 19th, at 11 A m the Constituent Assembly was formally opened President of the Assembly Senhor Santos Bandeira, read a decree declaring the Mon archy abolished, and the Royal House of Braganza banished for ever from Portugal. This was unanimously approved It was arranged that the Provisional Government should remain in office pending the enactment of a new Constitution and the election of a President under it The Constitution was voted on the 20th of August It provides for two chambers-the first or National Council consisting of 164 members elected by direct suffrage for three years the second, or Upper Chamber, of 71 members elected by all the Municipal Councils for six years Half the members of the Upper Chamber are The President is elected by both Chambers for four years elected every three years and cannot be re-elected, nor may he be present during the debates in either chamber His salary is £2 600 and he receives an allowance of £1 300 for expenses and the Ministers are responsible to the nation, and may be brought before the High Court, consisting of the Supreme Court of Justice and a jury of 21 persons elected from both chambers of Congress. The President's house for official purposes, is the old Royal Palace at Belem The Constitution may be revised every ten years

On August 24th Dr Manoel Arnaga was elected first President under the new Constitution. A native of Horta in the Azores, he was a man 70 years old—a doctor of laws of Coimbra University and a brilliant crater and journalist. He was proposed for election by a coalition of all the Conservative Republicans, who were opposed by the Radicals under the leadership of Dr Affonso Costa, the Provisional Minister of Justice The Conservatives had at the last moment substituted Dr Arnaga for their original

candidate Senhor Braamcamp, as the former represented so single group and had the sympathy of the greater part of the Deputies — Dr. Arriaga received 121 votes as against 86 cast for Senhor Machado the Provisional Minister of Foreign Affairs and the nominee of Dr. Costa — When the election was over Dr. Theophilo Braga handed to his successor the formal resignation of the Provisional Government, and on September 3 the first Constitutional Ministry was formed. Its members were. Senhor João Chagas, Premier and Minister of the Interior, Dr. Mello Leotte (Justice), Dr. Duarte Leite (Finance), General Pimentel Castro (War), Senhor J. de Menezes (Marine), Dr. Celes tino Almeida (Colonies), Dr. Augusto Vasconcellos (Foreign Affairs). Dr. Paes (Public Works). The Republic was now recognised by all the leading Powers Brazil had been the first to accord recognition (Nov. 15, 1910), being followed by the United States (June 19. 1911) by France (Aug. 24), and finally by Great Britain, Spain, Germany Italy and Austria Hungary (Sept. 11)

Party Politics —The conservative Bloc had at the outset a majority of 56 in the Deputies—including 32 Independents—and of 25 in the Senate The breach between the Bloc and the Radicals soon began to widen, on September 4 indeed Dr Costa the Radical leader threatened to obstruct parliamentary business if the Ministry deviat ed from the democratic policy of the Provisional Government. On the 9th Parliament adjourned but in view of the imminence of a Royalist invasion it reassembled in special session on October 16 to discuss a bill for the suppression of conspiracy A Republi can conference was held in the hope of reaching some understanding which would assure union in the legislature during the winter but it became apparent that the Republican party had already split into several factions On November 8, Dr Almeida leader of one of the Bloc groups, withdrew his support, and the whole Cabinet Four days later a new Coalition Government was formed by Senhor Augusto Vasconcellos, three ministers being Radicals and five belonging to the Bloc This was regarded as a victory for Dr Costa. The Government programme included the presentation of an accurate financial statement the revision of Provincial legislation, and a policy anti-clerical but respectful to all creeds. Some improvement in the finances was effected by efforts to liberate the collection of revenue from local influences the extravagant increases in official salaries granted by the Provisional Government had already been annulled by the Chagas Ministry But the Government was unable to retain the confidence of its supporters, and on June 21, 1912 a third Coalition Govern ment took its place, with Dr Duarte Leite as Prime Minister

The Royalist Invasions —In the spring of 1911 a small force of Royalist refugees had gathered in Spanish Galicia for a raid into Northern Portugal, where the Church and the Monarchy could always count upon some popular support The Royalist leader was Captain Paiva Couceiro The Government created eighteen new military districts and strengthened the frontier garrisons, especially at Braga and Villa Real On June 15 the Portuguese Minister in Madrid, Senhor Relvas complained to the Spanish Government that the refugees were using Spanish territory as a base for an attack upon the Republic He received assurances of goodwill, but no strong action was taken by the Spanish authorities who had not yet recognised the Republic and who were embar rassed by the activity of Portuguese Republican agitators in several parts of Spain it self A few consignments of war material were seized as contraband, and the German SS "Gemma' was detained at Corcubion and compelled to unload a cargo of rifles and ammunition destined for the Royalists. But Coucero and his band of irregulars remained for the most part unmolested In July a Royalist plot was discovered in the South, a whole regiment of chasseurs was arrested at Valença de Minho in the extreme North, and there were minor outbreaks in various districts. On the 24th and 25th of August two small steamers the "Foam Queen" and the "Arizona," were seized by the customs authorities at the ports of London and Barrow respectively The "Foam Queen " carried apparatus for wireless telegraphy and there were fittings for guns and other war material aboard both vessels, which were believed to be intended for the Portuguese Royalists, though their ostensible destination was Bahia Blanca.

The Royalist coup was planned for the anniversary of the Republican rising of 1970—the insurrection in the North and an invasion were to take place simultaneously—But a premature outbreak at Oporto (September 30) was easily quelled, and no widespread popular movement occurred—Captain Coupero crossed the frontier on October 3 at the head of about 1 000 men, badly armed and equipped. He occupied the village of Vinhaes near Braganza, but was soon compelled to take refuge in the heights of the rugged Serra da Corôa, and by October 11 had recrossed the frontier, after a few small skirmishes—No further attempt was made in 1911

Dom Manoel and the other claimant to the throne D Miguel, met at Dover on February 6, 1912 to concert common action for the restoration of the Monarchy—a cause which was now supported by the great wealth of the Miguelites The exact nature of the compact between the two rival and exiled dynastics has not been made public, though it is certain that Dom Manoel would be accorded a prior claim to the throne and probable that some matrimonal alliance was contemplated

On July 7 1912 800 Royalists crossed the frontier near Verm and a further force of 400 led by Couceiro and supported by discontented peasants took the field near Montalegre. But though an alleged Royalist plot was discovered at Torres Vedras at the same time, this invasion was even less successful than those of 1911, and it ended in the withdrawal of the Royalists after three days. An official Portuguese note dated July 14th complained strongly of the maction of the Spanish authorities. Señor Canalejas protested against the terms of the note but on the 17th 62 Royalists were arrested by Spanish frontier guards and on September 3 the Portuguese Government issued a second note stating that all disagreement was at an end. A manifesto was published shortly afterwards by Dom Manoel thanking Couceiro and the other Royal ists and stating that his claim to the throne would never be abandoned.

Church and State — The anti-clerical policy initiated when the Provisional Government was formed evoked opposition in many districts. In February 1911 numerous priests were arrested in the North for reading in the churches a Pastoral Letter of Protest signed by all the bishops, and on March 7 an attempt was made by the Lisbon mob to lynch the Bishop of Oporto. The Bishop was removed from his see but granted a pension of £240

On April 21 the Government published the Decree of Separation between Church and State, a document of far reaching importance for the social and religious history of the country This Decree was the work of Dr Affonso Costa the Minister of Justice It guarantees full liberty of conscience to all Portuguese citizens, declares that the Ro man Catholic Creed is no longer recognised as the State religion, recognises all faiths as of equal authority and abolishes all State payments for the maintenance of public worship and all imposts levied for such a purpose No public body or functionary is permitted to assume any religious office Public worship is permitted " in places de signed for it," and is defined as the meeting of any number of persons for religious purposes in public or of twenty or more persons in a private house. This definition is held to include religious instruction-and all schools where such instruction is given must be open to the public All churches and other edifices used for public worship are declared to be inalienable without the consent of the Minister of Justice and may at any time be exprepriated for public purposes at their actual value. Members of a congregation or other religious association may only contribute towards the general expenses of their worship through some charitable body exclusively Portuguese such as the board of a local hospital asylum or crecke, but preferably through the Misericordia and the corporation acting as trustee must apply at least one third of the money received to acts of behindence No funeral ceremony or other act of worship may be performed outside any recognised place of worship without the consent of the municipal authori ties All ecclesiastical buildings and other existing property of the Roman Catholic Church now pertain to the State, which allows free use of them to the various congrega tions The existing Roman Catholic Clergy is permitted a like free use of the Episcopal palaces and parsonages Pensions are granted to all ensuing members of the presthood

who act as such in Portugal All present bequests to religious bodies are annulied, and all such bequests are in future illegal. Local and national taxes are imposed on all ecclesiastical property, whether freely granted by the State or otherwise held-such taxes to be paid by the corporation acting as trustee No minister of any religion may take part in any act of public worship without permission from the competent secular authority, except those who by international convention or very ancient usage possess the right to conduct religious services within their own churches This last clause of the Decree was introduced to meet the case of the foreign religious communities

The value of the Church property confiscated under the Decree was £6 000,000-a smaller sum than had been anticipated Immediately after its publication the Embassy to the Vatican was suppressed but it was afterwards replaced by a Legation On May 5 a representative meeting of the Portuguese clergy was held in Lisbon under the Presidency of the Patriarch Mgr Mendes Bello The bishops had refused any stipend from the State but could not secure any other maintenance for the rural clergy, some of whom preferred the State allowance to destitution The result was a Papal Encyclical denouncing the Provisional Government and declaring the Separation Law null and On May 23 a further protest was issued in the form of leastess distributed broadcast throughout Portugal while a month later the Patriarch of Lisbon and the Bishop of Guarda issued a second Pastoral, forbidding the clergy to accept the State stipend due on the first of July 1911 By the 6th of August however, about 1,200 priests out of a total of approximately 6 000 had petitioned the Government to pay them their

official stipends which were of the average value of £111

Towards the close of 1911 the Government decided to take action against the On the 26th of November the Bishop of Guarda Mgr Viera de Mattos was expelled from his see for having consistently advocated resistance to the Separation The Vatican then forbade those priests who had accepted the State stipend to continue doing so but this order was largely disobeyed. On the 20th of December the Patriarch the Bishop of Guarda and the Administrator of the diocese of Oporto were ordered to leave their districts within five days and forbidden to return for two years and on the 6th of January 1912 a similar sentence was pronounced against the Bishop of Algarve All emoluments were withdrawn from the Lisbon priests who had signed a declaration of fidelity to the Patnarch The bishops and Patriarch appealed in vain to President Arriaga who referred them to the Ministers Many of the foreign Congre gations remonstrated through their diplomatic representatives against certain disabilities imposed by the Separation Law and the Government promised that it should be revised at the earliest convenient date

The Political Trials - Special tribunals were instituted in Lisbon and Oporto in January 19.1 to try cases of political conspiracy and insults to the national flag and the President Since then all persons suspected of reactionary opinions, religious or political have been in danger Their houses have been invaded by spies their corre spondence opened Thousands of innocent persons have been summarily arrested without the formulation of any definite charge and have been confined for many months in subterranean dungeons where they have been herded with the vilest crim-The chief instrument of this widespread system of espionage and terrorism has been the organisation of the Carbonarios This powerful secret society had a large share in the revolution by which the Monarchy was overthrown
It has since assumed the functions of an unofficial police force, and has at times proved itself strong enough to attack the Republican Government and the army Its members who carry arms are Republicans of the most extreme type many have also joined its ranks in order to gratify some personal dislike, or to secure the rewards given to successful informers. It is thus a body composed of dangerous fanatics and criminal adventurers And it has arrogated to itself the power of summary arrest

Senhor João Chagas, the first Republican Prime Minister estimated that on October 23, 1911, there were 2 000 political prisoners awaiting trial of whom 700 were innocent. In the following January the number had been largely augmented So notorious was the basharity with which suspects were treated that a Committee of prominent British residents was formed to investigate and if possible to alleviate their condition Reports of this Committee were published in the London Morning Post and Paris Figure in January and March 1912, and the matter was vigorously taken up by th Itahan Swiss Austrian and Spanish Press. Several Portuguese Republican newspapers and prominent Conservative Republicans corroborated the findings of the British Committee and diplomatic representations followed. But the influence of the Carbonanos, and of the Radical Republicans led by Dr Costa, prevented reform the proscription of alleged political conspirators continues and hundreds of innocent persons remain imprisoned without trial and in circumstances of great hardship

Two of the political trials call for special mention. In the first, the accused was Senhor Joso Franco, the former "Dictator" On December 11, 1910 the Court of Appeal unanimously decided in favour of the accused The Government retaliated by banishing five of the judges to Goa but these were reinstated on June 6 1911 second trial under notice (June 1912), the accused was the Monarchist leader Captain Paiva Couçeiro who was sentenced, in absentia, to six years solitary confinement and

ten years imprisonment in the first class

New Legislation -One of the first decrees of the Provisional Government (Nov 4 1910) dealt with the subject of divorce. Among the grounds for divorce now legally admitted are insanity if pronounced incurable after three years imprisonment for a long term and mutual consent. The latter is only granted if both parties are over twenty five and have been married two years. The Provisional Government attempted to abolish gambling beth married two years. The Provisional Government attempted to about gaining but this was afterwards legalised and foreign capital was invited for the establishment of casinos. A decree of the 29th of December made the Law of Offences against the Crown applicable to offences against the Republic and a new Press Law submitted Press offences to trial by jury instead of by a single judge as formerly. This reform was more apparent than real for in practice the liberty of the Press has been greatly curtailed under the Republic and every Monarchist or Clerical newspaper had either ceased to express its opinions or else ceased to exist by March 1911 Duelling was declared illegal in January of that year By a decree of the 30th of May Greenwich time was officially adopted the decree taking effect on January 1 1912 when all clocks were advanced thirty seven minutes On September 5 1911 the Government adopted the Marcom system of wireless telegraphy

Finance and Commerce - The apparent stability of the Republic had a favourable effect upon the national finances — An official note published on May 21 1911 showed an increase of £390 000 in revenue during the previous three months despite reductions in the octroi on foodstuffs. Credit seemed good for on the 6th of June the 3 — external loan stood higher than at any time during the previous twenty years and the agio on gold had fallen to 8% On the 18th of December the Government presented the budget for 1911-12 showing a total revenue of £16,800 000 and a reduction in the deficit to £435,000 total indebtedness of the nation was returned at £191 000 000-a sum which would however be largely increased by the new naval programme On January 18 1912 the Budget for 1912-13 was presented showing a deficit increased to \$800,000. As there was a doubt about the Government estimates which included impossible sources of revenue and impossubl. means of retrenchment, a committee was appointed to examine the Budget, and by the following May it had calculated the deficit as at least £1 466 000 On December 7 1911 the Bank of Portugal decided to increase its paper currency by £1 300 000 the reserve of gold to be increased by one third the value of the notes

A decree of January 20 1911 allowed Queen Maria Pia £5 340 yearly the balance available from her dowry £7 555 yearly was retained for repayment of advances made to her by the state She died at Stupinigi on July 8 following A committee appointed to examine into various loans made by the state to the House of Braganza assessed the total [June 18 1912] at nearly £800 000 of which £720 000 had been advanced to King Carlos £44,500 to the Duke of Oporto and £16 400 to Queen Amelia The Government decided

[June 18 1912] at nearly \$800 000 of which \$1720 000 had been advanced to King Carios \$124,500 to the Duke of Oporto and \$16 400 to Queen Amelia The Government decided to resultures uself from King Manoel's property in Portugal.

Commerca—In 1910 11,560 vessels of 20 515 388 tons entered at Portuguese ports The length of railways open was 1780 m of which 665 belonged to the state The exports were valued at \$8,073 000 and the imports at \$15 581 000. In April 1911 it was decided to form a British Chamber of Commerce in Lisbon. The wine trade—the most important branch of foreign commerce—has been affected by the disturbances in the North and by shortage of labour due to emigration. But 1912 will be remembered as a vintage year the port being exceptionally fine though the quantity fell below expectations

The Nary—On January 19 1911 a commission appointed to reorganise the navy recommended the immediate acquisition from Great Britain of three battleships of the Dreadnought type, similar to the Minas Genes of the Brazilian savy

This recommendation

Dreadnought type, similar to the Minas Geraes of the Brazilian navy This recommendation

RUSSIA 2129

was adopted in the new naval programme submitted by the Minister of Marine in December 1911 which involved the purchase of three battleships of 20 000 tons each three scouts of 3 000 tons twelve torpedo boats of 820 tons and six submarines On May 7 1912 a bill was introduced fixing the naval force at 4 500 men as compared with 5 687 in 1910 (K. G. JAYNE)

Portuguese Dependencies

The Portuguese dependencies occupy a total area of 793,980 square miles in Africa, and 8 972 square miles in Asia. The total population in the African territories is estimated at 8½ millions and that in the Asiatic territories at about 896,000, but for several of the individual territories no recent estimates exist

The population of Angola (W Africa see E B 11, 38) is estimated at 4000000. That of the chief town, Loanda, was 17541 according to the census of 1911, and that of Benguella 5000 Revenue (1911) £515860, expenditure £704750 The manufacture of rum till 1911 one of the most important industries, was abolished in 1911, the factories being dismantled under compulsion, and indemnities, covered by a local government loan being paid to the manufacturers. An industry recently developed is the whale fishery from Lobito. The Lobito Katanga railway which when completed will have a total length of over 800 miles within the colony, was completed in July 1911 for 225 miles.

The islands of St Thomas (São Thomé) and Principe (est pop 45 000) form the province of St Thomas (W Africa) This has acquired some notoriety in connection with the abuses disclosed in 1908-09 relative to the conditions of native labour on the cocoa plantations (see E B xxiv, 48d) The new regulations which came into force in 1910, provided that labour recruiting should be permitted only in specific zones in Angola, the numbers to be recruited were limited, recruiting agents were to be licensed by government the recruiting was to be carried on publicly, under the supervision of Portuguese officials and native chiefs, labourers were to be conveyed only by specific routes, and were to be repatriated during four periods annually, half their wages being in the meantime collected by the government and paid over to them on their return home In January 1911 recruiting in Angola was stopped, and a new field was created in Portuguese Guinea Natives who did not desire repatriation were given the right to enter into new contracts, under regulations designed to prevent compulsion on the part of employers The general position now appears to be more satisfactory, in the view of British representatives on the spot, though enquiries and statements in the British parliament and elsewhere during 1912 still reveal a considerable body of opinion that the abuses have not yet been entirely removed

The trade of Portuguese East Africa (see E B xxii 163 et seq) is in great part transit its total value was [8 514 041 in 1910 Among industries of recent development may be men tioned the whale fishery near Inhambane the cultivation of sisal hemp in the Quilmant district and the exploitation of oil producing trees. Among recent public works the development of the ocean beach south of Lourenço Marques as a recreation ground and residential district is of great importance to residents and may become so for visitors from the Transi aal. The Nyasaland Government and the Shire Highlands railway company have determined to extend that his from Port Herald to a point on the Zambezi contingent upon the construction of a railway from the river to the port of Beira in Portuguese territory which would divert from Chiade to Beira a large proportion of traffic

RUSSIA

There has been no proper census in the Russian Empire since 1897, but the Central Statistical Committee issues annual estimates of the population based on the yearly returns. The total population for 1911 was put at 167,003,400 (European Russia, 120,588,000, Poland, 12,467,300, Caucasus, 12,037 200, Siberia, 8 719,200 Central Asia, 10,197,300 Finland, 3,084 400). The various peoples of Russia have altogether 191 different languages, Russian predominating in 41 of the 78 provinces, 21 territories and 2 circuits, into which the country is divided for administration. The population of St. Petersburg is given as 1,062,400, Moscow 1,533,400, Warsaw 872,478, 1See E. B. xxiii 869 et seq.

rii6 RUSSLA

Odessa 505,660 Riga 331 300, Kharkov 236,042, Lodz 208,330, and twenty-one other towns have between 100 000 and 200,000. Census work has been done in the chief cities since the general numbering of the people in 1897, and it is considered certain that St. Petersburg now contains over two milion inhabitants. The urban population of the whole Empire is 23,177,700, including Finland (459,000). Caucasus (1,577,500). Si beria (1,050,600) and Central Asia (1 385,500). The rural population is 143,825,700 of which European Russia counts 104,700 roc. According to information issued by the Chief Medical Inspector of the Ministry for Internal Affairs, the death rate of European Russia in 1909 was 28 9 and the birth rate 43 8 per 1,000. This was a less favourable year from a samitary point of view than the two preceding and the increase of the population was lower than for 12 years previously, except in 1905. For 20 years down to 1910 the birth rate generally fluctuated between 47 10 in 1903 and 49 5 in 1801.

An idea may be formed of the insanitary condition of the country from the following figures the total number of sick persons registered by doctors rose from 56 835 200 or 330 Public beaks per 1 000, in 1904 to 81 746 072 or 524 per 1 000 in 1909 These details become terribly significant when it is considered that there is only one doctor in European Russia per 7 100 of the population and in Asiatic Russia per 14,900 Information as to the health of army recruits also bears upon this subject. In 1908 the number of men registered as liable to serve with the colours was 1 280 887 of whom 679 266 or 53 per cent were medically examined with the result that 73 496 or 10 8 per cent were found totally unfit for military service and 58 606, or 8 6% were enrolled in the second category of the militia reserve as being unfit for the regular army on account of sickness and bodily defects whilst 74 425 or 10 7%, were allowed further time for recovery from illness and physical development

The past three years in Russia have been notable for several important legislative acts and reforms affecting large classes of the population. Much attention has been bestowed upon reorganisation of peasant administration, peasant justice land tenure migration colonisation and labour insurance.

As a matter of important benefit for the great mass of Russian peasantry the third Duma (which came into being in November 1907) passed a bill in 1910 which ranks next

to the one designed to emancipate them from their village communes Locai This was the reform of local justice to replace the system introduced in 1880 justice by Count Tolstoy the famous reactionary Minister of Alexander III According to that system, small cases were tried by Volost Courts, the volost being a collective administrative unit comprising many villages and communes More impor tant cases were dealt with by the Zemskie Nachalniki or Rural Administrators who com bined administrative and judicial functions. These administrators were to be recruited chiefly from amongst the local landed gentry, and in this way Count Tolstoy desired to re-establish the influence of the landlords, which had been lost ever since the peasant Toistoy's measure was most unpopular from the very beginning and reforms of 1861 both the volost judges who were elected by the peasants, and the Rural Administrators appointed by the Government, proved themselves incompetent to satisfy modern re quirements. As soon as the constitutional regime was introduced the Government recognised the urgency of reform in this direction with a view to substituting both volost courts and rural administrators by trained justices of the peace as in the towns When the bill came before the legislature both houses accepted the abolition of the judicial functions of the rural administrators, but the projected abolition of the volost courts was strongly opposed in the State Council, and this gave rise to severe criticism was finally voted by the Council in 1011 with retention of the volost courts under the supervision of local boards of magistrates, constituting in this instance courts of appeal

One of the most remarkable features of the years 1910 and 1911 was the manifestation of nationalism by the Government and the Duma. This showed itself in the carrying through of several bills tending to withstand the centrifugal forces which were at work amongst the foreign and heterodox races under Russian rule and which the cosmopolitan disposition of former central authorities had allowed to attain dangerous proportions. The work of the Government and Duma in this

respect surprised those persons who thought the Russification policy of the old bureaucratic regime would disappear with the establishment of representative institutions.

Against these denationalising forces the Government brought forward several bills, such as the introduction of Russian zemstvos or County Councils into the six western provinces, the separation of the Holm district from Laubin, and sta with drawal from under Polish law, the purchase of the Warsaw Vienna Railway by the State, and special Russian legislation for Finland A characteristic in this connection was an order of the Minister of Ways of Communication prohibiting the employment of more than 10 per cent of men of non Russian

race on the Government railways Bills were also introduced for giving zemstvos to Siberia the Baltic Provinces, and the Don Cossack territory

The introduction of zemstvos into the western provinces brought on a serious Minis The measure was calculated indirectly to give the Russian peasant terial crisis in 1911 element in the provinces in question a preponderance of representation over Ministeriai the Polish land proprietors, who had hitherto elected only Poles to sit in the crisis in 1911 State Council at St. Petersburg. With this in view, the new zemstvos were to be elected by separate national curias or colleges The Prime Minister M Stolypin explained the measure in a speech to the Duma, and that assembly passed it on June 11 1010. Very strong opposition however was made to parts of it in the State Council, especially to the projected electoral curias, and in March 1011, in spite of Stolypin's appeals for urgency the upper chamber after much debating, threw out the bill altogether A serious political crisis at once ensued Stolypin tendered his resignation which the Tsar declined to accept Extraordinary means were then resorted to in order to accomplish the desired end On March 27th an Imperial ukaz appeared, which suspended the sittings of both legislative chambers for three days Besides this, two members of the State Council, Durnovo and Trepov, who it was alleged had used unfair means to instigate the opposition, were sent into retirement. The Government then obtained the issue of another Imperial ukaz, whereby the establishment of zemstvos in the six provinces was decreed under article 87 of the Fundamental Laws which en ables the Crown to legislate independently when the two chambers are not in session The only obligation was to obtain the subsequent consent of the legislature to the ac complished fact, which was not difficult after removal of the most dangerous opponents from the State Council This arbitrary proceeding produced a sharp conflict between the Government and the Duma and Council as soon as the two houses resumed their Both chambers for the first time sank their differences and united in vehement ly denouncing the illegal action of the Government although the Duma had actually voted for the law in question As a demonstration, M Goochkov, the President of the Duma resigned his post and was succeeded by M Rodzianko. All factions in the Duma except the Nationalists, combined in an effort to overthrow Stolypin, and passed a vote of censure But the man who had not funched at his post in 1906 when a bomb exploded in the very midst of his own household was not to be intimidated by the wrath

of the Duma especially now that the Emperor's confidence was secured.

The friendliness created between the State Council and the Duma by this incident did not last long. In the autumn of 1911 the old friction between them was renewed and the peasant deputies of the Duma made a pilgrimage to the Ministers and other influential personages to complain of the State Council's neglect of measures affecting their class in particular. They declared that they could not face their electors 'empty handed when they returned home to their native villages.

Meanwhile the Premier Stolypin fell a victim to the perilous double game so often played by members of the Russian Secret Police and their agents among the revolutionary spies. As a gala performance on September 14, 1911 in the theatre at Kiev in the presence of the Emperor and the Imperial family, Stolypin was fatally wounded by two revolver shots fired by a Jew named Mordka Bogrov who at one and the same time was an agent of the Okhrana, or Secret Political Police and a member of the party of revolutionary terror. He succembed to his wounds

mas RUSSIA

on September 18th. This trage end to the ablest and strongest head of the Russian Government since Count Witte had left office produced a great sensation throughout the country and agitated all political parties

Peter Arcadevich Stolypin was born in 1863, the son of a Russian Admiral of Sevastopol fame, who had married a Princess Gorchakov, so that on his mother's side he was related to the noble line of the descendants of Rurik Having finished his education at the University of St Petersburg, he entered the Government of Stolypin, service in 1884, first in the ministry for Internal Affairs and then in the

Department of Agriculture. He was appointed Governor of Grodno in 1902, and of Saratov m 1905 where he became known as a firm administrator He was called from the governorship of Saratov in April 1906 to be Minister of Internal Affairs and in July succeeded M Goremykin as Minister President He quickly proved himself a capable and wise statesman of strong character and convictions. a good orator with a clear and concise style, an indefatigable worker, and able to give unity and prestige to the Ministerial Council over which he presided He at first cooperated with the Octobrists and the Duma, and knew how to make use of the latter for the realisation of his programme of national legislation. It was said that the Duma determined the character of Stolypin, while Stolypin to a great extent determined the character of the Duma Certainly the third Duma convoked under the operation of Stolypan's modified electoral law and influenced by his able speeches turned out incomparably more workable and practically useful than either of its two predecessors motto was reform and order To those who objected to the arbitrary and autocratic tendencies of his policy his answer was that until new and better laws were introduced the old and defective ones, which often produced harm as well as good would be strictly Amongst the important agranan reforms which he promoted was the abolition of the tyrannical hold of the antiquated and fast decaying communal system over the Russian peasantry In a few years time the inhabitants of St Petersburg will have reason to bless Stolypin's memory on account of his scheme of compulsory sanitation and drainage, which the Municipal Duma of the Russian capital, after long years of culpable neglect, will now be bound to carry out He resisted everything tending towards compromise with sedition in any form, and maintained the extraordinary and extra judicial measures of public security and the operation of courts-martial in the face of much op-He was the terror of the Finns and the socialist revolutionaries regarded him as their deadliest enemy, and no less than seven plots and attempts against his life were organised from August 1006, when a bomb was exploded in his summer villa with terrible consequences to his family and visitors, down to the attack at Kiev which unhappily proved fatal

The death of Stolypin induced the radical opposition to entertain hopes of a change of policy under his successor, but M Kokovtsov the new President of the Council of Ministers, very soon dispelled that illusion. In his first speech to the Duma M. Kokovtsov in this new capacity he laid much stress upon the fact that there would be no political change whatever, and this declaration, combined with the impression produced by the fact of the assassin of Stolypin having been a Jew, gave a fresh stimulus to the Nationalist cause and gained for it the full support of the Octobrists. At a great banquet on October 17th in memory of the October Manifesto, the Octobrists and Nationalists, under Goochkov and Balashov respectively joined their forces to pass a whole series of bills initiated by Stolypin. These included the law of equal rights for Russians in Finland, a money contribution from the Finnish to the Russian Exchequer in heu of personal military service, the separation of the Holm district from Polish control and the introduction of municipal administration into Polish towns, which was a sop to the Poles after foisting upon them the zemstvo scheme

1 Vladimir Nikolasavsch Kokovtaov was born in 1847 After serving in the prison administration, and then as Secretary to the Imperial Council, he became Assistant Minister of Finance under Witte in 1901. In 1904 he was appointed Minister of Finance and he retained this office as Prime Minister M Makarov being appointed Minister of Internal Affairs. In December 1912 the latter made way for M Makarov

The antagonism between Russia and Finland was reaccentuated by the necessity of enforcing the law of equal rights In 1910 the Finnish Deet, after three dissolutions for refusing to entertain the subject of Russian Impenal legislation, commued Planish to pursue a provocative policy In 1911 the claims of Russian subjects m question. Finland to be allowed to benefit by the aforesaid law and the absolute re fusal of the Finnish local authorities to admit its validity, or to grant any rights under it, very much aggravated the bad feeling between the two peoples, and matters were made still worse by the Finnish Courts not rendering any assistance to the Russian judicial officers sent into Finland to prosecute the passive resisters Finally several members of the magistracy of Viborg, Abo and other Funnsh towns were arrested and conveyed to St Petersburg amidst demonstrations of sympathy from their countrymen, to be tried in the Russian Law Courts In February 1912 an Imperial decree ordered the pilot and lighthouse services of Finland to be placed under the Russian Ministry of Marine. which further embittered Russo Finnish relations

A number of publications giving the Russian side of the Finnish Question have been translated into English and issued by the Russian Commission for Codifying Finnish Laws Amongst them are The Legal position of the Grand Duchy of Finland in the Russian Empire by Baron von der Osten Sacken Finland Its Position in the Russian State by M Borodkin The Finnish Revolution in Preparation by E Feodorov with a preface by G Dobson The Rights of Finland according to European Scholars by Prof Dr E N Berendts and The Finnish Question and Equal Rights by P Souvorov

The majority of the third Duma took advantage of every possible opportunity to urge the necessity of extending national education. A distinct attitude of opposition was assumed towards M Schwartz Minister of Public Instruction who had National the reputation of a reactionary His successor, M Kasso (appointed in education 1910) was severely censured for his dismissal of a number of professors of the University at Moscow for offering resistance to his measures limiting the independ ence of university autonomy The Duma voted a broad scheme of school development which was calculated to establish general elementary instruction throughout the country in about ten years but this was materially modified by the State Council, which came into acute conflict with the Duma on the question of lay and clerical influence over the proposed schools The Duma refused to vote money for the latter When the Emperor last received the members, before the final dissolution of the third Duma, His Majesty remarked in his farewell speech that he expected the Duma to vote the necessary funds for the schools in question On the last day of the session, in order to avoid a vote uncomplimentary to the Emperor the majority took care to be absent when the question was brought up for discussion and failing the requisite number of members the bill This difficulty however was easily surmounted, as in the case could not be discussed of the Council's refusal to introduce zemstvos into the six western provinces that is to say by again bringing into operation the famous article No 87 of the Fundamental Laws and providing the necessary funds by the issue of an Imperial ukaz

It may be mentioned here that the money devoted to elementary education was in creased from 23½ million to 72 million roubles in 1912

The work of the third Duma in connection with the budget is considered by all parties as most effective and praiseworthy Such a result is largely due to the President of the Budget Commission M Alexenko formerly professor at the University of Kharkov In five years the State revenue increased by £45 773

200 (1908, £268 co8 500* 1912, £397,640,000) The principal source of this increase is the revenue from railways which have produced more receipts for the period mentioned by nearly £20,000 000 It is worthy of note that whereas before 1907

It may be noted that on January 23 1911 the Council of Ministers sanctioned the formation of a Société D Études for surveying the route for the projected Great Indian Railway which is to join the railway systems of Russia and India. The total length of all Russian railways opened for permanent traffic in January 1912 is officially given as 69 332 versts, or 46 221 miles. During 1911 new lines were opened for regular traffic over 957 miles and for temporary traffic over 950 miles new second tracks were laid down over 137 miles new lines were under construction for 3,967 miles and new lines were projected for 1 654 miles.

RUSSIA

Russian radways always showed a considerable deficit for the Exchequer, the last two budgets of the third Duma were closed with a large net profit of some £16,000,000 During the first two years of the third Duma the latter constantly urged economy and better management of radways, while it recommended the kind of measures most likely to conduce to those ends. On one occasion it took the unusual course of reducing the estimates of the Radway Department by r rouble in order to mark its disapproval of the Government policy in that respect. The credits for education rank first in the relative figures of increased state expenditure. These have been nearly quadrupled since 1907, before which year they amounted to about 43,000,000 roubles, in 1912 they came to close upon 170,000,000 roubles. Next in importance are the assignments in connection with migration to Siberia and agricultural assistance and improvement. The money for these "pet children" of the third Duma, as the President of the Budget Commission called them, has been increased by about 78,000,000 roubles (from 40,000,000 roubles before 1907 to 118,000,000 roubles in 1912)

The estimates for the budget of 1913, subject to the scrutiny of the Duma were balanced at the colossal sum of 3,208,496,961 roubles and their chief characteristic is an enormous increase of revenue and expenditure the latter extending to all branches of the government, and amounting to 335 million roubles more than the expenditure of 1912 whilst the anticipated revenue is 277 million roubles more than that of 1912 Consequently the expenditure for 1913 is calculated to exceed the growth of revenue by 78 million roubles.

The attention of the third Duma was much occupied by questions of National Defence—Its unrelenting hostility to the Ministry of Marine and persistent refusal to grant more money led to administrative change and revision in that department (Vice Admiral Grigorovich becoming Minister in 1911) after which more credit was duly voted. In 1907 the Admiralty estimates amounted to 87 000,000 roubles in its last Budget the third Duma provided 230 000 000 roubles for the National Navy—Relations with the Ministry of War (to which General Sulhomlinov was appointed in 1909) were less strained and although that Ministry was invariably criticized, more especially the Commissariat Department, the third Duma was induced to satisfy all requirements of the Army to the extent of 545 000,000 roubles in 1913, or 150,000,000 roubles more than in 1907

Russia's finances have never before been in such a flourishing condition as they were at the end of 1912. The free resources of the Treasury had attained to the unprecedent ed sum of 800 000,000 roubles, and the gold reserve of the State Bank the largest reserve of any bank in the world was close upon 1 milhard 572 milhon roubles. These brilliant results were due to two splendid harvests and an unexampled development of trade and industry. As a matter of fact in the course of two years only from 1910 to 1912, there was an increase of industrial employ ment for over 300,000 more workmen.

The Ministry of Commerce and Industry reports that during the first nine months of 1911 there were 295 labour strikes on economic grounds, in which 78,000 workmen took part, and which entailed the loss of 540,000 working days. The great est number of these strikes was amongst workmen in the textile industries namely, 119, or 40 per cent, and the number of men involved was greater than in any other industry. The industries producing metal goods were accountable for 34 strikes, those dealing with animal products for 27, and those for the mechanical treatment of wood for 24 strikes. The most serious strike took place in March 1912 at the mines of the Lena Goldfields Company in Siberia, and resulted in a wholesale massacre of workmen, hundreds of whom were shot down mercilessly by the troops Discontent with the management of the mines was the only cause of the disturbance it roused general public indignation, and the Emperor sent a trusted senator to make a special investigation and prosecute the parties responsible for so much loss of life

The prosperity of Russis, which is in the main an agricultural country is almost entirely dependent upon good harvest results. The harvest of 1911 was much inferior

RUSSIA 133E

to that of 1910, which was very nearly as good as the abundant harvest of 1909 in quantity though not in quality owing to unfavourable weather. There was a dearth

in 1911 in 14 provinces and 3 territories which necessitated the adoption of measures of relief for the peasantry in the famine stricken districts, such A ariculture. as the sale of corn and seed at cost price loans; reduction of railway rates for transportation, and so forth The harvest of 1012 was considered on the whole to be good but rather unusual meteorological conditions during the latter part of the year probably marred the expected results. This was certainly the case with the harvest of beetroot for sugar-making There was even an alarm raised in the press as to the possibility of a sugar famine and the advisability of importing foreign sugar

For the purpose of establishing more security in kind for advances made on corn by the government private banks and radway companies, it was decided in 1912 to erect 178 large granaries at railway stations and wharves with an aggregate capacity of one million tons

The employment of improved agricultural machinery and implements is spreading every year. The total value of such machinery acquired in 1910 was estimated at about £9 200 000 as against £8 500 000 in 1909

The Russian grain export trade suffered considerably in 1911-12 from the temporary clos-

ing of the Dardanelles in consequence of the Turco-Italian and Balkan wars

The realisation of the great agrarian reforms under the ukaz of November 1906 which emancipated the peasantry from the thraldom of their communes has been energetically pursued The number of peasant householders applying for personal tenure from the begin ning of this reorganisation of the land down till June 1911 was 2 160 867 while 1 531 620 had finally left their communes Besides this there was a growing tendency for whole communes to have their land distributed into separate allotments and farms thus enabling the members to adopt individual tenure without direct application By the law of June 14 1910 communes in which there has not been any general redistribution since the first allotment are considered to have passed over to hereditary tenure. On January 1 1911 the number of such communes amounted to 116 043 with 3 489 898 householders representing allotments aggregating about 77 million acres

The purchase price of State land sold to the peasants during 1907-10 was 28 096 973

roubles most of which is to be paid off by instalments spread over \$51/2 years

roubles most of which is to be paid off by instalments spread over \$5\frac{1}{2}\$ years

Russia s foreign trade is growing rapidly. Its total value as reported from the British

Consulate in St. Petersburg including the trade of the Caucasus and Finland both exports
and imports (but exclusive of precious metals for which it has been decided

becomes and imports (but exclusive of precious metals for which it has been decided

henceforth not to publish any data) amounted in 1911 to \$268,405,925 as com
pared with \$\frac{1}{2}466619,092\$ in 1910 showing an increase of \$\frac{1}{2}1781833\$ or \$8.\circ\$

The exports in 1911 were officially estimated at \$\frac{1}{2}60.183809\$ as compared with \$\frac{1}{2}46.032.505\$

In 1910 an increase of \$\frac{1}{2}4.151.304\$ or \$9.4\circ\$ and imports at \$\frac{1}{2}108.222.116\$ as compared with \$\frac{1}{2}100.586.587\$ in 1910 an increase of \$\frac{1}{2}7.35.539\$ or \$7.4\circ\$ (Compared with the quinquennial period of 1906-10 the exports in 1911 increased by 33.2\circ\$ the imports by 33.7\circ\$ and duty on imports by 20.1\circ\$. The average excess value of exports over imports for the 5 years end ing 1910 was over 39 million sterling. Russia imported German goods in 1911 for a value of \$\frac{1}{2}50.590.155\$ so that Germany now monopolises nearly 50 of the Russian import trade. The United Kingdom came next with \$\frac{1}{2}62.83.070\$ or \$15.0\$ of the total imports a small increase over the previous year. There has been a remarkable growth in recent years of imports from the United States. In 1911 Russia imported American goods valued at \$\frac{1}{2}10.668.045\$ as compared with \$\frac{1}{2}7.98.937\$ in 1910 and \$\frac{1}{2}6112.610\$ in 1909. In 1911 Great Britain took Russian exports for \$\frac{1}{2}50.868.862\$ and Germany for \$\frac{1}{2}51.866.561\$. The principal items of the Russian exports for \$\frac{1}{2}50.868.862\$ and Germany products which amounted altogether in 1911 to over 13 million tons. The following are the chief Russian exports taken by the United Kingdom in 1911 wi 10 million tons The following are the chief Russian exports taken by the United Ringdom in 1911 with their respective values cereals for £11 169 934 timber for £6 689 312 eggs for £3 242 530 butter for £945 185 sugar for £2 843 068 flax for £1 979 788 and game and other lood products for £1 068 571 The total values of all these exports to all countries in 1911 were food stuffs £104 608 149 timber goods £14 982 963 eggs £8 544 656 butter £7 408 412 sugar £5 106 772 flax £6 757 777 poultry and game £1 532 063.

Chambers of Commerce were introduced into Russia for the first time in the years 1910-11-12 beginning with the establishment of the Russia for the first time in the years 1910-11-12 beginning with the establishment of the Russia for the first time in the years Slavonic countries.

Slavonic countries

Another Present novement of British orgain in these years was the emulation of General

Another Russian movement of British origin in these years was the emulation of General Baden Powell's system of Boy Scouts but owing to the peculiarities of Russian conditions the Scouts in Russia have become polysimile; play soldiers, or boys playing at soldiers and are organised and drilled accordingly

One of the last measures passed by the third Duma was for a comprehensive system of Labour Insurance, which was introduced into the Lower House in June 1908 It applies 1132 RUSSIA

transport railways and transport railways and transport railways. Insurance in case of accident is provided for on the Austrian system by term tonal mutual societies with capital supplied exclusively by employers and man aged by them under Government control. A second bill was passed for insurance in cases of temporary sickness to be indertaken by societies similar to the German Kronkenhaisen the ne essary funds in this instance being supplied in the proportions of \$\frac{1}{2}\$ by the workmen and \$\frac{1}{2}\$ by the employers. Sick pay is to be granted for periods not exceeding \$\frac{2}{2}\$6 weeks in one year. Considerable opposition was offered to the part of the scheme which provides for medical and at the expense of employers but finally after much discussion in both houses the bill was made law.

The third Duma, which was the first really working Duma, completed its 5 years term in 1912, and an Imperial ukaz summoned the fourth Duma elections being held in the late autumn. In these there is no doubt that the Government exercised considerable pressure through M Sabler the Procurator of the Holy Synod, on the clerical vote, and through the Zemskie Nachalniki and other local authorities on the peasant vote, also in the matter of distribution of electoral

boroughs arbitrary removal of undesirable voters, and so forth The result was, however unsatisfactory for the Government after all its efforts for its campaign having been apparently directed against the Octobrists the Opposition came in stronger than ever and the Octobrists, although they lost Goochkov and other good men, practically lost only 10 seats. It seemed likely to be very difficult to arrange for a working majority in the fourth Duma. The returns in November 1912 showed its constitution to be as follows. United Right, 229 various parties of the Left, 109, Ministerial Centre 80,

Aliens" or Autonomists 17, miscellaneous 15 Of the whole 440 members of the Duma only 7 or 8 were members of the first Duma (1906), and of the new party of the Right 45 were priests of the Orthodox clergy, 2 being bishops, the outlook being un promising for any but reactionary legislation

In foreign affairs Russian diplomacy has played an active and pacific part, without however, exhibiting enough energetic initiative and success to win popularity at home The former Minister for Foreign Affairs, Izvolsky who in 1910 was trans Foreign ferred to Paris as Russian Ambassador was severely criticized in the Rus aifairs. sian press for not preventing the annexation of Bosnia and Herzegovina, and his successor M Sazonov (who in 1912 paid important visits to Paris London and Ber lin) has been criticized at home with equal if not greater severity for nearly everything he has done or not done. It was laid to his charge that he neglected to avail himself of the opportunity of the Turco-Italian war to insist upon the Turkish troops withdrawing from the Persian district of Urma After the Potsdam interview in 1912 between the German Emperor and the Tsar, accompanied by their respective Ministers M Sazonov was sharply criticized for the resultant agreement, whereby Germany received several substantial advantages in return for merely promising not to interfere in Russia's political relations with Persia Germany in fact was given the possibility of accelerat ing the construction of the Bagdad Railway, and Russia undertook to solicit a con cession from Persia for a railway from Khamikan, the last station of the German line on the Turco Persian frontier, to Teheran, thus facilitating the competition of German goods with those of Russia in the markets of northern Persia. Although Russia contunued to proclaim the principle of non interference in Persian affairs, a Russian Con sular officer was insulted by Persian gendarmes, and an ultimatum had to be sent to Te heran and more Russian troops entered the country English and Russian co operation at Teheran was severely tried by the reign of Persian anarchy, but good relations were maintained between the governments. Kussia again had trouble with China as to revision of the treaty of 1881, and towards the end of 1912 concerning the independence of northern Mongolia After much hesitation and refusing to accede to Mongolian solicitations for protection against China, Russia concluded a convention with the new Mongolian Government at Urga, recognising the autonomy of that region without impugning the sovereignty of the Chinese over their former province This gave rise to much ill feeling against Russia in China The explanation was that Russia was object to establish direct relations with northern Mongolia is order to secure the treaty

RUSSIA 2133

rights for her merchants which China had not yet agreed to renew. In 1911 all outstanding accounts were finally settled with Japan and Russia received back her hospital ship which had been captured during the war. In the Moroccan crisis of 1911, between Germany and France, the attitude of England in support of France was undoubtedly assisted by Russia making it plainly understood that the France-Russian alliance was still in full force, and especially by the order to refund to Russian banks out of the Russian Exchequer deposit in Germany all sums of money demanded of them from that country. Meanwhile difficulties have arisen between Russia and the Umited States. In December 1911 President Taft declared his intention to abrogate the treaty with Russia of 1832, and the announcement gave great umbrage in Russia, where it was at once understood as a retaliation for Russia's refusal to abolish her restrictions against foreign Jews and American Jews in particular. For some time the situation appeared to threaten a tariff war between the two nations.

In the beginning of 1912 Anglo Russian sympathies were very considerably strength ened by the visit of a British delegation to Russia composed of representatives of both Houses of Parliament, the Army Navy, Press and Commerce They were received by the Emperor and overwhelmed with traditional Russian hospitality at St Petersburg and Moscow A British squadron of 3 ships under the command of Admiral Warrender visited Revel for 3 days at the beginning of October 1912

In September 1912 the centennial jubilee of Napoleon's retreat from Moscow was celebrated with much military and religious ceremony in all the chief cities and towns of the Russian Empire, especially on the field of Borodino, where the Tsar reviewed a large number of troops. A distinguished French deputation also attended at Borodino and placed wreaths at the foot of both monuments erected to the Russian and French soldiers respectively who fell here in 1812. Special patriotic performances were given at most Russian theatres, representing Kutuzov's pursuit of the defeated French army

In October 1912 great distress was caused in the Russian Royal family by the serious illness of the Tsar Nicholas s only son, the Grand duke Alexis (b 1904). All sorts of wild rumours were current that he had been the victim of a bomb outrage that he had been mutilated by his nurse, and so forth. All that was definitely known was that he was very ill and in a critical state but his condition improved early in November. It was officially stated on November 3rd that the child had injured himself in jumping into a boat and that an internal effusion of blood had been set up causing great anaemia "which will require a long period of recuperation and may possibly for a long time render difficult the free use of the legs." The question of the succession to the throne came under discussion in connection with this unhappy event and on December 11th it was reported that the Grand duke Dmitri (b 1891) son of the Tsar's uncle, the Grand duke Paul, would be made heir-designate

Obstuary —Besides M Stolypin whose death is referred to above Russian public life has lost an important figure in the editor of the Novoya Vremva Alexis Serghevich Suvoring (b. 1834) who died at St. Petersburg on August 24, 1912. The son of a serf who had fought at Borodino and risen from the ranks to be a captain he was educated at the military school at Voronezh and obtained a commission in 1853, but owing to lack of means decided to become a schoolmaster at Korshovo. In 1858, he translated Beranger's 'Captive' and brought out some sketches of country life. In 1860 he got a tutorship at Voronezh and continued to write for the press. In 1863, he removed to St. Petersburg where for 12 years he was chief sub-editor of the St. Petersburg Viedomosti. His articles republished in 1866 caused him to be sentenced to two months imprisonment and the whole edition of his book was publicly burnt. In February 1876 he began the publication of the daily Novoya Vremya making a special feature of the war news from Turkey and becoming his own correspondent in the Balkans. His paper soon became the leading one in Russia and managed to steer clear of all troubles with the government supporting the Constitutional régime and in foreign policy the French alliance. For over thirty years he contributed personally "Little Letters" on the chief topics of the day. He did much to help the circulation of cheap classics and he founded a dramatic society and owned a theatire.

classics and he founded a dramatic society and owned a theatre
Another important figure passed away in Monsgr Antonius (Alexander Vassilevitch
Vadkowski) Metropolitan of St Petersburg (b 1846 d November 13 1912) At the age of
20 he entered the Ecclesiastical Academy of Kazan and in 1870 became Professor of Pastoral
Theology and Homiletics. He also wrote much on scientific subjects and in 1879 became

SEAM **TI34**

edutor of the Orthodox Descenser. After the death of his wife and children he became a monk, and in 1883 was made Archimandrite. In 1884 he became Inspector of the Kazan Academy and in 1886 Professor in the Ecclesiastical Academy of St. Petersburg and in

Academy and in 1888 Professor in the Ecclesiastical Academy of St. Petersburg and in 1883 Archbishop of Finland and member of the Most Holy Governing Synod, of which he was President at the time of his death. He published several collections of his writings and speeches. He was succeeded as Metropolitan of St. Petersburg and President of the Holy Synod by Monsignor Vladimur Metropolitan of Moscow. On February 7, 1912 the veteran Russian Field Marshal and coadjutor of the Emperor Alexander II in his liberal reforms. Count D. A. Milutin died in the Crimea at the great age of 96. He was for 20 years Minister of War and one of the most distinguished statesmen of the reign of the Tosar Emancipator. As Chief of the Military Staff of the Caucasus during the Russian conquest of that country. Militin was the author of the plan which led to the capture of the elusive Shamyl in his mountain fastness at Gumb. He it was who radically reformed the Russian army military education and justice in the seventies of the last cen reformed the Russian army military education and justice in the seventies of the last cen He was always a warm advocate of representative government for Russia complete retirement took place in 1881

ADMIRAL DUBASOV, a well known Russian naval officer who was chosen by the Tsar to suppress the insurrection at Moscow in 1905, died in June 1912 aged 67. He first distinguished himself and at once became popular as the hero of the only naval exploit of which the Russians were able to boast in the Russo-Turkish campaign of 1877-78 when as a young lieutenant in company with Lieutenant Shestakov he succeeded in sinking the Turkish ironclad Seifi by means of a mine. He was sent to occupy Port Arthur and Dalny and also to Paris as Russian delegate to the International Commission of Enquiry into the Dogger Bank incident In 1905 the Emperor appointed him to put a stop to agrarian outrage and armed revolt in the provinces of Chernigov Kursk and Poltava As Governor General of Moscow he showed great courage against the revolutionists. His life was twice attempted but he only received an injury to his left foot, which however, soon caused him to retire

On December 13 1911 the death took place of Professor BEKETOV an eminent Russian

professor of chemistry who enjoyed a European reputation

Professor SERGE MURONTSEFF President of the first State Duma and a party to the famous Viborg Manifesto died at Moscow on October 17 1910 YURY VICHOLAIVICH MILUTIN the founder of the well known political party of Octobrists died on Jan 21 1912 and Mrs. Anna Filosophova the Russian champion of women's rights and promoter of

higher female education died on March 30 1912

The deaths may also be recorded of NICOLAS DMITRIEVICH Count OSTEN-SACKEN (b 1831 d May 22 1912) Russian minister successively at Darmstadt Munich and finally at Berlin from 1895 until his death and of GEORGE ROMANOWER fifth Duke of LEUCHTENBERG (b 1852 d May 5 1912) formerly a Russian officer who was a descendant of Eugène de Beauharnais (see E B in 588c) and son of a Russian Grand duchess.

(GEORGE E DOBSON)

SIAM 1

The treaty of 1907 with France reduced the area of Siam from 240 000 to 215 000 sq m approximately. In 1909 a treaty was concluded with Great Britain ceding the Malay Protectorates of Trengganu, Kelantan, Kedah and Perlis to that country reduced the approximate area of the Kingdom to 198,000 sq m At the same time Great Britain agreed to a modification of the extra territorial rights of British subjects and Siam obtained from the Federated Malay States Government on favourable terms a loan for the construction of the Peninsular Railway The new frontier in the Malay Peninsula was in due course delimitated by a joint commission The total popula

tion in 1910 numbered 7,561 977 The capital Bangkok, has a population of 628,675
Siam is purely an agricultural country rice accounting for some 84 per cent of the total value of the exports. Up to 1910 there was evidence of a fairly steady growth in the cultivated area. This connoted a growing revenue and a prosperous trade. But a poor crop for three years—due to unfavourable climatic conditions and the want of any system of irrigation. —has temporarily given a serious check to the growth of trade and caused a certain amount of distress. The rice export was 1,051,836 tons in 1910–11, and 627,468 tons in 1911–12

The supports for 1910–11 were valued at 68,205,328 ticals (13 ticals approximately = £1)

and the exports at 108 909 811 ticals

The bulk of the trade is carried out with the two great transhipment ports of Singapore and Hongkong, without any indication of where the goods come from or go to The estimated revenue for 1911-12 was ticals 62 320,000 as compared with ticals 60 523 520 for the previous year. The main sources of revenue are—Opium (101 millions) Land and Fishery Taxes (81 millions). Capitation Taxes (7 3 millions) Spirits (6.2 millions), Customs (6 millions) Railway Trainc (4.2 millions) Lottery Farm (3.6 millions) Gambling Farms

See E. B. xxv, z et sue.

SPAIN aug

(3.5 millions) and Forests, Octroi Slaughter Lacence Fees Manes, Muscellaneous Fees and Lacences (all over one million)

The expenditure chargeable to revenue for 1911-12 amounted to ticals 62 235 539 as compared with ticals 60 522 962 for 1910-11. In 1911-12 the expenditure thargeable to loan account (railway construction and Bangkok Water Works) amounted to ticals 9 820 838 while in the same year the expenditure chargeable to treasury reserve was ticals 1,854 231. The Ministry of War (with army) for 1911-12 was estimated to cost ticals 11,365,460 and the navy ticals 4 000 000. The kings civil list amounts to ticals 7,000 000 and that of the Queen Mother to ticals 300,000. The foreign debt amounts to \$4,000,000 bearing interest

at 44 per cent

The length of state railways open to traffic is 607 miles. The southern line down the Pennsula to connect with the line to Singapore is under construction, and it has been decided to resume the construction of the northern line to Chiengman In 1912 a Ministry of Communications was formed but the development of roads and waterways must depend on

a return of prosperity and a growing revenue

After the longest and most illustrious reign in the history of the country King Chulalongkorn died on October 23 1910, and was succeeded by his son, the Crown Prince, under the style and title of Somdetch Phra Paramendr Maha Vapravudh, Phra Mongkut Klao King of Siam The coronation in December 1911 brought together the largest gathering of European royalties ever seen in Asia The new King is not less an absolute monarch than his predecessor. But the note of the new reign may be found in the royal decree making the very considerable personal property of the King subject to the same taxation as that to which the property of a subject is hable and in the effort made to stimulate patriotism and a national consciousness by the Wild Tiger and Boy Scout' movements Siam however has not been able to escape the general unrest and largely as a reflex from the successful revolution in China an anti-dynastic conspiracy was hatched early in 1912 This, however, was promptly checkmated and punished but without undue severity. Local self-government, dealing chiefly with samitation and education is being attempted in districts in the interior provinces Conscription is now enforced throughout the country, both for army and police, and the army organisation is thorough and successful

A national system of education is in process of organisation and it has been decided to establish a university. At present there is in Bangkok one school in which the final examination reaches the standard of the matriculation examinations at London University. A beginning is being made to make elementary education compulsory for boys. The education of girls is not yet general.

In the administration of justice under the treaties with Great Britain and France, European lawyers play an important part as advisers and judges and the system is found to work satisfactorily

SPAIN¹

In 1910 the population of Spain was 19 588 688 an increase of 970,602 since the census of 1900. The populations of the chief towns were as follows. Madrid 571,539, Barcelo na 560 000, Valencia 233 348. Seville 155 366. Malaga 133 045. Murcia 124,085, Sara gossa 105 788. The census showed that 63 7 per cent of the population were illiterate—a high figure yet a marked improvement on 1900. In 1911 the total State expenditure² on education and art was £2 340 000 (58 524 586 p.), of which £1,266,000 (31,664,746 p.) were spent on public and primary education

Agraculture—The crop returns for 1911 were in most cases the best for the five years 1907-11 wheat yielding 4 000 000 tons as compared with 3 740 000 tons in 1910. The barley oats and maize crops were also excellent while the increase in olive oil and olives amounted to 200 per cent for the year—in the latter case however the 1910 harvest had

See E B xxv 527 et seq Conversion is made throughout at the approximate rate of £1-25 pesetas but a considerable deduction has to be made owing to depreciation

SPAIN дізб

been very poor. The vintage was the best since 1908, and an increase in the acreage under vineyards took place for the first time for many years. Parasitic growths attacked theorange almond, and spice crops but the orange trade escaped serious mury with other branches of the feuit export trade it was adversely affected by the British coal strike in 1912.

*Commerce**—Spanish banking, electrical and railway enterprises have continued to attract

foreign capital the most important new venture being the Barcelona Traction Light and Power Company a Canadian company with a capital of \$800 000. The great develop ment scheme, intended to devote a loan of \$60 000,000 to harbour improvements railways irrigation, afforestation and similar public works, never came to fruition, but good progress was made with the building of new roads especially motor highways and the first of the new light railways—a line 18 m long in Palencia—was opened in 1912

On January 1 1912 the new tariff came into operation. It involves reductions in the duties on most cotton and some woollen and silk goods on sewing machines tools, iron and steel wire ropes iron and steel plates paper and cardboard. There are increases in the duties on hemp and linen yarns washed wool and untained hides and skins.

The mining industry was impeded not only by the industrial agitation but by the new mining law (Dec. 29 1910). This law makes the head rent payable in a lump sum instead of quarterly the ownership lapsing in default of such payment when due. As the mine owners were not given adequate notice many mines lapsed i.e. were confiscated. The to £10 585 000 while the imports only decreased from £10 296 000 to £10 279 000

Finance -The Octror was abolished on June 1 1914 and a tax on house rents substituted The Canalejas government also endeavoured to lighten the burdens of the poorer classes by reducing the sugar duties to about 25s per cwt and increasing the death duties. These changes were accompanied by numerous much needed increases in official salaries and

by additional grants for educational purposes

The national debt on January 1 1911 amounted to £391,491 000 (91 787 281 388 pesetas) In the following December Señor Canalejas persuaded the king to re-enact for 1912 the budget of 1911 the Spanish Constitution permitted the budget for one year to be once thus budget of 1911 the Spanish Constitution permitted the budget for the year to be once that re enacted. The estimates showed an expenditure of £45 240 000 (1 131 000 000 p) and a revenue of £45 280 000 (1 132 000,000 p) but the war expenditure destroyed this apparent equilibrium. The budget for 1913 introduced in May 1912 showed a heavy deficit on this account. Senor Navarro Reverter the Finance Minister seeing that a foreign loan was impossible and an internal one would be unpopular arranged to raise the current credit of the Treasury with the Bank of Spain from 75 to 100 million pesetas (£3 400 000 to £4 000 000). At the same time the Treasury was empowered to borrow 100 million pesetas from the bank at 1 per cent and to reduce the interest on the existing debt of the same amount (owing on a committee of the American Way) from a per cent to 1 per cent and to reduce the interest on the existing debt of the same amount (owing on the fire American Way) from a per cent to 1 per cent and to reduce the account to 1 per cent and the American Way) from a per cent to 1 per cent and to reduce the contract of the American Way) from the house of the American Way) from the fire account to 1 per cent and to reduce the contract of the same amount of the American Way) from the fire account to 1 per cent and the contract of the same amount of the American Way) from the fire account to 1 per cent and the cent and the contract of the same amount of the same amount and the cent a account of the American War) from 2 per cent to 1 per cent also In return the bank was apparently authorized to issue notes up to the value of 200 milhon pesetas without covering the extra issue with 50 per cent of gold in reserve, as previously required for all notes issued in excess of a total of 1,500 milhon pesetas

The amount of notes in circulation on May 4 1912 was 1 806 million pesetas

Defence—The first ship of the new Spanish navy a gunboat of 800 tons was launched at Cartagena on January 26 1911 and on February 8 1912 the battleship España was launched at Ferrol This is a vessel of the Dreadnought type displacing 15 450 tons and with a contract speed of 19 5 knots. On April 24 1911 the king inaugurated the first powerful station for wireless telegraphy at the military camp of Carabanchel near Madrid

The Industrial Agitation -An epidemic of strikes, often accompanied by rioting and the destruction of property swept over the industrial districts of Spain between October 1910 and July 1911 In August 1911 it culminated in an economic and political crisis of the gravest character Members of the French General Confederation of Labour had been invited to address a series of meetings in Madrid and Barcelona were expelled, by order of the government, owing to the inflammatory nature of their speeches Disturbances followed in Catalonia, but the repressive measures taken by Géneral Weyler, the Captain General, restored the semblance of order for a few days The transport workers in Rilbao then struck work, to be followed by the miners and factory hands, and the employers declared a lock-out Work ceased throughout the district, and the crisis developed rapidly King Alfonso, who had been visiting England with the Queen (Aug 14th-26th), returned hurnedly to Madrid on August 30th The SPAIN P37

strike spread to Santander and Asturias and the General Labour Umon decided on a general strike. In many parts of the country the labour disturbances assumed a revolutionary character, noting and bloodshed were of daily occurrence, and Barcelona Heuiva Saragossa, Malaga and Valencia appeared to be on the eve of instruction the disorder being worst in the last named province. In the north, General Aguilas, the Captain General of Burgos took command at Bilbao with all the troops at his command. The city was placed under martial law and the strikers dispersed by cavalry charges and the threat of artillery. At Valencia, however the noters succeeded in gaining the upper hand (Sept. 18th) and at Cullera and Alcira the Commune was proclaimed. The exceptionally brutal murder of a magistrate (Senor Lopez Rueda) at Gullera, and of his secretary and the clerk of the court brought about some revulsion of public feeling and strengthened the hands of the government

On September 19th martial law was declared throughout Spain the Constitutional Guarantees not being restored until October 22nd On the night of the 19th 300 arrests were made within a few days the prisons were full and the barracks converted into The publication of two Republican newspapers was suspended the others de cided to cease until the Constitutional Guarantees were restored These measures The funds of the strikers were almost exhausted, the revolutionary organi sation was paralysed by the loss of its leaders and the strikers reluctantly returned to work Minor outbreaks occurred sporadically after the collapse of the great strike and in June 1912 much anxiety was caused by the widespread symptoms of unrest At Oviedo the Civil Guard intervened in a strike of miners, shots were exchanged, and the whole mining population ceased work as a protest. In the district of Almeria a general strike was threatened and great dissatisfaction was shown throughout Spain by the rail waymen who demanded higher wages and shorter hours This culminated on October 4th, when the railwaymen decided in favour of a general strike by 65 400 votes to 1418 The companies refused to accede to their demands and the government issued a mobili sation order recalling to the ranks many reservists who were on strike. This together with the organisation of a provisional service of trains and the promise of a bill to better the conditions of railway employes led to the collapse of the movement

Politics and Legislation—Senor Canalejas who had become Prime Minister on February 10, 1910 remained in office until he was assassinated on November 12, 1912. His policy aimed it has been said at 'Europeanising Spain. While maintaining order under many difficulties he worked for the betterment of the agricultural and industrial classes. During his tenure of office the government reduced the power of the church im secular affairs solved numerous financial problems carried on military operations in Morocco and also conducted a most intricate series of negotiations with France

The anniversary of the execution of Francisco Ferrer (Oct 13 1910) was the occasion of many Republican demonstrations but it was not until March 27, 1911, that

the debate on the Ferrer trial opened. Meanwhile there had been a The split in the Republican party and the government had gained in strength Perrer The Republican leader in Barcelona Senor Lerroux had been accused of question complicity in certain municipal scandals He was formally expelled from the party by its chief, Senor Azcarate who then joined forces with Senor Pablo Iglesias the Socialist leader forming a new group in the Cortes—the Republican Socialists was in December 1010 On January 1, 1011 Senor Canalejas resigned desiring a free hand, which his return to power would give him. He received the royal confidence, and reorganised the Ministry the new Ministers being Senores Alonso Castrillo (Interior), Amos Salvador (Education) and Gasset (Public Walks)—the last named a leader of the Moret group who had served in five previous cabinets Before the Cortes opened on March 6th the Republicans had been further weakened by the exclusion of the Catalin ists, and now consisted of three mutually hostile factions—Catalizasts, Radical Republicans and Republican Socialists

The Ferrer debate lasted until midmight of April 8th-9th, ending in the rejection of the Republican motion which asked the government to modify the Code of Military 1136 SPAIN

Justice and to repeal the Law of Jurisdictions Señor Canalejas maintained that the Laberal government could not be held responsible for the acts of its predecessors, but a cabinet crisis arose on April 1st, owing to the strong feeling in Army circles that Senor Canalejas had not sufficiently defended the action of the Military Judges who condemned Ferrer The king was summoned to Madrid, and the cabinet was again reconstituted Only three ministers retained their portofolios, 2sz the Prime Minister, Señor Garcia Prieto (Foreign Minister) and Señor Gasset (Public Works) Senor Ruz Villarino was transferred from the department of Justice to the Interior

On October o 1910 two important new bills were introduced in the Senate. The first imposed compulsory military service on clerical as well as lay citizens, the second substituted an asseveration on the honour of a witness for the legal oath on the crucifix This was the government's reply to the great Roman religious Catholic demonstration which had taken place a week earlier The Cadenas auestion. Bill, which forbade any further religious orders to settle in Spain until the Associations Bill became law was carried December 23rd There were at this time 3 007 numeries and 704 monasteries in Spain with 41 500 nums and 12 800 monks, and a large number of members of religious Orders had also entered the country from Portu gal On the 2nd of March the king approved a draft of the new Associations Bill, but on the same day Cardinal Merry del Val, the Papal Secretary of State, informed the government that the Vatican would not be prepared to resume negotiations unless all measures dealing with the religious question were first submitted for its approval To this Señor Canalejas would not agree the Associations Bill was introduced at the end of May and compulsory military service for all classes was legalised on June 20th Owing however to the urgency of the industrial and Moroccan questions, Senor Canalejas was forced to defer the fulfilment of his anticlerical programme

On November 12 1911 the Municipal elections were held throughout Spain proved a triumph for the Monarchist Parties which had a majority in most of the large towns recovering Madrid and Valencia and winning five seats at Barcelona Even Sazagossa returned a Monarchist majority for the first time for twenty trial. years This was due partly to the disunion among the Republicans but still more to the success of the government in dealing with the great strike and to the reaction produced by the Cullera murders On January 11, 1912 the Supreme Council of War and Marine passed sentence of death upon 7 out of 22 persons arrested at Cullera It was alleged by the Republicans that torture had been used to secure a confession, but this charge was not substantiated when a medical commission examined the prison Six of these were reprieved, but the seventh Jover, had been found guilty of murder on three counts, and the government opposed the reprieve As the king insisted upon it, Señor Canalejas tendered his resignation declaring the government decision irrevocable An attempt was made to form a new Cabinet, Senores Montero Rios, Moret and Maura being summoned successively to the palace, but on the follow ing day (Jan 15 1912) Sefior Canalejas returned to power the royal elemency hav ing been exercised in the interval. This crisis strengthened both the Monarchy and the Ministry, and on May 5, 1912, the Chamber, after an animated debate, reaffirmed its confidence in Señor Canalejas by 180 to 73

On November 12 1912, the Prime Minister was shot in the Puerta del Soi Madrid as he was walking to the Ministry of the Interior to preside over a Cabinet meeting. The assassin by name Manuel Pardinas Sarrato, was a native of El Grado and Señor Garcia Prieto was appointed acting Premier. He was succeeded two days later by Count Romanones, who formed a new Laberal Ministry Señor Canalejas was fifty-eight years of age and had been a member of the Cortes for twenty-eight years. He had been very successful at the Bar, had served in the war

for twenty-eight years. He had been very successful at the Bar, had served in the war against the United States, in Cuba and had held the portfolios of Public Works, Finance and Justice, and been President of the Chamber He was probably the ablest Spanish statesman of the period which ended with the fall of Sagasta

SWEDEN 1130

Between January 5 and c6 1911 King Alfonso visited Mehlla, where he unveiled a monument to the Spanish soldiers who had fallen in the Riff In June, the occupation of Alcazar and Laraiche brought about a critical situation, strong protests Могоссия being made by the French and Moorish governments. Public feeling ran attairs dangerously high despite the efforts of the Ministerial Press But the Minister for Foreign Affairs, Señor Garcia Prieto handled the situation with firmness and tact and on December 6th, formal negotiations with France were begun M Geoff ray, the French Ambassador representing his country while Sir Maurice de Bunsen, the British Ambassador, was present at the request of both parties The negotiations terminated successfully in November 1912 (see Morocco) In January of that year, the total number of Spanish troops in Morocco had been nearly 35,000. The cost of the war evoked many protests from the Republican party who denounced the official policy of adventure" But even they were not unanimous, as Senor Lerroux supported the government on this one question. All the Monarchist parties were in favour of an active Moroccan policy, and the war was not unpopular in the country

Obituary—In addition to that of Señor Canalejas the following deaths may be noted Maria Teresa Isabella Infanta of Spain (b 1882) died at Madrid on September 23 1912 she was the second daughter of Alphonso XII and Queen Maria Cristina and was married on January 12 1906 to Prince Ferdinandof Bavaria. Marcella Maria Cristina and was married on the scholar and critic (see E B xviii 128d) died at Santander on May 20 1912 he continued his critical and linguistic researches almost up to the day of his death and bequeathed his library of 40 000 volumes to Santander the town of his birth José Lopez Dominguez (b 1825) the statesman and general died on October 18 1911 he was war minister in the Posada Herrera Cabinet of 1883 (see E B xxv 560) and on the death of his uncle Marshal Scriano succeeded him as leader of the Dynastic Left party later he joined a coalition which took the name of the Nationalist party and in 1906 was Prime Minister at the head of ananti clerical cabinet (see E B xxv 567b) Aureliano de Beruete (b 1845) the painter and art critic died at Madrid on January 5 1912 He was a well known landscape painter (see E. B xxvii 978b) wrote the standard work on Velazquez and was the leading authority on Spanish art (K G Javae)

SWEDEN 1

Population —The census of 1910 showed an increase of 7 5% since 1900. The population on January 1 1912 was 5 561 799 (2 718 638 males and 2 843 161 females) distributed as follows. Norrland (Northern Division) 953 582. Svealand (Central Division), 1 170 795. Stockholm district (Lán) 234 9/3. Stockholm Citi, 346 599. Gotaland (Southern Division) 2 855 850. There has been a marked increase in the population of the Northern Division since 1970, a result of the development of the mineral (iron ore) resources in the northernmost districts, and also of new railway and waterworks construction. In Stockholm the growth of population is still rapid but not as rapid as that before 1900. This is due to the exodus to new suburban residential districts, among which are Lidingon Djursholm Saltsjobaden Sundbyberg etc. These outlying districts are not yet incorporated, and the growth of Stockholm must not, therefore be gauged by the statistics of the city alone but also by those of Stockholm district, the inhabitants of which increased from 172,850 in 1900 to 234,973

The excess of births over deaths in 1010 was 10.462 per thousand. The birth rate for the same 1 ear was 24 466 per thousand. The chief towns with a population exceeding 20 000 inhabitants are Stockholm (346 599), Gothenburg (170 606) Malmo (89,719), Norrköping (46 629), Gesle (35,719), Helsingborg (33 225), Orebro (31,066), Eskilstuna (28,485) Karlskrona (27 496), Jonkoping (27,226), Upsala (26,586), Linköping (23,021), Borås (21,997), Lund (20 340)

Emigration during 1910 showed an increase—probably a result of the national strike in 1909. The figures published for 1906—10 are (1906) 24 704 (1907) 22,978 (1908) 12 499, (1909) 21,992, (1910) 27,816. The United States received the largest contingent, but Denmark, Norway and Canada also received considerable numbers. Swedes resident abroad number between 2,120,000 and 2,245,000, of whom no less than 1,500,000.

1See E B xxvi 188 et seq

are in America, and 370,000 in Finland / Immigrants to Sweden in 1910 numbered Strain which habourers for agreealture and the mining and manufacturing industries.

Agriculture—Of the total land area 5.5% is meadow land 50.85% forest land 36.0% improductive land and 8.75% cultivated land. The cultivated land comprises 3,635,534 lanktar (about 8.992,996 acres). The rather large percentage of unproductive land includes mountains, marshes and bags, but the last-named are being reclaimed as a result of the work carried on by the Swedish Moss Culture Society, of Jönköping (founded 1886). About 47.6% of the cultivated land is under cereals, chiefly oats and rye 34% fodder, 5.7% root crops (about three-quarters potatoes and one quarter sugar beet). I 3% garden and other produce, and II.4% fallow. A considerable quantity of fresh fruit is imported into Sweden, but lately a revival of fruit growing has taken place and experiments in fruit export have but lately a revival of fruit growing has taken place and experiments in fruit export have even been made. A society for the promotion of fruit growing (Svenska Pomologiska Föreningen Atvidaberg) has established a Swedish fruit brand on the same basis as the Swedish Rane' butter brand To facilitate the gathering and exportation of cranberries

the bulk of which go to Germany the interests are being concentrated.

On an average there are 104 horses per thousand inhabitants and 495 cattle. The average of sheep and pigs is 230 and 155 per thousand inhabitants respectively production is about 2 852 million kilogrammes per annum equal to 1 891 kilogrammes per cow or 549 kilogrammes per head of population. The dairy industry is rapidly developing and the export of butter, and recently case in is steadily growing. Sweden is again taking a high place in the manufacture of dairy machinery as several practical milking machines which have won praise all over the world have been placed on the market. Pig breeding was taken up during 1910–11 on a larger scale than hitherto and the bacon export is becom

ing important

A law was enacted in 1909 for the protection of natural monuments and the creation of national parks. Extensive areas mostly in the northern provinces of Sweden (e g the neighbourhoods of the great fall Stora Sjofallet the Sarjek Mountains and the tourist station Abisko) have been proclaimed national parks under the supervision of the Royal

Academy of Science Hunting fishing building etc are generally prohibited there

Industries and Manufactures —In a country where forests cover half the area it is only natural that the sawmill industry should be the most important. Sawn and planed timber still heads the export list although the output is slowly decreasing giving way to the more lucrative wood pulp industry. The erection of new pulp mills both for mechanical and chemical (sulphate and sulphite) pulp continues and the output is now considerable. Until recent years the power of the waterfalls which abound in Sweden was not harnessed except for water wheels and small factories. The power obtainable from the waterfalls amounts to between three and four million horse power but only 100 000 horse power is at present utilized. However the falls are being developed and by means of water turbines and electric power stations and a network of electric cables cheap power is supplied for many in dustrial undertakings. A remarkable instance of the utilization of water power is to be found at Trollhattan, where the famous falls drive many new and important works

The total output of manufactures from 11 435 factories and mills not including mines

and iron works for 1910 aggregated 488 087 000

Mining — The following figures relate to 1911 Mining—The following figures relate to 1911 The total production of iron ore from 278 mines amounted to 6 150 718 metric tons, the largest output on record The figures for 1910 were 5 549,987 tons which were again an increase of 42 90% on the figures for 1900 The average value of the iron ore shows an appreciation of 62% The total number employed in the iron ore industry was 10 461 Of other ores—chiefly zinc but also silver copper and lead—45 884 metric tons were obtained from 30 mines. The production of zinc at the new electric simelting works at Trollhattan is of special interest and 2 123,641 kilogrammes valued at 1 106 958 kipnor were produced by this novel process.

Commerce—Exports in 1910 reached £32 574,900 and in 1911 aggregated £36 428 600. The values of the principal exports and imports for 1910 were. Timber £9 901 168 wood purp £3 993 482 iron and steel £3 795 162 butter £2,425 956 iron ore £2 369 521 paper and cardboard £1 770,753 machinery and implements, £2,209 642 matches £651 309. Of the total exports Great Britain takes about 32% and Germany about 21%. Imports for 1910 were valued at £36 902,900, and for 1911 £38 241 800. The value of principal imports in 1910 was Coal and coke, £3 367 924 grain and flour £3 020 367 coffee £1 657,795 tissues £2 093,999 metals £3 665 313 machinery £1 433,859 wool and yarn, £1,250 652 oil cakes £976 838 cotton yarn and thread £1,781,349 artificial fertilizers, £828,591; India rubber £552 558

Of the imports, Germany sends about 35½, and Great Britain 25%. The total production of iron ore from

Of the imports, Germany sends about 351%, and Great Britain 25%.

Figures — In the 1913 budget revenue and expenditure were estimated at £14 511 500 as against £14 131 700 in the 1912 budget. The principal sources of income are customs income and other taxes sugar and spirit duties and railways. The expenditure on the army and navy aggregates £4347434 and the other important item is education. The national debt in 1911 was £33,672 009, as against £29,837 024 in 1910. By the end

of 1911 a sum of 132 611,111 had been sunk in the railways, chiefly obtained by loans Thus about 96 % of the national debt money has been utilised for railways

Thus about 95 % of the national dest money has been utilised for remaining.

Communications — The government owns 2 836 miles of the radicays, and 5 903 miles belong to private companies. The new inland line. Ostersund (Jemiland) to Porms (Lapland) is being pushed forward and the first section, Ostersund to Ström. (Angermanland) is finished, as well as the last section Gellivara to Porjus where large water-power works are being erected. The second section from Ström northward has been started towards the Another important link in the chain of radways has been completed. Angerman river viz the Boden-Morjary-Lapptrask, which will be extended to Haparanda on the border of Finland A connecting link between the inland line and the dentral line has been decided upon viz the Sveg Ostersund section. An important project to connect the ports along the Gulf of Bothnia with an East Coast line, from Geffe up to Hernosand, is considered to be financially guaranteed during 1913 When these lines are completed many lovely parts of northern Sweden will be accessible to the tourist. Even now the Lapland express carries in creasing numbers of travellers to the Lapland rivers and lakes and the Abisko tourist station Work on the electrification of the Liruna to Riksgransen (Norwegian frontier) has begun

The power will be obtained from the Porjus electric power station.

The work of deepening and widening the Trollhattan canal has begun and it is estimated that it will be concluded in 1915. The depth will be four metres

The Tisnare canal extending in all about 15 miles and linking together the lakes along the border between Ostergotland and Sodermanland counties with Lake Tisnaren, was opened in September 1912 A new canal from Nykoping Harbour to the lakes in the country of Sodermanland has been in course of construction during the last few years

The government purchased to five metres. The harbours of Stock holm and Gothenburg have been extended and further developments have been decided Several new harbours for fishing fleets are in course of construction along the West

A new dry dock at Malmo is nearly completed Coast

As regards telegraphic communication a Swedish syndicate has applied to the govern ment for a concession to erect a Marconi wireless station in southern Sweden, chiefly intended for communication with a station in Great Britain and transmission thence to America The authorities however do not favour the granting of a concession to any specific company but prefer to make the best possible arrangements for wireless with other countries

Constitution Government and Administration — The parliament (Riksdag) consists of two chambers The electoral reform of 1909 has considerably widened the franchise and introduced a system of proportional representation. Under it the members of the first chamber are now elected for six years, a sixth part of the house being renewed every The census of eligibility is lowered to either real property to the value of 50 000 kronor (£2,50) or an annual income of 3,000 kronor (£165) on which taxes have been The members receive the same salary as members of the second chamber, 1,200 kronor (£66) per annum For the elections to the second chamber the country is divided into 56 great electoral districts with 3 to 7 representatives each all elected proportionally The former distinction between towns and rural constituencies is abol The three greater towns Stockholm Gothenburg and Malmo, however form separate constituencies, and five other towns are aggregated in two constituencies for the rest towns and rural constituencies poll together Eligibility for the lower house necessitates an age of at least 24 years and residence within the constituency Man hood suffrage is introduced for these elections, fulfilment of military service however, and payment of rates and taxes for the last three years before the election are required The whole house is, as formerly, renewed every third year Even the standing com mittees of the Riksdag common to both chambers and with the same number of mem bers from each, are elected by proportional representation A Supreme Administrative Court (Regeringsratten) has been established (1900) with a membership of seven justices Three members of the Supreme Court of Justice (Högsia Domstolen) (regeringsråd) and one member of the Supreme Administrative Court form (since 1910) a separate consultative body (Lagradet) for giving opinions upon all proposed changes of law The number of justices in the Supreme Court has been increased from 18 to 24 Jurisdiction in disputed parliamentary elections belongs to the Supreme Administrative Court

Defence - A Royal Commission under the personal direction of the Premier and of the innisters of land defence naval defence and finance is preparing a drastic reform of the whole defence system

The reservists system (landsstorm) has been reorganised of late and was tested by a partial mobilisation during the autumn of 1912

The navy includes 12 ironclads of 3 100 to 4,270 tons

The building of a larger coast-

TE42 SWEDEN

defeace cruiser (of 6 800 tons) of the "F type of warship was decided upon by parliament in 1911 when the Conservatives were in power but the new Liberal government indicated shortly after taking office, that they desired to postpone the building of the ship. That this team of events was not to the liking of the general public was demonstrated in a striking and practical manner by the starting of a private subscription which in less than three months realised 4006 625. This sum was tendered to, and accepted by the government and the building of the warship at a Swedish yard was sanctioned by the Riksdag in May 1912.

Education—The public schools for boys have been reorganised and are now divided into two kinds hogre allmanns librowerk (higher public schools) and realishelor (hower public schools, board schools). The latter have only six classes and lead up to examinations (realishelo-examen) adapted to the needs of a commercial and industrial life etc. These six classes are common to the two kinds of schools and then come the higher public schools viz. four other classes (gymnasium) with classical and scientific studies both leading up to student-examen (matriculation examination), an examination of admission to the universities and to several other higher special schools. In certain small towns the practical schools or lower public schools are accessible to children of both sexes and are then named boy and girl schools (samskolor). Generally however the higher and middle schools for girls are private but they often enjoy considerable state and and are then submitted to special state inspection. In 1909 the number of higher public schools was 38 and the practical schools. 77 The school terms comprise 38 weeks in the year. The primary education in the board schools (folksholor) is rapidly developing. The number of these schools in 1909 was 13 146 with 5 802 male and 13 549 female teachers. Of the children of school age. (7 to 14 years) 800 684 (or 98 2% of the whole number) have received instruction these include 755 197 in the board schools, 14 380 in higher public schools 19 566 in private schools and 8 004 in their homes. Special instruction in gardening and arboriculture was given in 1909 to 96 321 children the cost of 784 courses in cookery and domestic economy was defrayed by the state. Instruction in stord (sloy d manual occupations) was given to 95 070 boys and 170 689 girls in the board schools which represents an increase since 1894 of 114% for boys and 100% for girls.

Religion — The Swedish Lutheran Church comprising more than 99% of the total population is provisionally divided into 13 diocesses which however will soon be reduced to 12. Among the dissenters the Methodists and Baptists are most numerous the Roman Catholics only number about 2600 and the Jews about 5000. Vigorous measures are taken against the Mormon propaganda carried on by American preachers. Interest in religion and the church is increasing remarkably and has evoked a strong feeling for the careful preservation of old church buildings and for the artistic adornment of the churches

Christian social activity is also increasing especially among university students

Poor Law and Charities — The burden of maintaining the poor is thrown on the parishes

Poor Law and Charities —The burden of maintaining the poor is thrown on the parishes and is therefore rather unequally distributed but a Royal Commission is preparing schemes for a more uniform and practical system of poor rehef. In 1910 rehef was given to 236 918 persons (90 912 in the towns and 146 006 in rural districts) 1 e to 4 29% of the total population. The proportion of paupers varies in the districts between 14.5% and 0% (in 8 communes). The number of inhabitants in workhouses alms-houses or children a homes is 47 204 all receivers of rehef (19 9% of the whole number). 28 494 (12 1%) were boarded out in private houses and outdoor rehef ("home assistance") was given to 144 892 (61 2°). The number of private charitable institutions is great and steadily increasing. A comprehensive system of sick rehef funds has recently been organised by State legislation and proposals for an Old Are Pension Scheme are being prepared by the government.

proposals for an Old Age Pension Scheme are being prepared by the government Law Justice and Crime—The latest criminal statistics comprise the five year period 1901–1905. The number of convicted persons for gross crimes was then yearly on an average 2,589 (4 9 per 10 000 inhabitants) for lesser crimes 10 345 (19 8 per 10 000 inhabitants) and for misdemeanour 45,211 (86.7 per 10 000 inhabitants). No less than 83 8° of the misdemeanour cases in 1905 consisted of drinkenness and disorderly conduct. The number of prisoners is slowly but steadily, decreasing a daily average in the period 1901–1905 was 2 954 (2 991 in the period 1896–1900—3 842 in 1886–90—4 981 in the period 1871–75). Capital punishment is not yet abolished though the second chamber has more than once passed resolutions in favour of such a reform. Executions however are very rare none took place in the period 1901–05, and since them very few have occurred

Recent Politics — After the separation from Norway the Lundeberg Coalition Ministry was succeeded in October 1905 by a Liberal Ministry formed by Mr Karl Staaff (b 1860) His proposals for reform of the franchise being rejected by the Upper House, Mr Staaff resigned and a new ministry was formed in May 1906 by the Conservative leader, Admiral Lindman (b 1862) His principal task was to find a solution of the Suffrage Question which both Chambers could accept, and after various compromises his Reform Bill, establishing Proportional Representation for both Chambers, Umiversal Manhood Suffrage for the Second Chamber, and Payment of Members of the

First Chamber, took final shape in May 1907 and was accepted by both Chambers Under the Constitution, the Bill could only become law if ratified by the Riksdag after new elections to the Second Chamber, but it was finally passed in 1909, after the elections of 1908

The Lindman Ministry was especially eager for practical economic legislation and during its term of office the Riksdag passed a series of bills for construction of new rail ways state purchase of waterfalls erection of state-owned hydro-electric power stations etc. The State took over half the shares of the great Kirtina-Gellivara and other mining concerns in Lapland. A thorough going reform of the income and capital taxation was effected in 1910 and industrial development was advanced in various ways.

In 1909 a great lockout was followed by a general strike in August, affecting 285 000 workmen but the railwaymen and the agricultural labourers did not join, and in September most of the strikers were back at work the great conflict being finally ended in November Thanks to the orderly conduct of the workingmen and the firm meas ures of the Government order was admirably preserved during the whole conflict

The General Election of September 1911 the first since the introduction of Man hood Suffrage and Proportional Representation was keenly contested and resulted in great successes for the Liberals and Social Democrats (102 Liberals 64 Conservatives 64 Social Democrats) Mr Lindman then resigned, Mr Staaff the Liberal leader, again becoming Premier (Oct 7) with Count Albert Ehrensvárd (previously Swedish Minister at Washington) as Foreign Minister Wishing to gain a sure working majority at the joint sittings of both Chambers on Budget questions on which the Houses were at variance Mr Staaff induced the King to dissolve the First Chamber where the Conservatives had always been in an overwhelming majority. The result of the new elections (Nov) was a considerable weakening of the Conservative majority in the Upper House (84 Conservatives 51 Liberals, 14 Social Democrats)

The chief questions of political interest during the last two years have been the Defence Question and several matters of social legislation. A great scheme of National Insurance and Old Age Pensions is being prepared, the sick relief fund law has been reformed and several bills for improving the Factory Laws have been passed. The Women's Suffrage Question has been keenly discussed on the platform and in the Riksdag bills purporting to grant the suffrage to women on the same terms as to men have more than once passed the Second Chamber but have then been invariably rejected by the Upper House. The creation of Small Holdings is generally recognised to be of great national importance but opinions differ widely as to the best system of ten ure and violent dissensions have arisen in regard to the respective rights of the State on the one hand and the private occupiers or owners on the other to utilise the waterfalls for generating electric power for industrial enterprises

Obituary —The deaths may be noted of —Rear Admiral Theodor Sandstrom (b. 1853 d. Feb. 6. 1911). Alfred Elis Tornebohm (b. 1838 d. Ap. 21. 1911). the geologist (see E. B. xix 801 b. xiv 810 a.) Johan Severin Svendsen (b. 1840 d. June 14. 1911). the famous composer (see E. B. xxvi. 175). Christian Lundeberg (b. 1842 d. Nov. 11. 1911). the statesman who as premier conducted the negotiations for the separation from Norway in 1905 and August Strindberg (b. 1849 d. May 14. 1912). the famous author (see E. B. xxv. 1038).

SWITZERLAND 1

Population — The provisional results of the census taken on December 1, 1910 snow that the resident population of Switzerland on that day was 3,741 971 as against 3 315,443 in 1900, an increase of 426 528. The details of the 22 Cantons are as follows: Aargau, 229,850, Appenzell, 72,354, Basel, 211,787, Bern 642 744, Fribourg, 139 200, Gall St., 301,141, Geneva, 154,159 Glarus, 33 211 Graubinden, 118,262, Lacerne 166 782, Neuchâtel, 132,184 Schaffhausen 45 043, Schwyz 58,347, Soleure, 116 728, Thurgau 134 055, Ticino, 158 556 Unterwalden 30 914 Uri, 22,055 Valais, 129,579, Vaud 315,428, Zug, 28,013, and Zurich, 500,679. In the rural districts the 1See E B xxvi 239 et seg

rate of situance as regards the chief towns is stationary while in the purely agricultural or pasteral communes a considerable decrease is to be noted But the larger towns have all very much more numerous populations than in 1900 So Zürich has advanced to 188 930 (from 150,703) and hopes soon to reach the figure 200 000 Basel to 135,163 (from 109 161), Geneva to 125,550 (from 104,796), Bern to 85,095 (from 64,227) and Lausanne to 64,142 (from 46,732) No other Swiss town has more than 40,000 inhabitants, though "Great St Gall" (when the fusion of St Gall with the neighbour ing communes of Tablat and Straubenzell is effected) will (on the results of 1910) number 75,105 souls, and so rank as the 5th most populous town in Switzerland

The most striking feature of the census of 1910 however, is the great increase in the number of the non-Swiss residents in Switzerland, which has risen to 565,296 or about 15 per cent (as against 383 424 or 12 per cent in 1900) The influx is all but wholly made up of members of the working class from Germany, France and Italy seeking better wages and freedom from compulsory military service. Naturally it is the great towns, and especially those near the frontier which contain the vast majority of these foreigners, though many Italian navvies and masons are employed on the construction of new lines of railway The matter has caused much discussion in Switzerland, for it is of importance from the point of view of the Poor Law and of the Army But, quite apart from the various international treaties by which foreign powers have secured the rights of their subjects there are many objections to the compulsory naturalisation of these non Swiss, even though this be limited to children born in the country, but of foreign parentage. The chief objection perhaps is that as Swiss and Cantonal citizenship can only be obtained by previous admittance as a member of a commune the communes have the last word and in many cases are not desirous of increasing the number of those entitled to use the communal property (pastures, &c), and so ask prohibitory entrance fees Further even if the fees were made lower by law or if the poorer communes should charge lower fees so small a proportion of native-born Swiss inhabit their commune of birth (only 38) per cent in 1900, and probably not over 30 per cent now) that the connection of the new burgh ers with the communes of which they became members would be simply a paper bond though those communes might be put to heavy charges in case these new burghers came under the provisions of the Poor Law The same would be the case with the The creation of a new status of Swiss citizenship domicile of the newly naturalised (apart from Cantonal or Communal burghership) has been proposed but such a course would involve difficulties not only with the communes but with the cantons as well It has been found too, in practice, that the lowering of the entrance fees has not at tracted a great proportion of the foreigners resident in Switzerland many of whom are there for political reasons while many Swiss employers prefer to employ foreign workmen at lower wages (being not liable to be called out to do military service) rather than to have only Swiss workmen Such difficulties, however, are part of the price which Switzerland pays for its international position, which in itself is productive of great benefit

Agriculture.—On April 21 1911 a new census was taken of the cattle of all kinds in Switzerland, the number being 1.254.950 as against 1 497 904 in 1906. Every category has decreased in number save cows and bullocks which show a slight increase. This striking decrease is to be accounted for in part by the rise in the price of milk due to the preference of the peasants for producing that article (largely for export in a condensed form or as cheese) rather than for cattle breeding so that the native supply of meat does not keep pace with the rise in the population and the consequent greater demand. It is said indeed that the native meat supply is now but \$\frac{2}{2}\$ of the quantity demanded. But as the import of live cattle is lindered by the danger of bringling in infectious diseases, while Germany and France do not look with labour on the passage of live stock through their respective territories the import of dead medit has now greatly exceeded that of live stock. But here comes in a further difficulty the high figure of the import duties on dead meat. The situation has become so awkward that the Federal Covernment has had to consent to a (provisional) lowering of the duties so as to enable frozen meat from the Argentine to be brought in this being sold at a cheaper price naturally this policy does not approve itself to the peasants or butchers, but has become almost a necessity owing to the general rise in prices.

Commerce -The new Customs Tariff of 1906 resulted at first in a considerable unfavour able balance of trade followed by an increase in 1907, and a new decrease in 1908. But from 1909 onwards Switzerland has shared in the prosperity of international trade through out Europe In 1910 the value of her exports was about £47 832 000 and in 1911 about £50 280 000 while in 1910 her imports were about £69,800 000 and in 1911 about £72 812 000 so that the excess of imports rose from £2 288 000 in 1910 to £2.448 000 in 1911 Thi This was due to the value of the increased imports of meat oats and other food stuffs fall of £520 000 in the imports in 1911 from Great Britain was exactly balanced by an equivalent in exports thither. Great Britain was in 1911 the best customer of Switzerland next after Germany though behind Germany France Italy and Austria Hungary as

regards the value of the goods imported into Switzerland

regards the value of Finance — During 1962 to 1907 there was always a balance Finance — During 1962 to 1907 there was always a balance But 1908 and 1909 both showed deficits However in 1910 there was again a surplus of £221 000 (the receipts But in 1911 there was a expenditure of £6 453 000) amounting to £6 674 000 as against an expenditure of £6 453 000) But in 1911 there was again a deficit though only of some £10 000 the receipts being £7 838 000 as against an expenditure of £7 848 000 With the exception of about £500 000 annually the receipts of the Federal Treasury are derived from three main sources—Customs Duties Post Office Telegraph and Telephone But in these cases the Customs Duties alone show a constant great surplus, so that they form the backbone of Federal finance In 1908 these Customs Duties were £2 810 000 (a slight falling off on the yield of 1907), but in 1909 amounted to £2 970 000 in 1910 to £3 320 000 and in 1911 to £3 230 000 the budget estimate for 1912 was only £3 191 000 but for 1913 rose to £3 312 000 Swiss statesmen are rather uneasy at the fact that Federal finances depend so largely on a single source of revenue always uncertain and rendered still more uncertain by the approaching expiration of the tariff treaties. Besides the expenditure is always increasing especially for the Army (fi 690 000 in 1910 and fi 790 000 in 1911) the incessant demand for Federal subventions and the as yet unknown expenses of working the new Insurance Law In 1911 the funded debt of the Swiss Confederation was £4 686 000

In 1911 (Jan 1) the Swiss army numbered 211 567 men of whom 69 513 were in the Landwehr and 142 054 in the Auszug In 1910 27 487 young men presented themselves as recruits 19 460 of whom were passed the proportion (70 per cent) being the same as in 1909 and higher than was the case before the regulations of 1905 (1905 53 per cent, 1906

55 per cent 1907 62 per cent and 1908 67 per cent)

Politics —The triennial elections for the popularly elected house (the National rath or Conseil National) of the Swiss Parliament took place in the autumn of 1911 and resulted (as has always been the case since the Federal Constitution came into force in 1848) in giving an overwhelming majority to the Radicals. In consequence of the new census the number of members (one for every 20 000 or fraction over 10 000 of the population, native born or foreigners) was increased from 167 to 189 of these 114 are Radicals, 38 Conservatives, 16 Social Democrats, 14 Centre (Liberal Conserva tive) and 7 Socialists

Edward Muller of Bern (b 1848), colonel in the army was elected the new President of the Confederation on Dec 12, 1912, by 184 votes out of 196 and Arthur Hoffmann, of St Gall (b 1857), also a colonel, was elected Vice President Both are

Radicals in politics

In 1909-1912 there were two cases of a popular Vote or Referendum, though in neither case one affecting the Federal Constitution. In 1910 a proposal (Initiative) to introduce proportional representation into the elections for the Nationalizath was defeated though only by a majority of some 25,000 on a total poll of rather over 500 000 voters, while early in 1912 the Federal law as to insurance against sickness and accidents was accepted by a majority of some 46 900 votes on a poll of 528 000 Including 3 popular votes in 1908 (all affirmative) 2 being Amendments to the Constitu tion and I an Initiative prohibiting the manufacture or sale of absinthe, the statistics as to the Federal Referendum from 1874 to the end of 1912 stand at 20 as to Con statutional Amendments (14 accepted) 8 "Initiatives" (3 only accepted) and 31 as to Federal laws (12 accepted) - in all 59 polls of which 29 only were in the affirmative

Despite the check to proportional representation suffered through the defeat of the Federal Referendum in 1910, it was accepted for cantonal legislatures by Lucerne (1900) and St Gall (1911), though rejected in 1911 by Zurich. But a cantons have now adopted this plan (in 1891 Neuchâtel and Ticino, in 1892 Geneva, in 1894 Zug. in 1863: Soleare, in 1900 Schwyz in 1905 Basel-Stadt in 1909 Lucerne and in 1911 St. Gall); in general the Radicals oppose it and the Conservatives support it

The number of the members of the Federal Tribunal was raised in 1912 from 19 to sa, in view of the great morease of business expected on the coming into force (Jan 1, 1012) of the Federal Crvil Code It has also been proposed to increase that of the Federal Executive (Bundesrath or Conseil Fédéral) from 7 to 9 or more, and also to appoint a permanent head of the Political Department (practically a Minister of Foreign Affairs), but neither change has yet been adopted, both proposals are due to the increase of routine business which hinders departmental work, and to the fact that the President elected any given year may not be skilled in foreign affairs the other hand in 1911-12 the Federal Council was greatly altered as to its personnel, owing to the death of 4 and retirement of 1 of its members, so that 5 new members were elected in 1911-12, the two semors having been chosen in 1805 and 1902 respectively Three of the present members were born between 1845 and 1850 1 in 1857 2 in 1862 and 1868, and the jumor as recently as 1871 This jumor member (Motta of Ticino) is also interesting as he replaces the single Roman Catholic Conservative on the Council, one only having been elected from 1891 onwards, though between 1848 and 1891 no member of that shade of opinion was ever chosen Up to November 1912 43 Federal Councillors had been chosen since 1848, Vaud having had 8, Zurich 6 Bern and Neucha tél 4 each Zürich and Bern have had one continuously But the following 8 cantons have never had a representative on the Federal Council - Uri, Schwyz, Unterwalden. Fribourg, Valais, Schaffhausen Appenzell and Zug It is worthy of note that only one Federal Councillor has failed to be re-elected at the triennial election by the two houses of the Federal Legislature sitting in Congress — this was Challet Venel in 1873

Another scheme for relieving the Federal authorities is the creation of an Admin istrative Court which will decide administrative disputes without troubling the higher powers

By a decree of the Federal Council (June 23 1911) the official name of the great Federal Polytechnic School (at Zitrich) is to be henceforth Federal Technical University — this is to avoid the ordinary sense of polytechnic in Germany, where it is used of technical intermediate schools

The chief event in the international relations of Switzerland in 1909-1012 was the so-called "Gotthard Convention." The railway was purchased by the Swiss Confederation in virtue of the popular vote in 1808 but this purchase only took effect on May 1 1009 The two great Powers which granted large subventions towards its construction, Germany and Italy maintained that this purchase could not be effected without their consent, which would only be given on certain conditions to which the Swiss statesmen consented by a Convention dated October 13, 1909 and to come into force on May 1 1910 As soon as the text was made known it was seen that the Swiss negotiators had granted very large concessions to the two Powers named espe cially the supulation that, in case of the transit of persons and goods through Switzer land from or to either of the two countries named, Switzerland was bound to allow to the German and Italian railway lines all advantages or reductions which should at any time be given to the Swiss State Railways (arts 7-8) the fixing of the Transit dues without possibility of alteration (art 11) and the special reduction in favour of Germany and Italy of the extra dues on the mountain bits of the St Gotthard line (art. rs). The last named concessions mean a heavy financial less to the Swiss State Railways, while the other provisions give the two Powers a sort of control over the Swiss State Railways, and so seem to mirringe the sovereignty of Switzerland Convention has been ratified by the German Diet (March 1, 1910) and by the Italian Parliament (June 1912) but was still unadopted by the Swiss Federal Assembly in November 1012 A strong agitation has taken place in Switzerland against it, a peti tion signed by 116,000 citizens being presented (May 1, 1911) to the Federal Assembly

The most important event in the domestic instory of Switzerland during 1909-1912 was the acceptance (Feb 4, 1912), by popular vote, of the Federal law establishment.

histing insurance against sickness and accidents it was carried by a majority of 46,000 only on a poll of 528,000 in the face of strong resistance on the part of the foreign insurance companies who saw their business being taken away

The following is an outline of some of its chief provisions: (1) only certain trades and occupations are included under its compulsory provisions railway and steamer employes factory operatives and artisans or mechanics. Other classes of workmen or workwomen (such as servants hotel employes and agricultural labourers) are not subject to these compulsory provisions for they are protected by another law by which the employer is respon sible for his employes save in the case when he prefers to insure them himself (2) The Side for his employes save in the case which he prefers to histic their minisch. (4) the Confederation is responsible for insurance against accidents only. In the case of insurance against suckness the matter is in the hands of the existing Friendly Societies if they bring their statutes into accordance with this new law. But any canton or commune can enact that insurance against sickness shall be compulsory within its jurisdiction. (3) In the case of insurance against sickness the scale of contributions payable by the Confederation to the Friendly Societies is as follows for each person insured (whether compulsorily or of his free will whether male or female whether a native born Swiss or a foreigner) children up to and including 14 years of age and also men 3½ frs per annum and women (including childhed benefits) 4 frs per annum. If however a Friendly Society makes a larger con tribution than its statutes require the Confederation can (not must) also make a larger contributory grant In the special case of dwelkers in mountain regions an extra grant up to 7 frs a head is made over and above the sums given above. In the case of insurance against accidents the law distinguishes between accidents arising in the course of the work man's employment (then the Confederation pays \(\frac{1}{2} \) and the employer \(\frac{1}{2} \)) or not in the course of his employ ment (here the workman must himself pay the premiums but the Confederation contributes \(\frac{1}{2} \) of the amount) (4) The benefits in the case of insurance against sickness are payment of the doctors and apothecary's fees (the insured having the right of free choice of both doctor and apothecary') as well as a sick allowance of at least I fr a day Lying in women who suckle their own babies during 10 weeks have a right to a grant of at least 20 frs but no payment is made in respect to sick children under the age of 14 In the case of insurance against accidents widows and orphans on the death of the bread winner by accident receive a pension up to 60 per cent of the amount of the wages formerly received by him in addition to a grant of 40 frs for funeral expenses. If the injured person is totally incapacitated the grant amounts to from 70 to 100 per cent of the wages formerly received if only temporarily incapacitated the ordinary wages are given as from the third day after the accident. The trades are graded according to their dangerous character and in this class of trade the premiums are higher
All native Swiss workmen are entitled to these benefits and also foreign workmen residing

All native Swiss workmen are entitled to these benefits and also foreign workmen residing in Switzerland provided their country grants Swiss residents there similar benefits (if not the pensions are paid on a reduced scale and a lump sum given on leaving Switzerland). The date at which this law comes into force was not definitively settled as much previous preparatory work has to be done. But it is supposed that the sickness part would be put into operation in the course of 1913 and the accident part probably in 1914.

Surss Canions — Mention has been made above of some important events in several cantons and with an allusion to the great strike in the town of Zurich (summer of 1912) where the Socialists are acquiring more and more power, we may limit our attention to two other great cantons

Basel—In 1910 the separation of State and Church was here carried out. The number of the Romanists rose from about 5000 in 1850 to some 41 000 in 1910 thus forming about 1901 the population of the town. But they were unable to obtain favourable terms from the State the pretext being that their regulations did not allow them to permit their priests to be elected by their parishioners and that they could not submit their internal regulations for the approval of the State. The Old Catholics (4 500 in 1910) accepted these conditions and so obtained a church in full ownership a lump sum of 46 000 and recognition (like the Protestants) as a public corporation. The Romanists and the Jews are now only private corporations in Basel the former received the provisional right of user of a church and a lump sum of 48 000 while the Jews (2397 in 1910) the richest of all these religious communities were awarded the derisory lump sum of £600.

Geneva—In 1910 the electors of the now disestablished Protestant Church decided that women should have a vote in all ecclesiastical matters. In the same year a new Art and History Museum was opened wherein many scattered collections have been brought together. But the chief event in recent Genevese history relates to its main (or Cornavin) railway station. This like the line from the town to the French frontier belonged to the French Paris Lyons and Mediterranean Railway Company, an obviously anomalous state of things. The result of many deliberations was a final arrangement on March 23, 1912—it was approved by the Federal Assembly in July 1912—as between the three parties the Cornavin railway station with the line to the French frontier was ceded (against a considerable

sum of maney) by the French Company to the canton of Geneva, which passed them over on the same conditions to the Swiss State Railways. This arrangement was to take effect on January 1 1913 but the French Railway Company (against payment) was to have the right of joint user of the Cornavin station and to pay half the expenses of its upkeep. On the other hand the scheme for the connecting ('raccordement) of the Cornavin station with the Eaux Vives station (for P.L.M. lines to Chamonix and Savoy). 61 miles distant but involving bridges over the Rhone and the Arve, was to be carried out at the joint expense (estimated at nearly 1 million sterling) of the Confederation (\frac{1}{3}) and of the canton of Geneva According to the Federal cessus of 1910, the sown of Geneva numbered 57 519 foreigners

among its inhabitants while the native-born Genevese were only 3 631 more than the Swiss

from other cantons

Bibliography 1909-1912 The 4th Vol (1648-1798) of J Dierauer's authoritative Geschichte der schweiz. Eidgenossenschaft appeared at Gotha in 1912 thus worthily completing this great work. In 1910 W Oechsli published at Zurich a new edition of his excellent Quellenbuch W Raustein's Die schweiz Halbhantone ihre Entstehung und Rechtsstellung (Zurich 1912) is important for the earlier constitutional history of Switzerland as is J Schollenberger's Die schweizerische Eidgenossenschaft von 1874 bis auf die Gegenwart (Berlin 1910) a contaniation of his Die Schweiz seit 1848 (Berlin 1908) for later times which are also illustrated in J Winiger's life of Josef Zemp 1834-1908 (Lucerne, 1910) Very early Swiss history is represented by A Schenk, La Suisse Prehistorique (Lausanne 1912) by P E Martin Etudes critiques sur la Suisse à l'epoque Merovingienne 554-715 (Geneva 1910) and by M Besson L'Art barbare dans l'ancien diocese de Lausanne (Lausanne 1909) A popularly written Swiss history is L Suter's Schweizer Geschichte für Schule und Haus (Einstedeln 1912)

Obituary — Jean Henri Dunant a well known writer (b 1828) died on the 30th of October 1910 his book Un Souvent de Solferino (1862) led to the Geneva convention of 1864 and the founding of the Red Cross Society —Arthur de Claparede (b 1852) who died on December 13 1911 was a leading Swiss geographer who since 1887 had been several times president of the Geographical Society of Geneva, and also presided over the International Congress of Geography there —Francois Alphonse Forel the physician and physiographer (b 1841) died at Morges, on the 7th of August 1912 he was the inventor of Forel's xanthometer used in oceanography (see E B xix 980) and (with Prof Rossi) of a seismic scale (see E B viii 818) for measuring earthquake shocks he wrote an authoritative work on the Lake of Geneva (see E B xi 593) and also on limnology generally (Handbuch der Seenkunde) our present knowledge of seiches being almost wholly due to him

The Alps 1

A number of new mountain railways have been opened recently in the Alps Some lead to the summits of peaks e.g. the Niesen 7,763 ft. (Group 6), opened in 1910, and the Monte Mottarone 4 892 ft (Group 7) near Stresa, opened in 1911 as was also that up the Monte Bre 3 of 1ft. (Group 6) near Lugano Some lines lead over moun tain passes, e.g. the Bernina Pass, 7 645 ft. (Group 10), opened in instalments between 1908 and 1910 and the Jaufen Pass, 6,870 ft (Group 15), opened in 1911, but that (opened 1912) up to the Jungfraupoch 11 385 ft (Group 6), leads only on the Bernese side up to the summit of the pass where is now the loftiest railway station in the Alps The electric line over the Seefeld or Scharnitz Pass (3,874 ft., Group 13) from Innsbruck by Zirl and Partenkirchen to Reutte was also opened in 1912—it connects the Tirol with Bavaria. It was expected that the Lotschberg line would be opened in 1913 in all its length from Fruigen to Brieg but it passes below the Lotschen Pass, 8,842 ft. (Group 6), The piercing of the main tunnel was completed on March 31, 1911

Among carriage roads below passes that of the Col du Parpaillon, 9 193 ft (Group 3), built 1891-1901 should be mentioned, but is only a military road from La Condamine, on the Col de l Argentière road, to Embrun, and is not well kept up. This road is the second highest in the Alps (next after that over the Stelvio, 9 055 ft.), the tunnel is at a height of 8,554 ft. (the pass is 9,193 ft.), while the tunnel beneath the Col du Calibier, 8,721 ft. (Group 3) is pierced at an elevation of 8,366 ft. only

It is proposed to instal two wireless telegraph stations on two Alpine summits—the Santis (8,216 ft, Group 3) and the Zugspitze (9,738 ft, Group 13), on the water shed between Tirol and Bavatis. (W A B COOLIDGE)

¹ See E. B 1 737 4 seq.

TURKEY 1

The population of the Turkish Empire was estimated in 1971 at 25,926,000. In spite of the difficulties and the unrest following the revolution of 1908, considerable progress was made up to 1912 in the economic development of the country. The custom house returns showed that Turkey was buying more all round the railways showed increased earnings labour was in increased demand and at higher wages. Sir Adam Block, the representative of the British and Dutch bondholders on the Council of the Public Debt Administration, in his report for 1911 said. "What the future may bring no one at this moment can venture to predict, but Turkey must be given the credit of having during the last three years made a serious and determined effort to remodel and reorganize the finances on a sound if still imperfect basis."

In introducing before parliament in July 1912 the budget for 1912-13 the minister of finance showed that, although the expenditure had increased, the revenue had also im proved. He also observed that the customs revenue had not been affected by the war with Italy which at that time had lasted for 10 months. He announced that he would shortly introduce a bill for the regulation of the Floating Debt, and another for the creation of a state monopoly on tobacco. As the chamber was dissolved soon after wards these bills as well as the projected monetary reform remained in abeyance. Other important bills before the chamber which had to be postponed were a new commercial code, and an amended law on real property.

Finance — Expenditure was estimated in 1910–11 at £28 945 000 and in 1911–12 at £31 784 000 revenue at £22 820 000 in 1910–11 and at £24 980 000 in 1911–12 the budget showing deficits of £6 125 000 in 1910–11 and £6 804 000 in 1911–12. For 1910–11 the revenue exceeded the estimate by about £1 800 000 For 1911–12 in extraordinary expenditure for the Army and for public works amounting to £2 365 000 had to be added to the deficit. For 1911–12 the principal heads of expenditure were Public Debt £10 379 000 War £7 895 000 Gendarmene £1 \$25 000 Marine £1 476 000 Interior £1 189 000 Finance £2 505 000 and Public Works and Commerce £1 363 000 The principal sources of revenue were Tithes £6 040 000 Sheep Tax £1 717 000 Customs Dues £4 123 000 Land Tax £2 340 000 Salt Monopoly £1 026 000 Annuity from Tobacco Regie £910 000 and Military Exemption Tax £895 000

The outstanding debt on September 14 1911 amounted to £111 655 674 There were also authorized loans to the amount of £10 526 400 which had not been issued up to the end of 1911 A reorganization of the Turkish custom house was undertaken by Sir Richard Crawford in January 1909 The customs receipts for 1911-12 had increased by 26 per cent since 1908 The Turkish Government obtained the consent of the British Government for a renewal of the loan of Sir Richard Crawford's services for a further term of two years beginning January 1912 and created for him the post of financial and economical adviser of

the empire in addition to his post at the custom house

Army—The reorganisation of the Turkish army during these years was actively carried on but the new recruiting law by which the obligation of military service was extended to non Mahommedans encountered many difficulties. Many of the non Mahommedans preferred to pay the exemption tax while a great number of young men emigrated in order to avoid the law altogether. The army consisted of the Nizam or active army the 1st and 2d class Redifs and the Mustahfiz or Landsturm service being in the Nizam or 3 years (20-22) with the colours and 6 in the Irbital (reserve), then 9 years in the Redif and 2 in the Mustahfiz The Nizam was increased to 14 army corps and 6 independent divisions. With the exception 4 army corps with two divisions all the others were organized in three divisions, a Turkish division being composed of 7 battalions in peace and of 10 in war time. The empire was divided into 7 military districts or inspections of unequal size and importance. The headquarters of these districts and the number of army corps each district contains were as follows. Constantinople 1 Adrianople 3, Salonika 3 Erzingan 3 Damascus 1 Bagdad 2 and Sana 1. The independent divisions were one in Tripoli (Africa) one in the Hejaz and three in the district of Salonika. An addition to the cavalry was formed by the organisation of the light cavalry called the Hamideh recruited from the Kurds in Asia Minor The object of this addition was to ntilise the valuable military material supplied by these tribes. It was proposed to create 65 regiments of this light cavalry each regiment composed as far as possible of men of the same tribe. The command of each regiment was entrusted to an officer of the regular army assisted by a chief of the tribe and some of the other officers were also natives. Up to October 1912 24 such regiments had been created. It was proposed to from vol-

¹ See E B xxvii 426 et seq

TURKEM 1350

unteers who had completed their military service. These guards were to be located along the European frontiers of the empire

The artillery was reorganised, with 350 batteries of field artillery and 152 companies of fortress artillery. The greater part of the malantry was armed with Mauser magazine rifles model 1890 and the artillery was provided with quick firing Krupp guns. The war minister alone was made responsible in Turkey for the administration and efficiency of the army. The master-general of the ordinance, who was responsible for war material and who was fermerly independent was put under the war minister. A General Staff department was created and a Military Council established.

The approximate peace effective of the army in 1911-12 was about 230 000 men. The Nizam was strength was reckoned at 600 000. With the addition of the Redifs and all other

Alarge force of gendarmerie was also employed, amounting to about 42 000 men 16 000 mounted 11 000 being stationed in European Turkey. The gendarmerie in the European provinces was provided with several foreign officers—British French Italian etc.—whose services were loaned to Turkey by the respective Governments.

Navy—The reorganisation of the navy was supervised by two British admirals assisted by a staff of British officers—In October 1912 it consisted of 7 battleships 4 being small and obsolete and three of 10,000 tons displacement each (two of the latter were formerly German battleships launched in 1891 and bought by Turkey in 1910) together with 2 cruisers of 3 800 tons displacement each 8 destroyers 14 torpedo boats 15 gunboats and 2 submarines. There were building 2 Dreadnoughts of 23 000 tons, equipped with the latest armament one cruiser nine destroyers, and a number of submarines. The personnel of the navy was given at about 30 000 men. Naval bases were projected at Salonica and Smyrna and it was also intended to build a naval barbour at Constantinole. intended to build a naval harbour at Constantinople

Minerals —The Turkish Empire is rich in minerals and since 1908 a great deal of prospecting has taken place many claims being filed with the ministry of mines but little work

has actually been done. The value of the total production of the mines amounted in 1908 to £1 001 000 and the value of the salt extracted amounted to £1 229 000

Agriculture — Approximate yields in cwts of cereals in 1911. Wheat 30-34 000 000. Bar ley 22-24 000 000. Maize 20-22 000 000. Rye 10-12 000 000. Jats 9-11 000 000. In 1911 the

roduction of silk cocoons amounted to 3,431 000 lbs and that of opium to 2500 boxes
Tobacco is an important crop and 69 822 834 lbs. were exported in 1910

Radways — The original concession granted to the Bagdad Railway Company in 1903
was modified by a series of agreements concluded with the Turkish government in March In virtue of these agreements the company renounced its right to build beyond Bagdad on the condition that if the railway were extended from Bagdad to the Persian Gulf the Bagdad Railway Company should have as large a share in the extension as that held by any one non-Ottoman nationality

The company also renounced its lien on revenue to be derived from an increase in the import duties as security for its kilometric guarantees In return for this cession of its original rights the company obtained the right to build a branch line from a point near Osmanieh to Alexandretta and a concession for the construction of a port at Alexandretta. It also obtained the right to build a wharf at Payas in connection with the Osmanieh Alexandretta line. This concession was valuable on account of the extremely favourable position of Alexandretta. Work had already started in 1912 both on the harbour and on the railway. The value of the trade passing through Alexandretta.

both on the narrous and on the rahway Ine value of the trade passing through Alexan dretta has been imports, £2,226 395 (1909) £1 398 884 (1910) £1 145 135 (1911) exports £1 308 607 (1909) £1,301.025 (1910) £1,044 324 (1911)

A section of about 150 males of the Bagdad line starting from railhead at Bulgurlu and reaching to the Amanus Mountains is opened for traffic passing through Bozanti Dorak and Adana There is a station at Aleppo and a line from it to Muslamieh (15 kil) which is continuous with the French line from Aleppo to Hamah and Rayak. At Muslamieh is the junction with the main line from the west. This has now been laid from the eastern end of the Bagdah Page (M. Amanus) to the Euphrase at Lerahlius where a bridge over the reverjunction with the main line from the west—this has now been fain from the easiern chief the Bagche Pass (Mt. Amanus) to the Euphrates at Jerablus—where a bridge over the river (now building) is to carry the line on to Harran, Tell Helif and Mosul—In consequence Aleppo-I has acquired an accession of Christian inhabitants and new buildings of European character e.g. German Hospital Schools and Casino—Construction has been going on from Aleppo in two directions towards the Euphrates and a section of 100 miles was expected to be opened for traffic in the early part of 1913. The a section of 100 miles was expected to be opened for traffic in the early part of 1913. The last section of this railway namely from Tell Helif to Bagdad was started in the middle of 1912, construction beginning at Bagdad. The site of the Bagdad railway station has definitely been chosen on the right bank of the Tigris and the scheme provides for the construction of a hardenic and a custom bank.

The Saracenic wall has been largely destroyed on the north and east sides of the old y. Since the promulgation of the Constitution and the death of Ibrahim Pasha, the rebellious chief of the Milli Kinds (1909) the province of Aleppo has been tranquil but the feudal beys and makhtars whose power has been an institution of N Syria for many genera tions continue hostile to the new order of things

struction of a harbour and a custom bouse,

The following new railways had been opened, or were in course of construction or had The following new railways had been opened, or were in source of construction or had been surveyed between 1909 and October 1912 in European Turkey Baba Esk Kirk kilisseh 30 miles opened (concession granted to the Oriental Company), Monastir Ochrida Iannina Adriatic Sea Monastir Istib Bulgarian frontier Prizren Scutari Adriatic Sea and the construction of a harbour at Medua and Uskub-Kaikandele Gostiyar. In Turkey in Asia besides the work going on in connection with the Bagdad Railway the following was the state of affairs in October 1912 as regards the principal lines. Tripoli Home, in Syria 65 miles opened Soma Panderma 120 miles, expected to be opened in 19131 the concession for building this line was granted to the Smyria Kassaba Railway Company, and it would establish a connection between the Sea of Marmora and the main line of this comwould establish a connection between the Sea of Marmora and the main line of this com pany Ada Bazar Bolu 100 miles building concession granted to the Haidar Pasha Angora Railway Company Hodeida Sana 190 miles building Medina Mecca Jedda building by the Hejaz Railway Company Samsun Sivas Erzingan Erzerum Trebizond about 1 200 miles building by the Turkish government The building of this line has been proceeding rery slowly not only on account of financial difficulties but also for political reasons. Russia raised objections in virtue of the Black Sea Basin agreement reserving to Russia the sole right of building railways in the northern portion of Asia Minor. The exact interpretation of this agreement was in 1912 a matter of controversy between the two governments

Among other projects open in 1912 for construction of railways may be mentioned the offer made by an American syndicate (known as the Chester scheme) to build about 1 250 miles of railways in Asia Minor in return for the grant of mining rights in the regions traversed by the railway The Turkish government however had made no decision in the matter

Surveys were being made by English engineers for a railway between Jaffa and Egypt
The State paid in 1910 £572,400 as kilometric guarantees to the railway companies
All the railways showed substantial increases both in gross and net profits during 1911
On the main line of the Haidar Pasha Angora Railway Company the takings in 1911 exceeded the kilometric guarantee for the first time in the history of the line and the government in consequence received £13 000 as its share

Roads -A programme of extensive road building was undertaken after the instalment In 1910 a concession was granted to a French company to build about of the new regime 6 000 miles of new roads in various parts of the empire the work to be completed in 1912 at a cost of about £2 000 000 But both the mileage and the cost were greatly underestimated and the work had to be abandoned In the middle of 1912 the Turkish government decided itself to undertake the building of these roads utilising the surveys and the other preparatory work of the French company

The approximate length of the roads proposed to be built in the various districts was as follows Constantinople Adrianople and Ismid 750 m Scutari Monastir and Iannina 750 m Sivas Erzerum Van Trebizond and Samsun 1 350 m Aleppo Bagdad and Urta 750 m Smyrna Kona and Adana 570 m. Angora and Kasta muni 600 m Mezere Bitlis and Diarbelir 580 m Damascus Berrut Jerusalem and Lebanon 280 m Brusa and Karasi 250 m About 800 miles of roads have been built or repaired in the Salonika and Kossovo districts

Harbours—Prehminary surveys were made for the construction of harbours at Tripoli (Syria) Latakia Jaffa Mersina Rodosto Heraclea (Black Sea) and Amastris (Black Sea) Agreements were concluded with the National Bank of Turkey (a British financial institution) for the construction and the working of the harbours of Samsun and Trebizond The esti-mated cost of these works was £2 000 000 The Hejaz Railway Company is constructing a harbour at Haifa the sea terminus of the railway while several other railway companies are engaged in building harbours at their various ports

Irrigation - Plans drawn up by Sir William Willcocks provide for the irrigation of an rrigation—Plans drawn up by Sir William Williams provide for the fragation of an area of 3 500 000 acres in Mesopotamia. The whole region contains about 12 500 000 acres but the tracts which can be most profitably irrigated at present have been selected. The total cost of irrigation works proper was estimated at £13 730 000 while the cost of preparing the land for cultivation would amount to £12 465 000. The total sum necessary for the execution of the project would be £26 195 000. It was calculated that the rent of the irrigated land would bring in a sum equal to 9 per cent per annum of the total cost spent on these works. Preliminary contracts were signed in 1912 with Sir John Jackson for the building of the Hudde before 600 a branch of the Euphystee) and the Habbary acres building of the Hindia barrage (on a branch of the Euphrates) and the Habbania escape

Among other irrigation works which have been undertaken in Turkey in Asia are those in the region of Koma which irrigate about 110 000 acres of land, and were finished in 1912 These were executed by the Anatolian Railway Company which has also undertaken the irrigation of about 1 250 000 acres in the Adana region. Preliminary contracts have been signed with the National Bank of Turkey for the irrigation of nearly 1 000 000 acres in signed with the National dank of Turkey for the irrigation of nearly 1 000 000 acres at the Macander valley in the province of Smyrna and in the same province about 75 000 acres are to be irrigated in the Gediz valley. Work had started in 1912 for the irrigation of 100,000 acres in the region of Samsun, and of 75,000 acres in the Orontes valley in the region of Antioch. In Albania surveys were made for the irrigation of about 2 000 000 acres in the valleys of the rivers Maritza Vardar and Drin.

Trade —The imports were valued in 1909-10 at £29 542 000 and in 1910-11 at £35 548

000 the expects at £16 105 000 in 1909-10, and at £19,440 000 in 1910-11. The following table gives the imports and exports according to countries:-

Country	Imports from		Exports to *	
	1909	1910	1909	1910
United Kingdom Austria Hungary Germany France Italy Russia United States Belgium Egypt	£7 814 000 3 825,000 3 945 000 2,730 000 3,387 000 2 760,000 1,146 000 502 000 1	£8 858 000 5 355 000 5 245,000 2 920,000 4,700 000 1,430 000 666 000	£5 466 000 1 830 000 2 865 000 3 950 000 2 954 000 926 000 3 087 000 538 000 2 642 000	£5 033 000 2 167,000 3 372 000 3 850 000 2 400 000 2 817 000 870 000 2 905 000

HISTORY, 1909-19121

On the 27th of April 1909, in the grand saloon of the War Office at Stamboul, Prince Mahommed Reshad, as Sultan Mahommed V, received the homage of the Young Turk politicians and generals amid the acclamations of Mahmud Shevket Pasha s troops from Salomca The Ottoman Senate and Chamber acting on a fetwa of the Sheikh ul-Islam had voted the deposition of Abdul Hamid II and that same night he was sent to Salonica and interned in the Villa Allatini, a residence assigned at first to the Conte de Robilanti the Italian general en gaged in reorganising the Macedonian gendarmerie

It might have been thought that the triumph of Young Turkey, and the renewal of the Ottoman Empire on the lines of the Japanese Renaissance, were now assured

swift mobilisation of the Macedonian troops, the amazing dash for Con Young stantinople, and the surrender of the city within twenty four hours, won Turkey the highest opinions in Europe for the Ottoman army and Mahmud Shevket in power Pasha. The fanatical and reactionary party seemed silenced and subdued for good, terror-stricken as they were by the summary executions of those who plotted

the assassinations of April 13th, and by the sentences of exile and penal servitude passed on Abdul Hamid's creatures On May 5th Tewfik Pasha was appointed ambassador to London, and was succeeded as Grand Vizier by Hussein Hilmi Pasha who had worked for a long time on the Macedonian Finance Committee with the delegates of the

Great Powers, and so had had a training in European methods He con structed a Cabinet entirely of Young Turks, among them notably Talaat Bey (numster of the Interior), Diavid Bey (Finance), and Halladjian Effendi (Public Works), and completed the work of foreign collaboration

M Laurent, formerly president of the French Cour des Comptes, had already been appointed financial adviser to the Ottoman Empire; Admiral Sir Douglas Camble was at work on the reorganisation of the navy, and General von der Goltz on the army

See E.B xxvii, 442 et sego

Attention appointment was a bold innovation. Foly writished degard for the displeasure of the minister of future (the Multin Nepredillar) and the hundre oppointment of the Multin Nepredillar) and the hundre oppointment of the Modern clericits in the Chamber; a French juris-consult and extentalist, possible of the Continue of the Chambers of the Continue of the Chambers of the Castoms was entrested to Mr. (afterwards for Richard) Chambers; for William Willocoke was to start urngation works in Mesopotamia; and two French civil enverses, MM Picard and Godard, were called in to advise in the department of Public Works. The energy and enlightenment of Young Turkey was extelled by the whole press of four ope. France and Russia levalled the ambassistors accredited to the ex-Sultin; and replaced them by MM Bompard and Charleofi, two diplomats of known Liberal sympathics.

Yet it was not long before clouds appeared on the horizon Albanian chiefs, such as the notorious Issa Bollelinatz a partisan all along of About-Haund, and Halli Bey. who took decasion later, after April 14th, to declare for the ex-Sultany who Diagontest had lavished bensions and favours upon them both, might be, at any rate in Albania at first, a very small minority. But Albanians generally, for the very reason that they had taken part in the Revolution of 1903 and in crushing the counter revolution of 1959 bould not believe that the Loung Turks meant to curtail the privileges or to be mure eccurate the becare allowed to the bayinkdars and their men; who paid no taxes and took multary service or not as they pleased. Now the Young Furk's proposed indeed a constitution for Turkey but if was to be founded upon absolute administrative and legislative uniformity which meant that everyone alike must pay taxes and serve in the affiny it also meant (though they were less ready to put that for ward) the strict maintenance of the old Turkish negemony, and as the principal means to this end Turkish was to be the one recognised official language Some demonstratrons supposed to be dangerously separatest in tendency, were made by Ismail Kerhal The Albanians demanded official recogni-Bey and by Hima Bey at Iannina and Dibra tion for their language, and that everyone in office should be able to speak Albanian. At Sentan they refused to have the census taken or to serve in the army General Bravel Pasha was sent to repress the movement, and with his artillery dispersed some 3 coo Albanians at Ferizovitch on the 17th of August he followed this up with measures of extreme regour and teturned to Mitrovitza on September 25th, leaving a dangelibility ferment of rancour and revolt behind him

The Ottoman Greeks by no means remained indifferent during the tension produced by the Cretan question. From the first they had been dessausished because they could ered themselves insufficiently represented in parliament and the counter revolution of the 13th of April 1900 was harled with praise by their press in fulfilment of a longituding promise the Powers withdrew their contingents from Crete on July 27th. As soon as they left the Cretains holsted the Greek flag af. Canea and claimed the right of sending deputies to Athens. After vehement protest from the Sublime Porte, the Powers again landed their contingents; and the Turkish flag was once more holsted by them on the 18th of October. A boycott of Greek goods in Turkey followed and produced some lively irritation.

Other events began to lessen the unanimous sympathy felt for Young Turkey me England and France To satisfy the almost here desire to be independent of Europe which had spring up in Turkey after the revolution, District Bey, then muniformly troubles first budget, decided to raise a leak quire independently of the Ottoman Public Debt administration, and to ignore the preciseder transmishally given to the Impendit of the first budget, decided to raise a leak quire independently given to the Impendit of the other thanks. On the 6th of September the poess was nother of the risule of a load to see the precise transmishally given to the Impendit of the first is specifying the conditions and revenues affered as given and the Laurent the financial adviser, thought the co operation of the Ottoman Public Debtinstiff of the Risk dredit. His disappiroval naturally created a prefoductagament the actions and the European capitalists the French capitalists in particular, who were repre-

sented in the council of the Rubbe Debt and the board of the Imperal Ottoman Bank. The latter, fearing lest the loss might be negotiated with an English group, when remesentatives of Sir Ernest Cassel and Messre, Baring (founders of the National Bank of Turkey) arrived at Constantinople on the 23rd of September, decided to accent Djavid Bey's terms But the matter rankled in the minds of French capitalists, and one outcome of it was a crop of press articles hostile to Young Turkey in the following year, with serious political consequences,

Another event occurred in the commercial world, with immediate mischaevous effects m pohtics Though Hussein Hilms Pasha enjoyed the esteem and confidence of every

intrigues against the eleistry

European cabinet, and of an important section of the Young Turkish party he had enemies among the Young Turks. The deputy for Kasta muni Nejmeddin Mullah, minister of Justice could not forgive Hilmi for appointing a judicial adviser to assist him, and Rahmi Bey, the very influen

tial Salomba deputy, wanted to put Hakki Bey in power (Hakki Bey for a long time had been legal adviser to the Sublime Porte, during Abdul-Hamid's reign, and was after wards minister of the Interior and ambassador at Rome, which post he was filling at the time) They brought about the fall of Hilms Pasha over the Lynch affair, a matter which just then made a great poise in Turkey Two Englishmen the Messrs Lynch, owned, by right of ancient firmans, the monopoly of running cargo steamers on the Emphrates and Tights, Hilm: Pasha confirmed the grant, stipulating that the firm should constitute itself an Ottoman company and the steamers should ply under the Turkish The grand wimer regarded this concession as a handy counterpoise to German influence in Mesopotamia, where the Bagdad railway scheme was in progress.

An active campaign began among Ottoman deputies Hilmi Pasha was represented to them as ready to make Mesopotamua a British sphere of influence. On the 11th of

Pall of Hussein Hilmi. December 1909 after a stormy sitting, Hilmi secured 168 votes to 8 upon a division but he was given to understand by the party of Union and Progress that he no longer possessed their confidence, and on the 28th he had to resign

Hakkı Bey now Hakkı Pasha was summoned to form a new cabinet. It was the old one over again except that Mahmud Shevket Pasha agreed to resign the post of generalistimo to go to the War Office, immeasurably strengthening Hakki Pasha's position by doing so It was well known that the sym Hatti Pasta a pathies of both were with the Triple Alliance, and especially with Germany,

Cabbeet, 1919 and a change in Turkish policy, which hitherto had gravitated towards the Emple Entente, was not long delayed

Mention has already been made that Young Turkey aimed at uniformity of adminis tration and legislation throughout the Ottoman Empire, and how the very first step towards it was Diavid Pasha's Albanian expedition The Hakki Cabinet Conclos of determined to carry out the scheme root and branch in the Albaman vilayets, while settling the Macedoman question once for all The likeliest means to this end, it was supposed, was to disarm the entire Albanian and

Macedonian population. The Tutkish Government must have known the difficulties in the way. By immemorial Albanian custom every man goes armed, and every peasant in Macedonia carries a weapon, because the country has been infested for years by wandering bands. Mahmud Shevket Pasha, the War minister, went himself to the spot, and sent General Shevket Torgut Pasha with 50,000 men and a field battery to casty part the disarming at any cost. In Albania this mount nothing less than war Shevket Tengut's army, marching from east to west, forced the Kachenik passes in April 1970; reached Prisrend in May, Ipok and Jakova in June, and entered Scutari at the end of the month. He succeeded in disarming the tribeamen on his route, and dismantled the Kesils or strongholds of the Albasian chieftama, but it had been done with a hautality which forever destroyed all Albanian loyalty to the Young

11 The session of the Ottoman Chamber ended on June 2nd. Djavid Bay's budget for the following session showing a deficit £T5,000,000, he went to Paris early in July to negotiate a loan. But the Imperial Ottoman Bank group, that is so say, the heads of the French money-market, unposed as their conditions that the Imperial Treasury

Diavid Bey s Suance.

Department should be brought under the supervision of the Ottoman Bank, and that the Bank should keep some sort of check on the expenditure to see that it did not exceed the estimates on the system followed before the Revolution of 1908 in Macedonia Such a scheme had been drawn up

by M Ch Lautent and even approved by Djavid Bey himself, but it had been thrown out by the Finance Committee of the Chamber of Deputies, as a piece of that foreign interference which Young Turkey professed to dread. Djavid Bey therefore declared that it was quite hopeless to think of getting such conditions accepted by the Chamber, and fell back on a less important group of French capitalists. But M. Laurent and the heads of the money market were already dissatisfied with Diavid Bey's independent

' Young Turkey' at odds with France and England attitude of the year before, and, acting on their advice M Cochery said that there were difficulties it seemed to him, in the way of admitting the loan on the recognised list (à la cole)—It was an awkward business all the more awkward because the grand vizier Hakki Pasha's action gave umbrage about this time to the Triple Entente—Leaving Constantinople in August, he had gone first to Bucharest and conferred with M Dyivara, the Ruman

ian minister for Foreign Affairs; and then to Marienbad, where he had long and repeated interviews with M d Achrenthal the Austrian minister for Foreign There were rumours of a multary agreement between Turkey and Rumania. The Neue Free Presse announced a rapprochement between Austria and Turkey, and was not contradicted. And upon all this came the news that Turkey was buying two ironclads of Germany A strong current of hostility set in at Pans, and the press strongly supported the Finance minister's demands Diavid Bey went back to Con stantinople having accomplished nothing, Hakki Pasha who followed him to Paris did no better In October the loan negotiations were finally broken off thereupon a violent campaign began in the French press against what was called the uncompromising arrogance of Young Turkey, while in the Turkish press a perfect outburst of fury against France and England (where negotiations also had been fruitless) soon degenerated, in the Jeune Turc newspaper into an ardent Pan Islamic and Germanophil campaign against the Triple Entente One highly characteristic result was a meeting held on October 25th to protest against the action of England and Russia in Persia the upshot of which was that a Young Turk deputy, Ubeldullah Effendi sent a telegram to the Emperor of Germany, inviting him to intervene in the character of friend and protector of 300,000,000 Moslems David Bey, seeing that all hope of a French or English loan was now over went to the German embassy and begged the good offices of Baron

The drift towards Germany Marschall von Bieberstein to help him to raise the money in Germany Numerous German Banks formed a syndicate and on November oth the contract was signed with M von Helferich of the Deutsche Bank the most important of those concerned Hakki Pasha had carned out his plan,

Turkey was returning to the orbit of Germany From that time Baron Marschall again became as important a personage as he had been in the reign of Abdul Hamid M Laurent resigned his position in the Turkish service

Meanwhile, since the Albanians had been disarmed, the turn of the Macedonian Bulgars and Greeks came next. And again the work too often was done by subalterns with recolling brutality. Detachments told off to make the peasants give Propositions up their arms, or point out where rifles were hidden, continually had re-

Provocations up their arms, or point out where raffe, were hadden, continually had reand Bulgaria, rourse to cruel beatings and ill usage, which sometimes ended in death
The Vende Varda after in Sentember to to when hundreds of Ruleyran

The Yendje-Varda affair in September 1910, when hundreds of Bulgarian peasants were beaten and driven to starvation, and the Bulgarian priest was murdered after a indeous beating, produced reverbetations not only throughout the Bulgarian press but all over western Europe. Another step taken in that same nonth by the Hakki Pasha Cabinet drew down the deadly hate of the Creeks, who were wready exasperated by the Turkish boycott of their goods in retallation for santous mundents—

HIS TURKEY

a close understanding succeeded to a traditional myalry

the nathrof allegance to the hing of the Hellenes taken in the Cretar Assembly, the attempt in expel Mahammeden mon-juming Cretan deputies, and the election of M. Meninches as Cretan representative to the Hellenes Chamber in August. ?

One of many sources of trouble in Macedonia was the struckle between the adherents of the Geometrical Patranch and the Bulgarian Exarch for possession of church build. To put an end to the disputes, the Ostomas Parliament voted a law, styled the Church Law, enacting that, if part of the population of a given place bived Importança obedience to the Greek Patrianek and part to the Bulgarian Exerch, the af the Maurinties party which represented more than two-thirds of the Christian population was to have possession of the existing church, the state undertaking to build mother for the monarty. When the Government tried to carry this out in practice the Occurrenced Patrianch claimed that it was a breach of his privileges. and proceeded to call a meeting denominated the 'Phanar Mational Assembly ' The Government prohibited the meeting. The Patriarch took no notice and issued a sum mons to the delegates. On September 14th the Government had them arrested and imprisoned. The outcome of these rough and ready methods and abrupt collisions was not only the final estrangement of Ottoman Greeks and Bulgars from the Young Turkish regime, but the reconciliation of Bulgars and Greeks a remarkable fact with far reaching results. On the 15th of November Bulgarian delegates wasted on the Patriarch, early in December Greek delegates went to the Bulgarian Exarch; and from that time forth

The discontent which found no quilet but the press while the Chamber was not sitting, broke out in violent interpellations as soon as the Ottoman Parhament met

Growth
of the opposition in
pantament

All through December 1910 and part of January 1911 Hakk Pasha had to weather a series of storms. Albanian, Bulgar and Grock deputies spoke at length one after another, pouring out facts and dates of misdeeds committed by Government agents during the disarmament. Hakki Pasha, refuting nothing, kept on promising that justice should be done wherever proof

of abuses was forthcoming. Turkish deputies also mounted the tribune. The Government suspecting a plot during the sumseer, had arrested certain politicians. Luth Fikm, an opposition deputy accused prison officials of torturing the prisoners to make them confess. He produced blood-stained cudgels and finger-nails said to have been extracted from victims, and demanded a commission of enquiry (Jan a, 2011) which Hakki Pashe triused. The grand visiter obtained a vote of confidence, meanwhile, by a device of parhamentary procedure adopted by the Young Turkish party of Union and Progress. The party used to ment privately before a debate to decide whether or no there was need to support the Cabinet, no matter what might be said afterwards in public. Parliamentary discipline catried out with lack of tact and discretion did not a little to discretion the party of Union and Progress, an impression gaining ground that purely party considerations overruled all claims of equity and humanity

So the circle of discontent went on widering, and the task of the Government grew harder and harder. Difficulties followed in the Arab provinces. The Government had been obliged in August 1920 to send an expedition against the Druses. In December the Druses rose again, so did the Karak Araba in Palestine, aided by Bedomas. They rose against the census and tonscription. Government mentions were killed. Disturbances were reported at Insk. News of a maing came in January 1911 from two provinces,—Vennen, where the Limits Vahya, of the Zeidi See H. Brah, 333 et se. Joachun III, the Occumental Patriarch but ewing to differences with the Porte as to the trial of ecclesiastics by the secular power he resigned in 1884, and lives its indifferent at various monasteries with 1607 Porte as to the trial of ecclesiastics by the secular power he resigned in 1884, and lives its indifferent at various monasteries with 1607 when he was restored to the Patriarchate. These followed a severe struggle in Macadomia against the Butgaman Exaptiate, which he was apparent to keep un bounds. He also came into college with the Poly Synod owing to be the fellowed, and by the younger latty as too conservative being light interests against the Tarbush Government.

sect, refused to recognise the Sultan as lawful Calph, and Assic, where an insurrection heren under the lead of Sevvid Idria, a chieftain of Moroccan organ. The Government was forced to send out an armed force, weskening the Toppditan garason, with effects that proved very senous afterwards

Still the Hakki Cabinet managed to keep in office, though there were some resignations. Talast Bey retired, a concession to the Opposition. So did the minister of Public Works, Halladnan Estendi, because some of the ministeriolists and Hakki the grand vizier himself thought him too uncompromising especially with Pasha's есопотіс regard to Germany's wishes On February 28, 1911 there was an anpolicy nouncement in the Terdjeman-i Hakikat the Government organ that Hakki Pasha himself would take over the department of Public Works until the Bagdad Railway question should be settled This affair, of such great political and financial importance was concluded almost at once. In the agreement signed on March 17th by Hakki Pasha, the conditions under which Germany should complete the line from Helif to Bagdad, and Germany's share in constructing the line from Bagdad to the Persian Gulf, were defined At the same time the making of the Osmanieh Alexandretta line was given to Germany with the concession of Alexandretta harbour April 19th Hakki Pasha signed a preliminary agreement with a group of French finan ciers for the construction of railways in Eastern Anatolia Macedonia and Albania, and a loan of £T25,000,000 for the purpose By further agreements with the Banque Rouvier a loan was to be raised for making some 10,000 kilometres of roadway

These economical measures were however the only aspect of official activity real collaboration with the foreign advisers in promoting reform was abandoned

On April 17 1911 Nejmeddin Mullah minister of Justice, announced a Reaction triumph for the fanatical anti-foreign party Count Leon Ostrorog the agalaut internal foreign judicial adviser weary of seeing his schemes of reform shelved or reform distorted by Moslem fanaticism, sent in his resignation on the 31st of The manister's announcement that henceforth there was to be no foreign judy cial adviser or inspectors was received with cheers from the turbaned' party in the Chamber of Deputies one mullah, deputy for St John of Acre, declaring that the minis ter was indeed defending the sacred Law, like unto a hon" A few days later the Chamber voted the suppression of the post of foreign adviser to the Post and Telegraph The Hakki Cabinet might well believe its position secure with a docile and solid parliamentary majority behind it. Supported by Germany French capital, and that section of the press which is ruled by Germany and finance, sure of the army, since Mahmud Shevket Pasha was in the Cabinet, and confident that concessions had railied the fanatical and foreigner-hating elements to the Government, they might have

About the 1st of April, a small but very warlike Catholic Albanian tribe on the Montenegrm border, that of the Malasson had usen in revolt They demanded to be

felt themselves unassailable They were to be cruelly undeceived

Malissori rising in

allowed to carry arms, and that their military service should be localised further they claimed exemption from certain taxes, and that their officials should be of their own race The benevolent attitude of Montenegro to wards the insurgents seemed significant from the first. Rifaat Pasha. minister of Foreign Affairs, might declare in the Chamber that Montenegro was friendly

and that all would easily be settled, but the attuation rapidly grew worse, and on April 11th Shevket Torgut Pasha with an army corps was despatched to northern Albania At that very mement a split in the Party of Union and Progress threatened to break

up the bloc on which the Hakki Cabinet was based. A cavalry selonel Saadik Rey once an influential member of the Umon and Progress committee, till he left it on ground of personal discontent, had been secretly working in the army and parliament against the Young Turkish committee for some times past. An enthusiastic Mahommedan mystic, a member of the Mélami dervish sect, he carried out his underground propaganda on religious lines, using the tactics which before proved so efficacious against the Young

Turks and beauty about the mutter of Applican root. There, as now, the Young Tind desiles were called bad Moslenis, fredthinkers, freemasons, and abettors of Zan. they were said to be testile hands of Salamer Jews, and Djavid Bey in particular was said to be their tool. Suddenly on April 20th the effects of the propagands came to light. There was a split in the bloc. A section of the party of Union and Progress. called the "new group," comprising all the Mostom dericals, turned against the minustry and Dravid Bey. Their political programme comprised strengthening the authority of the Caliph, with strict observance of Moslem traditions, and the prohibition of free missoury The committee of Union and Progress tacked about The programme was to be discussed later at a party congress. Dravid Bey was entreated to resign to soothe the fanatics and umon appeared to be re-established. But in reality the split in the bloc was past mending

Meantime things were going from bad to worse in northern Albania Since the Malisson, at the first reverse, simply went over into Montenegro, where they could

Foreign protests against straction in Alberia -find rest and fresh supplies and ammunition for a further resistance it was impossible to subdue them Russia, moreover, warned Turkey to be careful of hostility to the Montenegrins, and to crown all, a violent anti Turkish press campaign began at Vienna, especially in the Christian Socialist organs Shevket Torgut Pasha's troops were accused of unspeakable atrecities, the London press took this up, European public opinion was

Even Moslem Albania showed signs of ferment The Hakki Pasha Cabinet roused m its anxiety to secure the loyalty of the Albanians, the Mahommedans among them at any rate tried to raily them to the Camphate by working on their fanaticism A great

The Sultan as Caliph visits Kessovo.

spectacular Malionimedan demonstration was got up. In June after the session, Mahommed V went to Salonica and Usktib and thence to Kossovo. There on the famous "Field of Blackbirds," where (in 1448) Murad II dealt Balkan Christendom a final blow, the Sultan acting in the capacity of a Caliph of the old days, personally officiated at a vast. Friday assembly for prayer Thousands of Moslems, attracted by the unexampled ceremony, came from Albania Macedonia and even from Bosma.

The showy Mahommedan demonstration only roused uneasuress and prejudice among Macedoman Christians and such of the Great Powers as ruled Mahommedan

insists on

subjects, the Triple Entente for some time past had been blaming the Young Turks for their Pan Islamist tendencies No intimidating effect whatever was produced on the Mahsson, and the European press took so violent a tone about the atrocities that the Government recalled Shevket Torgut Pasha, and replaced him by Abdullah Pasha Hostilities moreover were not renewed. At the end of June 1911 the Austrian Ambassador,

Margrave Pallavician expressed to Rifaat Pasha the hope of his Government that the demands of the Catholic Malisson would be considered Abdullah Pasha was ordered to cease fighting, negotiations began which dragged on till August and when the Porte conceded, by written agreement, a full amnesty to the Malisson chiefs, and the privileges demanded, privileges of capital importance, for they constituted the first breach in the system of uniform administration and Turkish hegemony which so far had been the principal dogma of the old Turkish Empire and Young Turks alike

The bad impression made on the Ottoman mind when the Government thus surren dered before the revolt of an insignificant tribe which had grown irresistible because it

was backed by a little Balkan state with Russia behind it, increased the carcitement produced by two untoward events. On the 11th of July Zeki Bey, an official in the Ottoman Public Debt, was murdered at Makrikieuy near Constantinople. Zeki Bey was an important member of Saadik Bey's opposition, and the marderer was the brother of a Young Turk deputy

In space of assurances given by the leaders of the party of Union and Progress that they had nothing to do with it and deployed the event, it made a painful propression, and mised a storm in the Opposition newspapers. Then, on the night of July agod, a fire breite out at Stamboul, and, a surgous north would blowing at the game, one fifth of the cato tells building at the Moslem population arter the data, the anniversary of the Reviolation, and said it was a judgment of God upon the Young Turks for not respecting the traditions of Islam.

But another midd greater calamity was to befall Turkey All; the world knew of Italy s long-cherished designs upon Tupoli. Hakk: Pathats Calimet alone seemed to attach no importance to them, either because the Government believed the

The war Italian Minister's diplomatic protestations of friendship, or, as is more hely because the grand vizier considered the friendship of Baron Marschall 'von Bieberstein and his master an absolute guarantee against Italian aggression After the Agadar incident and the subsequent Moroccan negotiations, which

assured France of the possession of Morocco, Italy decided to hurry the pace and get her share of Mahommedan Africa. A pretext was found in the ill will shown towards Italian economic enterprise in Tripoli under Turkish administration, more particularly over the operations of the famous. Banco di Roma." On September 28th Di Martino the Italian charge d'affaires handed Hakki Pasha Italy's ultimatum. The Porte was given twenty four hours notice to order the evacuation of Tripoli and the sanjak of Ben Ghazi by the Turkish troops. On the 29th war was declared, and Di Martino quitted Constantinople. It was a death blow for Hakki Pasha's Cabinet. He and his colleague at the Foreign Office were blamed for negligence in diplomacy, Mahmud

Shevket Pasha for withdrawing troops from Tripoli into the Yemen, and Halil Bey, Minister of the Interior, for administrative negligence On the 30th of September Hakki Pasha resigned Turkish opinion went the length of demanding that the Cabinet should be brought before the High

Court appointed under the Constitution to try ministers accused of high treason

Everybody expected Kiamil Pasha and his opposition party to come info power Things went quite otherwise. The party of Union and Progress still had a majority in the Chamber. Said Pasha was called upon by the Sultan to construct a

the Chamber Said Pasha was called upon by the Sultan to construct a cabinet It was done with some difficulty Mahmud Shevket Pasha was maintained at the War Office because it was not thought safe to take all authority from the man who had organised the national defence and knew

all its secrets Two struggles thus began a war with Italy in Tripoli carried on by two Young Turkish officers the famous Enver Bey and Fethi Bey (military attache at Par is), with admirable energy and persistence and another conflict as fierce or fiercer at Constantinople, between the Opposition and the party of Union and Progress Colonel Saadik Bey, working with Kiamil Pasha's adherents, carried on a campaign against the Young Turks, in the army in political circles and in town and country. Events made it easy for him. With the reopening of Parliament on November 14th, he brought out a programme for a new party of 'Liberty and Understanding' ("Liberte et Entente'), which set about organisms itself on the lines of the party of Union and Progress, found

Ing clubs all over Constantinople and the provinces Through their newspapers the Alemdar and the Tanzimai, and their spokesmen in the Chamber they find to runn the Young Turks blending partly true acclusations with obvious calumnies, chief among them the charges of being abettors of Zeonism and bought up by the Jews In Constantinople the campaign

had considerable effect. When Rifaat Pasha (minister for Foreign Affairs) went as ambassador to Paris, the victorious candidate for his vacant seat was a member of the party of Liberty and Understanding, Tahir Halreddin Bey, editor of the Alemdar Meanwhile Albanian and Arab deputies were demanding loudly that the privileges given to the Malisson should be extended to Moslem Albanians insurgent Druses and Karak Arabe. The party of Union and Progress took alarm. The progress of the Opposition meant, they thought that a reactionary and anti-Turk tide was setting in, and they decided upon immediate dissolution, so that the elections should take place under a Unionist government before the Ententists could capture the provinces.

Said Pasha conceived an ingenious bit of strategy On the 15th of December he

brought before the Chamber a proposal to alter Article 35 of the Constitution, and restore to the Sultan the power of dissolving the Chamber without the simultaneous assent of the Senate. If the proposal were adopted, it meant a dissolution, Dissolution for the grand vizier felt sure of the sovereign, thrown out, it still means of the Chamber dissolution for after a Government defeat the party of Union and Progress had a majority in the Senate, and under the existing constitution the assent of the Senate was necessary if the sovereign were to dissolve parhament. The Opposi tion, hardly feeling ready for a general election, took fright accordingly and formed a bloc, -Arab Albanian, Greek and Bulgar deputies joining forces with the Mahommedan clericals and some few malcontents the Turkish nucleus of the party of Liberty and Understanding But their efforts were vain. After some incredibly stormy scenes in the Chamber and a last attempt to obstruct by abstention the Sultan Pagentation with the assent of the Senate dissolved parhament on the 10th of January tion of the 1012, and on the 22nd a new purely Unionist Cabinet was formed under ministry Said Pasha Djavid Bey returned to the Public Works department Talaat Bey to the Posts and Telegraph, Mahmud Shevket Pasha remaining at the War Office and Prince Said Halim the Khedive's cousm President of the Umon and Prog ress group in the Senate taking the Presidency of the Council of State

Said Pasha's manifesto in the Daily Telegraph (London) of January 21, 1912 which attracted a great deal of attention, set forth the programme of the new Cabinet immediate reforms were promised with the collaboration of foreign advisers and Destruction no official pressure was to be brought to bear upon the elections of the opposition in fortunately this was only on paper Except for a long tour of inspection sariiameat. among the vilavets of Macedonia and Albania made in February by Hadii Add Bey minister of the Interior accompanied by a former British consul general Mr Graves who was a member of the Reform Committee of the Finance Ministry nothing was done in the way of reforms As for the elections they were worked on the lines known in France under the Second Empire as the "official candidature Under pressure from civil (and occasionally military) officials opposition candidates were almost completely eliminated. It was found when the new Chamber opened on April 18, 1912 that there were hardly ten Opposition members and among them not one of the principal speakers of the previous parliament

Albania felt the consequences almost at once On December 1 1911 Hassan Bey then Albanian deputy for Prishtina had said openly that if he were not satisfied with the elections he should raise an insurrection. This he did. On May of the lections he should raise an insurrection. This he did. On May of the lections he should raise an insurrection. This he did. On May of the lections he should raise an insurrection. This he did. On May of the lections he should raise an insurrection. This he did. On May of the news reached. Constantinople that Hassan Bey was heading a rising in the Ipek and Mitrovitza districts, while Basri Bey (a member not re-elected) with a band of insurgents had taken to the mountains at Dibra.

Disturbances at home added complications to troubles abroad. The very day that parliament opened Italy bombarded the Dardanelles. The Porte temporarily closed the Straits and so gave umbrage to Russia, who ceasing to believe in the Young Turkish revolution had replaced M. Charikoff so friendly to their cause, by M. de Giers, a much less whole hearted supporter. The Italians next occupied the southern Sporades and on May 6th landed at Rhodes.

But serious as these events might be their importance was but relative compared with what was passing in Albania. The whole district between Djakova Ipek and Mitrovitza was in open revolt. Young Turkish officers and officials were driven out or murdered and the movement although obviously a political to Verney one, was also directed towards autonomy the insurgents demanding (1)

the return of the fire arms taken from them by the Djavid Bey and Torgut Pasha expeditions, (2) official recognition for the Albanian language, (3) localised military service, and (4) Albanian officials for Albania, at the same time as the resignation of the Said Cabinet another general electron, and the trial of the Hakki Cabinet for high treason before the High Court On May 22nd the Government decided to send as reinforcements the first or Constantinople division. This step was not merely use

less it was fatal Colonel Saadik Bey's subterranean propaganda had made immense progress among the officers of the Constantinople garrison he had relied upon the want of preparation at Tripoli, on officers passed over, and appointments made for political reasons by Mahmud Shevket Pasha A Society of Saviours of their Country' counted many members among the officers of the first division. In their eyes the Albanians, against whom they were sent by the Government were not insurgents but their own allies, and before June 1912 was out news came that many both officers and men, were deserting to the Albanians.

Mahmud Shevket Pasha made desperate efforts to repress the movement. On Iuly 1st a law was passed at his instance, severely punishing officers for meddling in

politics then seeing that his efforts were useless, he sacrificed himself to calm the movement and resigned (July 10th) Even that, it seemed, was Said Pasha. not enough Said Pasha himself resigned on July 17th and so brought about a Cabinet crisis The situation was so serious that the Sultan intervened an person On the 19th of July he issued a manifesto prohibiting officers from meddling m politics and promising an impartial Cabinet On July 22nd Ghazi Mukhtar Pasha became grand vizier Kiamil Pasha President of the Council of State Nazim Pasha minister of War, Hussein Hilmi Pasha, minister of State and an Armenian legal adviser of the Porte under Sultan Abdul Hamid, Gabriel Effendi Noradoughian minis ter for Foreign Affairs The next day it was decided at a cabinet council to stop the fighting in Albania and to send a conciliation commission to treat Ghari Mukh- then the purely political nature of the movement was made manifest for tar Pasha s even this was not enough. The Albanians, led by the excluded deputies ministry clamoured for a dissolution and the arraignment of the Hakki Cabinet On July 25th the military society of 'Saviours of their Country" sent a threatening letter to Halil Bey, President of the Chamber calling upon the Chamber to dissolve Just then the Government plainly showed what line they meant to take by issuing an amnesty (Aug 1st) to all Abdul Hamid's high officials and all ringleaders of the mu

tiny of April 13 1999 exiled by the Young Turks
On August 5th the Ghazi Mukhtar Cabinet obtained from the Senate a decision
interpretative of the Constitution declaring that the task of the newly elected Chamber

was now completed (this was represented to the Senate as the only way of stopping the Albanian disturbances and keeping the Austrians out of the Sanjak of Novibazar) then backed by a proclamation issued in the Sultan's name the grand vizier ignored a vote of want of confidence given

after a violent revolutionary speech from Djavid Bey and closed both the Chamber and the Senate After this supreme concession made to them, the Albanian insurgents naturally only grew bolder More officers and officials were murdered at Ipek and Mitrovitza (Aug 18th) Then the Albanians marched on Uskub and some went on to Salonica demanding the restoration of Abdul-Hamid Once again the Porte gave way Out of fourteen points raised by the Albanians twelve were conceded, among them official recognition of their language localised military service, appointment of officials able to speak Albanian. Yet it was decided to send troops to stop the march

of the insurgents now very near Salonica. The Albanian advance was stopped but not the disturbances. The Government had lost all authority The Albanians took to plundering the depots for arms, and assassinations continued News of massacres came from Berana, Sienitza and Epirus The Kurds in Asia Minor began to flatter themselves that the days of Abdul Hamid had come back at last, and fell to massacring the luckless Armenians

There was great excitement in Europe and in the press. The tone of the Balkan journals grew very hostile to Turkey they spoke of autonomy in the Pennsula, perhaps encouraged by a proposal made by Count Berchtold Austrian Minister for Foreign Af fairs, who, naturally disposed to favour the Albanians, invited the cabinets of Europe to urge the Turkish Government to decentralise their administrative system. The Bulgarian press was particularly violent. The Ishtib massacres of the previous December,

and above all the quite recent Kotchana massacres (Aug 1st), where over a hundred victims (principally Bulgars) were done to death by the populace or the soldiery after a

among Balkan States.

bomb explosion had wrought up public feeling in Sofia to the highest pitch The official paper, the Mir brought out a series of articles proclaiming the necessity of European control in the Balkans, and declared that the main tenance of the status quo meant a continuance of Turkish anarchy till the

Christian population was exterminated Diplomatic difficulties helped to create hostility to Turkey among the Balkan States Montenegro demanded a rectification of the frontier on the basis of an agreement, already ten years old which had never been This the Porte refused The Turkish Government, having authorised Servia to transport an important consignment of artillery from France across Turkey now refused to allow the war material either to be forwarded to its destination, or to be sent back to Salonica and the Servian press in its turn showed intense irritation final measure precipitated events. By way of mending matters the Ottoman Govern ment apparently thought it adrost policy to try a palliative combined with intimidating On September 22nd the Porte made it known through the Stamboul press that acting on the application of the ambassadors of the Great Powers and more especially on the advice given by M Sazonoff Russian Minister for Foreign Affairs, to Turkhan Pasha Turkish Ambassador at St. Petersburg, the Ottoman Government was resolved to extend the privileges granted to Albania to all parts of the Turkish Empire On the other hand the semi-official Yenz-Gazette of September 25th announced that for the forthcoming Grand Manoeuvres at Adrianople the War minister was there concen-

Turkish grand manoeuvres Adriamopie

trating twelve divisions of effectives, besides calling up the redifs from the districts of Adrianople, Salonica, Monastir and Uskub. On the 26th the Jeune Turc newspaper published an interview with Gabriel Effendi Nora doughian Minister of Foreign Affairs confirming this news and the paper also announced that about 300 000 men would shortly be concentrated in On the 30th, on the advice of the representatives of England and

Russia who pointed out to the Porte how little the circumstances called for an an nouncement of manoeuvres on so extraordinary a scale, the War Minister issued a But it was too late Bulgaria Greece, Montenegro and Servia allies in vir tue of agreements concluded in profound secrecy believing that Turkey had reached the required pitch of civil and military discord and anarchy decided to profit by the opportunity to realise by force of arms the long standing ambitions which the Young Turkish Revolution had seemed so sure to bring to nothing. A brief statement of dates and facts is all that remains to be given

On October 1st the Kings of Bulgaria, Greece and Servia ordered general mobilisa tion, and in response, on the same date an Imperial irade was issued ordering Turkish

Mobilization of Balgaria, Servia and

mobilisation Still as mobilisation is not war, efforts were made for peace by European diplomacy especially by the Triple Entente On October 6th, on the initiative of the ambassadors of France Great Britain and Russia, the Porte declared itself ready to accept the application of Article 23 of the Berlin Treaty, hitherto never carried out, by which a special administration was provided for the vilayets of Turkey in Europe But the Balkan

States, who might perhaps have been satisfied with this concession some weeks sooner, now wanted something more, declaring that they put no confidence what Actio≡ by soever in any reforms to be carried out by Turkey alone without the con the Great

trol of the Powers Montenegro decided to hasten the crisis, and declared war on Turkey on October 8th, when her Minister, M Plamenatz left European diplomacy made one more supreme effort A collective

Constantinople note drawn up upon an idea conceived by M. Poincaré, the French Premier, was issued

lostesegro

Powers.

simultaneously to the Porte and the four Balkan States It was declared therein that Europe had decided "to take in hand ' the execution of re forms in European Turkey The note gave satisfaction to none of the parties involved. On October 14th the Governments of Bulgaria, Greece

and Servia together issued one note to the plenipotentiaries of Austria Hungary France Germany Great Britain and Russia declining the proposal, and another to the Ottoman plenipotentiaries requiring that the reforms should be carried Collapse of out under the joint control of the Great Powers and the Balkan States diplomacy the appointment of Belgian or Swiss governors and the immediate de mobilisation of the Turkish army On the same date the Porte dechned the pro posal of the Great Powers declaring that Turkey was ready to carry out reforms but the communication of the note issued by the Balkan States recalled the Turkish ministers from Athens Belgrade and Sofia On the 16th peace was concluded with Italy on the basis of a disguised but really complete cession of the vilayets of Tripoli and Cyrenaica On the 17th Turkey declared war on Bulgaria and Servia of diplomatic finesse the Greek note was supposed not to have been communicated to the last Turkey really hoped to detach Greece from the Balkan League On the 18th Greece declared war on Turkev MM Sarafoff, Grypans and Nenadovitch ministers of Bulgaria Greece and Servia left Constantinople that same day Balkan war was about to begin

The events of the war and its international aspects are dealt with elsewhere (see "International Affairs" in Part I Sect 1) and the direct results in Constantinople

Kiamil succeeds Ghazi Mukhtar as Grand Vizier need only be noted Mukhtar's willingness to accept the application of Art 23 of the treaty of Berlin agreeably to the suggestions of the foreign ambassadors had caused the widest dissatisfaction in Stamboul which manifested itself on October 7th in a demonstration of the students of Stamboul University in which some Young Turk politicians partook

This occasioned the proclamation of martial law on October 8th and the arrest of four or five malcontents amongst them Obeidullah Effendi, ex deputy for Aidin and Aka Gunduz an editor of the Tanin who were respectively condemned to five and seven years' detention in a fortress On October 20th Ghazi Mukhtar resigned transmitting the seals to Kiamil Pasha the avowed object of the resignation being the hope to obtain Great Britain's full support in the conflict with the Balkan States by the accession of Kiamil Pasha to power In the course of November an attempt was made by some general officers of the old regime seemingly without the connivance of the cabinet to suppress the Young Turk party by arresting and deporting to Konia all the ex ministers ex deputies leading journalists and politicians of the Union and Prog ress" party to be found in Constantinople Djavid Bey Talaat Bey and a few others managed to escape with the help of foreign friends but nearly a hundred prominent Unionists were arrested by order of the Court Martial and imprisoned at the War Office at Stamboul However their detention lasted but a few days On Nazim Pasha's return to Constantinople after the signature of the armistice at Chatalia the composi tion of the Court Martial was altered and all the political prisoners released including even those who under the preceding Court Martial had been tried and condemned (LEON OSTROROG) as for instance, the ex deputy Obeidullah
